LANE, LONDON.

ORE,
S,
GENTS,
C.; &
ON, E.

Telephone Avenue 335.

House Property Sales at the Auction Mart on Thursdays.
[Held for 65 years.]

Special attention given to Rent Collecting, and the entire
Management of Real Estate.

Valuations made for Compensation Claims, Probates, Mort-
gages, etc. Surveys for Dilapidations and Plans.

Scottish Provident Institution.

INSTITUTED
1837.

INCORPORATED
1848.

Head Office: 6, ST. ANDREW SQUARE, EDINBURGH.

IN THIS SOCIETY are combined the Advantages of
Mutual Assurance with Moderate Premiums.

THE PREMIUMS are so moderate that, at usual ages for Assurance, £1200 or £1250 may generally be secured from the first for the yearly payment which would elsewhere assure (with profits) £1000 only—the difference of £200 or £250 being equivalent to an immediate and certain Bonus of 20 to 25 per cent.

THE WHOLE SURPLUS goes to the Policy-holders, on a system at once safe and equitable—no share being given to those by whose early death there is a *loss* to the common fund.

Examples of Premium for £100 at Death—With Profits.

AGE.	25	30*	35	40	45	50	55
During Life ...	£1 18 0	£2 1 6	£2 6 10	£2 14 9	£3 5 9	£4 1 7	£5 1 11
25 Payments ...	2 10 2	2 13 0	2 17 9	3 4 6	3 14 0	4 8 7	5 6 11
15 Payments ..	3 8 5	3 12 1	3 18 0	4 5 8	4 16 2	5 11 8	6 9 11

* A person of 30 may secure £1000 at Death by a yearly payment during life of £20 15s. This Premium would generally elsewhere secure (with Profits) £800 only, instead of £1000. OR, if unwilling to burden himself with payments during his whole life, he may secure the same sum of £1000 by *twenty-five* yearly payments of £26 10s., being thus free of Premiums before age 55. To **Professional Men** and others, whose income is dependent upon health, the limited payment system is specially recommended.

THE SURPLUS at last Investigation was **£1,423,000.**

More than One-Half of the Members who died during the Septennial period were entitled to **Bonuses** which, notwithstanding that the **Premiums** do not as a rule exceed the non-profit rates of other Offices, were, on the average, equal to an addition of about 50 per cent. to the Policies which participated.

ACCUMULATED FUNDS exceed **£11,000,000.**

REPORTS, with full information and TABLES of RATES, may be had on application.

Nov. 1899.

A TYPEWRITER

Is far speedier than the pen. Its work is far more legible.
 Typewritten Letters are more easily checked, filed and looked up than
 Handwritten Documents.

The Typewriter

IS THE

Remington Typewriter.

It is simple in construction, and embodies the best devices applicable to the typewriter.

Hence it is thoroughly reliable.

Unpractical devices, however fascinating in appearance, are rigidly excluded from the Remington.

It is made of the best materials, under the closest supervision, and thus each individual machine is up to the high standard of excellence established by the manufacturers.

INVESTMENT STOCK & SHARE BROKERS.

Cornforth & Reacher,

MANSION HOUSE BUILDINGS,

4, Queen Victoria Street, London, E.C.

We invite correspondence from Investors, to whose interests and needs special attention is devoted.

SPECULATIVE BUSINESS ON OPEN ACCOUNT IS NOT UNDERTAKEN.

We publish month by month "Notes for Investors," giving details of a considerable number of promising securities; and also a Monthly Investment List, giving prices of Government Stocks, Railways, Industrial and Trading Companies, Mines, etc., showing fluctuations in prices, and the yield per cent. to an Investor.

GOVERNMENT and RAILWAY STOCKS BOUGHT and SOLD.

We do a large business in BANK Shares, and devote considerable attention to INSURANCE Investments.

A special feature is made of INDUSTRIAL and TRADING Companies. We have numerous dealings in Aerated Bread Shares, Liptons, Bovrils, John Barkers, Slaters, Roberts (Islington and Stratford), George Newnes, Harmsworth, D. H. Evans, Salvati Jesurum & Company, Thomas Wallis, Welfords, and similar undertakings.

We do not consider correspondence a trouble, even if no business results immediately, and are always glad to answer questions to the best of our ability. Foreign correspondents will receive every attention.

MINES.

Mining shares are, of course, speculative. Our notes, carefully prepared each month and based on most recent information, should be seen by those interested in Indian, Australian, and African (Gold or Diamond) Mines. Dealing at close prices. Prompt delivery.

Send Postcard for Investment List.

References can be given in every large town in England.

DR. J. COLLIS BROWNE'S CHLORODYNE

ONLY GENUINE.

ORIGINAL AND

IS THE GREAT SPECIFIC FOR
CHOLERA, DIARRHŒA, DYSENTERY.
GENERAL BOARD of HEALTH,
London, REPORT that it ACTS
as a CHARM, one dose generally suffi-
cient.

COUGHES,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.—

Dr. J. C. BROWNE (late Army Medical Staff) DISCOVERED a REMEDY to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and, as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false*.

This Caution is necessary, as many persons deceive purchasers by false representations.

DR. J. COLLIS BROWNE'S CHLORODYNE.—

Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was UNDOUBTEDLY the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13th, 1864.

Dr. GIBBON, Army Medical Staff, Calcutta, states: "2 DOSES COMPLETELY CURED ME of DIARRHŒA."

DR. J. COLLIS BROWNE'S CHLORODYNE
is the TRUE PALLIATIVE in
**NEURALGIA, GOUT, CANCER, TOOTH-
ACHE, RHEUMATISM.**

DR. J. COLLIS BROWNE'S CHLORODYNE
is a liquid medicine which assuages PAIN
of EVERY KIND, affords a calm, refreshing
sleep WITHOUT HEADACHE, and INVIGO-
RATES the nervous system when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE
rapidly cuts short all attacks of
**EPILEPSY, SPASMS, COLIC, PALPITATION,
HYSTERIA.**

IMPORTANT CAUTION.—The IMMENSE
SALE of this REMEDY has given rise to
many UNSCRUPULOUS IMITATIONS. Be
careful to observe Trade Mark.

Of all Chemists, 1s. 1½d., 2s. 9d., and 4s. 6d.

LIFE INSURANCE.

EARLY BONUS SCHEME (E.B.).

The following among other special advantages apply to Ordinary Policies issued under this Scheme. Besides being payable immediately on proof of death and title, they are, at the end of Three Years from their date,

Entitled to rank for Bonus Additions; Indisputable on the ground of Errors or Omissions; World-wide without extra Charge; and Kept in force, wholly or partially, even in case of Non-payment of the Premiums.

SPECIAL BONUS SCHEME (D.B.).

Under this Scheme, PROFIT POLICIES are issued at NON-PROFIT RATES, and Share in the Profits when the Premiums received, accumulated at 4 per cent. compound interest, amount to the Sum Assured. POLICIES ISSUED AT THESE CHEAP RATES PRACTICALLY RECEIVE A LARGE BONUS AT THE OUTSET. Policies of this class, which for the first time became entitled to rank for Bonus, received additions at the rate of £10 per cent., besides a further progressive addition of £1 per cent. per annum.

FIRE INSURANCE.

Almost all descriptions of Property Insured on the most favourable conditions.

PREFACE.

THE year 1899 again stands out pre-eminently as a year in which foreign affairs have far exceeded home affairs in interest and importance. The political centre of gravity seems to have shifted of late, and never was it more necessary for "the man in the street" to make himself well informed as to what is going on in other countries and in every part of the British Empire. Whether that excuses, or even accounts for, "the new diplomacy," it is not for the Editor to say. His business has been to follow diligently, and record as accurately as may be, the rapid flight of events—war in the Soudan, the Philippines, and South Africa, the Peace Conference at the Hague, the Venezuela Arbitration, the settlements arrived at with France in North Central Africa, and with Germany in the Pacific, West Africa, and a few other places, the more quiet development of European rivalries in China, the progress of the Dreyfus affair, the friendly dispute with the United States about Alaska, and so on.

The articles on these subjects, it may be pointed out, will be useful, not merely as a summary of what has been done, but as a guide to what probably will be done when some of these difficulties are settled in 1900. For instance, the summary of the negotiations with the Transvaal, in which almost every dispatch of the Boer and British Governments is given verbatim, and the article on Newfoundland, containing a *précis* of the Commissioners' report on the French Treaty Shore Question, should be not without their value before long. Maps are given illustrating the Alaska Boundary Question, the Anglo-French Settlement in Africa, and the Transvaal War.

In much the same way the summaries given of two extremely valuable publications, the Reports of the Royal Commissions on the Licensing Laws and Local Taxation, will serve both as records and as guides, in the event of any legislation being attempted on these difficult and complicated subjects.

The new Biographies added to this edition are rather more numerous and interesting than usual, and will be found to include particulars as to the permanent officials at the heads of our great State departments, in whose hands the real administration of the country so largely rests, and to whose ability so many statesmen have paid tribute.

It is again a pleasure to make a warm acknowledgment of the help increasingly afforded every year by officials of this and other countries, and by secretaries of institutions, societies, etc., in rendering the ANNUAL not merely correct, but authoritative. The countless letters of suggestion, criticism, and encouragement that are received are also a great help, and it is hoped that they will not diminish in the future.

WILLIAM PALMER.

SEVENOAKS, KENT.

KEY TO CONTENTS.

HAZELL'S ANNUAL, being compiled on the alphabetical system, is its own index. It has, however, been thought well to give here the following condensed summary of its contents. It will be understood that no pages are mentioned, because when an article is specified it is only necessary to turn to that page, on which it appears in its proper alphabetical place. This summary is a purely arbitrary and not an exhaustive one, but it may give some idea of the enormous variety of the subjects treated of in the **ANNUAL**, and enable the reader, when desirous of gaining information on some special point, to turn to other articles bearing upon it. The list of **New Articles** written specially for the 1900 edition will be found on a subsequent page.

Afforestation.

Agriculture. A special article on this subject has been prepared for the 1900 edition, embracing the following heads:—

- I. BOARD OF AGRICULTURE.
- II. AGRICULTURAL STATISTICS.
- III. VETERINARY SANITATION.
- IV. AGRICULTURAL LABOURERS.
- V. HOLDINGS AND ALLOTMENTS.
- VI. AGRICULTURAL SOCIETIES.

See also

Agricultural Rates Act, '96.
Allotments and Small Holdings Association.
Royal Agricultural Society.

Alaska (with Map).

Anglo-American Commission.

Arctic and Antarctic Exploration.

Army, The British. This is dealt with under the following heads:—

- I. ORGANISATION.
- II. MAINTENANCE.
- III. EFFECTIVES, ESTABLISHMENTS, AND DISTRIBUTION.
- IV. THE ARMY RESERVE.
- V. MOBILISATION AND HOME DEFENCE.
- VI. TERMS OF ENLISTMENT AND SERVICE.
- VII. THE INDIAN ARMY.
- VIII. PROGRESS AND EVENTS, '99.

See also

HOMESPUNS.

The recognised **LONDON
DEPOT for IRISH PEASANT**

MADE HOMESPUNS from Counties CORK, KERRY, GALWAY, TIPPERARY, MAYO, and DONEGAL. The distinctive characteristics of the handiwork of each locality on Exhibition, and for Sale by the yard or web; in huge variety (bulk and pattern). Prices are fixed on a level corresponding with the extent of my business, and will be found little, if any, higher than the weaver would charge on the spot, viz., from **1/9 to 3/6** per yard, 28 in.

The different sorts are respectively suited for Gentlemen's, Lounge, Shooting, Golfing, Cycling, Mountaineering Suits. Also for light Summer and Tropical wear. For Ladies Gowns, Boys' Clothes, Ulsters, Capes; and, joined together, as Rugs and Wraps.

Patterns on application, giving idea of requirements. Further particulars of my business can be seen on reference to "WHITAKER," page 3; "A.B.C. RAILWAY GUIDE," page 2; "TIMES" (weekly edition), "LONDON P.O. DIRECTORY," page 87; "TRUTH" (Christmas Number), "WALFORD," "STATESMAN'S YEAR BOOK," "HAM'S REVENUE GUIDES," "FIELD," etc., etc.

[A]

Abbas Pasha, eldest son of the late Tewfik Pasha, succeeded his father as **Khedive of Egypt** Jan. 7th, '92. He was b. July 14th, 1874, and was thus, counting lunar months, according to the Mohammedan calendar, eighteen years old when he ascended the throne. At the time of his father's death Prince Abbas was studying at the Theresianum Academy at Vienna, where he had been for five years. He married Princess Ikbal Hanem, and has issue by her three daughters, and a son and heir born Feb. 20th, '99. He has a brother, Mohamed Ali, born in '75. His Highness's attitude to England during the earlier part of his reign was not a very friendly one, and his recent actions do not seem to show that it has improved. He has an annual allowance of £100,000.

Abdul Aziz, the reigning Sultan of Morocco, was born in 1880, and so was only fourteen years of age when he succeeded his father Muley Hassan in '94. Abdul Aziz married a daughter of Muley Ershid, uncle of his father (June 25th, '94), and in a few months made his position secure.

Abd-ul-Hamid II., Sultan of Turkey, was b. Sept. 21st, 1842, and was the second son of Sultan Abd-ul Medjid. He was proclaimed Sultan in succession to his brother Murad V., who was deposed in consequence of his mental incapacity (Aug. 31st, '76). His brother Mehemed-Reshad Effendi, b. Nov. 3rd, '44, is the heir-apparent to the throne, the succession, according to Turkish custom, vesting in the senior male descendant of the house of Othman. The Sultan has several children. Under the rule of Abd-ul-Hamid the Ottoman Empire has been dismembered of some of its fairest regions. The Berlin Treaty, concluded after the disastrous war with Russia in '78, practically deprived the Sultan of Bulgaria, Bosnia, and Herzegovina in Europe, and of Ardahan, Kars, and Batoum in Asia. His recent conduct with regard to his Christian subjects in Armenia and Crete exposed him to almost universal execration, but amongst his own subjects the successful conduct of the war with Greece in '97 somewhat improved his position.

Abdurrahman Khan, Ameer of Afghanistan, is the eldest son of Mohammed Afzul Khan, grandson of Dost Mahommed, and nephew of the late Ameer, Shere Ali, and was b. 1830. He took sides against his uncle in the civil war of '64, and won the battles of Shaikhabad and Khelat-i-Ghilzai. In '68 he was defeated by Yakoub Khan, son of Shere Ali, and fled

A

[Abe

for protection to Russian territory. The Russians provided him with a residence at Samarcand, and a pension. In '79 he made his way to the Cabul frontier, and, having gained the allegiance of the leading men of that city, was (July '80) acknowledged **Ameer** by the **British Government**. It was afterwards seen, moreover, that the Ameer's sympathies were more English than Russian. In Sept. '93 a British mission, sent with the object of settling Anglo-Afghan boundaries and so getting rid of frontier disputes, was received with marked cordiality, and an agreement was come to which has since been carried out. His Highness's subsidy was also increased from 12 to 18 lakhs, and he was appointed a G.C.S.I. in Jan. '94. Unfavourable accounts of his health reached this country during '99. See **AFGHANISTAN** and **INDIA**.

Aberdeen, Lord. See under **PEERS**.

Aberdeen University was founded in 1495 by Bishop Elphinstone as a *Studium Generale*, in which he constituted a college in 1505 known as King's College. In 1593 George Keith, 5th Earl Marischal, founded **Marischal College**, which came to be also a university distinct from the former foundation. In 1860 these two universities were united in one institution, and now form the University of Aberdeen. The divinity classes meet in the old college, as also the largest portion of the arts classes, while the science, law and medical meet in the new. **Chancellor**, Duke of Richmond and Gordon. **Lord Rector**, Lord Strathcona (elected Nov. 4th, '99). **Principal**, Sir W. D. Geddes, LL.D.; there are 23 professors and upwards of 700 students. In conjunction with Glasgow it sends one representative to Parliament (present member, the Right Hon. J. A. Campbell, LL.D.). It grants degrees in Arts, Science, Divinity, Law, and Medicine, and is now empowered to admit women as well as men to those degrees. It also grants certificates of proficiency to women in the local examinations which it has instituted throughout the northern counties of Scotland. In '92, the Government being appealed to to aid the Buildings Extension Scheme of the University, agreed to grant £40,000 in instalments, on condition of an equal sum being contributed locally. This amount was more than secured, and the University have already expended since '92 in sites and buildings upwards of £100,000. In connection with the four hundredth anniversary of the College several new buildings were inaugurated in Oct. '95. Its degrees are: **M.A.**, **D.Litt.**, **D.Phil.**, **B.D.**,

D.D., B.L., LL.D, M.B., C.M., M.D., B.Sc., D.Sc., ; whereof D.D. and LL.D. are purely honorary.

Aberystwyth College. See UNIVERSITY COLLEGE OF WALES (ABERYSTWYTH).

Abyssinia is a country of North Africa, and occupies a highland region S.W. of the Red Sea. Estimated area, 150,000 sq. m.; pop. 3,500,000. The country is made up of semi-independent small states, the chief of which are **Tigre** in the north, **Amhara** in the west and centre, and **Shoa** in the south. By a treaty with Great Britain concluded in '97, the frontiers of the British Somali Protectorate were defined as follows:—Starting from the seashore opposite the well of Hadou (on which the French and the English Governments agreed in Feb. '88), it follows the caravan road by Abbassouen to Mount Somadou; from Mount Somadou to Mount Saw; from Mount Saw to Mount Egu; from Mount Egu to Moga Medir; starting from Moga Medir it goes in a direct line to Eylinta Kaddo and Arran Arrhe, 44° east of Greenwich and 9° north, and again in a direct line until 47° east and 8° north. After this the boundary follows the line on which the English and the Italians agreed on May 5th, '94, until the sea. The caravan route between Zeila and Harar was declared open to the commerce of both nations, the most-favoured-nation treatment was granted to Great Britain and her colonies, and in return the right of free entry at the port of Zeila was given to all material destined for the service of Abyssinia. The Emperor also claims jurisdiction over some of the country between Shoa and the Nile. Abyssinian trade passes principally through **Adowa** to the port of **Massowah**, now Italian. The capital is **Adis Abeba**. Government monarchical, and a sort of feudal military system obtains, each large province being under a Ras or feudal chief, while under them are the governors of districts and the chiefs of villages. An army of 50,000 can be raised equipped with modern arms. Religion a form of the Armenian and Coptic Christian Church, called Monophysite. Manufactures limited to coarse cotton and woollen cloths, leather, pottery, and some iron, steel, and other metal articles. Exports: ivory, gold dust, musk, coffee, and some other productions. People a mixed race: Semitic or Arabic type most prevalent; colour yellow-brown to black. There are Mohammedans, and the Jewish Falashas, who number about 250,000, and are the principal agriculturists and manufacturers. After the defeat and suicide of King Theodore, in '68, Prince Kassa of Tigré assumed the chief power as **Johannes II.** To him, in '89, succeeded **Menelik II.**, King of Shoa; but by the treaty of Ucciali, concluded with Italy in that year, the country was practically made an Italian protectorate. The advances of the Italians from the direction of Erythrea led to war between them and Menelik, and the province of Tigré was annexed by the Italians in Nov. '95, only to be given up again later on, when Menelik inflicted several severe defeats on the Italians. A treaty of peace was signed (Nov. 15th, '96), by which the treaty of Ucciali, mentioned above, was abrogated, and the absolute independence of Abyssinia recognised. See EGYPT (Map) and FOREIGN ARMIES.—**History**, '99. A strong force under Ras Makonnen was sent against Ras Mangascia, Governor of Tigré, who had been in rebellion against the Emperor, and an engagement took place, after the failure of negotiations for peace. After

other encounters peace was concluded, Ras Makonnen's force being in a difficulty for food and stores (Jan. 18th). Ras Mangascia and the chiefs who supported him afterwards made formal submission to the Negus (Feb. 18th).

Academy. See ROYAL ACADEMY.

Academy, The French (*Académie Française*), was founded in 1635 by Cardinal Richelieu, and is the first of the five academies constituting the "Institut de France," the other four being l'Académie des Inscriptions et Belles Lettres, l'Académie des Sciences, l'Académie des Beaux Arts, and l'Académie des Sciences Morales et Politiques. The Academy consists of forty members, and meets at the **Palais de l'Institut** every Thursday from 3 to 5 p.m. An annual meeting is held in November. Each of the members receives 1500 fr. a year, and the Secretary 6000 fr. Six members who are appointed as a Dictionary Commission also receive 1000 fr. a year each. Twenty-one "prix littéraires" and forty "prix de vertu" are awarded by the Academy. The list of members is as follows, the dates of their election following the name: MM. Legouvé '55, Duc de Broglie '62, Emile Ollivier '70, Alfred Mézières '74, Gaston Boissier '76, Victorien Sardou '77, Duc d'Audriffet-Pasquier '78, Rousse '80, Sully-Prudhomme '81, Perraud '82, Coppée '84, Joseph Bertrand '84, Ludovic Halévy '84, Edouard Hervé '86, Gréard '86, Comte d'Haussonville '88, Jules Claretie '88, Melchior de Vogüé '88, De Freycinet '90, J. Viald (Pierre Loti) '91, Ernest Lavisse '92, Thureau-Gangin '93, Henri de Bornier '93, Brunetière '93, Sorel '94, Paul Bourget '94, De Herdia '94, Henri Houssaye '95, Jules Lemaitre '95, Anatole France '96, Costa Beauregard '96, Gaston Paris '96, Theuriet '96, Vandal '96, Hanotaux '97, De Mun '97, E. Guillaume '98, Lavedan '98, Deschanel '98. The Secretary is M. Gaston Boissier.

Accountants. See INSTITUTE OF CHARTERED ACCOUNTANTS, and SOCIETY OF ACCOUNTANTS.

Acts of Parliament. All public Acts affecting the United Kingdom, and all local Acts affecting only limited areas, as well as private Acts of Parliament, are published, and can be obtained (if in print) at various prices, from Messrs. Eyre & Spottiswoode, East Harding Street, London, E.C., who also publish at the close of each session a cheap edition of the public Acts in covers. The public Acts passed during the '99 Sessions are enumerated at the commencement of Part II. of the article on SESSIONS, and particulars are given of the more important of them in alphabetical order in that article.

Aden. A town and territory on the S. coast of Yemen, Arabia, 110 miles east of the Straits of Bab-el-Mandeb, forming a British dependency. Total area, 80 sq. m. Pop. 41,912. Consists of a rocky promontory not unlike Gibraltar, joined to the mainland by a low isthmus, and is under a Resident, who acts as military and civil governor. The harbour, a very fine one, touched at by 1500 ships annually, is the entrepôt of trade for surrounding countries. It is a coaling station for the British navy, and as such is strongly fortified. Perim and Socotra are dependencies of Aden. For statistics see BRITISH EMPIRE (table).

Adler, Hermann, M.A., Ph.D., Hon. LL.D. St. Andrew's, Chief Rabbi, is son of the late

Chief Rabbi, and was b. in Hanover, 1839. Educated at Univ. Coll., Lond., B.A. Lond. '59, Ph.D. Leipsic '61. Appointed Principal of the Jews' College in '63, and Minister of the Jewish Synagogue at Bayswater in '64. Dr. Adler is the author of several works of a controversial and homiletic character, including a reply to Dr. Colenso's "Criticism of the Pentateuch," and "Sermons on Passages in the Bible on which Christian Theologians base their Faith," and has contributed to the principal Reviews. He was elected Chief Rabbi of the United Congregations of the British Empire in May '91, and was installed on June 23rd in the Great Synagogue of London. He is connected with a large number of philanthropic and educational institutions, both in his own and the general community, including the Prince of Wales' London Hospitals Fund. Address: 10, Finsbury Square, E.C.; 6, Craven Hill, W.

Administration, Letters of. See WILLS.

Admiralty. Unlike the other great departments of the Government, the Admiralty is not presided over by a Secretary of State. This is due to the circumstance that the constitutional ruler of the Navy is a Lord High Admiral. But the office has been continuously in commission since 1708, except during the period when it was filled by the Duke of Clarence, afterwards William IV. The commissioners are generally styled "the Lords of the Admiralty" or "the Board." The First Lord is the Minister immediately responsible for the general efficiency of the Navy. Under the First Lord the direction of affairs rests in the hands of four naval lords, a civil parliamentary lord, and the financial or parliamentary secretary. The senior naval lord, who is always an admiral of high rank and general experience, practically fills the position of Commander-in-Chief of the Navy. He is the chief naval adviser of the First Lord, and is especially responsible for the *personnel*, condition, and general movements of the fleet. The naval lords each share the responsibility of maintaining the efficiency of the branches of the service under their immediate supervision. The Controller of the Navy is the naval lord charged with the supervision of the whole of the material of the Navy, including the construction, repair, armament, general equipment, and upkeep of every ship in the service. He is also responsible for the administration of the dockyards, and for the construction of ships and machinery by contractors. Under the naval lords and other members of the Board, the several branches of administration are conducted by permanent officers, who, under the title of directors, deal with naval construction, engineering, ordnance, hydrography, dockyards, stores, victualling, works, hygiene, and contracts. Formerly the Navy was dependent upon the War Department for armaments and ammunition, but the responsibility for this provision has now been transferred to the Admiralty. The Director of Transports, on the other hand, is an Admiralty officer, but the responsibility for the expenditure rests with the War Office. The Works Department of the Admiralty is presided over by officers of the Royal Engineers, its supervision resting with the civil lord. The Department of Naval Intelligence is a recent addition to the establishment of the Admiralty, but one of the most important.

The headquarters of the marine forces are at the Admiralty, where its affairs are administered by the Deputy Adjutant-General. The secretariat of the Admiralty is divided into two sections, the executive and the financial. The first-named section is under the direction of the permanent secretary of the Admiralty, who acts as mouthpiece of the Board. The Financial Secretary, being a Minister of the Crown, vacates office with the Administration of which he is a member. The Accountant-General of the Navy, who is the permanent financial officer of the Admiralty, fills the position of Assistant Financial Secretary. At one time the Departments of the Admiralty were scattered in many buildings. The new Admiralty, at Whitehall, has now afforded accommodation for many of the outlying departments, and when the other wing is completed, all will be concentrated under one roof. See NAVY, BRITISH.

Advertisement Regulation Society. See NATIONAL SOCIETY FOR CHECKING THE ABUSES OF PUBLIC ADVERTISING.

Aërial Navigation. There are two systems of aërial navigation in vogue—viz., ballooning and aviation. The former involves the use of machines lighter than the air; while the latter may be accomplished only by the use of apparatus heavier than the air. For a discussion of the subject, and accounts of various flying machines, see '95 and previous eds.

Afforestation. Forests are useful to a country—firstly, as a source of timber and fuel supply; and, secondly, as regards their sanitary and climatic influences. In Great Britain we have about 3,000,000 acres of woodlands, or less than 4 per cent. of its total area. The national woodlands include about 115,293 acres, but only about 57,304 are under timber crops in the New Forest, the Forest of Dean, and other smaller tracts. The excess of imports of foreign forest produce in Great Britain over the exports is about £18,000,000; but this sum does not include mahogany, cutch gambier, caoutchouc, and gutta-percha, which are imported to the extent of about £4,500,000. Half our timber imports, at the least, ought to be produced at home. A very reckless destruction of forests has taken place both in England and Scotland during the present century and previously. In many countries forests have also been destroyed without fresh afforestation; and, while the world's demands for timber are yearly increasing, the productive area under forests is steadily decreasing. In the United Kingdom five times as much timber is now consumed as a century ago. In the growing of trees for effect in plantations, and for other ornamental purposes, which is called *arboriculture*, British landowners are unrivalled; but as for the cultivation of trees on scientific principles for yielding profitable crops, which is *silviculture*, this is grossly neglected in the United Kingdom. Landowners might make their woods more profitable if better attention were given to the selection of trees suitable to different soils, and to more efficient management after the trees were planted. There is much bad land, unsuitable for growing anything but timber trees, which might be utilised with great advantage for this purpose, particu-

larly in the Highlands of Scotland and the west side of Ireland. One discouragement to afforestation in the United Kingdom is that there is no chance of a return for the outlay for very many years. There appears, however, to be no reason why, if the existing woodlands were well and economically managed, they should not produce nearly £2,000,000 per annum. The select committee of the House of Commons on Forestry in '87 recommended the establishment of a Forest Board. There is no such Board at present, but some of the work of the proposed Board has been assumed by the Board of Agriculture by the Act of '89, and various small sums are allotted to four different minor institutions for technical instruction in forestry. The Surveyors' Institution has recently started a **Forestry Museum** in London, which should have an important educational influence. It also conducts **examinations in forestry** in connection with its examinations for admission to the class of Professional Associates and for Fellowship of the Institution, and Special Certificate Examinations in Forestry are open to its members. In the event of afforestation in the United Kingdom being carried on on a large scale in the near future, very many unemployed labourers would be engaged in the operation. Much work, too, in connection with tending woodlands and getting in timber can be best done during the winter months, when far more labourers remain unemployed.

Afghanistan is an inland country of Asia, forming the north-eastern portion of the great Iran plateau. Its breadth is about 500, and its length, from the Herat boundary to the Khaibar, about 600 miles. Its area is about 216,000 sq. m. It is bounded on the E. by the tribes on the N.W. frontier of India under British control; on the S. by Baluchistan; on the W. by Persia; on the N. by Turkestan as far as the Oxus. **Cabul** is the capital. There is no Afghan nation; the population (4,000,000) consists of discordant tribesmen, constantly in revolt, and only kept in subjection by frequent military expeditions from Cabul. The chief tribes are the Ghilzais in the province of Cabul, the Duranis between Herat and Kandahar, the Amiahs and Hazaras in the Paropamisus mountains, north of the Duranis, and the Uzbegs and Tajiks. The four principal provinces are Cabul, Turkestan, Herat, and Kandahar. Most of the tribesmen are Suni Mahomedans. The present **Ameer** is Abdurrahman Khan (*q.v.*). Under his rule much progress has been made, and at Cabul he has established factories where guns are forged and rifles made, and all sorts of manufactures are carried on. He has a subsidy of 18 lakhs per annum from the Indian Government. A standing army whose war strength is estimated at about 50,000 is maintained. Silks, felts, and carpets are manufactured. **Exports:** assafoetida, madder, fruits, furs, shawls, and chintz. For Agent to Governor-General of India see **DIPLOMATIC**.

AFRICA.

The present condition of affairs and the latest details that have come to hand about the various parts of this vast continent will be found dealt with under their proper alphabetical headings throughout the book. Africa has been gradually shared out between various European Powers, chief of whom are England,

Germany, France, Italy, Belgium, and Portugal, and the following list will show what colonies and protectorates have been acquired by each power:

BRITISH.

BASUTOLAND.
BECHUANALAND PROTECTORATE.
BRITISH CENTRAL AFRICA PROTECTORATE.
CAPE COLONY.
EAST AFRICA PROTECTORATE.
GAMBIA.
GOLD COAST.
LAGOS.
NATAL.
NIGER COAST PROTECTORATE.
NIGERIA.
RHODESIA.
SIERRA LEONE.
SOMALI COAST PROTECTORATE.
UGANDA.
WALFISCH BAY.
ZANZIBAR PROTECTORATE.

CONGO FREE STATE (BELGIAN).
LIBERIA.
MOROCCO.
ORANGE FREE STATE.

The area owned by **Great Britain** in Africa amounts roughly to 2,500,000 square miles; by **France**, 3,500,000; by **Germany**, 900,000; by the **Congo Free State**, 900,000; by **Portugal**, 800,000; by **Italy**, 200,000; and by **Spain**, 250,000. **Egypt** and **Tripoli** occupy about 800,000 sq. miles. France has secured free communication between the three great sections of her African possessions—the Soudan and West Africa, French Congo, and the Mediterranean possessions. **Great Britain** too has nearly joined up her possessions in East Africa with that part of the Soudan in Anglo-Egyptian occupation. A bigger scheme still is apparently on the way to completion. More than ten years ago Mr. Cecil Rhodes conceived the plan of build-

ing a railway right through the Continent, from the Cape to Cairo. There is already railway communication from the Cape to Bulawayo, and the line is being extended through Rhodesia northwards. The country has been surveyed as far as the south end of Lake Tanganyika, across which it is proposed a steamboat service shall run, the railway thence going on north through Uganda and into the Nile Valley. Mr. Rhodes, in '99, asked the Imperial Government to guarantee the interest on the money needed to construct the first section, from Bulawayo to Gwelo, but the request was not granted. For details of the telegraph line which will eventually connect the Cape with Alexandria, and which is now being rapidly pushed northward, see **African Transcontinental Telegraph** under **ENGINEERING**. Under the headings of **BRITISH EMPIRE** (table), and **COLONIES, ETC., OF EUROPEAN POWERS**, the latest statistics relating to these countries, colonies, etc., will be found. See **EGYPT** and **NIGERIA** (Maps). See **SESSION**, sects. 12, 14, 34 and 37.

Agricultural Rates Act, '96. The, was passed in accordance with the recommendation of the Royal Commission on Agriculture, then sitting, with the view of relieving agricultural land of a portion of its burden of rates. It provided that for a period of five years from March 31st, '97, the occupier of agricultural land should be liable to pay one-half only of the rate in the £ payable in respect of buildings and other property. Thus, if a rate of 1s. in the £ is levied in a district, agricultural land pays only 6d. while houses and other property pay 1s. in the £. This exemption applies in the case of all rates made—that is, allowed by the Justices—during the five years, except (1) those rates in which agricultural land previously paid only one-half (or less) of the rate in the £ payable in respect of buildings and other property; and (2) those rates which are raised for works for the benefit of the land, such as works for land drainage or for an embankment for keeping out the sea. In effect, the reduced rating of agricultural land extends to nearly all the more important rates, such as the poor rate, county rate, highway rate, borough rate, and school-board rate. The chief exceptions are the general district rate in urban districts; the special expenses rate in rural districts; and the lighting and watching rate. In these cases land was already assessed at either $\frac{1}{4}$ or $\frac{1}{2}$ of the rate on other property, and is obviously not entitled to any further benefit. **Agricultural land** is defined for the purposes of the Act as being "any land used as arable, meadow, or pasture ground only, cottage gardens exceeding one-quarter of an acre, market gardens, nursery grounds, orchards, or allotments, but does not include land occupied together with a house as a park, gardens other than as aforesaid, pleasure-grounds, any land kept or preserved mainly or exclusively for purposes of sport or recreation, or land used as a racecourse." The deficiency thus occasioned is made up by grants from Imperial funds, so as to prevent increased rates being levied on other property. By the Act, and by the Regulations which were issued in '96 by the Local Government Board, the procedure was prescribed for arriving at the amount of the grants. By means of returns from the "spending authorities" (county councils, councils of county boroughs, councils of boroughs and

other urban districts and of rural districts, boards of guardians, the receiver of the Metropolitan police district, school boards, highway boards and surveyors of highways), and from the overseers of the poor, and the assessment committees, the Local Government Board ascertained the amount which during the year previous to the passing of the Act (*i.e.* the year ended March '96) agricultural land contributed to the expenditure of each spending authority. Half of that amount represented the supposed deficiency to the spending authority in consequence of the exemption of agricultural land from payment of half the rates, and the amount of this deficiency was certified by the Local Government Board as the amount of the annual grant to the authority. The total of the grants certified to all the spending authorities constitutes the amount of the annual grant from the Imperial funds, which is met out of the proceeds of the estate duty derived from personal property. The Local Government Board pay the grants to the spending authorities, and the payments are made half-yearly. The first payments were made to meet the deficiency arising during the six months ending Sept. 30th, '97. Several authorities were intentionally omitted from the list of "spending authorities" given in the Act, and therefore receive no grant. Among these are parish councils and parish meetings, burial boards, and certain joint committees. The rates out of which these authorities pay their expenses are nevertheless contributed to by agricultural land on the basis of one-half of its value, so that, as there is no grant to make up the deficiency, houses and other property than land are more heavily rated in consequence. The vestries and district boards in London receive no grant. The total of the annual grants in the case of all the spending authorities was certified by the Local Government Board, in March '98, as amounting to £1,331,116. During the five years the Act continues in force the same grants will be paid half-yearly to the authorities, except only in cases where in consequence of an error in arriving at the original grant, or an alteration in the area of an authority, the Board vary the amount. Of course, as the expenditure of each spending authority varies each year (probably increasing), the grant ceases to represent the amount of rates from the payment of which agricultural land has been exempted; and wherever the rates of a district increase the effect will be to throw a proportionately heavier burden on houses, buildings, and other property than land, than would have been the case if the Act had not passed. In the case of surveyors of highways and school boards for a parish, the grants due to them are paid to the guardians of the union containing the parish, but in all other cases the grants are paid directly to the several authorities concerned. The exemption allowed by the Act to agricultural land applies alike to parish, union, borough, district and county. In London and many of the boroughs there is very little agricultural land; but wherever there is any, it receives the benefit of the Act, and grants are made to the "spending authorities." It is in rural districts that the effect of the Act is felt principally. The rateable value of agricultural land in England and Wales is £24,565,058, and the relief afforded by the annual grants under the Act represents an

average rate of 1s. 1d. in the £ on that value. In the Local Government (Ireland) Act '98 a similar rating grant was made, the estimated annual value being £730,000; but no limit was put to the duration of the grant in Ireland, as there was in the case of Great Britain.

- III. VETERINARY SANITATION.
- IV. AGRICULTURAL LABOURERS.
- V. HOLDINGS AND ALLOTMENTS.
- VI. AGRICULTURAL SOCIETIES.

Agriculture may be defined as the science of cultivating the ground in such a manner as to cause it to produce in plenty and perfection those vegetable products which are useful to human beings and to those animals that are reared and kept for food and labour. This science also includes the breeding and management of such animals. In all countries it is coeval with the first dawn of civilisation, and is the principal industry of the world.

The total expenditure on land improvement in Great Britain, that has been made a charge on the land, from the commencement of the Public Money Drainage Acts in '47, and under the subsequent Improvement Companies Acts and others up to Dec. 31st, '98, amounts to £16,989,865 6s. 1d., distributed as follows:—

	£	s.	d.
Drainage	8,991,481	15	5
Farm buildings	4,925,063	15	5
Labourers' cottages	1,107,549	17	5
Fencing and embanking	446,048	19	1
Roads	165,966	7	
Clearing and reclamation	146,461	0	9
Planting	96,494	14	10
Other agricultural improve- ments	286,412	7	4
Subscriptions to railways	126,923	1	1
Mansion houses, etc.	697,463	13	2
Total	£16,989,865	6	1

Four millions of this was public money advanced by the Exchequer under the Public Money Drainage Acts for the draining of agricultural land, nearly all of which has now been repaid by those to whom it was advanced. The remainder has been found through the several Land Improvement Companies, under their special Acts, and by landowners themselves, under the Improvement of Land Act, '64, and the Limited Owners' Residences Acts, '70 and '71.

The General Enclosure Act of '45 was passed to facilitate the enclosure of commons and wastes, and commissioners were appointed under it for England and Wales, now the Board of Agriculture. These officials were to decide whether enclosures were expedient. Every kind of common was subject to be enclosed by the statute; but all lands in the New Forest and the Forest of Dean and village or town greens were excepted from such. It was further provided that no lands within fifteen miles of London and certain specified distances of other

large towns could be enclosed. It also required allotments to be appropriated for recreation and others for the poor as field-gardens. Power was given for the appropriation of portions of the ground proposed to be enclosed for public purposes—as the formation of roads and footways, public drains, embankments, watercourses, public ponds, wells, or watering-places, or for enlarging or making burial-grounds, the supply of stone and gravel, or any other purpose of public convenience or usefulness, or for the general convenience of interested persons. The number of enclosures from 1700 up to 1886 amounts to about 8,372,662 acres. Notwithstanding the fact that a large quantity of land, approaching 1,000,000 acres, has been taken into cultivation since '45 in England and Wales, there is reason to believe that about as much agricultural land has been occupied from this period by the increase of cities, towns, roads, and railways.

The long and critical report which was published by the Commissioners on Agricultural Depression, being their "Final Report" on the subject in '97, is an exceedingly important one. It cannot be overestimated, and is applicable to the present time as regards nearly all points. They express their entire concurrence in the general opinion that the present depression in British agriculture is mainly owing to the fall in prices of agricultural produce. For a full summary of the report see '99 and previous eds.

Much good has been done for the progress of farming by the Copyhold Acts. The number of enfranchisements which have taken place under them from '41, when the first statute was passed, to '98, inclusive, is 18,921. The gross sum received by landlords for compensation amounted to £2,462,489 6s. 3½d., and the rent-charges to £19,908 0s. 6d. The powers given by the Settled Lands Acts, '82 to '90, to a tenant for life for selling settled land, and of making exchanges, partitions, and of granting leases, and of enfranchising copyholds of any settled manor, and of expending the money arising under these Acts for making improvements in agricultural land and premises settled, and of imposing an obligation on his successors to maintain them, have been productive of much good to landowners and farmers. By the Agricultural Holdings Acts of '82 a general right is given to tenants of farms in Great Britain to compensation for improvements made on their holdings at their own expense, and for securing to them the property in any fixtures or machinery they may put up on the premises. Any agreement between landlord and tenant depriving the latter of his right to such compensation is void. The Ground Game Act of '80, the Conveyancing Acts, '81 to '92, the Small Holdings Act of '92, the Destructive Insects Act, the Contagious Diseases (Animals) Acts, '78 to '93, the Wild Birds Protection Amendment Act, the Finance Act, the Merchandise Marks Prosecutions Act, the Locomotive Threshing Engines Act, and the Diseases of Animals Act of '94, the Diseases of Animals Act, the Agricultural Rates Act (q.v.), the Locomotives on Highways Act (q.v.), and the Finance Act of '96. The Extraordinary Tithe Act, the Land Transfer Act of '97, and the Improvement of Land Act '99, have been and will be of beneficial interest to agriculturists. So also will be the great number of orders wholly or in part in operation on Jan. 1st, '98 and '99, under the

Diseases of Animals Acts '94 and '96, incorporating the Contagious Diseases (Animals) Acts '78 to '93.

I. BOARD OF AGRICULTURE.

The Board of Agriculture for Great Britain was established in '89, and consists of the Lord President of the Council, Her Majesty's Principal Secretaries of State, the First Commissioner of the Treasury, the Chancellor of the Exchequer, the Chancellor of the Duchy of Lancaster, and the Secretary for Scotland, with such other persons as Her Majesty may from time to time think fit to appoint during her pleasure. The President of the Board receives a salary of £2000 per annum. The powers and duties of the Privy Council under the Diseases of Animals Acts; of the Land Commissioners for England under the Tithe Acts, the Copyhold Act, the Inclosure Acts, the Metropolitan Commons Acts, the Drainage and Improvement of Land Acts, or under any other Act; and of the Commissioners of Works under the Survey Act '70, were transferred to the Board by the Act of '89. The expression "agriculture" is defined to include "horticulture." The business of the Board is transacted in three divisions—viz., Animals, Intelligence, and Land. The **Animals Division** is charged with the suppression of contagious diseases, including rabies, among animals in Great Britain; and with the regulation of the importation, into Great Britain, of animals, including dogs. The **Intelligence Division** prepares the annual Agricultural and Produce Returns, and collects the average prices of British corn under the Corn Returns Act '82. It also edits the quarterly *Journal* of the Board, which contains information as to the position of agriculture at home and abroad, rural industries, noxious insects and fungi, wild birds useful to agriculture, and statistics of quantities and values of agricultural produce. The **Land Division** is chiefly concerned with the regulation and inclosure of commons, transactions under the Universities and College Estates Acts, sales of glebe land, re-apportionment and redemption of tithe-rent-charge, enfranchisement of copyhold land, and the sanctioning of charges on land for works of improvement. Under the Fertilisers and Feeding Stuffs Act '93, the Board have appointed a chief agricultural analyst, and made regulations regarding the analysis of fertilisers and feeding stuffs by district analysts. The **Ordnance Survey** (*q.v.*) of Great Britain and Ireland is conducted by the Director of the Survey, under the control of the Board. Further powers have been conferred on the Board by the Sale of Food and Drugs Act, the Commons Act, and the Improvement of Land Act, of the session of '99. The President is Rt. Hon. Walter Hume Long, M.P., and the Permanent Secretary is Mr. T. H. Elliott, C.B. Offices, 4, Whitehall Place, and 3, St. James's Square, S.W.

II. AGRICULTURAL STATISTICS.

Nearly all of the following important statistics have been prepared by the Board of Agriculture. The total area of land and water, not including tidal water, in Great Britain, in '98, was 56,773,223 acres. The total acreage

under crops, fallow, and grass, not including mountain and heath land, on June 4th, '98, was 32,477,031, of which 7,400,335 were under corn crops; 3,133,470 under green crops; 4,911,350 under clover, sainfoin and grasses under rotation; 16,559,392 under permanent pasture. The acreage of flax was 902; of hops, 49,735; of small fruit, 69,753; and of bare fallow or uncropped arable land, 352,094. The wheat grown covered 2,102,206 acres; barley, 1,903,666; oats, 2,917,760; rye, 68,795; beans, 231,964; and peas, 175,944. Of green crops, there were 524,591 acres of potatoes; 1,772,502 of turnips and swedes; 352,235 of mangold; 165,724 of cabbage, kohlrabi and rape; 193,612 of vetches; and 124,806 of other green crops. As to the acreage of some of the more important of these crops, later returns were published in the *Journal of the Board of Agriculture* for Sept. '99, as a Preliminary Statement for that year compiled from the returns collected on June 5th last. From these statistics it appears that the acreage of wheat for '99 was 2,000,981; of barley, 1,982,108; of oats, 2,959,755; and of potatoes, 547,682. There was thus a diminution of 101,225 acres in the wheat area as compared with '98, the increase in '98 over '97 being 213,059 acres. According to the returns on June 4th, '98, the acreage of mountain and heath land used for grazing in Great Britain was 12,856,938, of which 9,420,370 was in Scotland. There were 226,059 acres of orchards. As to woods and plantations (according to latest returns, published in '95), these are estimated to cover 2,726,116 acres, of which 131,843 are returned as planted from '81 to '95. On June 4th, '98, the horses numbered 1,517,160, of which 441,852 were unbroken, and 1,075,308 were used solely for agriculture, including mares kept for breeding. There were also 6,622,364 cattle, 26,743,194 sheep, and 2,451,595 pigs. According to the Preliminary Statement for '99 referred to, the number of cattle on June 5th of this year was 6,795,720; of sheep, 27,237,664; and of pigs, 2,623,813. On that date the acreage of hay from clover and rotation grasses was 2,214,883, and from permanent pasture, 4,339,025. The acreage of hops was 51,843. The total acreage of permanent pasture, exclusive of mountain and heath land, was 12,915,929 in '73, 15,065,373 in '83, 16,465,066 in '94, 16,610,563 in '95, 16,726,476 in '96, 16,512,868 in '97, and in '98 16,559,392; while the total acreage of arable land was in the first six mentioned periods 18,186,691, 17,319,712, 16,164,786, 15,966,950, 15,835,883, 16,007,208, and in '98 15,917,639.

The estimated total produce of the principal crops of Great Britain in '98 is as follows: In bushels: wheat, 73,028,856; barley, 68,051,918; oats, 118,920,917; beans, 7,200,131; peas, 4,848,794. In tons: potatoes, 3,282,517; turnips, 21,336,508; mangold, 6,218,032. In cwt.s.: hay from clover, sainfoin, and grasses under rotation, 80,130,803; hay from permanent pasture, 132,630,055; and hops, 356,598.

Acreage under Wheat, etc.

The following figures as to the acreage under wheat, barley, and oats in Great Britain for the ten years '90-99 are taken from various publications issued by the Board of Agriculture and published at various periods in its *Journal*—

Wheat.	England.	Wales.	Scotland.	Great Britain.	Year.	Cattle.		Sheep.	
	Acres.	Acres.	Acres.	Acres.		Per stone of 8 lb.		Per stone of 8 lb.	
						s. d.	s. d.	s. d.	s. d.
'90	2,255,694	68,669	61,973	2,386,336	'73	5 1	to 6 4	5 8	to 6 11
'91	2,192,393	61,590	53,294	2,307,277	'78	4 6	to 6 0	5 4	to 6 10
'92	2,102,969	55,278	61,591	2,219,838	'83	4 3	to 6 1	5 6	to 7 3

'96	1,845,730	241,642	1,008,116	3,095,488
'97	1,829,072	238,510	968,474	3,036,056
'98	1,731,167	230,670	955,933	2,917,760
'99	1,781,649	220,233	957,873	2,959,755

Prices of Wheat, etc.

The prices of British wheat, barley and oats for '73, '78, '83, '88, '93, '94, '95, '96, '97 and '98 are as follows:—

Year.	Wheat.	Barley.	Oats.
	Per quarter.	Per quarter.	Per quarter.
	s. d.	s. d.	s. d.
'73	58 8	40 5	25 5
'78	46 5	40 2	24 4
'83	41 7	31 10	21 5
'88	31 10	27 10	16 9
'93	26 4	25 7	13 9
'94	22 10	24 6	17 1
'95	23 1	21 11	14 6
'96	26 2	22 11	14 9
'97	30 2	23 6	16 11
'98	34 0	27 2	18 5

The 1st of September is the opening of a new cereal year. The average price per quarter of British corn for the cereal year '98-99 was 26s. 0d. for wheat, 26s. 1d. for barley, and 17s. 3d. for oats. The average price of such grain for the week ended Nov. 4th was 27s. 2d. for wheat, 27s. 2d. for barley, and 16s. 7d. for oats per quarter.

Prices of Cattle and Sheep.

The average prices of British cattle and sheep per stone of 8 lb., sinking the offal, at the Metropolitan cattle market, are mentioned in the next table:—

During the second quarter of '99 the prices of such cattle and sheep ranged from 2s. 7d. to 4s. 6d., and from 3s. 4d. to 5s. 9d. respectively.

Numbers of Cattle, Sheep and Pigs.

This table has been compiled from the Board of Agriculture's statistics giving the numbers of cattle, sheep and pigs in Great Britain for the ten years '90-99, which are as follows:—

Cattle.	England.	Wales.	Scotland.	Great Britain.
	No.	No.	No.	No.
'90	4,617,641	705,115	1,185,876	6,508,632
'91	4,870,215	759,309	1,223,297	6,852,821
'92	4,968,590	754,467	1,221,726	6,944,783
'93	4,744,059	738,668	1,218,009	6,700,676
'94	4,450,607	695,000	1,201,566	6,347,113
'95	4,472,565	703,824	1,177,947	6,354,336
'96	4,573,603	712,979	1,207,000	6,493,582
'97	4,567,834	709,120	1,223,543	6,500,497
'98	4,674,303	701,777	1,246,284	6,622,364
'99	4,841,852	736,691	1,217,177	6,795,720

Sheep.	England.	Wales.	Scotland.	Great Britain.
	No.	No.	No.	No.
'90	16,841,288	3,069,710	7,361,461	27,272,459
'91	17,874,722	3,233,936	7,623,900	28,732,558
'92	17,993,756	3,197,501	7,543,447	28,734,704

'97	1,990,534	216,447	135,321	2,342,302
'98	2,078,898	238,581	134,116	2,451,595
'99	2,225,420	258,154	140,239	2,623,813

Agricultural Produce Imported.

Some statistics as to the annual imports of the principal kinds of agricultural produce into the United Kingdom are given in the *Journal of the Board of Agriculture* for Sept. '99, and the value of such produce from figures taken from the "Accounts relating to Trade and Navigation of the United Kingdom," during

the cereal year which had just closed, together with the imports of the corresponding period of '97 and '98. The following table relates to grain, flour and meal imported :—

Articles.	Sept. 1st, '97, to Aug. 31st, '98.		Sept. 1st, '98, to Aug. 31st, '99.	
	Quantities.	Value.	Quantities.	Value.
	cwts.	£	cwts.	£
Wheat	66,384,590	28,168,148	66,991,000	22,610,554
Wheat meal and flour	19,969,580	11,405,364	22,923,473	11,014,829
Barley	20,257,729	5,427,815	22,869,458	6,343,603
Oats	15,384,190	4,263,264	14,869,370	4,113,996
Maize	55,641,692	10,751,513	57,500,000	11,899,112

Particulars are not stated in these last-named accounts as to the imports into the United Kingdom during the last cereal year of beans, peas and maize meal.

The quantity of beans, peas and maize meal imported into the United Kingdom in '98, according to "Accounts relating to Trade and Navigation" for Dec. '98, are 2,293,346 cwts. of beans, of the value of £670,169; and 2,179,062

cwts. of peas, of the value of £689,899. The quantity of maize meal imported in '98 was 1,453,800 cwts., of the value of £379,485; and of oatmeal 989,480 cwts., of the value of £615,925. The quantity of rye imported in '97 was 1,018,940 cwts. of the value of £250,482; and the quantity of buckwheat 170,264 cwts., of the value of £46,919.

Other imports are as follows :—

DEAD MEAT IMPORTED.

The quantity and value of the hay imported is not mentioned in the returns from Sept. 1st, '98, to the end of Aug. '99; but in the returns for '98 the quantity then imported was 116,107 tons, as against 121,541 in the previous year. The value of the hay imported in '98 is not declared.

The number of live stock imported into Great Britain from Ireland in '98 included 38,804 horses, 803,362 cattle, 833,458 sheep, and 588,785 pigs.

III. VETERINARY SANITATION.

The reports for '98 of the proceedings under the Diseases of Animals Acts by the Chief Veterinary Officer and the Assistant Secretary of the Animals Division of the Board of Agriculture are very important; and the following statistics and statements from such reports are likely to be of great interest to those engaged in agriculture. During '98 only one outbreak of pleuro-pneumonia was noticed in the United Kingdom, as compared with seven attacks of this disease in '97; while the number of cattle slaughtered as having been exposed to infection from such malady, were 220 as against 741 in the previous year. As in '97, there was no outbreak of foot-and-mouth disease. There has been a gradual decrease in the number of outbreaks of glanders or farcy in Great Britain since '93, and of the 1385 animals attacked by it in '98, 1199 cases

occurred in the counties of Middlesex and Lanark. Only 17 cases of rabies have been ascertained in '98, as against 151 in '97, 438 in '96, and 672 in '95. Swine-fever occurred in 2514 cases, which necessitated the slaughter of 43,756 pigs as diseased, or as having been exposed to infection. There were 2514 outbreaks of sheep-scab, which attacked 38,943 sheep, as compared with 33,546 which suffered from this disease in '97. In '98 there were 556 outbreaks of anthrax, which attacked 634 cattle, 22 sheep, 161 pigs, and 39 horses.

The Chief Veterinary Officer of the Board of Agriculture in his report for '98 states that "at no period during the last sixty years has the stock of the whole of the United Kingdom been so free from contagious diseases as at the present time, or the trade in cattle been so freely carried on, there being now no order or regulation in force which prevents any farmer or owner of stock from driving his cattle in any direction he may think fit, sending them by rail or road to any part of the country, however distant from his home, or exposing them for sale in any market, fair, or sale-yard, throughout the country.

"But the ordinary stock-owner has not alone benefited by this immunity from disease: breeders of pedigree cattle have also reaped great advantages, because their foreign customers know that when purchasing cattle in Great Britain or Ireland they incur no risk of introducing pleuro-pneumonia or foot-and-

mouth disease into the country to which they are taken. In this respect the cattle of the United Kingdom are in better position, from a sanitary point of view, and can be more safely purchased, than animals of the same class in almost any other country in Europe."

The only disease which occurred among foreign cattle, sheep, and pigs imported into Great Britain in '98 was sheep-scab, which affected 9758 of them, as against 1905 in '97; and swine-fever, which affected 35 pigs. The Diseases of Animals Act of '96 in effect prohibits the importation of foreign animals for food into the United Kingdom, except for immediate slaughter at the place of landing. The statute also minimises the great risks to which cattle, sheep, and swine were formerly exposed from the maladies referred to.

IV. AGRICULTURAL LABOURERS.

As regards agricultural labourers, their pay, housing and education were very bad and disgraceful until about thirty years ago. From 1800 to '34 their standard of living had sunk to the lowest scale, and their wages had to be supplemented by parochial relief. Very great

improvement has been made in their position during the last twenty years. The average weekly wages of these labourers in England is about 13s. per week, and in Scotland about 18s. *qd.* In the arable counties, and particularly those of the East of England, a considerable reduction of the number of men employed has occurred since '92, while those still engaged have in many cases suffered from irregularity of employment, which is mainly in consequence of not ploughing so much land as formerly. Information has been received from correspondents respecting the rates of weekly cash wages paid to ordinary agricultural labourers (*viz.*, those not exclusively engaged with the charge of animals) exclusive of piecework earnings, special rates for haymaking, and all extra allowances in cash or kind, in June '99, compared with June '98. The general effect of the returns is to show that there has been an upward movement in agricultural wages. The following table, published in the *Labour Gazette* for July '99, shows the changes of wages of agricultural labourers in certain Poor Law Unions in the Midland, Eastern, Home, Southern and South-Western counties in June '99, compared with June '98:—

Districts.	No. of Poor Law Unions reported on.	No. of Agricultural Labourers, in 1891 in Unions in which there has been the undermentioned change in the weekly rates of wages of agricultural labourers in the summer of '99, compared with the summer of '98.				
		No rise.	1s. per week.	1s.6d. per week.	2s. per week.	Total.
Midland Counties	39	41,564	10,806	2,040	1,443	55,853
Eastern Counties	42	71,090	28,540	—	—	99,630
Home Counties	19	13,010	11,848	5,960	—	30,818
Southern and South-Western Counties	49	46,952	10,870	2,559	1,491	61,872
Total	149	172,616	62,064	10,559	2,934	248,173

During the last twenty years the number of British agricultural labourers has decreased by about 260,000, although the total population has increased by more than 7,000,000.

V. HOLDINGS AND ALLOTMENTS.

The Board of Agriculture has not published any statistics on holdings and allotments for '97 and '98; nor do there appear to have been any adequate particulars otherwise published as to their acreage, number, etc. The following remarks, therefore, are limited to the land returned in '95 as under crop or grass, and do not include the surface occupied as grazings of mountain and heath land or the area of woodlands. As regards the classification of holdings, those above 1 acre and not more than 5 were 117,968; others above 5 and not exceeding 20 acres were 149,818. There were 85,663 holdings of more than 20 but not above 50 acres; 66,625 of more than 50, but not beyond 100 acres; 81,245 of above 100, but not exceeding 300 acres; 13,568 of 300, but not more than 500 acres; 4616 of more than 500, but not beyond 1000 acres; and 603 above 1000 acres. Nearly a third in number of all the holdings in Great Britain were areas wholly under grass; but in the small holdings up to 5 acres the proportion of

grass holdings rose to more than one-half. Concerning allotments of 1 acre and under, these numbered 579,133; those of less than 1 acre were 541,990, and of 1 acre 37,143. Allotments are still increasing, although less rapidly than formerly. Major Craigie, in his Report to the Board of Agriculture, in the Agricultural Returns of '96, states, respecting these allotments, that "the wants of certain counties have apparently been fully met, while a tendency to the amalgamation of small plots, and some surrender of allotments, owing to the low prices of vegetable produce, is reported in others."

VI. AGRICULTURAL SOCIETIES.

Several Societies, Associations, Farmers' Clubs, and Chambers of Agriculture have been formed for the general advancement of agriculture as well as for special purposes, such as the promotion of the art by means of shows, competitions, prizes, meetings for discussion, the publication of journals and transactions, the employment of chemists, botanists, entomologists, zoologists, veterinary surgeons, the carrying out of chemical, field, and stock-feeding experiments, and influencing the legislation

in connection with farming. The **Royal Agricultural Society** (*q.v.*) of England formed in 1838, the Bath and West of England Society started in 1777, and the Highland and Agricultural Society of Scotland organised in 1784, have done much for thus promoting agriculture. The Smithfield Club, formed in 1798, has also to be credited with excellent services in encouraging the breeding and proper fattening of live stock and exhibiting agricultural produce and implements. The Royal Agricultural Benevolent Institution grants pensions to farmers and their wives and daughters who have become reduced in circumstances. There are several large institutions in Great Britain where a full course of **agricultural education**, with a knowledge of the allied sciences, can be obtained. Amongst these may be mentioned the Royal Agricultural College at Cirencester, the College of Agriculture at Downton, the Agricultural College at Aspatria, and the Agricultural and Horticultural School at Holmes Chapel, Cheshire. There are also Agricultural Departments in connection with the Universities of Nottingham, of North Wales at Bangor, of Edinburgh, and of Aberdeen, the Durham College of Science at Newcastle-on-Tyne, and others. Great attention is now being paid to instruction in **Dairying**, which may be specially studied at the British Dairy Institute at Reading, the Midland Dairy Institute, Kingston Fields, Derby, the Dairy Institute, Worleston, Nantwich, and the Dairy School, Kilmarnock, N.B. It is principally at the various farmers' clubs situated throughout the country that papers are read and discussions held on subjects of moment to agriculture. The pioneer of these clubs is the **London Farmers' Club**, at Salisbury Square, E.C. The several local Chambers of Agriculture in Great Britain are affiliated to the **Central and Associated Chamber of Agriculture** (Broad Sanctuary Chambers, Westminster, S.W.), and concern themselves principally in influencing legislation in the interests of the farmers. **Breed Societies** have been established for practically each recognised breed of horses and cattle in the British Isles. Amongst these may be mentioned for horses the Shire Horse, Clydesdale, Hackney Horse, Hunters' Improvement, Polo Pony, Cleveland Bay, Yorkshire Coach Horse, and Suffolk Horse Societies; for cattle the Shorthorn, Hereford, Devon, Sussex, Red Polled, Galloway, Ayrshire, Jersey, Guernsey, and Polled (Aberdeen-Angus) Societies. Separate **Flock-Book Societies** have also been established for the following breeds of sheep amongst others:—Leicester, Shropshire, Southdown, Oxfordshire Down, Kentish or Romney Marsh, Wensleydale, Somerset and Dorset Horned. There are moreover two Associations devoted to the interests of **Pig Breeders**: viz., the National Pig Breeders' Association, and the British Berkshire Society. The **British Goat Society** also issues a Herd-Book for that description of stock. There are in addition several other associations and co-operations established for special objects connected with agriculture and its allied sciences, such as Poultry, Dairying, Cider-making, and the like.

The **National Agricultural Union** was formed in '93, in pursuance of a resolution of the National Agricultural Conference in Dec. '92. It is, so far as party is concerned, entirely non-political, and on the question of free trade against protection it still holds a neutral

position. The British Produce Supply Association was formed under its auspices, and the following Parliamentary programme has been adopted. (1) To amend and strengthen the law of adulteration, and to prevent the sale of foreign produce as home-grown; (2) Old age pensions for working men; (3) The placing on the whole national income all such charges as correspond to national duties and requirements; (4) Improved parcels post; (5) Appointment of a Select Committee to inquire into the effect on prices of gambling in fictitious produce; (6) Improved Agricultural Holdings Act; (7) Abolition of preferential railway rates on foreign produce; (8) A Tithe Redemption Act; (9) Reform of the beer duties; (10) An International agreement for a stable monetary par of exchange between gold and silver; (11) Facilities for the purchase of holdings by existing tenants; (12) Facilities for the purchase of small holdings. Upwards of 500 local branches and 50 rural councils have been formed over 31 of the agricultural counties. The **President** is Viscount Templeton, and the **Secretary** is Mr. A. T. Matthews. **Offices**, 30, Fleet Street, E.C. For **Agricultural and Technical Instruction (Ireland) Act**, '99, see **SESSION**, sect. 38.

Alaska, a territory in the extreme N.W. of North America, purchased from Russia by the United States in 1868. The area is 531,000 sq. m., and the population in '90 was given as 32,052. The chief town is Juneau, pop. 3000, a point of departure for the Yukon gold region, so named from the river Yukon, which rises in British territory, and has a course of over 2000 miles to its mouth in Behring Sea. The United States Government has established an agricultural experiment station at Sitka, to determine what agricultural produce can best be grown in the country. Encouraging results have already been obtained, and it has been proved that oats and barley will ripen their grain in South-East Alaska. There is a difference of opinion between the American and British Governments as to the exact boundary line between Alaska and British territory, so far as the strip of territory running down the coast from Mount St. Elias to the south end of the Prince of Wales Island is concerned, and we give opposite a map illustrating the situation. The boundary was agreed to, before the purchase of the territory by the United States, in the **Russo-British treaty of 1825**, and the main question is whether the word "ocean" in the treaty is to include the waters inside the islands, as the Americans contend, or to be limited to the high seas outside them, as the Canadians contend. The importance of this is obvious from the fact that the boundary line is to run at a distance of "ten marine leagues or 30 miles from the ocean." The gold discoveries and the value of navigable inlets, such as the Lynn Canal, the Stickine River, and the Taku Inlet, giving access to the gold-fields, have obviously made this question one of the greatest importance, and it was included amongst those referred to the **Anglo-American Commission** in '98. Indeed, this was the rock on which the Commission came to grief during '99. Canada claimed access to the ocean by the three inlets named above, arguing that the intention of the 1825 treaty was not that the ten-league boundary line should follow the indentations of inlets running up long distances inland. The Lynn Canal, for instance, runs inland for nearly 100 miles, and at its northern extremity the

towns of Dyea and Skagway and Pyramid Harbour are situated, affording the best routes to the Klondyke gold-fields. These places Canada claims belong to her, in virtue of her interpretation of the 1825 treaty; but the United States have actual possession of them, and exercise jurisdiction in Skagway. They urge that, although the boundary has not ever been actually delimited, yet it was marked as going round the head of the Lynn Canal on the Russian maps at the time of the cession of the territory to the United States in 1868, and has been treated as American territory ever since. Canada replied that formal protests had been made against this occupation; but till the gold discoveries it had not been necessary to take more energetic action, especially in view of the cost of delimitation. After lengthy negotiations between the British, Canadian and American Governments, who took up the matter when the sittings of the Anglo-American Commission were suspended, a provisional agreement for a *modus vivendi* was come to (Oct. 20th, '99) as follows:—The divisional line on the West Pass, by which the Dalton trail is reached, was placed at 22½ miles above Pyramid Harbour, which is regarded under the treaty as a tide-water mark, so that the Canadians are not allowed to reach any point on the Lynn Canal. Moreover, there is no permission given for a free port, or even for the free transfer across American territory of Canadian goods, exception being made in favour of miners' belongings. The *modus vivendi* followed the precedent established by Mr. Evarts in '78, with regard to an agreement for a temporary boundary on the Stickine River, in Alaska, by means of an exchange of Notes. The line on the Chilcut River was drawn 22½ statute miles from the head of navigation on the Chilcut inlet of the Lynn Canal, and on the Klakini River 12 statute miles farther inland, and the whole valley of the Porcupine Creek was included within the American line. On the White and Chilcut Passes the line was fixed at the summit or watershed, these being points which for some time past have been observed by the Customs authorities of the two countries. The provisional arrangement was made without prejudice to the claims of either party in the permanent adjustment of the boundary, which Canada strongly desired should be submitted to arbitration, with similar terms of reference to those agreed upon in the case of Venezuela. It was understood, however, that the United States would not consent to this. See **ANGLO-AMERICAN COMMISSION**. For details as to the Yukon gold districts see **NORTH-WEST TERRITORIES**.

Albani, Madame, the vocalist, whose name prior to her marriage with Mr. Ernest Gye was Emma la Jeunesse, was b. in Montreal. No *prima donna* has a more extensive *répertoire*, and her fame is as great on the oratorio platform as on the lyric stage. She studied under Duprez in Paris, and under Lamperti in Milan. She made a successful *début* at Messina in 1870, and subsequently sang in other Italian theatres, coming to the Covent Garden Opera House in '72. Wagner's "Lohengrin" and "Tannhäuser" owe much of the favour they have received in this country to her intellectual and refined impersonation of the heroines. She has sung in Paris, Berlin, Vienna, and other Continental cities, and throughout the United States, and is indispensable at the

triennial Handel Festivals. Address: 16, The Boltons, South Kensington, S.W.

Albania is a part of the Turkish Empire in Europe, extending along the sea coast between Montenegro in the north and Greece in the south. It includes the four vilayets of Scutari, Janina, Kossova, and Monastir, and the bulk of the population are Mahomedans. There are about 1,500,000 Albanians, divided into the Ghegs who live in the north of Albania, and the Tosks who dwell in the south. Greece and Montenegro are both keenly interested in the future of Albania. A strong party advocates the independence of Albania under a Governor-General appointed by the Powers, with a National Assembly, the Sultan merely retaining the suzerainty. See **TURKEY**.

Albany, H.R.H. the Duchess of, daughter of the Prince and Princess of Waldeck-Pyrmont, and sister of the Queen-Regent of the Netherlands, was b. Feb. 17th, 1861. She married H.R.H. Prince Leopold of England, Duke of Albany, April 27th, '82, and became a widow by his sudden death ('84). In '88 the Princess lost her mother. H.R.H. receives a pension of £6000 a year from the British Government. In '99 her son the Duke of Albany, by the renunciation of the eldest son of the Duke of Connaught, became heir-presumptive to the Duchy of Saxe-Coburg; and it was arranged that he should live at Coburg with his mother, and receive a German education there.

Alberta. A district of the North-West Territories (*q.v.*), and a future province of the Dominion of Canada. Area, 106,100 sq. m.

Albert Medal, The, was instituted in 1866 and extended in '67 and '77, for the purpose of rewarding acts of heroism performed by civilians at sea or on land. The recipients of the decoration belong to one of two classes. The first class are awarded a decoration consisting of a gold oval-shaped badge bearing the words on a garter "For Gallantry in Saving Life at Sea," or "on Land," as the case may be. Members of the second class, whose acts of bravery, though meritorious, have not been so striking, receive a bronze badge with the same inscription.

Alexander I., King of Serbia, was b. 1876, and ascended the throne on the abdication of his father, King Milan (*q.v.*), on March 6th, '89. Privately educated at Belgrade, according to the programme of the German gymnasium or high school. When Crown Prince he accompanied his mother, Queen Natalie, into exile after her separation from the King, but was forcibly removed from her at Berlin, and conveyed back to Belgrade. He was under the guardianship of M. Ristitch and M. Belimarkovitch as Regents until April '93. The country having then for some time been in a state of dissension, the young Prince, doubtless at the suggestion of King Milan, suddenly assumed the reins of power. In '94 his father returned to Belgrade to aid him in the government of the country, and he has since governed under the old constitution of '69. See **SERBIA**.

Alexandra, Princess of Wales. See **WALES, PRINCE OF**.

Algeria. One of the Barbary States of North Africa, now a French province, administered by a Governor-General assisted by a consultative Council. Area, 184,474 sq. m.; pop. ('96), 4,429,424. Inhabitants include, besides the natives, French and European settlers, about 765,000, and about 50,000 Jews. The country

is divided into the three departments of Oran, Constantine, and Algiers, capital cities of same names, each sending one senator and two deputies to the National Assembly, and subdivided into twelve arrondissements; also the Saharan borders, administered by military authorities. There are 2156 miles of railway. The products of the country include esparto and halfa grass, barley, wine, oil, tobacco, wool, iron and zinc ores, etc. Workable beds of phosphates have lately been discovered in the region between Oran and Tunis. The French forces maintained in Algeria consist of an army corps numbering 55,000 men. The cost of the colony to France has always been far greater than its revenues. Revenue, '98, £2,081,500; expenditure, £2,846,000. Exports, '97, £11,760,000; imports, £11,145,160. For Governor-General, etc., see DIPLOMATIC.

Allotments and Small Holdings Association. This Association was founded in '85 to assist rural labourers to obtain small allotments of land and to maintain their rights to the charities bequeathed for their benefit in past years. Where parish councils have been established under the Local Government Act of '94 a fair area of allotments has generally been provided. However, nearly half the parishes of the country are either included in urban districts, or are too small in population to be entitled to elect parish councils. In these and in urban districts the aid of the Association is found to be as much required as ever to enable the labourers to obtain the much valued plots of land. The President is Sir Walter Foster, M.P., and the Secretary Mr. C. D. Sturge. The Offices are at 35, Moor Street, Birmingham.

Alma-Tadema, Sir Lawrence, R.A., was b. at Dronryp, in the Netherlands, 1836. Originally intended for one of the learned professions, he devoted himself very largely to the study of antiquity; and in '52 entered the Antwerp Academy as a student. Subsequently he assisted Baron Henry Leys in painting several of his large pictures, and finally came to London, where, in '73, he obtained letters patent of denisation, having resolved to reside permanently in this country. Since then he has delighted the art-world with his productions, in regard to the majority of which he has put to excellent use his early classical training. Honours of all kinds, and by various countries, have been showered upon Sir Lawrence, who was knighted in '99. He was elected R.A. '79, and *membre associate* in the painting section of the Institute of France '91; Lit.D. Dublin University '92; D.C.L. Durham '93. Sir Lawrence married in '71 Miss Laura Epps, herself an accomplished artist. Address: 17, Grove End Road, St. John's Wood, London.

Ambulance Association, St. John. Established in 1877, by the Duke of Manchester, and the Chapter of the Order of St. John of Jerusalem, for the purpose of disseminating general information as to the preliminary treatment of the sick and injured among all classes of society. A course of instruction is given to students. Those who pass the examination receive a certificate of proficiency. Pupils who have passed the first examination are allowed to attend a second course on home nursing and hygiene. Considerably over 400,000 certificates have been awarded to persons of both sexes. An Invalid Transport Corps has also been formed. On public occasions—as on H.M. the Queen's Jubilee—ambulance stations are formed by the men and nurses belonging to the various corps

of the "St. John Ambulance Brigade," and "first aid" is rendered both in cases of injuries from accidents and of sudden illness. The work has been extended to the East and West Indies, Canada, China, Australia, New Zealand, and different parts of Europe and Africa. President, H.R.H. Prince of Wales, K.G. Chairman, Viscount Knutsford, G.C.M.G. Chief Secretary, Col. Sir Herbert C. Perrott, Bart. Head Offices, St. John's Gate, Clerkenwell, London, E.C.

American Political Parties. See UNITED STATES, POLITICAL PARTIES OF.

Anarchy. See '99 and previous eds.

Ancient Order of Foresters. See FORESTERS.

Anegada. A British West Indian island. Area, 14 sq. m. Belongs to the presidency of the Virgin Islands, under the federal government of the Leeward Islands (*g.v.*).

Anglican Church, The. By the Anglican Church is meant collectively that group of autonomous churches which are in communion with or have sprung from the mother Church of England. They are the following: The Church of Ireland, the Episcopal Church of Scotland, the Protestant Episcopal Church of the United States of America, the Church of Canada, the Church of Australia, the Indian Church, and the Church of South Africa, which are all autonomous bodies under the jurisdiction of their own metropolitans, and not amenable to the Ecclesiastical Courts of the Church of England, though they all look to the Archbishop of Canterbury as Patriarch. In addition to these autonomous Churches in connection with the Anglican Communion there are twelve missionary bishops, representing the English Church in various remote regions of Asia, Africa, and America; and three or four representing the Protestant Episcopal Church of America. The Reformed Episcopal Church of America and the Free Church of England are not recognised as authentic branches of the Anglican Church. The American Church possesses 82 bishops in 58 dioceses and 27 missionary jurisdictions, and 4776 other clergy. It has 644,083 communicants, and upwards of 1,650,000 baptised members. There are 7 bishops in the Scotch Episcopal Church, the Bishop of Brechin (Rev. Dr. Jermyn) being Primus. The Church of Ireland (*g.v.*) has 2 Archbishops and 11 bishops. India and the various Colonies of the British Empire own 67 bishops of the Anglican Church, while 2 are appointed for Europe. In all essential respects the doctrine and discipline of the Churches in connection with the Anglican Communion is the same, differentiations being rather in detail of development than in form or character (see CHURCH OF ENGLAND). One important difference is the restoration of Diocesan Synods and the general Synodical action which marks the un-Established branches of the Church. The tendency of the American, South African, and Scotch Churches is towards High Churchmanship, and the same may be said in a less degree of the Indian Church; while Broad Evangelicalism is the rule in the colonies.

Anglican Orders. See '99 and previous eds.

ANGLO-AMERICAN COMMISSION.

One of the chief results of the friendly feeling which, after the American-Spanish war, sprang up between the United States and Great Britain and Canada was the agreement on May 30th,

'98, to appoint a Commission to adjust all controversial matters between Canada and the United States. The subjects submitted for the consideration of the Joint Commission were officially determined as follows:—"The Behring Sea sealing question, reciprocal mining regulations, the Alaskan boundary, restrictive regulations for the preservation of the fisheries of the Great Lakes, the North Atlantic fishery question, the boundary question, the Alien Labour Laws, and reciprocity of trade." Lord Herschell, Sir Wilfrid Laurier, Sir Richard Cartwright, Sir Louis H. Davies, and Mr. J. Charlton, a member of the Dominion Congress, were appointed as **British Commissioners**. The **American Commissioners** were Mr. Fairbanks, Mr. Gray, Mr. Dingley, Mr. Kasson, and Mr. J. W. Foster. The Commission met at Quebec in August '98, Lord Herschell being appointed chairman; Mr. W. C. Cartwright, of the Foreign Office, and Mr. H. Bourassa, M.P. for Labelle County, Quebec, were chosen British secretaries, and Mr. C. P. Anderson American secretary. After sitting at Quebec till Oct. 8th, '98, an adjournment took place, and the Commissioners reassembled at Washington on Nov. 1st, '98. They were not able, however, to come to an agreement on the question of the Alaskan boundary and tariff reciprocity, and smaller concessions in regard to lumber were offered by the Americans than the Canadian members of the Commission were able to accept. As time went on it was rumoured that the Commission would prove to be fruitless, and the probable collapse of negotiations was freely discussed. Two of the Commissioners, Lord Herschell and Mr. Dingley, unfortunately died early in '99, and the Parliamentary and other duties of various members led to a further adjournment on Feb. 20th, '99.

An official statement of the position of affairs at that time was issued by the British Foreign Office (22nd) as follows:—"The British and American Joint High Commission recently in session at Washington has adjourned, to meet at Quebec on August 2nd, unless the chairmen of the respective Commissions shall agree upon another date. The Commission has made very substantial progress in settlement and adjustment of many of the questions upon which it has been earnestly engaged, but it has been unable to agree upon the settlement of the **Alaskan boundary**. This problem has been a complicated and difficult one; but the Commissioners, acting in utmost friendliness and cordiality, have been unable to agree upon a satisfactory adjustment. Difficulties, apart from immediate delimitation of this boundary by the Commission itself, arise from conditions under which it might be referred to arbitration. The British Commissioners desired that the whole question should be referred on terms similar to those provided in reference to the Venezuela boundary line, and which, by providing an umpire, would insure certainty and finality. The United States Commissioners, on the other hand, thought local conditions in Alaska so different, that some modifications of the Venezuela boundary reference should be introduced. They thought reference should be made to six eminent jurists, three chosen by each of the high contracting parties without providing for an umpire, they believing that finality would be secured by the majority vote of the jurists so chosen. They did not see any present prospect of agreeing to a European umpire to

be selected in the manner proposed by British Commissioners, while the British Commissioners were unwilling to agree to the selection of an American umpire in the manner suggested by the United States Commissioners. The United States Commissioners further contended that special stipulations should be made in any reference to arbitration that existing settlements on the tide waters of the coast should in any result continue to belong to the United States. To this contention the British Commissioners refused to agree. It was, therefore, deemed advisable to adjourn to a convenient date, in order to enable the respective Governments to further consider the subject, with respect to which no conclusion has yet been reached." Great disappointment was felt and expressed in Canada at this suspension of the negotiations, and measures of reprisal towards the United States were urged upon the Government. Sir Wilfrid Laurier, however, speaking on May 27th, '99, discountenanced any policy of retaliation, while asserting that Canada would make a firm stand for her rights. He said that, unless the diplomatic negotiations then going on between the British and American Governments resulted in the settlement of the Alaska boundary question or its reference to arbitration, it would be useless for the Commission to resume in August. As a matter of fact, the Commission did not resume in August; but negotiations between the Governments were continued, and in October an agreement was formally come to for a temporary adjustment of the boundary. The Canadian claim to the Lynn Canal was not conceded, nor was any permission given for a free port, or for the free transfer across American territory of Canadian goods, except miners' belongings. This provisional arrangement was made without prejudice to the claims of either party in the permanent adjustment of the boundary, and thus matters stood at the time of going to press. For full details of the conflicting claims of Canada and the United States as to Alaskan territory see **ALASKA**.

The **lumber question** was the most important amongst the other trade matters under the consideration of the Commission, and an article in the *Times* (March 17th, '99) threw valuable light on the position of affairs. Canada possesses apparently inexhaustible timber forests of enormous extent, and is practically the only country in North America that can afford to export timber. The United States supply is comparatively small, and is rapidly being consumed. Her need of wood-pulp is imperative in view of the great paper-making and other industries which depend upon it, and she obtains great quantities of logs for the supply of her pulp and timber mills from the Canadian forests. Many American timber mill owners have indeed bought large forest areas in Ontario and elsewhere. The effect of this is that the Canadian raw material feeds the American industry, and the import duties imposed under the McKinley tariff practically shut Canadian sawn lumber and wood-pulp out of the American market. Canada therefore put forward the demand that her lumber should be admitted free into the United States. This demand was not granted. On the contrary, the present Administration of the United States imposed an import duty of \$2 per 1000 ft. of sawn lumber, and increased the import duties on other wood products. Thereupon the Ontario Provincial Government

passed a measure prohibiting the manufacture of all timber taken from the Ontario crown lands (including most of the forests purchased by American mill owners) except upon Canadian soil.

Anglo-American League. The, was formed July 13th, '98, at a meeting held at Stafford House on that date, the Duke of Sutherland presiding. The object is to give practical effect to the terms of the following resolution passed at that meeting: "Considering that the peoples of the British Empire and of the United States of America are closely allied in blood, inherit the same literature and laws, hold the same principles of self-government, recognise the same ideals of freedom and humanity in the guidance of their national policy, and are drawn together by strong common interests in many parts of the world, this meeting is of opinion that every effort should be made in the interest of civilisation and peace to secure the most cordial and constant co-operation between the two nations." Membership is open to all British subjects and citizens of the United States on payment of a subscription of not less than 1s. and not more than £1 per annum. Donations for a larger sum than £1, however, will be gratefully accepted. A very strong and representative general committee has been formed. The **Executive Committee** consists of the following:—The Right Hon. James Bryce, M.P. (Chairman), The Duke of Sutherland (Hon. Treasurer), The Earl of Jersey, G.C.M.G., Earl Grey, The Earl of Crewe, Lord Coleridge, Q.C., Rt. Hon. Horace Plunkett, M.P., Sir Stafford Northcote, Bart., C.B., M.P., Sir William Houldsworth, Bart., M.P., Thomas Burt, Esq., M.P., John E. Ellis, Esq., M.P., Percy W. Bunting, Esq., H. W. Massingham, Esq., Alfred C. Harmsworth, Esq., George Wyndham, Esq., M.P., E. J. C. Morton, Esq., M.P., Sir David Dale, Bart., Sir Walter Besant, Sir W. Martin Conway, Thomas H. Ismay, Esq., D.L., J.P., Rev. A. M. Fairbairn, D.D., Prof. J. Westlake, Q.C., Prof. A. V. Dicey, Q.C., W. T. Stead, Esq., T. Fisher Unwin, Esq., with power to add to their number. The **Hon. Secretaries** are Sir Frederick Pollock, Bart., T. Lee Roberts, Esq., R. C. Maxwell, Esq., LL.D. The temporary offices are at 6, King's Bench Walk, Temple, E.C.

Angola. Portuguese West Africa, or Lower Guinea. It is bounded on the north and east by the Congo State and Rhodesia, on the south by German South-West Africa, and on the west by the Atlantic Ocean. **Stated area**, 480,000 sq. m.; **pop.** 4,000,000. **Capital**, St. Paul de Loanda. Divided into the five districts of Congo, Loanda, Lunda, Benguela, and Mossamedes. There were 230 miles of railway in operation in '96. The chief products are coffee, rubber, sugar, oils, and ivory. A company working in Mossamedes has a concession for mining, cattle-rearing, and fish-curing.

Anguilla. A British West Indian island. **Area**, 35 sq. m.; **pop.** 3699. Belongs to the presidency of St. Christopher, in the federal government of the Leeward Islands (*q.v.*). Is low and flat, deficient in wood and water. Produces salt from a lake, phosphate of lime, cattle, ponies, and garden stock.

Annam. An empire in S.E. Asia, which became a French protectorate in '84. It formerly included Tonquin, French (or Lower) Cochinchina, and Cambodia. **Area**, 81,000 sq. m.;

pop. 6,200,000. **Capital**, Hué, near the coast, garrisoned by French troops. Annam proper stretches northward along the coast from French Cochinchina to Tonquin, and, since the war with Siam in '93, has extended its western boundary to the river Mekong, which now separates it from Siam. **Principal productions**: rice, maize, tobacco, sugar, timber, and cinnamon. Coal and iron have been discovered in abundance. There is an Emperor named Thanh-Tai, with court and dignitaries, but the government is really in French hands. The various peoples belong to the Indo-Chinese race, a link between Chinese and Malays. Religion chiefly Buddhism. Polygamy prevails generally. See **INDO-CHINA**.

Antarctic Exploration. See **ARCTIC AND ANTARCTIC EXPLORATION**.

Anthropology, '99. No event during the past year has been of more interest to anthropologists than the return of the expedition which was sent out by the University of Cambridge, under Professor Haddon, for the scientific exploration of **Torres Strait and New Guinea**, with special reference to ethnological work. As it was the first expedition of its kind ever despatched from this country, it was watched with keen interest by British students of anthropology. Although the results are not yet worked out, it is known that in every department of observational anthropology valuable work has been accomplished. Not only have ethnological collections been brought home, but Dr. Seligmann, Dr. Rivers, and other officers of the staff made accurate observations on the physiology and psychology of the natives, whilst Mr. Sidney Ray studied their languages. A work of exceptional merit, dealing with the **natives of Central Australia**, has been written by Professor Baldwin Spencer, of Melbourne, and Mr. Gillen, the Protector of Aborigines at Alice Springs in the heart of South Australia. Its special value lies in the full description of the mysterious ceremonies of the natives which the authors, having undergone tribal initiation, were permitted to witness. Mr. J. G. Frazer, of Cambridge, and Professor Tylor, of Oxford, have borne witness to the value of the information thus acquired in its bearing on the origin of totemism. Mr. F. W. Christian, who has spent many years in the exploration of the **Caroline Islands**, has brought home a large collection of ethnological objects, which he has described before the Anthropological Institute. The curious stone money of the Isle of Yap consists of large perforated discs of coral limestone quarried in the Pelew Islands. A valuable series of illustrations has recently been issued by Mr. Edge-Partington, as the third part of his **Ethnographical Album of the Pacific Islands**. The new illustrations are based on materials collected during a recent tour in the Pacific. Mr. C. H. Read, of the British Museum, in presiding over the Anthropological Section of the British Association at the Dover meeting, explained the progress which has been made in developing his scheme for the foundation of a **Central Bureau of Ethnology**. One of its great objects will be to collect, on a systematic basis, the records of races which are fast disappearing, or, if not, are adopting habits of civilisation, and thus losing their primitive customs. It appears that the formation of the Bureau is receiving the favourable consideration of the Government. Mr. Read suggests that a grand anthropological

museum should be established at the Imperial Institute, whither the collections from the British Museum might be removed. An official report by Mr. O. M. Dalton has recently shown the defective condition of our ethnological collections compared with those of Germany. The late Sir W. Flower did much to found an anthropological collection in the Mammalian gallery of the Natural History Museum, but the country possesses no public collections in any way comparable with those displayed in the new Anthropological Museum in Paris. Mr. Read has suggested that a professorship of anthropology should be established in the new University of London. At present the only Chair in this country is that at Oxford, so ably occupied by Dr. E. B. Tylor. The importance of forming, before the advance of civilisation renders it too late, an extensive collection of anthropological photographs, systematically arranged, has engaged the attention of Mr. J. L. Myres and the Rev. H. N. Hutchinson. It is hoped that such a collection may be acquired by the Anthropological Institute. Professor Flinders Petrie, with characteristic ingenuity, has suggested a method of defining with some approach to precision the sequences of prehistoric remains; and he has also called attention to the very early use of alphabetical characters in Egypt. Professor Macalister of Cambridge has made a vast number of measurements of Egyptian skulls; and he seems, like some other modern craniologists, to have become rather distrustful of the scientific value of the cephalic index as a means of racial diagnosis. A pigmental survey of all the school-children in East Aberdeenshire has been made through the instrumentality of the Buchan Field Club. Dr. Beddoe's scheme of colours for hair and eyes was used, with some modification. Compared with similar surveys of German children, it is seen that East Aberdeenshire is much darker than North Germany. Germany gets more brunette in passing from north to south, and Mr. J. Gray pointed out to the British Association that we must go to the extreme south of Germany before reaching a district comparable for pigmentation with East Aberdeenshire. A new edition of the useful volume of *Anthropological Notes and Queries*, by Dr. Garson and Mr. Read, has been issued by the Institute. "Man Past and Present" is the title of a valuable anthropological work recently written by Professor A. H. Keane; whilst "The Study of Man" is the title of another excellent work on anthropology contributed by Professor Haddon to the "Progressive Science Series." Anthropology is represented in this country by the *Anthropological Institute of Great Britain and Ireland*. President for '99—1900, C. H. Read; Hon. Secretary, W. Croke. Offices, 3, Hanover Square, W. The Institute issues a quarterly journal.

Anticosti. A large island in the Gulf of St. Lawrence under the Government of Canada. It is 125 miles long by 30 wide. Area, 2600 sq. m.; pop. 600. The coast is rocky, barren, and dangerous. The only organised settlements are lighthouses, fishing and refuge stations. The interior is a wilderness of mountain, forest, and swamp, abounding in game. Mineral wealth is reported.

Antigua—i.e., "ancient," so called by Columbus. A British West Indian island. Area, 180 sq. m.; pop. about 37,000. With Barbuda and Redonda forms a presidency of the Leeward

Islands. Its capital, St. John, pop. nearly 10,000, is the seat of the federal government. **English Harbour** is a naval station, and one of the finest harbours in the West Indies. The island, though suffering sometimes from drought, is very fertile. Produces sugar and pine-apples chiefly. Government is administered by the Governor of the Leeward Islands, four delegates are sent to the Federal Council. The Imperial Government having intimated that it could only grant financial aid on condition that the island should become a Crown colony, a Bill effecting this change in the constitution was carried through all its stages (March 23rd, '98). The Council now consists of eight official and eight non-official members, all nominated by the Governor.

Antilles. Name of the chain of islands surrounding the Caribbean Sea. They are divided into Greater and Lesser. See WEST INDIES.

Arabia. Is a large peninsula in S.W. Asia having an area of about 1,000,000 sq. miles, and a population of about 12,000,000. The provinces of Hedjaz and Yemen, contained in it, are under Turkish rule, while much of the remainder of the country is under British influence, exercised in the case of Oman through the Sultan of Muscat. Hedjaz contains 96,500 sq. m., and a pop. of 350,000. The Hedjaz camels are bred here, and about 20,000 are sent annually to Syria. Yemen has an area of 77,200 sq. m., and a pop. of 750,000. Mecca, besides being the goal of Mahomedan pilgrims, is the chief distributing centre for Central Arabia. The chief exports are sheep and goat skins, mother-of-pearl, and gum, but all in very small quantities.

Arbitration. See INTERNATIONAL ARBITRATION LEAGUE, PEACE CONFERENCE, and PEACE SOCIETY.

ARCHÆOLOGY, '99. T.M. S.W.H.

The chief interest in '99 has centred abroad rather than in England, and especially in Rome and in the Forum, where the work has been of a highly important character. Signor Lanciani has in the pages of the *Athenæum* from time to time given an account of the discoveries, which include the famous Black Stones and many important inscriptions and stelæ. The discovery is recorded of a number of statues of vestal virgins, and amongst them one whose name is carefully erased, while the inscription in her praise remains, indicating, as is most probable, that she became a Christian, as Prudentius records. To an Englishman a notable feature is the gift to the Italian Government of 64,000 lire for the purchase of certain houses that covered the Æmilia site, by Mr. Lionel Phillips. Already some superb carved marble work and many important treasures have been found on this site. Excavations of importance are also being conducted at Susa, at Niederbonn, in Alsace, where a temple of Mercury is being exposed; at Paphos by the British Museum, and at Priene. In England similar work is still in progress at Silchester and at Waverley Abbey. The chief discoveries at the former include a tannery, a curious half-timbered house of about A.D. 80, a fine pavement, and a tile having upon it the word *Satis*, evidently marked by the workman's wet finger. Many things have been found at Waverley of interest, and all will be exhibited at Guildford in the Town Museum. At Dorchester a good pavement has been exposed, and excavations are just being commenced at Uriconium. Scotland has been most interesting, as a fort has

been laid bare in the Clyde Valley, and also a crannog of more than usual interest, and more than one canoe; while another canoe has been found at Scarisbrick. Other notable discoveries are a strange underground chamber at Bridgend, the remains of a Roman hospital at Baden, with various medical and surgical instruments in it—and of special interest to Americans—the finding of an ancient sundial, having on it the arms of Washington. The notorious Shipway forgery case deserves some mention, more especially on account of the lurid light it sheds on the carelessness of those persons who have charge of such invaluable documents—*Quis custodiet custodes?* Very careful attention was given to the question at the Congress of Societies this year, and eventually a strong request was sent to the Government that the matter should receive urgent attention. This Congress was a very successful one, and many important questions were discussed at it, amongst others being those of Index to Wills, Catalogues of Portraits, and especially the important one of proper care of Parish Registers and proper facilities for their inspection. A series of county register offices was suggested, at which it would be possible to inspect all such documents, and at which certain fixed fees should be charged which should make the offices self-supporting.

There have been several very important sales during the year, notably the Marlborough gem sale, at which the British Museum were able to secure several very desirable treasures. Then the sale of the Rendlesham MSS. deserves notice, and also that of the Morrison and Philipps MSS. The books of the Kew Bee Society and those of the Loddiges family, and in Numismatics, the Lowsley tokens and coins, deserve notice; but the most notable of all was the Forman sale of antiquities, also notable for the admirable catalogue that Messrs. Sotheby got up for the occasion.

There have been several very important papers read at the societies during the year. At the Society of Antiquaries papers on the Syon Cope, remains at Tripoli, Norwich Cathedral, the Brocks of Caithness, and the metallurgy of Japan must be noted. At the British Archaeological Society, on Ramsey Abbey, Dunmow Tower, the Fen Country, Ancient British Costumes, the Clyde Valley, Fort and Crannog, Curious Peterborough Customs, the ancient University of Llantwit Faur, which in Saxon times had 2000 students, and on the Crannog at Killucan. The Numismatics had papers on Shrewsbury and Isle of Man Mints; and the Archaeological Institute on Western Architecture, Ecclesiology of North-east Somerset, the Anointing of the Kings, and a very important one on Consistory Courts, by Chancellor Fergusson.

Much of the best work of the year has appeared in books, of which the following deserve notice: Works on the Registers of St. Dunstan, Stepney, Bury, Canterbury, La Patente, Spitalfields, and Whickham; on the records of Blanchminster, Warwick, Cardiff, and the village of Harrold. A digest has also been published of the Worcester Registers before 1812, and a record of the Gloucester marriages; the Verney Memoirs; Abercromby's "History of the Fens"; Dr. S. Evans' "In Quest of the Holy Grail"; Lawler's Book Auctions; Muntz on the Pontifical Tiara; and Besant's "South London" must also be mentioned. The British

Museum have also a splendid work on the Papyri, and at length the much-wanted work on the Coins in the Museum at Glasgow has seen the light. Three fine volumes on Cyprus (British Museum) must not be overlooked, nor the productions of the Pipe Roll Society, Palæographical Society, and Yorks Archæological Society—notably the History of Yorks School issued by the latter society. A still more noteworthy work is the newly planned Victoria Series of County Histories, of which the volume on Hants is well forward and approaching completion. This series will not be mainly archæological, but will include a great deal of such information. Three volumes of the Historical Manuscripts Commission have appeared—viz., those on the MSS. of the Ormonde, Montagu, and Cecil families. An interesting correspondence has been carried on in the pages of the *Athenæum* on the old Junius controversy; and some agreeable letters have also appeared on the old game of Conquerors. In Paris a very great book has appeared called "La Tradition au Pays Basque," which has provoked many articles on that fascinating subject; but in all the round of Archæological books few have made such a sensation as Prof. Furtwangler's work on Forgeries. The Berlin Museum was proved to have been cruelly taken in, and at once removed a great marble head from its galleries; while other museums began to look into the history of their recent purchases. M. Molinier's great work, "Les Ivoires," must not be forgotten. The fall of some columns at Karnac, in Egypt, has alarmed the Archæologists of Europe, and drawn attention to the possibility of still further damage from the waters of the Nile. An important step has been taken in Crete by the issue of a decree respecting all ancient monuments in that island. By it they are well safeguarded and fear of damage at an end. The fees charged to visitors in Egypt for seeing the tombs now realises a sum of £2500 per annum, and Sir W. Garstin finds the sum none too large for the needful work of fitting doors to the tombs and taking other steps for their protection and preservation. Two somewhat serious matters must be mentioned—the fall of Michael Angelo's Leda in Florence, and the painting up at Canterbury of one of the tombs of the Archbishops. The new Museum at Winchester in the City Gate, the new society in Herts, the promised reissue in facsimile of the *Germ*, the discovery of Cardinal Wolsey's Hat, and the exhibition of Church plate at the Church Congress, must not be overlooked; while of things promised to be expected we must name; further explorations at Fountains and at Wartre Priory, a book by Prof. Supine on the Ceramic Disks on Italian Churches, and the Roman Missal and Irish "Liber Hymnorum" by the Henry Bradshaw Society. The new law passed at Athens, protecting in most definite form all the archæological treasures of that country, is an event of the first magnitude, and will prevent much destruction in Greece. The discovery of certain encaustic panels at Bosco Reale that the British Museum has acquired, the discovery of stone implements in Griqualand, the anthropological researches by Mr. Christian in the Caroline Islands, and the discovery of a chair of the period of St. Augustine, and said to have been used by him at Stanford Bishop, and its removal to Canterburys are other items that deserve record. Finally,

the annual outing of the Royal Archæological Society was to Buxton and the neighbourhood; and of the British Archæological Society to Ipswich; and our obituary list includes Sir Monier Williams, C. H. Coote, Arthur Gibbs, H. V. Tebbs, Sir Henry Dryden, and M. J. P. Six.

Archbishops, English. See CHURCH OF ENGLAND, and PEERAGE.

Arches, Court of. See ECCLESIASTICAL COURTS.

Architects, Royal Institute of British. See ROYAL INSTITUTE OF BRITISH ARCHITECTS.

Architects, The Society of. Founded in 1884 and incorporated by the Board of Trade in '93, it has taken the most active and efficient steps for the compulsory examination of all persons to be hereafter admitted as architects in Great Britain; and supports the Bill now before Parliament for the registration of existing architects and their federation. The Society has enrolled nearly 600 members. Applicants for admission into the Society, with two exceptions, are required to pass either an examination held by the Society, or by other specified bodies, which may be taken in lieu of or partly in the place of the Society's examinations, which are held twice a year, in April and October. The exceptions referred to are—(a) candidates who are not less than 28 years of age, and have been directly engaged professionally in architectural pursuits as principals for at least seven years; and (b) candidates who are not less than the above age, and have been directly engaged professionally in architectural pursuits, as assistants or as assistants and principals, for at least ten years. All candidates who seek election into the Society of Architects will be required to satisfy the Council that they possess a competent knowledge of architecture, building construction and materials, and modern practice. A register of students between the ages of 16 and 22 years is open to pupils or assistants in architects' offices, nominated by a member of the Society subject to the approval of the Council. There is also an Employment Register, free to members and students, at the disposal of non-members, at a nominal fee, while medals and awards are given in connection with the examinations and students' competitions, etc. The Year Book, price 2s., giving list of members and every information, may be had on application to the Secretary of the Society, at St. James' Hall, Piccadilly, W.

Architectural Association, The (London) is carried on under the authority of the Literary and Scientific Institutions Act of 1854. Its objects are to provide facilities for the study of architecture, and to be a medium of friendly communication between the members and others interested in architectural progress. Instruction is given by lectures and classes, and a studio, each of which is under the management of a paid instructor or lecturer. This education extends over four years. In the first Division probationers, who are members of the Association, are prepared for the intermediate examination of the Royal Institute of British Architects; and in the second Division members of the Architectural Association are prepared for the final examination, qualifying for candidature as A.R.I.B.A. The Architectural Association numbers 1247 members, and has a good lending library. The monthly num-

bers of its Sketch Book, which are much appreciated, consist of illustrations from subjects of interest to architects in the various styles of the past, reproduced from measured drawings and sketches by members of the Association, of architectural students, and others. A journal, *Architectural Association Notes*, is also published monthly. The entrance fee is £2 2s., and annual subscription £1 1s. The Association is located at 56, Great Marlborough Street.

Architecture. See previous eds.

Arctic and Antarctic Exploration. During '99 several expeditions were engaged in the Arctic regions; some of these have returned, others are still in the Polar ice. Prof. Nathorst, who last year conducted an expedition to Spitzbergen, sailed in May for East Greenland, with the primary object of searching for any trace of André, and the secondary one of examining the country. He returned in September, no trace of André having been found; but good work was done, many new inlets having been discovered in the neighbourhood of Franz Josef Fiord, the coast charted, and a valuable ethnographical collection made. The Danish expedition under Lieut. Andrup, which left Copenhagen in Aug. '98, returned in Sept. '99. The coast was examined from Agmasalik, 65° 30' N. to 67° 12' N., and two depots established for next year's operations. Mr. Wellman's expedition returned to Tromsø on Aug. 17th, having wintered in the Arctic region. After reaching Franz Josef Land, an outpost, Fort McKinley, was established in lat. 81° N., and two men left in charge, while the main party wintered at Cape Tegetthoff on Hall Island, lat. 80° N. In February Mr. Wellman and a party started north to Fort McKinley, and there found that one of the men had died. They then pushed northwards, and are said to have discovered land north of the Frieden Islands, but a serious accident sustained by Mr. Wellman obliged them to return. On June 12th the Duke of Abruzzi, with a full staff, sailed from Christiania in the *Stello Polar*. He proposes to winter in the northern part of Franz Josef Land, and to make a start for the Pole in spring. News has been received of the Peary and Sverdrup expeditions both of which wintered in the Arctic regions, by the *Windward*, which reached Newfoundland in September. Lieut. Peary had not succeeded in advancing beyond his previous farthest north point, and several members of his party had suffered severely from frost-bite. He had, however, explored the coast of Grennell Land to its western extremity. Captain Sverdrup, who had wintered in the *Fram*, about fifty miles to the south of Peary, is said to have explored Ellesmere Land. He intended again pushing north.

The Antarctic region is now the object of special interest. The efforts made by the Royal Geographical Society in association with the Royal Society have at last met with a very considerable measure of success. A generous gift, by Mr. Longstaff, of £25,000 gave a great impetus to the scheme, and the long-looked-for Government help has been promised. In response to the representations of a very influential deputation, it was stated that Government would recommend a grant of £45,000 to be spread over three years, conditionally on a like sum being provided from other sources. It is hoped that a British National Antarctic expedition will be able to

co-operate with the similar one which is being fitted out in Germany. The Belgian Antarctic expedition under Captain de Gerlache, as to the safety of which grave fears were entertained, has returned, though with the loss of two members. After leaving Magellan Strait, in Dec. '97, the *Belgica* made for the South Shetland Islands, and discovered other islands, which were named the Palmer group and Dance Land. In March the ice-pack was encountered in 71° 31' S., 85° 16' W., and the vessel was obliged to turn; a week later it was closed in, at a distance of sixty or seventy miles from the edge. Here the winter was passed, and early in spring an attempt was made to cut a way out. After three months' hard work this was effected, and on Mar. 14th, '99, open sea was reached, and Puntas Arenas on Mar. 28th. The most southerly point attained was 71° 36' in 92° W. The deepest sounding taken was 2187 fathoms, the greatest known depth south of Cape Horn. This is the first occasion on which men have wintered in the Antarctic region. Another Antarctic expedition is that organised by Sir George Newnes, and placed under the command of Mr. Borchgrevink, who had already distinguished himself in the voyage of the *Antarctic*. The vessel, the *Southern Cross*, sailed from London in Aug. '98, and from Hobart on Dec. 19th, for Cape Adare. After sighting the Bellamy Islands, the vessel was caught in the ice-pack for six weeks. On Feb. 15th high land was sighted, and three days later a landing effected. Steps were immediately taken to build a house, and by the 28th, it was completed. Mr. Borchgrevink and his staff landed to spend the winter, and the *Southern Cross* sailed for New Zealand. An attempt had been made to ascend a hill in the vicinity, but the party were unable to get above 2300 feet. The country inland appeared to be an immense undulating, glacier-covered plateau.

ARGENTINE REPUBLIC.

The Argentine Republic is a group of 14 provinces and 9 territories, with an extensive seaboard on the east coast of South America. The constitution closely resembles that of the United States. It vests the executive power in the hands of a President, who is also Commander-in-chief of the troops, elected for six years, not being re-eligible; and the legislative authority in that of a Senate of 30 members, 2 chosen by the capital and 2 by each province, and a House of Deputies of 133 members elected for four years by the people, one-half of the House retiring every two years. The provinces elect their own governors and legislatures, and have complete control over their internal affairs. The economic condition of the country, owing to the depreciated currency and the bloated officialism which prevails, has been and is very bad; but the law promulgated in January '95, authorising the Government to assume the external debts of the provinces, was a step in the right direction. The State religion is Roman Catholic, but all others are tolerated. Education is free, secular and compulsory between 6 and 14. The climate of the country is temperate and healthy. The rich mineral resources are beginning to be developed. Farming and stock breeding are, however, the chief industries of the country, and they are extending rapidly. The chief exports are wool, cattle

and sheep, frozen meat, hides, butter, and grain. The **Army** consists of over 12,000 men, with a national guard of nearly 500,000. As to the **Navy** see FOREIGN NAVIES. Length of railways, 9300 miles, connecting the capital with the principal cities of the Republic. Telegraphs, 25,500 miles, connecting all the Republic. Area, including Patagonia, 1,778,195 sq. miles; population, 4,200,000, the great majority of Spanish origin and of other European countries. **Capital** of the republic, **Buenos Ayres**, with 756,000 inhabitants. Capital of the province of Buenos Ayres, La Plata. The total revenue for '98 was about £11,560,000, and the expenditure about £13,000,000. The foreign debt in '98 was about £69,000,000, but to this must be added £16,000,000 for the home and floating debts and the provincial debts, for which the government has been authorised to assume the responsibility, amounting to about £18,000,000. **Imports**, '98, £21,485,780 (£1 = \$5); **exports**, £26,765,890. See DIPLOMATIC for President and Ministry. **History**, '99.—In opening Congress President Roca referred with satisfaction to the arrangement of the boundary dispute with Chili, and declared the Government's intention to accumulate a gold reserve with a view to placing the currency on a gold basis (May 1st). Forty thousand people met in response to a suggestion by the Chamber of Commerce of Buenos Ayres (June 28th), to protest against the heavy taxation imposed, and the modes of collecting it employed. A petition signed by 50,000 people was also presented to Congress, asking for reforms in the laws of the Custom House, etc., and the President pledged himself to meet the wishes of the commercial community. The conversion scheme absorbed public attention in the summer months. The total amount of notes in circulation was \$292,000,000; and it was estimated that it would require \$146,000,000 in gold to effect the conversion, or in round figures £30,000,000. A Bill fixing the rate of conversion at 44 gold centavos per paper dollar was introduced by the Government (Aug. 31st). It was intimated that the conversion would take place when a sufficient gold reserve had been accumulated by means of various economies, including a 10-per-cent. reduction in the salaries of all officials. An article in the *Times* pointed out that the annual interest on a loan of that amount would exceed £1,500,000, and that the drain thus made on the national resources at a time when the country was calling for a reduction in taxation would be severe if not impracticable. It was stated in the same article (Sept. 25th) that the President had arranged an understanding between Argentina, Chili, Brazil, and Uruguay, with a view to the reduction of their armaments, and commercial reciprocity. In an extraordinary Session the Chamber of Deputies passed the Conversion Bill (Oct. 27th), which, besides fixing the rate, included provisions for the sale of the Transandine Railway, and the issue of a loan of £1,500,000 in London. Nothing was done to effect economies or reduce taxation.

Argyll, Duke of. See under PEERS.

ARMENIA.

Armenia, together with Khurdistan, forms a part of the Turkish Empire in Asia. The total area is about 75,000 sq. m., and the population was recently estimated at from 2,500,000 to about 5,000,000. Large numbers of Armenians have,

however, been compelled to emigrate, and in Russian cities and districts and throughout the Turkish Empire a considerable Armenian population is scattered. Thousands also have recently been massacred or have died from starvation. Tradition assigns the cradle of the human race to Armenia. The country contains some mineral wealth, which, however, needs developing. The province is divided into three vilayets or governments—Erzerum, Mamuret ul Aziz, and Diabekr, with the districts of Bitlis and Van. The inhabitants are of the Christian faith, most of them belonging to the Gregorian Church, which greatly resembles the Greek Church in doctrine and ritual. There are many, however, who acknowledge the authority of Rome, though retaining their own distinctive ritual. In '94 terrible atrocities were perpetrated upon the Armenians in the Sasun district. A commission of inquiry was, after much pressure, appointed by the Sultan, and he afterwards issued an Iradé declaring his acceptance of a revised scheme of reforms presented by the three Powers. This scheme ordained that in each vilayet a non-Mahomedan moavin, or deputy-governor, should be appointed. A non-Mahomedan moavin should also be attached to every Mahomedan mutessarif and kaimakam holding office in those sandjaks and cazas where the importance of the Christian population justified such a measure. It was provided that the proportion of the Mahomedan and non-Mahomedan inhabitants of each vilayet should regulate the number of Christians and Mahomedans appointed to public offices. Provision was also made for reforming the councils of the sandjaks, cazas and nahíes, for the inspection of the prisons by judicial inspectors, for a mixed police and gendarmerie recruited from the Mahomedan and Christian subjects in proportion to the religions of the inhabitants of each vilayet, for the control and settlement of the Kurds, the regulation of the Hamidieh cavalry, and for the collection of taxes by the sole agency of the mukhtars and tax-gatherers elected by the inhabitants. It was further ordained that a Permanent Commission of Control should be established at Constantinople, consisting of an equal number of Mahomedans and Christians, and the Embassies were given access to this Commission. In spite of this scheme of reforms the atrocities recommenced in November '95, and nearly half a million Armenians in the six north-eastern vilayets were homeless at Christmas of that year. It was estimated that, altogether, 80,000 Armenians perished from the time the massacres commenced up till the spring of '96. The following September the atrocities commenced again in Anatolia. Horrible massacres took place at Kharput and Egin. At the latter place over 1000 persons were killed, and both towns were sacked and burned. There was, however, no disposition on the part of the Powers to take any active steps in the matter, while England's attitude was regarded with the greatest suspicion. Russia plainly declared that she would oppose separate action on the part of any Power. Mgr. Ormanian, Bishop of Armach, was (Nov. 18th, '96) elected to the Patriarchal See by the General Assembly. Since then there has been much discussion as to the promised reforms, but it was soon seen that these promises meant no more than other promises of the Sultan, and that the Powers either could not or would not compel their fulfilment.

Something was done, however, in Oct. '99, probably because the Patriarch insisted on resigning unless reforms were granted. The Sultan issued an Iradé sanctioning various recommendations for the rebuilding, with Government assistance, churches, schools, and monasteries destroyed during the "troubles"; the payment of sums due to Armenian Government officials killed or expelled during the massacres; the pardoning of 54 Armenian prisoners, and the commutation into life sentences of the death sentences passed on 24 others.

I. ORGANISATION.

1. Central.

A further reorganisation of the War Office, in regard to the respective duties of the Financial Secretary and the Director-General of Ordnance, was made by Order in Council, dated March 7th, '99. Otherwise the new order follows closely an Order in Council of Nov. 21st, '95, and the memorandum in which the duties of the principal officers were defined. Under the old system the whole of the military departments were in the control of the Commander-in-Chief as supreme head, with the Adjutant-General as his chief staff officer, while the Civil Department was under the Financial Secretary. Under the new system the Secretary of State controls administratively the Army Services, and the heads of departments are responsible to him. There is an Army Board, consisting of the Commander-in-Chief as president, the Adjutant-General, the Quartermaster-General, the Inspector-General of Fortifications, and the Inspector-General of Ordnance. The Assistant Under-Secretary of State is an *ex-officio* member as representing the Secretary of State for War, and the Accountant-General is financial adviser. This Board has lately been reorganised; its chief function is to report upon promotions and appointments of superior ranks and proposals for estimates. There is also a War Office Consultative Council, under the presidency of the Secretary of State, for the consideration of special subjects. The Commander-in-Chief exercises general command, is the principal adviser of the Secretary of State, and is charged with plans of mobilisation for offensive and defensive operations, etc. In his department are the Military Secretary, the Director of Military Intelligence, and the Officer in charge of Mobilisation Services. The Adjutant-General

is charged with discipline, education, training, recruiting, etc.; the Quartermaster-General with supplies and equipment, transport and the movement of troops; the Inspector-General of Fortifications with the control and maintenance of that department; and the Director-General of Ordnance with the supply of warlike stores, equipment and clothing, with the direction of the Ordnance Committee, and, under the new orders, of "the manufacturing departments of the Army," and he administers the various Ordnance Departments. These five officers are the heads of the principal departments. Under the new order the Financial Secretary financially reviews the estimates and proposed expenditure, and supervises expenditure and accounts; and his relation to the manufacturing departments is now confined to "financial control," and has no concern with practical administration. A feature of the new system is a Committee of the Cabinet, to which is referred the work of co-ordinating the duties of the naval and military departments in war time. The Mobilisation Board, consisting of about 20 members military and civil, being a part of the old system, has been abolished in '99, and its duties transferred to the Army Board. In July '98 a committee, appointed by the Secretary of State for War, reported upon the question of Decentralisation, and something has been done to reduce the routine work of the War Office, and transfer much greater liberty of action to the local commands. It is expected that a saving of £5000 a year will ultimately be effected through the suppression of sinecures and the amalgamation of branches.

2. Local.

Command of the Army is exercised through the general officers commanding districts, save that, in the case of Ireland, the general commanding the forces there is an intermediate authority. There are twelve of these districts, exclusive of Aldershot, Woolwich and the Curragh (which are concerned only with troops quartered locally), embracing 67 regimental districts, each under the command of a colonel, and maintaining 2 battalions, thus accounting for 144 battalions of the line. The Foot Guards are being raised to an establishment of 9 battalions, and a progressive increase of the organic units of the Cavalry, Infantry, and Artillery is still in progress. The regimental district is the recruiting ground of a territorial regiment, with which are linked, as junior battalions, the militia and volunteer corps within the area; and the reserve men are pensioners of their respective territorial regiments. The Royal Artillery, through 9 recruiting areas, and the Royal Engineers, through the Commanding Royal Engineer in each district, have also a territorial organisation; but this is not the case with the Cavalry, which has special recruiters or staff officers located in various districts. In theory, one battalion of each Infantry regiment is at home, as a feeder for the other abroad; but in practice this system cannot be uniformly maintained, though the increase of the forces has tended to redress the proportion between home and foreign battalions. The training of men by short service and passing them into the Reserve is the vital principle of the Army system.

II. MAINTENANCE.

1. Finance.

The total cost of the Army, on the estimates for the financial year '99-1900, is £20,617,200, against £19,220,500 in '98-9. This last sum is exclusive of the supplementary estimate (£385,000) presented Feb. 14th, '99. The various heads of expenditure are:—

Effective Services.

Pay, etc., of army (general staff, regiments, reserve and departments)	£ 6,509,000
Medical establishments: Pay, etc.	305,800
Militia: Pay and allowances	571,000
Yeomanry cavalry: Pay and allowances	75,000
Volunteer corps: Pay and allowances	624,200
Transport and remounts	790,000
Provisions, forage, and other supplies	3,425,500
Clothing establishments and services	1,090,000
Warlike and other stores: supply and repairs	2,531,000
Works, buildings and repairs: cost, including superintending establishment	1,211,900
Military education and establishments: pay and miscellaneous charges	111,100
Miscellaneous effective services	60,200
War Office: salaries and miscellaneous charges	248,300
	17,553,000

Non-Effective Services.

Non-effective charges for officers, etc.	1,555,000
Non-effective charges for men, etc.	1,325,500
Superannuation, compensation and compassionate allowances	183,700
	3,064,200

The total number of men upon the home and colonial establishments of the Army (exclusive of those serving in India), upon which the estimates were based, was 184,853, compared with 180,513 in '98-9, being an increase of 4340. The amounts represent the following increases on the sums voted for the year '98-9: Amount provided in supplementary estimate for '97-8 in relief of '98-9 on account of warlike stores, £293,000; clothing, £150,000; provisions, forage, etc., £60,000; pay, provisions, messing, clothing, etc., of additions to the Army, programmes of '97-8 and '98-9, £314,000; programme of '99-1900, £169,000; Militia and Volunteers, £41,000; clothing of regular forces, £137,000; armaments and stores, £299,000; Works (including Barrack Acts annuity), £196,000. The decreases were: Manœuvres, £100,000; amounts provided in supplementary estimate of Feb. 14th, '99, £100,000; War Office non-effective and miscellaneous, £62,300. Net increase, £1,396,700, due principally to the considerable addition to the effective.

Contributions in aid.—From Colonial Revenues in aid of military expenditure, £283,000; from Government of Egypt, £87,000; Indian Government for deferred pay of soldiers on the Indian establishment, £181,000; and for other effective charges for regular forces

serving in India, £548,700; purchase of discharges, £42,000; fines, hospital stoppages, etc., £52,300; also various sums from the Admiralty, etc. The amounts included in the estimates for military purposes in the Colonies and Egypt (exclusive of arms, stores, etc., of proportion for home recruiting, headquarter administration, sea transport, and non-effective charges) are: Bermuda, £140,100; Halifax, N.S., £131,170; Jamaica, £119,430; Barbadoes and St. Lucia, £111,507; Esquimalt, £523; Cape Colony and Natal, £709,200; St. Helena, £54,870; Mauritius, £115,400; West Coast of Africa, £102,000; Hong Kong, £196,000; Straits Settlements, £109,000; Ceylon, £120,750; Gibraltar, £312,450; Malta, £635,200; Cyprus, £9,350; Egypt, £328,750; total, £3,195,700 compared with £3,265,000 in '98-9.

Supplementary Estimate for the War.—On Oct. 18th, '99, a Supplementary Estimate for the purposes of the war in South Africa was presented, and received the sanction of Parliament, the money to be raised by the issue of Treasury Bills. The following are the particulars: 1. Expenditure to increase the efficiency and mobility of the force in South Africa on July 1st last, with the addition of 2 battalions of Infantry for the protection of Natal, and the raising of local bodies of Mounted Infantry for the protection of Rhodesia. Total, £553,000. 2. Expenditure on the despatch of reinforcements from home, the Mediterranean, and India (3 Cavalry regiments, 2 Brigade Divisions, Field Artillery, 8 battalions of Infantry, with proportion of Army Service Corps, Army Ordnance Corps, etc.), the raising of a Volunteer Force in Natal, and the provision of special clothing and hospital supplies for the Force in South Africa. Total, £1,441,000. 3. Expenditure on the despatch of a Cavalry Division, an Army Corps, and lines of communication, including the calling up of a portion of the Army Reserve, and the replacement of stores and clothing; including also the embodiment of a portion of the Militia, and the raising of 7 Cavalry regiments, and 19 batteries of Horse and Field Artillery to the Higher Establishment at home, the raising of an Irregular Force in South Africa, and the despatch of contingents from Australia and Canada. Total, £8,006,000: grand total, £10,000,000.

2. Additional Forces.

The great additions to the forces, inaugurated in '97-8 and continued in '98-9, are being further pursued this year. The increase is to provide for the more efficient defence of foreign stations, and for reducing the disparity between the number of battalions of Infantry maintained at home and abroad. The units, when completed, will be as follows:—15 batteries of Field Artillery; 11 companies of Garrison Artillery; 2 battalions of Foot Guards; 2 additional battalions each for the Royal Warwickshire Regiment, the Royal Fusiliers and the Lancashire Fusiliers, and a second battalion for the Cameron Highlanders; and the following Colonial Corps: 3 battalions West India Regiment, the West African Regiment, and a Chinese Infantry Regiment.

The addition to the Artillery (based on the proportion of 4 guns to 1000 bayonets) was inadequate, and the proportion adopted is now 5 guns to 1000 bayonets. Allowing 20 batteries (horse and field) to each of the 3 Army Corps,

and 4 to the 4 Cavalry brigades, a total of 64 batteries will be required; and, it being intended also to maintain 3 batteries of howitzers, the formation of 15 new batteries was proposed, to be spread over three years, of which 5 batteries were completed in '98-9, and 5 more are expected to be completed in '99-1900. The establishment of the Artillery depôts is also being increased.

The following table shows the increase in the numbers of the Army (all ranks) sanctioned under the main proposals of '97-8 and '98-9, excluding minor miscellaneous changes:—

	Pro- gramme of '97-8.	Pro- gramme of '98-9.	Total Increase.
Cavalry	—	684	684
Horse and Field Artillery	196	3,257	3,453
Garrison Artillery	3,641	73	3,714
Foot Guards . .	2,861	—	2,861
Infantry	185	12,045	12,230
West India Regi- ment	1,011	—	1,011
Total	7,894	16,059	23,953
Malta Militia . .	1,130	—	1,130
Total	9,024	16,059	25,083

The net addition, under the estimates of '99-1900, is 4915, the following being the principal increases:—Army Service Corps 1082, West African Regiment 1076, British Central African Regiment 1100, Chinese Regiment (Wei-hai-Wei) 1083. The establishment (exclusive of India) is 167,632 in '99-1900; it is contemplated to raise it to 173,442 in 1900-1.

War in South Africa. The number of men of all ranks required for the Army Service under the Supplementary Estimate (see above), in addition to those already voted, was 35,000.

3. Recruiting.

The considerable additions to the forces have caused much activity in the department of the Inspector-General of Recruiting. Large numbers have been enlisted under the standard, the proportion, which fell from 30·6 per cent. in '92 to 18·0 in '96, having risen again to 29·0 in '97 and 34·0 in '98. Special inducements were held out to Reservists to rejoin their corps, and to infantry soldiers serving at home to extend their service for two years. With the exception of men enlisting in the Infantry of the Line for 3 years with the colours and 9 years with Reserve, an increase was granted of 3d. to the daily emoluments on men becoming efficient soldiers, provided they are nineteen years of age. On transfer to the Reserve, or discharge, a gratuity of £1 for each year of colour service up to a limit of £12 was allowed; if, however, they serve until they are entitled to a pension the gratuity is £2 only. All men enlisted prior to April 1st, '98, were offered an opportunity of availing themselves of these conditions, and, practically, all accepted them; deferred pay has been abolished from the date the new conditions came into force.

During '98 a total of 40,729 recruits was obtained for all branches of the Regular Army, as against 35,015 in '97 and 28,532 in '96; or

taking British recruits alone the number was 38,418, as against 33,722 in '97 and 27,809 in '96. The number of recruits enlisted up to the standard of height and chest measurement was 25,435, as against 23,946 in '97 and 22,781 in '96. It is obvious, therefore, that the heavy recruiting of '98 was partly due to an increase in the number of those specially enlisted below the standard. It is, however, satisfactory to know that the bulk of these "specials" attain the full standard within a few months of their enlistment.

The following table shows the arms of the service joined by recruits and men from Reserve, etc., during '97 and '98:—

	'97.	'98.
Household Cavalry	168	140
Cavalry of the Line	2,569	3,936
Royal Artillery	6,883	7,609
Royal Engineers	835	1,098
Foot Guards	2,113	2,414
Infantry of the Line	22,216	28,445
Colonial Corps	1,316	2,319
Army Service Corps	575	513
Army Ordnance Corps	99	180
Royal Army Medical Corps	264	592
Army Post Office Corps, etc.	46	57
	37,084	47,303

III. EFFECTIVES, ESTABLISHMENTS AND DISTRIBUTION.

1. Effectives and Establishments.

The following was the strength and estab-

lishment of each arm of the service in rank and file on Jan. 1st, '99:—

	Effectives.	Establishments.
Household Cavalry	1,032	1,029
Cavalry of the Line	15,678	15,516
Royal Artillery	34,804	35,386
Royal Engineers	5,767	5,834
Foot Guards	6,467	6,975
Infantry of the Line	127,616	128,443
Colonial Corps	6,576	5,889
Army Service Corps	2,767	2,714
Army Ordnance Corps	711	708
Medical Staff Corps	2,443	2,231
Army Pay Corps	216	200
Total	204,077	204,925

The general total of the Regular Army, first-class Army Reserve, Militia and Volunteers, rose from 577,740 in '86, to 645,306 in '95, fell to 640,625 on Jan. 1st, '96, and rose again to 643,674 on Jan. 1st, '97, to nearly 660,000 of all ranks on Jan. 1st, '98, and to 665,000 on Jan. 1st, '99.

2. Distribution.

The following table shows the distribution of all ranks of the Army, including drafts on passage out, Jan. 1st, '99. It may be regarded as approximately normal, but, owing to the war in South Africa, and the drafting of troops from England, India, and other stations, it has been altogether changed. The total additional forces sent to South Africa, including colonial troops, number about 50,000 (Nov. 7th, '99):—

Jan. 1st, '99.	At Home.	Egypt.	Colonies.	India.
Household Cavalry	1,298	—	—	—
Cavalry of the Line	10,378	568	1,223	5,933
Royal Artillery { Horse	1,800	—	—	1,820
Field	7,678	183	534	7,038
Mountain	233	—	191	875
Garrison	7,861	148	7,262	3,773
Royal Engineers	5,351	146	2,074	337
Foot Guards	6,275	—	974	—
Infantry of the Line	58,791	2,903	23,782	54,247
Army Service Corps	3,302	70	212	—
Army Ordnance Corps	837	112	315	108
Royal Army Medical Corps	2,382	113	719	335
Army Pay Corps	500	14	77	—
Totals	106,686	4,257	37,363*	74,466

* In addition to 7242 colonial forces. There were also 1817 of all arms in Crete.

The regular troops are usually in large measure confined to the home country, India, and the Crown colonies. Canada and Australia have no Imperial troops, beyond some 1500 in Nova Scotia. The table indicates what may be regarded as an established force; but, of course, at any time the distribution of the troops is subject to change. The distribution of the Army is therefore, at the present time, abnormal. The Army of Occupation in Egypt has reverted to the same strength as before the Soudan expedition.

IV. THE ARMY RESERVE.

The Reserve is a vital element of our Army organisation, the Reserve men being liable, by the terms of their agreement, to general service with the arms in which they were enrolled with

the colours. There are two classes of the Reserve, of which the second is dying out and is practically non-existent. On Jan. 1st, '99, the first-class Army Reserve numbered 78,798 men, as compared with 82,005 on Jan. 1st, '98. They were divided in sections thus:—Sect. A 1360, Sect. B 58,674, Sect. C 2000, Sect. D 16,764. Sect. A is a new branch created from Nov. 1st, '98, to consist of men of "good" character, not to exceed 5000 in number, who receive one shilling a day. They are liable to be called out on active service during their first year in the section, under the Reserve Forces and Militia Act, '98, and there are other provisions to make them available for employment during "small wars." Up to Feb. 1st, '99, about 1750 men had joined this special branch of the Reserve, and it is believed that the

authorised strength will be reached easily. First-class Reservists, who have served their period with the colours, and who are of the best soldiering age, and available for service if required, are an excellent set of men, and all the Infantry have been made acquainted with the handling of the Lee-Metford magazine rifle, introduced since many of them left the ranks. The Infantry form the chief part of the Reserve, and number 54,917 men, of whom 5394 belong to the Foot Guards, whose men serve a shorter period with the colours than do the men of the Line regiments. The Cavalry Reserve numbers 596; the Royal Artillery—including horse, field, and mountain batteries, and the garrison companies—has 10,843; the Royal Engineers, with the Submarine Miners, 3058; the Army Service Corps, 2620; the Royal Army Medical Corps, 932; and the remainder of the Reserve men are distributed over the smaller departmental corps of the Army. The Reserve men are pensioners of the respective territorial regiments, and look to the officer commanding the district as their commanding officer. About 45,000 of them are under thirty years of age, and about 29,000 more between thirty and thirty-five.

Several circumstances have contributed to draw much attention to the Army Reserve during '99. A new scheme for the enlistment of railway employes into the Reserve, through the agency of the Engineer and Railway Volunteer Staff Corps, and under the direct supervision of the commandant of that corps, has borne fruit; and, as far as can be ascertained, bids fair to be a success. This scheme is based on the principle that the best method of obtaining recruits of the desired railway trades is to enlist the sympathies of the general managers of the railways in the United Kingdom, a large number of whom are officers of the Engineer and Railway Volunteer Staff Corps, and to obtain their co-operation. As was anticipated, the commandant and officers of the corps have readily responded to the call. The rule permitting Reservists to re-engage in the Regular Army has led to the transfer of about 5000 men, and there is some reduction in the total number of the Reserve; but the great outflow to it, due to heavy enlisting seven or eight years ago, was abnormal, and there is no reason to think that the Reserve will be depleted. The serious situation in South Africa caused the Army Reserve to be called out by Proclamation, dated Oct. 7th, '99, for the mobilising of a large field force; and the War Office issued special orders for the men of Classes A, B, and C, who had served in certain regiments, or were otherwise required to serve with particular branches of the Army, to join the colours on Oct. 9th. The mobilisation was most successfully accomplished.

A further Reserve force connected with each regimental district is the Militia Reserve, to be embodied with the Militia upon mobilisation. This force has also been called out for garrison duty (Oct. '99). It is a popular force, and forms the connecting link between the Regular Army and the Militia. On Jan. 1st, '99, the force numbered 29,996 men, being a slight increase compared with the previous year. See MILITIA.

V. MOBILISATION AND HOME DEFENCE.

The mobilisation of the field force for South Africa, in Oct. '99, was the first experience of real mobilisation in this country. The mean-

ing of mobilisation is, by the embodying of the Reserve, to complete, on a war footing, the units it is proposed to employ; and the order to mobilise gives the test of the Army system. The paper scheme of Home Defence is probably still something of a hypothesis, possessing little real value. The requirements of the various points have been considered, and the garrisons are appointed for them with a small nucleus of Regulars, with which are associated the local Militia and Volunteers, and where these are insufficient others drawn from more remote sources. There remain the larger portion of the Regulars at home, the Yeomanry, and a considerable proportion of Militia and Volunteers, to form the Field Army. The scheme is incomplete, and its value problematical; but in some military districts, to give it practical value, Standing Defence Committees exist, with the general officers commanding as presidents, and out of these committees Defence Commandants, responsible for the preparation, custody and revision of local defence schemes, are selected. The scheme thus described has not been fully elaborated. For further particulars of the mobilisation scheme see ed. '96. Those who are interested in the question of mobilisation should see an article in the *Times* of Jan. 9th, '99.

VI. TERMS OF ENLISTMENT AND SERVICE.

A recruit is enlisted for any regiment of Cavalry or Infantry for which the recruiter to whom he offers himself is authorised to raise men, or he may enlist for general service in the Cavalry or Infantry, in which case he is appointed to a Cavalry or Infantry regiment, but is liable to be transferred, within three months of the date of his attestation, to any corps of the same arm of the service. The Army Service Corps is composed of drivers, clerks and artificers. Recruits for the corps will, as a rule, be trained as mounted men, and when dismissed drill with those who are qualified as clerks, bakers, butchers, wheelers, saddlers, shoeing smiths, carriage smiths and drivers, will be employed, as far as possible, in those trades. The Royal Army Medical Corps is under the immediate command of the Director-General of the Army Medical Department, and is intended for the performance of duties connected with the management of military hospitals, and for rendering assistance to sick and wounded in time of war. The Corps of Ordnance Artificers is established for the purpose of providing qualified artificers for the repair and maintenance of the material belonging to the Garrison Artillery, Siege Train, etc. Men enlisted for the corps are required to serve on probation for a period not exceeding twelve months. They must be men of good character, and must be competent "fitters," with some knowledge of mechanical drawing. Recruits for the Post Office Corps are selected from the members of the Post Office Rifle Volunteers, 24th Middlesex R.V.C., who on enlistment will cease to belong to that Volunteer Regiment, but will remain attached to it as supernumeraries. The requirements as to age and height are varied from time to time, and may be obtained at any recruiting station. In practice, for "growing youths," the standards are slightly modified. In Feb. '98 the standard height for recruits over 20 joining the Lancers and Dragoons was reduced from 5 ft. 8 in. to

5 ft. 7 in., and of Hussar recruits from 5 ft. 7 in. to 5 ft. 6 in. These were the standards prior to Feb. '96. This falling back is mainly due to the large demand for recruits, owing to the new formations.

The Terms of Service are:—Long service, *i.e.*, 12 years' Army service; or short service, *i.e.*, 7 years' Army and 5 years' Reserve service, which is extended to 8 years' Army service and 4 years' Reserve service if the period of Army service expires whilst the man is serving abroad. In the Foot Guards short service consists of 3 years' Army service and 9 years' Reserve service, and an additional year with the colours if abroad; and the same system has been applied to a limited number of Infantry of the Line. In '99 considerable advantages were offered to induce Reserve men to rejoin the colours under particular regulations. Particulars concerning re-engagement, pensions, etc., were given in the ed. of '98.

Service in Army Reserve.—The Army Reserve is that force to which men are transferred on expiration of their period of service with the Colours. Men serving at home may, should the exigencies of the service permit, be allowed to pass to the Reserve after 5 years' service. On the other hand, re-engagement for further service with the colours is encouraged. In '98 about 4500 reservists rejoined, and it was anticipated that 2000 would re-engage in '99. While in the Reserve a man receives pay at the rate of 6d. a day—*viz.*, 4d. a day ordinary pay, and 2d. a day deferred pay. They may be called up annually for training for a period not exceeding 12 days or 20 drills. While in the Reserve they are liable to be recalled to the colours in case of national danger or great emergency, and if so recalled are treated in every respect as soldiers, and are allowed to regain the rank they held on transfer to the Reserve. Special arrangements exist for allowances to the families of Reserve men recalled to the colours. For the new section of the Army Reserve "A," see above (IV.). It is embodied, from Nov. 1st, '98, under the Reserve Forces and Militia Act, '98, which enables 5000 Army Reservists to contract themselves into a liability to be called out for twelve months' permanent service during the first twelve months of Reserve service, and dispenses with the necessity of Parliament being summoned for the purpose of being informed of the step, though it is added that any exercise of this new power must be reported to Parliament as soon as may be. Men may revoke their agreements by three months' notice in writing. The same Act enables any part of the Militia to make an offer, certified by their commanding officer, to serve in any place out of the United Kingdom.

VII. THE INDIAN ARMY.

The strength of the British forces in India on Jan. 1st, '99, is given above (III. 2) as 74,466. Upon the estimates of '99-1900 the total establishment is 73,157 of all ranks. The troops are: Cavalry, 9 regiments; Artillery, 11 Horse, 42 Field, and 8 Mountain Batteries, with 27 Garrison Companies; Infantry, 52 battalions; Engineers, 340 officers; artificers, 113. The native army numbers about 148,000 men; Cavalry, 40 regiments; Infantry, 133 battalions; Artillery, 13 batteries and companies; also Sappers, Miners, etc. The cavalry regi-

ments are as follows: 19 Bengal, 3 Madras, 7 Bombay, 5 Punjab Frontier Force, 2 Central India Horse, 4 Hyderabad Contingent. A force of Khyber rifles for service in the pass has lately been raised. The system of class regiments and companies is being developed, and gives a better set of men than was obtainable when Brahmans, Rajputs, Jats, and Mohammedans were indiscriminately mixed together. The enrolled Volunteers are some 30,000 men, of whom 24,000 are efficient, and by an Act of '96 can be called out for active service in case of emergency. In addition to these are the vast regular and irregular armies of the native states. The Government of India has now definitely adopted the policy of encouraging the native rulers to maintain armies fit to take the field, and with this view the plan of embodying "Imperial Service troops," under agreement with the feudatory states, was adopted during Lord Dufferin's viceroyalty. The result has been admirable, and the native Princes have been enthusiastic in their prosecution of the plan. A splendid reserve has been created, numbering at least 19,000 well trained men, located thus: Kashmir, 4350; Punjab, 4950; Rajputana, 4000; other states of Central and Western India, 4500; Southern India, 1400. Some of these troops have displayed the utmost hardihood and courage in the Frontier operations. On April 1st, '95, the Presidency System was abolished. Many high authorities had pronounced it to be a source of danger, and with the reorganisation four army corps have been created. The Bengal army is divided into two portions, the Punjab and the Bengal; and these, with the armies of Madras and Bombay, form the four commands. The Punjab command contains three first-class districts, Lahore, the Punjab Frontier Force and Rawal Pindi, and two second-class, Peshawur and Sirhind; the Bengal two first-class, Meerut and Oude, and six second-class, Allahabad, Assam, Bundelkund, Nerbudda, Presidency and Rohilkund; the Madras two first-class, Burma and Secunderabad, and six second-class, Bangalore, Belgaum, Madras, Mandalay, Rangoon and Southern; and the Bombay three first-class, Mhow, Poona, and Quetta; and five second-class, Aden, Bombay, Deesa, Nagpore and Sind. Each of the four commands reckons in its strength the British troops stationed within its borders. The Indian Army has developed rapidly in efficiency, notwithstanding caste prejudices and financial difficulties. An excellent system of mobilisation has been created during the past five years. The defences of the north-west frontier, including the lines of Quetta and the bridge-heads on the Indus at Sukkur and Attock as well as a strong series of forts at Rawal Pindi, have been completed. The horse and field batteries have received the 12-pr. B.L. guns, the British Infantry the Lee-Metford rifle, and the native troops the Martini-Henry. India now turns out her own small-arm ammunition, and the manufacture of steel and steel projectiles has been introduced at Cossipur. The horsing of the cavalry and artillery has been improved. Much attention has recently been directed to the question of transport in India, and it must be said that the Commissariat Department acquitted itself well during the great strain of the Tirah operations, in which not less than 74,000 animals were employed. The regimental transport exists; but, outside this, a

great organisation is required, which needs to be formed, as an adequate framework for mobilisation, in time of peace. The smoothness with which the troops were dispatched from India to South Africa in Sept. and Oct. '99 aroused the admiration of all military observers. The transport arrangements left nothing to be desired. The health of the army in India has very greatly preoccupied the public mind lately, and statistics of the disastrous prevalence of venereal disease were given in the '98 ed.

VIII. PROGRESS AND EVENTS, '99.

An important step was taken by the Government in '99 in the decision to add still further to the forces (see above, II. 2). Recent events in various parts of the world, and a consideration of the requirements involved by the working of the new organisation, demonstrated that the proposals of '97-8 were inadequate; and the scheme proposes a fixed establishment, indicated above, to be reached by March 31st, 1901. At the end of '97 the question of War Office administration was much discussed from a hostile point of view. The chief grounds of the attack were the centralisation and circumlocution of the War Office, the defects of the linked-battalion system as applied, and the alleged inadequacy of the Reserve. The committee upon War Office reorganisation and decentralisation which has been alluded to (I. 1), after hearing the opinion of many experienced officers, who gave almost ludicrous illustrations of centralisation, made over two hundred recommendations, with the view of delegating greater power and responsibility to the general officers in command of districts, nearly all of which immediately received the sanction of the Secretary of State. In regard to the failure of the linked-battalion system, the present expansion of the Army is expected to remedy the evils. The Reserve Forces and Militia Act (see VI.) is intended, by increasing the readiness of the forces, to remove another of the defects pointed out. The reorganisation of the War Office (I. 1) in March brought about a change that had long been regarded as inevitable. The control of the ordnance factories falls naturally to the hand of a soldier, who knows the needs of the service; and by placing authority in the hands of the Financial Secretary, when the reorganisation of Nov. '95 took place, a notable defect of the old system was retained. The manufacturing departments have now been placed under the sole direction of the Director-General of Ordnance, and the duties of the Financial Secretary are purely financial in regard to them. During '99 the condition of the fixed defences at home and abroad was under consideration, and the need of supplying new guns to replace old muzzle-loaders was recognised to be imperative. Accordingly, in consultation with the naval authorities, a scheme of rearmament has been laid down adapted to the needs of particular places. One advantage resulting from the plan when completed will be a reduction in the number of garrison artillery required to man the defences. The reorganisation of the Royal Artillery on June 1st, '98, has effected a change long advocated by many. Up to that date the Artillery formed a single regiment; but now the force has been divided, the horse and field artillery being separated from the garrison and mountain branches. The duties are very

distinct, and henceforth there will be no interchange between the two sections of the arm.—**Manœuvres.** At the end of Jan. '99 the Report on the Salisbury Manœuvres of the previous year was published, and affords many valuable suggestions as to the better working of the Manœuvres Act. The experimental operations, the largest ever held in England, had involved the employment of 50,000 or 60,000 men under non-service conditions. The following were the chief lessons drawn by the Commander-in-Chief:—“(1) The need of considerable additions to our supply and transport establishments. (2) The inability of even the largest, most successful, and liberal-minded civil firms to cope with the distribution of supplies to an army in the field. (3) The general unsuitability of civilian transport for military purposes in the first line with an army in the field. For manœuvres its use is generally a necessity with us; but careful previous organisation, and constant supervision afterwards, is essential to its satisfactory employment.” A committee, appointed by the War Office, to inquire into the better management of future manœuvres made a number of practical suggestions in its report (Jan. '99). The operations on Salisbury Plain in July '99 were upon a less extensive scale than in '98, but were excellently arranged for the work of practical training. The cavalry training attracted a good deal of attention, and was of a most serviceable character, though not based upon any large tactical scheme. There can be no doubt that the cavalry have made vast strides in regimental drill, and in the working of regiments in brigade; but there is still room for better tactical training, particularly in regard to dismounted action and reconnaissance. There were very important manœuvres in Ireland in August. The Red Force (Curragh), under command of Major-Gen. Boyce Combe, consisted of a cavalry brigade, with a battery of Royal Horse Artillery, two infantry brigades, a brigade division of Field Artillery, and a company of Royal Engineers, while the Blue Force (Thurles), under command of Major-Gen. H. McCalmont, had the same composition, but with only one infantry brigade. Lord Roberts, who was director and umpire-in-chief, made instructive comments on the manœuvres. The close nature of the country gave no opportunity to cavalry for shock tactics; but there was plenty of useful work in reconnaissance and detached duties, and the importance of a high standard of professional training was indicated. The artillery were also greatly hampered by the nature of the country. Lord Roberts pointed out that the best value could be obtained from the guns by massing the horse artillery and field batteries. The Blue artillery who followed this principle were invariably in superior force to the Red at the decisive point. The temptation to detach batteries to momentarily important points must be resisted, and nothing must be permitted to interfere with the concentration of the fire of every available gun at the decisive point. In regard to infantry, he said that the close country emphasised more than ever the importance of developing the independence and individual initiative of company and even section commanders; for the control of the battalion commander ceases when his companies leave the road. Habits of independence cannot be acquired suddenly, but must be the result of systematic

training and decentralisation in quarters as well as in the field. More than one instance occurred where reconnaissance of his own immediate vicinity was neglected by a battalion commander.

The dispute with the Transvaal Republic led to a gradual increase in the force maintained in South Africa during the summer of '99. When the situation became acute, in September and October, large bodies of troops were sent from India to Natal, and considerable reinforcements from home, the Army Service Corps was ordered for the Cape, and preparations were made for the mobilising of the First Army Corps, under the command of Sir Redvers Buller, Sir George White proceeding to assume the command in Natal. The Army Reserve was ordered to mobilise on Oct. 9th, and a vast tonnage of shipping was taken up by the Admiralty for transport. The operation was conducted with great general success, and the result is to place a force of Imperial and Colonial troops in the field numbering about 65,000 men. The following are the principal appointments to the First Army Corps:—Commanding the Corps, Gen. Sir Redvers Buller; Commanding Corps Artillery, Col. C. M. H. Downing; First Division, Lieut.-Gen. Lord Methuen (1st Brigade, Maj.-Gen. Sir H. Colville; 2nd Brigade, Maj.-Gen. H. J. T. Hildyard); Second Division, Lieut.-Gen. Sir C. F. Clery (3rd Brigade, Maj.-Gen. A. G. Wauchope; 4th Brigade, Maj.-Gen. Hon. N. G. Lyttelton); Third Division, Lieut.-Gen. Sir W. F. Gatacre (5th Brigade, Maj.-Gen. Fitzroy Hart; 6th Brigade, Maj.-Gen. G. Barton); Cavalry Division, Lieut.-Gen. J. D. P. French (1st Brigade, Maj.-Gen. J. M. Babington; 2nd Brigade, Maj.-Gen. J. P. Brabazon). For the military events in South Africa see TRANSVAAL, ORANGE FREE STATE, NATAL, CAPE COLONY, etc. See SESSION, sects. 5 and 128.

Arnold, Sir Edwin, K.C.I.E., C.S.I., poet, oratorist, and journalist, was b. 1832. Educated at King's School, Rochester; King's Coll., London, and Univ. Coll., Oxford, where he graduated in honours, '54. He was subsequently appointed second master of King Edward the Sixth's School, Birmingham, and afterwards proceeded to India as Principal of the Government Sanskrit College at Poona. On his return to England, in '61, he joined the *Daily Telegraph*, with which he has been connected editorially for many years. He has devoted much attention to the study of Oriental literature. Among his best known works are "The Indian Song of Songs," a metrical paraphrase from the Sanskrit, "Sādi in the Garden," "The Song Celestial," and "The Light of Asia," an epic poem upon the life and teaching of the great Indian prophet, Buddha, which has gone through more than a hundred editions. Sir Edwin's later productions include a volume of poems entitled "Lotus and Jewel," "Selected Poems: National and Non-Oriental," "Death and Afterwards," "In my Lady's Praise," "Seas and Lands," "Japonica," "The Light of the World," "Adzuma" ('93), "Wandering Words" and "East and West" ('94). Created a Companion of the Star of India '77, and K.C.I.E., Jan. '88. Sir Edwin is the bearer of many foreign orders, including the "White Elephant" of Siam and the "Rising Sun" of Japan. Northbrook, Indian, and Royal London Yacht Clubs. Address: 31, Bolton Gardens, South Kensington, London.

ART, '99.

The Winter Exhibition at Burlington House, which opened in the first week of January, was composed entirely of pictures and drawings by Rembrandt. Splendid examples of the work of the great Dutch master were lent by the Queen, the Duke of Devonshire, Lord Lansdowne (who lent his famous landscape "The Mill"), Lord Iveagh, Lord Ilchester, and others; and the exhibition, taking it all in all, was one of the most interesting and remarkable ever seen in England. The Royal Academy summer exhibition was regarded as unsatisfactory by the critics of all schools, but in spite of the inferior character of the exhibits, the receipts and the sales were exceptionally good. In the preceding winter a committee of academicians had recommended that the number of pictures submitted by outsiders to the Selecting Committee for the summer exhibition should be reduced from eight to three, and those sent in by members from eight to six. The recommendation was ignored by the General Assembly, and the number of pictures submitted to the Selecting Committee in April exceeded 12,000. The Hanging Committee was composed of Messrs. Oulless, Herkomer, Seymour Lucas, Briton Riviere, and Leader; and the exhibition was opened on May 1st. Mr. Sargent's portraits were the chief centres of attraction, and in his "Miss Jane Evans" he showed qualities of restraint and reserve which are not always conspicuous in his work. The brilliant American painter found a worthy rival in Mr. Orchardson, whose portraits of "The Earl of Crawford," and "Edmund Davis, Esq." will rank with the best of his work of previous years. Mr. G. F. Watts showed a portrait of Mr. Gerald Balfour; and of Prof. Herkomer's presentments the best was that of "Dr. W. W. Baldwin," in the Second Gallery. Mr. Stanhope Forbes did not exhibit, but the naturalistic school was well represented by Mr. Lathague, Mr. Clausen (whose pictures attracted less attention than they deserved), Mr. Edward Stott, and Mr. Tuke. Important subject pictures were few in number: Sir Lawrence Alma Tadema's "Baths of Caracalla" was below his usual standard; Mr. Byam Shaw failed to impress with his "Love the Conqueror"; and Miss Henrietta Rae's huge picture of "Diana and Callisto" was somewhat disappointing. The sea painters, on the other hand, showed some good work—notably Mr. Napier Hemy and Mr. W. L. Wyllie. It was not a great year for sculpture, but Mr. Thornycroft exhibited his colossal statue of Oliver Cromwell, Mr. Onslow Ford a striking bust of the Queen, and Mr. F. Derwent Wood a finely modelled group "Dante at Ravenna." Works purchased for the Chantry collection were:—"Approaching Night," by H. W. B. Davis, R.A.; "The Battle of the Nile," by W. L. Wyllie, A.R.A. (£700); "Off Valparaiso," by Mr. Thomas Somerscales (£250); "My Lady's Garden," by Mr. J. Young Hunter (£350); "Le Château d'O," by Mr. Charles Maundrell (£21); and "The Girdle: Statue, Bronze," by Mr. William R. Colton (£630). Pictures and other works of art to the value of nearly £24,000 were disposed of—an increase of about 30 per cent. upon the sales of the previous year. The chief sales, other than those in the Chantry list, were "Trailing Clouds of Glory," by Mr. H. J. Draper, £450; "La Côte d'Azur," by Mr. E. A. Waterlow, £630; "Signs of Herring," by Mr.

Colin Hunter, £1000; "On the Kentish Cliffs," by the veteran Mr. Sidney Cooper, £500; "Cinderella," by Mr. Val Prinsep, £500; "Harrowing," by Mr. H. H. Lathangue, £500; "Romantic Ground," by Mr. David Farquharson, £500; "Elaine," by Mr. Blair Leighton, £700; "Harvesters," by Miss L. E. Kemp-Welch, £500; "Smugglers," by Mr. Napier Hemy, £1500; and "In Radnorshire," by Mr. H. W. B. Davis, £750.

At the **New Gallery** an exhibition was opened in January of the pictures and drawings of Sir Edward Burne-Jones; fairly representative, but without the "Briar Rose" series, and one or two other well-known canvases. The summer exhibition was perhaps the weakest ever seen in this gallery. Here, however, the chief honours were shared by Mr. Sargent and Sir George Reid, the former showing a vivid portrait of "Colonel Ian Hamilton," and the latter a dignified and forcible presentment of "The Rev. Archibald MacLaren." Mr. Holman Hunt's "Miracle of Sacred Fire," which was hung in the place of honour in the West Room, caused amazement rather than admiration; and neither Mr. Watts's "Dedication," nor his "Lord Roberts," showed that painter's work at its best. To artists one of the most interesting pictures in the New Gallery was Mr. Edward Stott's pastoral "Trees, Old and Young Sprouting, a Shady Boon for Simple Sheep." Mr. J. J. Shannon's portraits were of more than average interest; Sir Lawrence Alma-Tadema's tiny portrait of "Mrs. George Lewis and her Daughter Elizabeth," was far more attractive than his big picture at the Academy. Good landscapes were shown by Mr. Alfred Parsons and Mr. Alfred East; Mrs. A. L. Swynnerton contributed a powerful but unsympathetic figure study "A Dream of Italy"; and Miss Anna Alma Tadema showed an extraordinary power of rendering detail in her water colour "The Closing Door." Among the sculpture there was nothing of especial excellence, but the average quality of the work was fairly good. The **International Exhibition** at Knightsbridge, though interesting, was inferior to that of the previous year. There were fewer works from foreign painters of eminence than in the exhibition of '98, and many of the prominent artists of the British and British-American schools were conspicuous by their absence. The President, Mr. Whistler, showed among other things two or three charming little examples of his earlier work in painting, and a fine series of etchings; Mr. Guthrie, Mr. Bernard Priestman, Mr. Grieffenhagen, Mr. Leslie Thomson, Mr. W. M. Chase, Mr. Mura, Mr. Mark Fisher, Mr. Austen Brown, Miss Cecilia Beaux, Mr. C. W. Furse, and Mr. E. A. Walton, were prominent among the painters, and there was an excellent show of drawings and prints. The foreign exhibitors included M. Alfred Stevens and M. Renoir, both of whom, however, were represented by work executed many years ago; M. Rodin, the great French sculptor, and M. De la Gandara, J. Maris, Franz Stuck, Kroyer, Pissaro, Thaulow, Blanche, Gustav Klimt, Claude Monet, Mancini, Fantin-Latour, Menzel, Rops, Vierge, Milcendeau, and Grasset. The **New English Art Club**, less revolutionary than of old, included in its spring exhibition some excellent landscapes by Prof. Fred Brown, and the work of Mr. W. W. Russell showed an advance upon any of his previous efforts. Mr. Steer, on the

other hand, showed little of his usual quality, and the eccentric element was practically non-existent. The **Annual Loan Collection** at the **Guildhall**, which attracted no fewer than 224,000 visitors, was composed chiefly of pictures and drawings by Turner, and contained some of the finest examples, outside the National Gallery, of the work of the great landscape painter. Several fine canvases by Reynolds, Gainsborough, Romney, Raeburn, and others were hung in one of the smaller galleries at the Guildhall. The **two Royal Water Colour Societies** shared the depression of the larger exhibitions. There was little work of distinction at either, but Mr. Clausen contributed one or two excellent drawings to the exhibition of the Old Society, and Mr. E. J. Gregory's work was pre-eminent at the Royal Institute. There was nothing remarkable at the **Royal Society of British Artists**, with the exception of a curiously quaint and interesting picture by Mr. Cayley Robinson, an artist whose work is rarely seen now at any other exhibition. The triennial exhibition of the **Arts and Crafts Society** was held at the New Gallery, and the special feature was the room devoted entirely to the work of the late William Morris, including many designs, and examples of his printed books; and the only picture in oils he is known to have painted. Book plates were prominent at the exhibition of the **Painter Etchers**; at the Grafton an exhibition of Verestchagin's pictures preceded one at which M. Bing, of Paris, showed glass made by Mr. Tiffany of New York, sculpture by Meunier, and examples of work by French painters of the advanced school. The **Pastel Society's** first exhibition (see under PASTEL) was held at the Royal Institute of Water Colours. The **Women Artists** had a fairly good exhibition, largely devoted to decorative work, at the Royal Society of British Artists; the **Photographic Salon** exhibited its "artistic" sun-pictures at the Dudley; and the **Royal Photographic Society** held its annual show in Pall Mall East. Among the exhibitions at private galleries were those of portraits by Benjamin Constant, pictures by Gaston La Touche and John R. Reid, and caricatures by E. T. Reed, at the Fine Art Society's; cabinet pictures by Byam Shaw, and "Beautiful Women" by Menpes, at Dowdeswell's; a famous series of pictures by Fragonard, at Agnew's; cartoons by A. C. Gould, at the Continental; and one of portraits and pictures of children at the Goupil Gallery.

Artistic honours included the bestowal of knighthoods upon Mr. Alma Tadema (who was the English representative in the Vandyke festival at Antwerp), and Mr. Walter Armstrong. Messrs. Alfred East, Cope, Goscombe John, and Aston Webb were elected Associates of the Royal Academy, M. Jules Breton became an Hon. Foreign R.A. (defeating M. Dagnan-Bouveret by a large number of votes); Mr. Herkomer was elected R.A. Professor of Painting; Mr. J. M. Swan and Mr. Robert Little became full members of the Royal Water-Colour Society, and Mrs. Stanhope Forbes and Mr. Alfred Parsons Associates; Mr. E. J. Gregory (Dec. '98) was chosen President of the Royal Institute of Painters in Water Colours, in succession to Sir J. Linton, retired; and Messrs. A. Macbride and E. C. Clifford were elected to membership. Messrs. Menpes, Byam Shaw, Cecil Rea, Charles l'Anson, and Alfred Hartley, became members of the Insti-

tute of Oils; and Messrs. R. Bryden and W. Monk, and Miss M. Bolingbroke of the Royal Society of Painter Etchers. On the other hand the resignations were announced of Mr. Walter Crane, the Principal of the Royal College of Art, and of Sir John Donnelly, the Secretary of the Science and Art Department.

The foundation stone of the long-talked-of extension of the South Kensington (to be known for the future as the Victoria and Albert) Museum, was laid by the Queen; Birmingham decided to extend its Art Gallery, and thus accept the conditional gift of pictures, by Watts, Holman Hunt, Burne Jones, and others, offered by Mr. J. T. Middlemore. Birmingham also acquired many rare and interesting objects of art at the Bardini sale. The two portraits by Rembrandt (referred to in last year's Annual) were exhibited at the National Gallery, which also received the addition, among other works, of a picture by Francisco de Herrera, and a portrait by Karel du Jardin. Cardiff acquired a valuable collection of pictures, etc. under the will of the late Mr. J. Pyke Thompson, and Norwich received a bequest of a similar nature, under the will of the late Mr. J. J. Colman. Mr. J. Whitehead presented to the City Art Gallery, Manchester, Lady Butler's picture of "Balacava"; two more mural pictures, by Mr. Ernest Crofts and Mr. Stanhope Forbes, were added to those already in position in the Royal Exchange; many new portraits were acquired by the National Portrait Gallery, including a collection of plaster models of eminent persons made by the late G. G. Adams, sculptor; and several pictures were bequeathed and presented to the Nottingham Castle Museum. The Adelaide Art Gallery spent the sum of £23,000, bequeathed by Sir Thomas Elder, in the purchase of modern pictures; and examples were purchased in London of the work of Leighton, Watts, Henry Moore, Tadema, Burne-Jones, Poynter, Phil May, and others. The Royal Academy decided that the sum of £10,000, presented to that body by the executors of the late Lord Leighton, should be called the "Leighton Bequest," and that the interest should be spent in acquiring or commissioning works of decorative art. Attention was called, through a correspondence in the columns of the *Times* to Sir W. B. Richmond's decorative work at St. Paul's Cathedral; and after much controversy and the presentation of a petition (signed by the President of the Royal Academy among others), the work was suspended. A Parliamentary committee held an inquiry into the affairs and general administration of the South Kensington Museum; and Lord Stanley of Alderley made a fruitless attempt in the House of Lords to induce the Government to inquire into the administration of the Royal Academy. The deaths in the world of art included those of Rosa Bonheur, the most famous of women painters; of Harry Bates, A.R.A., one of our most accomplished sculptors; of Birket Foster, the water-colour painter; of the architect, Sir Arthur Blomfield, A.R.A.; of W. H. Millais, an artist, and the brother of the late P.R.A.; of Jacob Maris, one of three brothers all eminent in art; of Mr. J. R. Findlay, the donor of the Scottish National Portrait Gallery; and of Townley Green and J. M. Youngman, both formerly members of the Royal Institute of Painters in Water Colours.

The chief picture sales were the Fowler (£65,355 13s.), and the Mieville (£41,751 3s.).

Several individual canvases fetched very high prices. A "Landscape," by Hobbema, realised £9550 (sold in 1871 for £3,100); a Reynolds' "Lady Hamilton as Bacchante," £4515; a "Holy Family," by Rubens, £8715; Troyon's "Dairy Farm," £6720; and "The Cattle Market," by the same artist, £3780. Turner's "Venice" fetched the huge price of £8610, and his "Oxford from the Abingdon Road," £4200; a portrait of a man by Frans Hals was sold for £3150; "A Chat round the Braserio," by J. Phillip, R.A., £2835; Raeburn's "Innocence," £1995; and a portrait of a girl in white muslin by Opie (sold as recently as 1871 for £38 19s.), £1554. Coloured engravings of certain periods continued to fetch high prices. Meyer's mezzotint of Romney's "Lady Hamilton as Nature," was sold for 470 guineas; and a set of Wheatley's "Cries of London" for the unprecedented price of 610 guineas.

ARTILLERY.

In the ANNUAL for '99 the general tendency of ordnance progress was noted as consisting mainly in the application of quick-fire, and in regard to army guns there is a further advance in that matter to be reported. In the Navy the reaction against heavy guns is complete. The *Royal Sovereign* and her sisters carry 67-ton guns, and the *Magnificent* and *Majestic*, with the battleships of the new programme, have 46-ton guns for their heaviest armament. It is the introduction of the wire-wound gun, offering greater resistance and permitting greater energy, which has made possible the diminution of weight and size. The principle of the new gun is a system of hooping by steel wire, now generally accepted as increasing the admissible maximum pressure from 40 to 50 per cent.

An account of the armament of the *Majestic* will illustrate some of the latest developments in naval guns. The *Magnificent* and the improved *Renowns* have the same armament. The ship carries 4 12-in. 46-ton Woolwich wire guns, on each of which 102 miles of rectangular wire are wound, with an average tension of 40 tons to the square inch, covered by a steel jacket; 12 6-in. Elswick quick-firing (wire) guns; 16 12-pounder Elswick quick-firers; and 12 3-pounder Hotchkiss quick-firers on Elswick recoil mountings. The mounting of the 12-in. guns is upon a new and advantageous principle; "thrust rings," fitting into grooves in the cradle, transmit the longitudinal thrust of recoil, and the guns are kept in their places by well-protected fittings, instead of by bands passing over them. Each gun, with its complete mountings, is balanced in the firing position upon trunnions fitting into the slides (in which position it is loaded, thus allowing more room in the rear than under the old arrangement), and can be elevated or depressed by hand, as is the case, where necessary, in every operation. The guns may be run out or in by hydraulic pressure, but the recoil will always bring them in after the discharge, and they can be loaded in any position, the loading of one gun in a barbette not interfering with the working or firing of the other—a vast improvement upon the former system. The 6-in. guns are upon pedestal mounts, and the *Majestic* was the first ship to carry the 12-pounder. A new wire 9·2 in. gun has been introduced for the cruisers *Powerful* and *Terrible*. It was stated in Aug. '99 that the

Royal Gun Factory had turned out a new gun, which had been tried at Shoeburyness, and was superior in range to any gun ever tested there. The system of electric gear for the turret-movement of heavy guns has been largely adopted in the French navy, and has been introduced in this country in the *Barfleur*, *Powerful*, *Terrible*, *Prince George*, etc. All the new guns are vastly more powerful than their predecessors, and the following table will illustrate their character and capabilities. The 6-in. quick-firer described is the new Vickers wire gun. The gun has a vastly greater muzzle energy than its predecessor. The breech mechanism is special, and the obturation so complete that the metal cartridge case commonly used in such guns is dispensed with:—

	12-in.	9·2-in.	6-in. Q.F.	4·7 Q.F.	12-pr. Q.F.	3 Pr. Q.F.

The importance of gun-domination was brought out strongly by the Boer attack at Ladysmith (Nov. '99), when their 40-pounders were silenced by the naval 4·7-in. guns brought up from Durban, which fired lyddite shells.

Turning to guns for the military forces, we note that all the batteries of horse and field artillery are being converted to a quick-firing system, and the conversion is proceeding rapidly. The arrangement consists in a method of checking recoil devised by Sir George Clarke, and there has been great activity at Woolwich in adapting the carriages according to his plan. The supply of new guns will occupy some time; but Messrs. Vickers, Messrs. Armstrong, and the Royal Arsenal have each supplied experimental 15-pr. field batteries with complete equipment. The Horse Artillery has received the new 12-pr. (6 cwt.) wire-wound gun. Two batteries have received a new 5-in. howitzer. Mountain batteries have each 4 muzzle-loading rifled 7-pounder jointed steel guns, 2·5-in. calibre, the whole, gun, carriage and wheels being carried by mules. Position batteries, each 4 muzzle-loading rifled 40-pounder guns, 4·75-in. calibre; also 2 6·3-in. howitzers. The new 20-pounder is a powerful gun intended for heavier work than that of regular field batteries. Some, however, would no doubt be equipped with it in time of war. The French and German armies are now supplied with new quick-firing long-range guns.

A very powerful wire fortress gun of 9·2-in. has been introduced by the War Office, similar to the naval gun of the same calibre, but 38 feet in length compared with 33 feet, and many of the coast batteries will be supplied with it.

Authorities.—Lloyd & Hadcock, "Artillery: its Progress and Present Position"; Garbett, "Naval Ordnance" (Royal Navy Handbooks); Dredge, "Modern French Artillery," reprinted from *Engineering*, '91; Longridge, "The Application of Wire to the Construction of Ordnance," '89, "Interior Ballistics," '89, "Smokeless Powder and Gun Construction," '90, "The Artillery of the Future," '91, and "The Field Gun of the Future," '92; Wille, "Das Feldgeschütz der Zukunft"; criticism of the same by Captain Moch, *Revue d'Artillerie*, '92; "Modern Naval Artillery" (Griffith); Veyrines, "Artillery at the Paris Exposition of '89"; "Operations of the Division of Military Engineering of the International Congress of

Engineers" (Columbian Exhibition), official, Washington, '94. There is a large literature concerning the tactical employment of guns. Consult Pratt, "Field Artillery"; May, "Guns and Cavalry." The "Field Artillery Drill" was revised, Nov. '96.

Artillery Association. The National, was formed in 1865, and has as its objects the advancement and promotion of the science and practice of Artillery, primarily amongst volunteers in the United Kingdom; and especially the formation of an annual camp of instruction and Prize Meeting for Volunteer Artillery. Subscribers of £1 1s. per annum become members subject to the approval of the Council; a subscription of £10 10s. qualifies for life membership. The Council consists of certain *ex-officio* members and 30 members elected at the annual general meeting, held in March every year. There are 403 members. The annual Prize Meeting in '99 was held August 5th—12th at Shoeburyness. The results of the principal competitions were as follows:—

Cinque Ports Challenge Cup: 1st prize, 1st Essex, Battery 1, 109 points; 2nd, 1st Cheshire and Carnarvon, 90 points.

Corporation and City Companies' Challenge Cup (No. 2): 1st prize, 2nd Cinque Ports, Battery 1, 169 points; 2nd, 1st Essex, Battery 1, 118 points.

Stradbroke Challenge Cup: 2nd Cinque Ports, Section 1, 185 points.

The Dewar Challenge Trophy: 1st prize, 1st Dorset, Group 1, 393 points; 2nd, 1st Essex, Group 4, 339 points; 3rd, 1st Hants, Group 1, 308 points; 4th, 1st Forfar, Group 1, 275 points.

Corporation and City Companies' Challenge Cup, No. 1 (Group Firing): 1st prize, 2nd Glamorgan, Group 2, 420 points; 2nd, 1st Hants, Group 1, 403 points; 3rd, 1st Essex, Group 4, 378 points; 4th, 1st Gloucester, Group 1, 356 points.

Turnbull Challenge Shield: 1st prize, 1st Kent, Group 1, 229 points; 2nd, 1st Hants, Group 1, 210 points; 3rd, 2nd Middlesex, Group 1, 195 points.

Scotland's Challenge Cup: 1st prize, 2nd Kent, Group 2, 137 points; 2nd, 2nd Kent, Group 1, 132 points.

Garrison Artillery Competition, "A" Shift: 1st prize, 8th Lancashire, Detachment 1, 95 points; 2nd, 1st Essex, Detachment 1, 95 points; 3rd, 2nd Kent, Detachment 2, 90 points.

Repository Badges Competition, "B" Shift,

and the "Financial Times" Challenge Cup: 8th Lancashire, Detachment 1, 190 points.

Harcourt Challenge Cup (awarded to such detachment of nineteen men as made the highest aggregate number of marks during the meeting in the Repository Competition "A" Shift and the 3rd Garrison Artillery combined): 1st Essex, Detachment 1, 220 points.

Queen's Prize (Position Artillery): 1st prize, a Silver Cup for the Corps and Silver Badge and cash for each man, added by National Artillery Association, value £80, 2nd Cinque Ports, Battery 1, 250 points; 2nd, 1st Essex, Battery 1, 227 points.

Queen's Prize (Garrison Artillery): 1st prize, a Silver Cup for the Corps, with Badge and cash for each man, added by National Artillery Association, value £110, 1st Essex, Group 4, 717 points.

Prince of Wales' Prize: 1st Hants, Group 1, 711 points.

Officers' Competition (Challenge Cup): 2nd Cinque Ports, Eastern Division, Commanded by Lieut.-Colonel H. C. Wilson.

The President of Council is Lord Stradbroke; the Secretary is Major H. Vane Stow, and the offices are at 24, Bedford Street, Strand, W.C.

Artists, Musicians, and Actors Deceased (Nov. '98–Nov. '99). See OBITUARY.

Ascension Island. In the South Atlantic, 960 miles from African coast, and is a British possession. The port is called Georgetown, and is furnished as a naval station with batteries and storehouses. Used as a coaling depot for the West African squadron. **Area**, 35 sq. miles; **population**, 266. Turtles, for which the island is famous, are found in abundance between December and May. The Governor is a naval officer appointed by the Admiralty. See BRITISH EMPIRE (table).

Ashanti. See GOLD COAST.

Asiatic Society of Bengal. Founded 1784. The Society consists of ordinary, associate, corresponding and honorary members. Meetings are held on the first Wednesday of every month (except in September and October). The Society publishes the well-known series of "Bibliotheca Indica," being a collection of rare and valuable Oriental works in Sanskrit, Arabic, Persian, and Thibetan. The Society's library is peculiarly rich in rare manuscripts. It has also a large and valuable collection of ancient coins, etc., besides a museum known as the Indian Museum.

Asquith, Rt. Hon. H. H., Q.C., M.P. See under COMMONS.

Assiniboia. A district of the North-West Territories (*q.v.*), and a future province of the Dominion of Canada. **Area**, 89,535 sq. m. Capital, Regina, which is the present seat of government for the Territories generally.

Association of Chambers of Commerce of the United Kingdom. This Association was formed in 1860, and incorporated in '75, for the purpose of discussing and considering questions concerning trade, commerce, manufactures, and shipping; and for the collection and dissemination of information from time to time on matters affecting these subjects and the general commercial interests of the country. The Association is in direct communication with various Government departments, and has been instrumental in passing several Acts of Parliament. Amongst the subjects dealt with by the Association may be mentioned bank-

ruptcy law reform, consolidation of the partnership law, postal reforms, bills of sale, parliamentary procedure, commercial union with the colonies, county court jurisdiction, treaties of commerce with foreign countries, etc. It holds an annual meeting early in the year in London, and an autumnal meeting in the provinces, at both of which resolutions suggested by the various local chambers of commerce are discussed, with a view to action being taken thereon. At these meetings the President of the Board of Trade and a representative of the Foreign Office usually attend in order to ascertain the views of the commercial community on important mercantile topics. The membership of the Association consists not of individuals, but of chambers of commerce, 93 of which are members and send delegates to the meetings of the Association. **President**, The Hon. Sir H. Stafford Northcote, Bart., M.P.; **Secretary**, E. W. Fithian. **Offices**, 1, Great College St., Westminster, S.W.

Astronomer Royal. See CHRISTIE.

Astronomy, '99. After the outburst of sun spots in September and October '98, the sun's surface became quiescent till June 23rd, '99, when a large spot appeared on the east limb, which with other smaller spots formed a group covering, on June 29th, an area of 700,000,000 square miles, being 87,000 miles long and 27,000 miles at greatest breadth. So large a disturbance near minimum is exceptional, and serves to keep up the character of the present decline. During July, August, and September the surface was practically free from spots. The predominance of spots and faculae has been in the southern hemisphere. The reports of the Indian eclipse observations in Jan. '98 show that good work was done, and our knowledge of the constitution of the sun and its surroundings has advanced. "The Flash" spectrum has been very successfully photographed, and a new region of the "Flash" explored and mapped; the bright-line spectrum of hydrogen has been followed in the chromosphere to the thirtieth point of the series, and the wavelengths found to agree closely with Balmer's formula; our knowledge of the distribution of coronium in the Corona has been increased; the variation in the form of the Corona with the sun-spot period has been further illustrated; the coronal rays have been photographed to a greater distance than ever before, and much has been gleaned of their structure; the corona has been photographed during partial phase, and good determinations of its total light have been made. The Zodiacal light and Gegenschein continue to receive great attention, but it cannot be said that real knowledge has been advanced. The recent work of Professor Newcombe leads him to conclude that (1) the motion of the Solar System in space is three and a half times the radius of the Earth's orbit in one year, or 334,000,000 miles; (2) the most likely position of the solar apex—i.e. the point in the sky towards which our system is travelling—is situated in R.A. 18h. 30m. and Dec. +35°. To the values of the aberration constant given last year may be added 20'461" (Jacoby), 20'581" (Doolittle). From experiments recently made by Professor C. V. Boys, the mean density of the earth is 5'5270 times that of water. In other words, the total weight of the earth is 5,882,064,000,000,000,000,000 tons; another determination made on totally different lines by Father Braun, in Bohemia, gives the density

5°52'37, a remarkable agreement. From his own observations, extending over a period of thirty years, Mr. Denning determines the **rotation period of Mars** to be 24h. 37m. 22^s.708. The small planet D.Q., discovered August '98, has been named **Eros**, and by reason of its interesting character has received great attention. In particular the Astronomer Royal has secured a long series of photographic positions with the new 26-inch Thomson refractor, and Professor Pickering has searched successfully the Harvard photographic records as far back as '93. From the old positions thus obtained Dr. Chandler has been enabled to compute an accurate orbit. Its period of revolution round the sun is 2^{yr}.32 years. The opposition of November 1900 will be the most favourable until 1917, so that observations for parallax ought then to be made. The planet will be seen as a 7th magnitude star, and will be nearer the earth than Mars even at its most favourable opposition. A great amount of detail has been visible on the surface of **Jupiter**, many spots appearing on the north edge of north equatorial belt, and moving at different rates. According to Denning, one of the fastest moving gives a period of rotation 27 seconds less than that given by the red spot which has now become a mere faint dusky stain attached to the north side of the south belt. The values of the rotation period of Jupiter generally lie either between 9h. 50m. and 9h. 51m., or 9h. 55m. and 9h. 56m. This period is deduced from observations of spots, and in general those in latitudes 0° to + 9° give a short period, while those in the higher latitudes produce the longer period; but occasionally this is reversed, and it may be that different spots occupy different levels. The most recent determination of the period of Jupiter's fifth satellite is 11h. 57m. 22^s.65 secs. The discovery of a **new satellite to Saturn** has been announced by Professor W. H. Pickering. A star of fifteenth magnitude taken on four photographic plates, August 16th, 17th, 18th, was found to have moved in position about ten seconds daily. It could either be a planet outside Neptune or a satellite to Saturn. If the latter, its period of revolution about Saturn is about seventeen months, its mean distance being 7,500,000 miles, and it would appear from Saturn as a star of the sixth magnitude. Confirmation of this is wanted. Three **periodic comets** expected this year have been already detected—viz., Tuttle's comet of '58, whose period is 13^{yr}.3 years, was found by Wolf on March 5th; Tempel's comet, '73, period 5^{yr}.4 years, found by Perrine at Lick on May 6th; Comet Holmes, '92, period 6^{yr}.3 years, found again by Perrine, June 10th. Besides these, Brooks discovered a comet on Oct. 20th, which became visible to the naked eye; Swift discovered one, Mar. 3rd, which became conspicuous in May and June, when it had two heads and a rapid motion; Chase found another, Nov. 14th, '98, by photography. The mean of all determinations of parallax hitherto made of 61st and 61st Cygni, give a difference of '078" between the two stars. This difference of parallax corresponds to a separation of the two stars equal to 2¹/₂ light years, a distance so great being distinctly against the idea of physical connection. **Coming events** include the occultation of Neptune, Mar. 8th, 1900, 6h. 13m. (morn.); of Saturn, April 3rd, 8h. 35m. (even), June 13th, 9h. 40m. (morn.), Sept. 3rd, 7h. 16m. (morn.); and the Total Solar Eclipse, May 28th. The central line

passes from America across the Atlantic to Portugal, Spain, Algiers; nowhere is it more than two minutes in duration. The British Astronomical Association are organising expeditions to America, Portugal, Spain, and Algiers. The Royal Astronomical Society are sending parties also. The Greenwich party had intended to visit Portugal, where the stations are easily accessible, but the probability of cloud is greater than in Algiers or the neighbourhood of Madrid; it is, however, feared that the plague will necessitate a change. At Greenwich it will be a partial eclipse, beginning 2h. 47m. and ending 4h. 57m.; at Edinburgh, begins 2h. 41m., ends 4h. 47m. Dublin, begins 2h. 38m., ends 4h. 52m. **Books for reference**: Young's "General Astronomy" (2nd Ed.); Miss Clerke's works; *Monthly Notices*: Royal Astronomical Society; *The Observatory*; Publications of the British Astronomical Society; *Astronomische Nachrichten*.

Athabasca (Indian, "swampy"). A district of the North-West Territories (*q.v.*), and future province of the **Dominion of Canada**. Lies north of Alberta and east of British Columbia. **Area**, 265,000 sq. m.

ATHLETICS, '99.

The principal competitions resulted as follows:—On Dec. 26th, '98, E. C. Bredin beat A. R. Downer in a 500 yards race for £100 at Barrow-in-Furness in 59 sec. on a bad ground. In the **Cross-country** running Dublin University beat Oxford University, and the match between Dublin and Edinburgh Universities ended in a tie. The **Welsh Cross-country Championship** was won by the Newport Club, J. Lee, Newport, coming in first; the course was 8 miles and the time 46 min. 2 sec. The death of E. L. Myers, the celebrated runner, in America on Feb. 15th was announced. The **Southern Counties Cross-country Championship** was won by the Highgate Harriers, C. Bennett, Finchley Harriers, coming in first, in 61 min. 34¹/₂ sec. The **Northern Counties Cross-country Championship** was won by the Salford Harriers, J. Hosker, Farnworth Harriers, coming in first, in 1 hr. 3 min. 37¹/₂ sec. The **Midland Counties Cross-country Championship** was won by the Birchfield Harriers, A. Meacham, of the same club, coming in first in 65 min. 54 sec. The **National Cross-country Championship** was run at Wembley Park, and resulted in the Highgate Harriers being first with 92 points, C. Bennett, of the Finchley Harriers, coming in first, in 58 min. 36 sec. The **Cross-country Championship of Scotland** was run at Glasgow, the Watsonian Club winning with 55 points, J. Paterson, of the same club, coming in first, in 64 min. 36¹/₂ sec. The 10th Annual Cross-country Match between Oxford and Cambridge Universities, over a 7¹/₂ miles course, ended in a victory by Oxford by 25 points to 30. The **Oxford and Cambridge University Sports**, held at Queen's Club on March 24th, ended in a tie; a new event, making 10 in all, having been added in the shape of a Half-Mile Contest, there was not the usual "odd event" which formerly allowed one side or the other to win the larger number. The results were as follow:—Hundred yards: C. R. Thomas, Oxford, 10¹/₂ sec. Half-mile: H. E. Graham, Cambridge, 1 min. 59¹/₂ sec. Hundred-and-twenty yards hurdle race: W. G. Paget-Tomlinson, Cambridge, 16 sec. Long jump: G. C. Vassall, Oxford, 23 ft. 3 in. Throwing the hammer:

J. D. Greenshields, Oxford, 110 ft. 1 in. Quarter-mile: A. M. Hollins, Oxford, 5½ sec. One mile: A. Hunter, Cambridge, 4 min. 25 sec. Putting the weight: G. W. Clark, Cambridge, 34 ft. High jump: H. S. Adair, Oxford, 5 ft. 8½ in. Three miles: H. W. Workman, Cambridge, 15 min. 32½ sec. Cambridge have now won the Sports 19 times to Oxford's 15. On April 7th the **Ten Miles Championship of Scotland** was won at Glasgow by W. M. Badenock, Edinburgh Harriers, in 58 min. 4½ sec. On April 22nd the **Ten Miles Championship of the Amateur Athletic Association** was won at Derby by C. Bennett, Finchley Harriers, in 54 min. 12½ sec. The **Amateur Athletic Association Championships** were held at Wolverhampton, the results being as follows:—One mile: Hugh Welsh, time, 4 min. 26 sec. Hundred yards: R. W. Wadsley, time, 10½ sec. Putting the weight, D. Horgan, 46 ft. ½ in. Hundred-and-twenty yards hurdles: W. G. Paget-Tomlinson, time, 16½ sec. High jump: P. Leahy, 5 ft. 10 in. Half-mile: A. E. Tysoc, time, 1 min. 58½ sec. Throwing the hammer: T. F. Kiely, 136 ft. 4½ in. Quarter-mile: R. W. Wadsley, time, 54½ sec. Four miles: C. Bennett, time, 20 min. 49½ sec. Long jump: W. J. M. Newburn, 22 ft. 2 in. Four miles walking: W. J. Sturgess, time, 29 min. 20 sec. Pole jump: E. C. Pritchard, 7 ft. Two miles steeplechase: W. Stokes, 11 min. 16½ sec. In the Annual Sports between Scotland and Ireland, held in Edinburgh, the former won. On June 3rd, at Limerick, T. J. Kieley, the English and Irish Champion threw the hammer the world's-record distance of 162 ft. On July 22nd, at Queen's Club, a most interesting contest took place: **Oxford and Cambridge Universities v. Harvard and Yale Universities**, a meeting at which not only capital performances were made, but everything passed off in the most friendly and satisfactory manner; the Englishmen won the odd event. The following were the winners:—Throwing the hammer: W. A. Boal, Harvard, 136 ft. 8½ in. Long jump: G. C. Vassall, Oxford, 23 ft. Hundred yards: F. T. Quinlan, Harvard, 10 sec. One mile: A. Hunter, Cambridge, 4 min. 24 sec. Hundred-and-twenty yards hurdles: F. B. Fox, Harvard, 15½ sec. Half-mile: H. E. Graham, Cambridge, 1 min. 57½ sec. High jump: A. N. Rice, Harvard, 6 ft. Quarter-mile: C. G. Davidson, Cambridge, 49½ sec. Three miles: H. W. Workman, Cambridge, 15 min. 24½ sec. On Aug. 5th, at Morpeth, R. D. Dickenson, of Windermere, won the **Pole-leaping** competition, tying the world's record of 11 ft. 6 in. H. Cullum, of Cardiff, ran 1000 yards in the record time of 2 min. 9½ sec. at Aberavon on the same date. W. J. Sturgess broke his own record by walking a mile in 6 min. 32½ secs. at Shanklin, on August 7th, and on October 14th he walked on the road 8 miles in 1 hr. 3 min., and 10 miles in 1 hr. 16 min. 57 sec., 41½ secs. better than his own world's record on a track. On Nov. 4th, at Rochdale, H. Cullum beat E. C. Bredin for the world's half-mile championship, the time being 2 min.

Auctioneers' Institute of the United Kingdom (Incorporated) The, has for its objects the provision of a central organisation for auctioneers, valuers, and land, estate, and house agents, and the promotion of the efficiency and usefulness of the profession. Branches of the Institute have been established in (1) York-

shire; (2) South Wales and Monmouthshire; (3) Lancashire, Cheshire, and Derbyshire; (4) Northumberland and Durham; (5) Kent, Surrey, and Sussex; (6) Western Counties. Lectures and papers are given at the Institute monthly during the session—October to March. Membership may be obtained by examination or under the "Practice" qualification. The examinations are held annually in March or April. **President**, Mr. W. Roland Peck (Hampton & Sons), London. **Secretary**, Mr. Charles Harris. **Offices**, 57 and 58, Chancery Lane, W.C.

Austin, Alfred, appointed Poet Laureate on New Year's Day '96, was b. 1835 at Headingley, near Leeds. He was ed. at Stonyhurst College and St. Mary's College, Oscott, and took his degree at the London University in '53. He was called to the bar of the Inner Temple, '57. His bent, however, was always towards literature, and he published his first acknowledged poem, entitled "The Season," in '61, having already published, anonymously, a poem called "Randolph," in his nineteenth year. His best-known works are "The Human Tragedy," "Savonarola," "The Tower of Babel," "Prince Lucifer," "Fortunatus the Pessimist" ('92), "The Garden that I Love" ('94), "In Veronica's Garden," and "Lamia's Winter Quarters" ('95), "England's Darling," ('96), and "The Conversion of Winckelmann" ('97). For many years he was a writer in the *Standard* and the *Quarterly Review*. He was also one of the founders of the *National Review*, which he edited, in conjunction with Mr. W. J. Courthope, during the first years of its existence. A collected edition of his works was issued in six volumes in '02. Address: Swinford Old Manor, Ashford, Kent.

Australasian Association for the Advancement of Science. The Association was formed in '86, and is modelled on the British Association. The sections include Astronomy, Mathematics and Physics, Chemistry, Geology and Mineralogy, Biology, Ethnology and Anthropology, Geography, Economic Science and Agriculture, Engineering and Architecture, Sanitary Science and Hygiene, Mental Science and Education. The last meeting was held at Sydney in Jan. '98, Professor Liversidge presiding. An elaborate and most valuable report of its proceedings is published as a separate book under the auspices of the Association. The eighth session will be held at Melbourne in 1900, and the ninth at Hobart (Tasmania) in 1902. The **Permanent Hon. Secretary** is Professor A. Liversidge, M.A., LL.D., F.R.S., and his address is The Chemical Laboratory, the University, Sydney, N.S.W.

AUSTRALIA.

Australia is the largest island in the world about one-fifth less than Europe, and about as large as the United States, excluding Alaska. It is situated south-east of Asia, dividing Pacific from Indian Ocean; extends 2400 miles west to east, and 1971 miles north to south. **Area** computed at 3,031,169 sq. miles, or twenty-six times the size of Great Britain and Ireland. Present total population about 3,445,000. Wholly British possession. Divided into the colonies of **Queensland**, pop. 493,704, capital Brisbane; **New South Wales**, pop. 1,335,800, capital Sydney; **Victoria**, pop. 1,174,888, capital Melbourne; **South Australia**, pop. 361,483 (including the Northern Territory), capital Adelaide; and **Western Australia**, pop. 170,021, capital Perth. (For separate

accounts of these colonies see under their respective alphabetical headings. For latest statistics see *BRITISH EMPIRE*, table.) Australia is a great plateau, elevated on the east and inclined towards the west. The eastern half and most of the other territories bordering the coasts on north and west are extremely fertile, and well adapted for grazing. Wool still continues to be the staple export, but the trade in frozen and tinned meat is fast increasing. A wine industry appears to be rapidly growing up, especially in South Australia. The great central depression is sterile, and almost impassable on account of want of water, together with prickly growths. Coal abounds in various districts, particularly in New South Wales and Queensland. Gold, silver, tin, iron, and copper are extensively worked. Climate varies from tropical to temperate. There are over 11,000 miles of railroad open. The black aborigines are few, and rapidly decreasing, but their present strength is probably about 200,000. The progress of the country during the last fifty years has been wonderful. But this progress has not been attained without considerable expenditure, and the Australian colonies have gone very far in this direction. The aggregate debt of the colonies in '98 amounted to about £180,000,000, most of the expenditure, however, being reproductive.

AUSTRALIAN FEDERATION.

This question has attracted attention more or less ever since '52, but the more recent history of the movement began in '86, when a Federal Council, sanctioned by the Imperial Parliament, met at Hobart. In Oct. '89 Sir Henry Parkes, the then Premier of New South Wales, took the initiative in calling together "a national convention for the purpose of devising and reporting upon an adequate scheme of Federal Government." The matter was taken up by all the Australasian governments, with the result that on Feb. 6th, '90, a conference met in Melbourne, and carried resolutions in favour of such a scheme. The *Australasian Federal Convention*, which met at Sydney (March 2nd, '91), marked a great advance. Its object was to frame a constitution for the Dominion of Australia. Sir Henry Parkes was unanimously selected as President, and the chief governmental representatives of New South Wales, Victoria, Queensland, South Australia, Tasmania, New Zealand, and Western Australia were present. This Convention, on April 9th, passed a Bill which proposed to establish a *Federal Constitution* for the Commonwealth of Australia. By the Bill it was provided that a Governor-General should be appointed by the Sovereign, and that each colony (or state) should contribute to the Commonwealth Parliament representatives from its individual Legislature. This Parliament should consist of a directly elected House of Representatives and a Senate composed of delegates from all the colonies. A salary of £500 should be paid to the members of both Houses. Seven Ministers, to be known as "the Queen's Ministers of State for the Commonwealth of Australia," should assist the Governor-General. There should be a Supreme Court, as in the United States, whose functions would render unnecessary the Privy Council. Freedom of Trade between the various colonies was also agreed to.

In '94, after a period of inaction, there were signs of renewed activity. A conference of

Australian Premiers, summoned by Mr. G. H. Reid, the Premier of New South Wales, met at Hobart (Jan. 29th, '95), and adopted a bill entitled "The Australasian Federation Enabling Act," which provided for the inclusion of New Zealand, if that colony should so desire. The procedure laid down was that ten representatives of each colony should form a convention to frame the Federal Constitution, and as soon as three or more colonies had elected their representatives the Governors of those colonies should summon the convention. The Constitution, having been framed and adopted, should be referred to the direct vote of the electors for acceptance or rejection, and if three colonies accepted it it should be presented for Imperial enactment. Delegates to the Federal Convention were accordingly elected by New South Wales, Victoria, South Australia, West Australia and Tasmania early in '97, Queensland standing aloof. The Convention opened at Adelaide (March 22nd), Mr. C. C. Kingston, Premier of South Australia, was chosen President, and Mr. Barton, of New South Wales, having been deputed to prepare resolutions embodying the principles of the new Constitution, submitted the following resolutions, which were carried by a unanimous vote:—

1. That the powers, privileges, and territory of the Colonies shall remain intact, except in respect of voluntary surrenders with a view to secure uniformity of law and administration.

2. That after the creation of a Federal Government there shall be no alteration of boundaries without the consent of the Colony concerned.

3. That the exclusive power of imposing and collecting customs and excise be vested in the Federal Parliament.

4. That the exclusive military and naval control be vested in the Federal Parliament.

5. That trade and intercourse between the federated Colonies be absolutely free.

6. That, subject to the above conditions, the Convention shall approve the framing of a Constitution whereby a Parliament shall be established, consisting of a States Assembly or Senate, and a National Assembly or House of Representatives, the former to consist of representatives of each Colony chosen in the manner best calculated to secure perpetual existence, with responsibility to their own people, and the latter to be elected in districts formed on a population basis, and to possess the sole power to originate revenue Bills and impose taxation. The executive shall consist of a Governor-General appointed by the Queen, as well as of such persons as shall be appointed as his advisers, and of the Supreme Federal Court, which shall also be the High Court of Appeal of the Federated Colonies.

The Convention, having resolved to take the Bill of '91 as a basis, remained in session till April 23rd, '97, and sat in Sept. '97, and again from Jan. 20th to March 17th, '98; and at these sittings the form of the Constitution Bill was vigorously and exhaustively debated. There were three main points on which the discussion turned. The first was that of the representation of the colonies in the Upper House. The smaller colonies stood out stoutly for equal representation independently of the numbers of the population, and this was finally conceded; but the larger colonies insisted that the Upper House should have no power to amend money bills. Eventually a compromise was

arrived at, and it was agreed that the Upper House might suggest alterations to the Lower. It was further provided that all powers not definitely vested in the commonwealth should be retained by the individual colonies. The second difficulty was as to the means of settling a deadlock in case of disagreement between the two Houses. This was met by a clause providing for simultaneous dissolution, and, if that should not settle the matter, for a joint sitting of both Houses and a two-thirds majority. The third point arose in connection with the financial arrangements. The Convention agreed that the customs revenue of the colonies should be applied to defray federal expenditure, but the question was how should the surplus not required (if there should be any) be divided amongst the colonies. The Convention decided that a uniform tariff should be established for the federated colonies within two years, and that within the borders of this tariff trade should be free. The just contribution of each colony to the general trade and the just share in the general expenditure of the Commonwealth should then be ascertained by careful examination during a period of five years, and on the data so obtained the division of the surplus customs revenue should be made. This became known as the Braddon clause.

The Bill was then referred to a *plebiscite* in each colony, and strong opposition to some of its provisions was manifested in New South Wales. The result of the voting was as follows:—

Colony.	For the Bill.	Against the Bill.
New South Wales ..	70,990	65,619
Victoria	93,473	20,570
Tasmania	13,496	2,900
South Australia ..	35,771	17,309

Mr. Reid, the Premier of New South Wales, asked the other Premiers to meet him in conference, to see if the Bill could be amended; and eventually a conference was held at Melbourne in Jan. '99, when an agreement was reached on all the points in dispute. It was also agreed that an absolute majority of both Houses of the Federal Parliament should decide in all cases of differences between the two Houses; that the Braddon clause relating to the proportionate distribution of the surplus of the Federal revenue amongst the separate states should continue in operation for ten years; and that the Federal capital should be in New South Wales, at least 100 miles from Sydney, Melbourne being the temporary meeting place of the Federal Parliament. Some difficulty was afterwards experienced in carrying the Bill through the New South Wales Legislature, but eventually this was overcome (see NEW SOUTH WALES), and the amended Bill was referred to the electors, first of New South Wales and then of the other colonies. The results of the voting were as follows:—

Colony.	For the Bill.	Against the Bill.
New South Wales ..	107,274	72,701
South Australia ..	65,990	17,053
Victoria	151,352	9,656
Queensland	38,488	30,996
Tasmania	12,931	779

The Legislatures of most of the colonies adopted a motion that an address should be presented to the Queen praying for the adoption of the Commonwealth Bill as an Imperial Act of Parliament, Western Australia alone holding aloof. The final outcome of the discussion left

the constitution of the Federal Parliament thus: there will be a Senate consisting of 6 representatives from each colony, chosen for 6 years. The House of Representatives will contain as nearly as possible double the number of members returned to the Senate allotted to the colonies on a population basis, but so that no colony has less than 5 members. The qualification for electors, for both Houses, will be the Parliamentary franchise of their respective colonies at present.

Austria, Emperor of. See FRANCIS JOSEPH.

AUSTRIA-HUNGARY.

Austria-Hungary is an empire under the rule of Francis Joseph I. of Hapsburg, Emperor of Austria and King of Hungary, and is composed of a Cisleithan portion, officially known as Austria, and a Transleithan portion known as Hungary, each having, according to the Compromise made in '67, its own constitution, a limited monarchy, and each possessing a separate parliament, but uniting under a common sovereign in the establishment of a common army, navy, financial, diplomatic, postal, and telegraphic services. Legislation in regard to common affairs is accomplished by a supreme body known as the Delegations. Of these there are two, each composed of 60 members, representing the legislative bodies of Austria and Hungary, the upper houses returning 20 and the lower houses 40 delegates. The members of the Delegations are appointed for one year, and are summoned annually by the Emperor alternately at Vienna and at Budapest. Subject to the Delegations are the three executive departments for Foreign Affairs, War, and Finance. The agreement between the two countries termed the *Ausgleich* embraces the regulation of their fiscal and commercial affairs, of the quota paid by them to the common expenses of the Empire, and the privileges of the Austro-Hungarian Bank. The customs and commercial treaty is renewable every ten years, and was denounced in Dec. '96 by the Hungarian Government in order to secure, if possible, more favourable terms for the future. After several months spent in negotiations, it was found impossible to arrive at any satisfactory understanding, and the deputations appointed for that purpose separated (May 4th, '97). The representatives of Hungary urged that their share of the common expenses should be based on the revenue derived from taxation in each half of the Monarchy; whereas the Austrian delegates argued that the basis should be the number of the population. The former contributions of Austria and Hungary were 68·6 per cent. and 31·4 per cent. respectively, and it was sought to raise Hungary's share to 43·14, or at the least to 36 per cent., whereas Hungary declined to pay more than 33·2 per cent. The treaty expired Dec. 31st, '97, but was prolonged for one year provisionally, and the subsequent negotiations are described below. **Austria** (capital Vienna)—area, 115,903 sq. m.; estimated population in '96, 25,249,701—is governed by an Emperor and by the *Reichsrath*, or Council of the Empire, consisting of an Upper House and a Lower House. The *Reichsrath* has its own ministers and government, and exercises full parliamentary functions on all matters within its competence—from which, however, Foreign Affairs and War are excluded. The present Upper House contains

255 members. It is composed of the Princes of the Imperial family who are of age, of whom there are 19, of 66 hereditary nobles, of 17 archbishops and bishops, and of 153 life-members nominated by the Emperor for distinguished services in science or art, or to the Church or State. The Lower House contains 425 members, who are the popular representatives of the sixteen provinces which comprise the Austrian Empire. According to the present system they are elected for six years by five groups: the large landed proprietors, who choose 85 members; the Chambers of Commerce, who choose 21; the inhabitants of towns, 118; the inhabitants of country districts, 129; and the general body of electors, including roughly all male citizens over twenty-four with a residential qualification of six months, who choose 72. In these four groups there are comprised about 1,700,000 voters. - Purely provincial matters are administered by the seventeen provincial diets (viz., of Upper and Lower Austria, Salzburg, Styria, Carinthia, Carniola, Trieste, Tyrol, Vorarlberg, Görz and Gradiska, Istria, Dalmatia, Bohemia (*q.v.*), Moravia, Silesia, Galicia and Bukovina), while local matters are dealt with by communal councils, or by corporations in towns. - **Hungary** (capital Buda-Pesth)—area, 125,039 sq. m.; population, '96, 18,550,512—embraces the kingdoms of Hungary, Croatia-Slavonia, and Transylvania, and is governed by a King (the Emperor of Austria), and a **Reichstag**, consisting of a House of Magnates and a House of Representatives. The former comprises 228 hereditary peers, paying land tax of at least 3000 fl. a year, some 56 high ecclesiastical dignitaries of the Roman Catholic, Greek, and Protestant Churches, 79 life-peers, all the archdukes who have attained their majority, 3 delegates from the Diet of Croatia-Slavonia, and 17 state dignitaries and judges. The House of Representatives contains 453 members, elected for five years by male citizens over 20, with a low property qualification. Of these 413 represent Hungary, and 40 Croatia and Slavonia. Transylvania is in full legislative and administrative union with Hungary, but Croatia-Slavonia has its own provincial diet, consisting of 90 members, for the transaction of provincial matters. The population of Transylvania is largely Roumanian, and much discontent exists amongst them on account of the persecution and injustice which they allege they suffer at the hands of the Magyar rulers of Hungary. - **Bosnia-Herzegovina** (*q.v.*), though in strictness still a province of the Porte, has since the Treaty of Berlin in '78 been occupied and administered by Austria-Hungary, and may fairly be considered as belonging to that empire. Its area is 23,262 sq. miles, and the population is about 1,600,000. - The chief religious bodies in Austria, where religious liberty is the ruling principle, are Roman Catholics, Old Catholics, Lutheran and Reformed Evangelicals, Armenians and Jews. In Hungary much the same divisions exist, and full liberty and equality prevail. Attendance in the elementary schools is compulsory in both countries, though the period of attendance varies in different districts, and the educational fabric includes also gymnasia and other preparatory schools, universities and colleges, and technical schools. The larger half of the population in both countries are engaged in and dependent upon agriculture,

cereals, beet, wine and silk being produced. There are extensive and valuable forests, and mining is also carried on very largely. The chief exports are sugar, grain, and other agricultural produce, timber, woollen and leather goods. The estimated revenue and expenditure for common affairs for '98 amounted to £13,766,667. For Austria alone the revenue was £59,991,750, and the expenditure £59,660,000; for Hungary alone the revenue was £41,649,084, and the expenditure £41,639,250; for Bosnia-Herzegovina the revenue was £1,519,250 and the expenditure £1,509,416. The common debt of Austria-Hungary amounted in '98 to about £250,000,000; the special debt of Austria to £124,200,000, and of Hungary to £181,475,000. The imports for '98 amounted to £69,242,000, and the exports to £67,391,000. See FOREIGN ARMIES, FOREIGN NAVIES, and DIPLOMATIC.

Political Parties.—**Austria.** The Lower House of the Reichsrath includes members of widely varying race and creed. After the general election of '91, for instance, there were German Liberals, National Germans, Anti-Semites, Poles, Ruthenians, Young Czechs, Old Czechs, Independent Czechs, Left Centre, Clericals, Slavonians and Serbo-Croats, Bohemian Feudal Conservatives, Moravian Central Party, Italians, Roumanians, and German Conservatives. The chief parties, however, were the German Liberals, the Poles, and the German Conservatives and Clericals. Count Taaffe, long the Prime Minister, in Oct. '93 lost the support of the German Liberals, the Poles, and the Conservatives, because of his Electoral Reform measure, which practically amounted to a measure of universal suffrage; and he finally had to resign. He was succeeded by Prince Windischgrätz, who, with the help of the Poles, the German Liberals, and the Conservatives, managed to form a Coalition Cabinet, which held office till June '95, when it was succeeded first by a provisional administration under Count Kiemansegg, and then by a non-party Cabinet under Count Badeni, who at the outset declared his absolute independence of the various parliamentary groups. During '96 the Anti-Semites, the party of ultra-Clerical reaction, obtained great prominence, chiefly through the efforts of Dr. Lüger. The Old German Liberal party also collapsed, and in place of it there arose a party called the German Progressist party, strongly opposed to the Clerical reactionists. The Poles, the Moderate German Liberals, and the Young Czechs formed the majority upon which Count Badeni relied during '97. His famous language ordinance, allowing the official use of the Czech language in Bohemia and Moravia, alienated the Germans, and provoked a racial conflict of a most bitter character between the Germans and the Czechs. In '98 the relations of parties became more confused than ever, the Clerical and Polish groups co-operating with the Czechs, and the Social Democrats joining their forces with the Germans. As the year went on, however, the Germans of all shades of opinion showed an increasing tendency to combine against the Slavs, the German Clericals falling more into line with the other German sections—the German People's party, including about 40 members returned mainly from the Alpine provinces; the German Progressives, numbering about 50 members, coming mainly from Bohemia and Moravia; the German landed proprietors, numbering about 25; and

the German Nationalists, a small but influential group of 5, including the redoubtable Herr Wolf. The Social Democrats joined with these numbered 14. The Germans, with the exception of the German Nationalist group, consolidated themselves still more in '99, and adopted a lengthy programme in May, demanding that other nationalities should no longer be satisfied at their expense, and that German should be legally adopted as the general language of communication. There was also a steady and significant revolt against the political influence of the Roman Church during the year, and it was seen to be intimately associated with the German Nationalist agitation. Finally Count Thun resigned, the language ordinances were repealed, and a Ministry under Count Clary was formed, relying mainly upon the Germans for a majority in the Reichsrath. The Czechs were thus transformed into an Opposition party. — **Hungary.** Parties are distinguished as Liberals, Independents, the Croatian delegates, who usually vote with the Liberals, and the Nationalists, who vote now with one party and now with another. After the '92 election the Liberals numbered 240; the Independents, who aim at the liberation of Hungary from all but the monarchical tie with Austria, 61; and the Nationalists 49. M. Tisza, who commanded the support of the majority in the Chamber during his seventeen years' leadership, retired in '91. His colleague, Count Szapary, succeeded him, but fell in Nov. '92, over the civil marriage question, and was succeeded by Dr. Wekerle, who formed a strong ministry, and entered office pledged to a reform of the marriage laws. This reform he in great part accomplished, but owing to the persistent attacks of the Clericals he was compelled to retire during '95, and Baron Banffy took his place, and completed his programme of reforms, the Liberal party proving strong and homogeneous enough to overcome all opposition. A new party, called the Hungarian People's Party, was formed in Jan. '95, with a showy programme, but with the real object of organising Catholic opposition to Liberal measures. This party has since openly adopted Anti-Semitism as part of its programme. At the general election in Oct. '96 the Liberals gained a decisive victory. There were returned 282 Liberals, 37 Nationalists, 48 Kossuthists, 7 Ugronists, 20 of the People's Party, and 10 owing allegiance to no party. The net Liberal gain was estimated to be 65 seats, while all the other parties except the Kossuthists, led by M. Franz Kossuth, lost ground. The Ugronists afterwards joined the Kossuthists, and passed under Clerical influence. At the end of '98, and early in '99, there was a serious split in the Liberal party, and the dissentients, with the aid of the Opposition, mainly controlled by the Clerical party, succeeded in driving Baron Banffy from office in Feb. '99. He was succeeded by M. Koloman Szell, but the Liberals remained in power. The National Party afterwards fell asunder, the members mostly joining the Liberals, and the Kossuthists showed symptoms of breaking up, the tendency being for parties to resolve themselves simply into Liberals and Ultramontanes.

History, '99.—Austria. Both Houses of the Reichsrath held special sittings at which appropriate speeches in honour of the Emperor's Jubilee were delivered (Nov. 25th, '98). The people in Vienna and throughout the

empire were enthusiastic in their demonstrations of loyalty and attachment to the Emperor on Jubilee Day (Dec. 2nd). This did not, however, assuage the bitterness of political strife. The confiscation of a number of the *Ostdeutsche Rundschau*, the organ of the pan-Germanic party, led to disgraceful scenes in the Reichstag (15th), the attack on the Minister of Justice being particularly violent. An Imperial decree was published (Jan. 1st), in accordance with an arrangement made by Baron Banffy and Count Thun, extending the *Ausgleich*, by virtue of Article XIV. of the Austrian Constitution, until Dec. 31st, '99, and directing that the contributions of each half of the Monarchy towards the joint expenditure should remain unchanged during that period. When the Reichsrath re-assembled (Jan. 17th) the obstruction began again, and was carried on as obstinately as ever. After several stormy scenes, including a free fight in the Press Gallery, the Session was prorogued (Feb. 1st) and the government of the country was carried on under Article XIV., the emergency paragraph of the Constitution, without the co-operation of Parliament. The Austrian and Hungarian Premiers held several conferences on the *Ausgleich* question, but it was at last recognised that the differences between the two Governments were such as could not be reconciled (May 22nd). Then, however, the Emperor stepped in, a compromise was arrived at, and M. Szell submitted Bills embodying it to the Hungarian Reichstag (June 14th). The existing arrangements were to be maintained till 1907, on condition that the Austrian Government pledged itself to promulgate reciprocal measures by virtue of Article XIV. This was done in due course, but not without exciting angry protests from the Opposition. An attempt was made to bring about a conference of the various parties, with a view to a compromise on the many points at issue, but it utterly failed, the German Opposition unanimously declining even to take any part in it, or to have anything to do with Count Thun and his colleagues. It was thus impossible to hope that the Austrian Delegation could be elected, and as the Ministry could not accomplish the task they resigned (Sept. 23rd). Count Clary, Governor of Styria, then formed a Ministry mainly composed of prominent officials (Oct. 2nd), and it was announced that the language ordinances would be repealed immediately before the opening of the Reichsrath. A decree repealing the ordinances was officially gazetted (17th), and the Reichsrath re-assembled (18th). The Czechs protested violently against the repeal, but the large majority of the House gave the Premier a favourable reception. He stated that a measure for the constitutional settlement of the language question would shortly be introduced, and appealed for the support of all parties in the restoration of its normal activity to Parliament, particularly in view of the pressing necessity of dealing with the Budget, the *Ausgleich*, and economic and other questions. Violent scenes, however, occurred, the Czech members being the offenders this time, and the Germans supporting the Government, thus reversing the previous order of things. Czech disturbances also occurred in the country, and the troops had to fire on the mob at Wsetin in Moravia (25th), killing and wounding several. Similar troubles occurred in Bohemia. — **Hungary.** It was announced (Nov. 30th, '98) that Baron Banffy and Count

Thun had agreed to a provisional *Ausgleich*, prolonging the *status quo* till the end of '99. During December a coalition, including the normal Opposition and many Liberals, and spurred on by the Ultramontanes, who desired a repeal of the ecclesiastical legislation of '94, made strenuous efforts to secure the resignation or dismissal of Baron Banffy. M. de Josipovich, Minister for Croatia and Slavonia, and M. Desider Szilagyi, President of the Chamber of Deputies, resigned their posts (Dec. 6th), assigning as their reason that they could not approve or support the extraordinary means which Baron Banffy threatened in case the obstructive tactics of the Opposition should be continued. Count Julius Andrássy also withdrew his support from the Ministry. M. Koloman Tisza, a former Premier, and one of the most influential leaders of the Liberal party, proposed that if the obstruction should continue, so as to prevent the most urgent State business, *e.g.*, the *Ausgleich* Bill and finance measures, from being transacted before Jan. 1st, '99, the Liberal members should pledge themselves to give the Ministry their full and absolute support in case they should find it necessary to govern for a few months without the co-operation of the Reichstag. Thereupon some few Liberals retired from the party, but the large majority approved of the proposal, which came to be known as the *lex Tisza*. A violent personal attack made by a Deputy, M. Horansky, on Baron Banffy led to a challenge to a duel, which, however, did not take place because terms could not be arranged. A number of duels between the seconds of the two parties, however, resulted. The Chamber adjourned (30th), after another tumultuous scene following on a statement by the Prime Minister, who fought a duel with M. Horansky (Jan. 3rd, '99), terms which were not offensive to Baron Banffy having been arranged. Neither of the combatants was wounded. A proposition of the Opposition that there should be an appeal to the Crown to end the existing extra-constitutional state of things was defeated in the

Chamber of Magnates by 90 votes to 69 (20th). Baron Banffy stated at a meeting of the Liberal party (Feb. 17th), that the negotiations for ending the deadlock had failed because the Opposition would not give way. He and his colleagues had therefore decided to resign, but would carry on the administration provisionally till the Emperor King made known his decision. Baron Banffy handed in his resignation and that of his colleagues (19th), and the Opposition thus scored a great victory. M. Koloman Szell was appointed Prime Minister in his place. Three other changes of Ministers were made, but the remainder of the Cabinet consisted of Baron Banffy's colleagues. The Parliamentary deadlock was thus put an end to, and the Lower House passed the Bill provisionally prolonging the *Ausgleich* (March 10th). As to this, after several fruitless conferences which took place between M. Szell and the Austrian Premier, the matter was referred to the Emperor, and a compromise was at last agreed to, which was embodied in Bills presented to the Reichstag (June 14th). M. Szell said that Hungary had pledged herself to provide for the maintenance until 1907 of the existing arrangement, on condition that Austria made reciprocal arrangements under Clause XIV. The charter to the Common Bank would terminate in 1907 if the Customs and commercial union were not renewed beyond that date. The Bills were duly carried (July 4th).

Autumn Session (War, '99). See SESSION, sects. 123-129.

Azores, The. A group of islands in the North Atlantic; belong as an integral part to the kingdom of Portugal. Area, 1005 sq. m.; pop. 255,594. Capital, Ponta Delgada, on San Miguel Island; but the Governor usually resides at Angra, in the island of Terceira. People Portuguese and Spanish, mostly very poor. Governed as a province of Portugal. Discovered 1439. Called also Western Islands or Terceiras. See COLONIES, ETC., OF EUROPEAN POWERS.

B

Baden. See FREDERICK, GRAND DUKE OF, and DIPLOMATIC.

Bagirmi. See FRENCH CONGO and SOUDAN.

Bahama Islands. A chain of islands, 600 miles in length, lying between the S.E. corner of Cuba and Florida. Area, 4,466 sq. m. Pop. 52,316, the majority being of the negro race. Twenty islands of the group are inhabited, but there are besides about 3000 islets and rocks. The chief island politically is **New Providence** (area, 85 sq. miles), on which is the capital, **Nassau**, pop. 12,000, a favourite winter health resort for Americans and West Indians. Other islands are Andros, Eleuthera, Great and Little Bahama, Abaco, Inagua, etc. Much forest and valuable timber. Cattle largely reared. San Salvador (either Cat Island or Watling Island—probably the latter), where Columbus first landed in America in 1492, is one of the Bahamas. Chief exports: sponges, turtles, pineapples, oranges, and sisal fibre. The Government is representative. There

is a Governor and Executive, a Legislative Council, and a House of Assembly of twenty-nine members. Education is free, compulsory, and unsectarian. For Governor, etc., see DIPLOMATIC; for latest statistics see BRITISH EMPIRE (table).

Bahr-el-Ghazal is the name of the old Egyptian province which encloses the district watered by the southern tributaries of Bahr-el-Arab and Bahr-el-Ghazal. It was under the control of the Arabs till 1879, when a settled government was established under Gordon by Gessi Pasha on behalf of Egypt. The province remained in the possession of Egypt till the Mahdi's rebellion cut off all communication with Khartoum and Egypt, and compelled the then ruler, Lupton Bey, who made a most gallant fight, to surrender in '84. Lupton Bey claimed in '83 that he was the only one of the Soudan governors who could show a profit on his administration. This he accomplished through the richness of the province in ivory,

rubber, gum and other products. It is said to be a good cotton-growing country, and abounds in timber. Slatin Pasha has drawn attention both to the fertility of the province and to its strategical importance. To the west of it lies the Ubangi district of French Congo; and it was thence that Major Marchand made his way through the Bahr-el-Ghazal to Fashoda in the summer of '98. By the Anglo-French agreement of March 21st, '99, France agreed that the Bahr-el-Ghazal and Darfur should be regarded as falling within the British sphere, and all French claims therein were withdrawn. There were rumours later in the year that the Congo Free State, claiming some right under the '94 agreement with Great Britain (see CONGO FREE STATE), was sending a military expedition into the province. See EGYPT (map) and SOUDAN.

Balfour, Rt. Hon. A. J., M.P. See under COMMONS.

Ball, Sir Robert Stawell, LL.D., F.R.S., was b. at Dublin July 1st, 1840, and was ed. at Chester and Trin. Coll. Dublin. Formerly Andrews Professor of Astronomy in the University of Dublin, and Royal Astronomer of Ireland ('74), now Lowndean Professor of Astronomy at Cambridge ('92). He is the author of several works on what is known as the Theory of Screws, besides many papers on mathematics, astronomy, and physical science in various publications. Knighted '86. "Starland," "In Starry Realms," "The Story of the Sun," "In the High Heavens," and "Great Astronomers," are amongst his chief works. Address: Observatory, Cambridge; Athenæum Club.

Ballot for the Militia. See MILITIA, and SESSION, sect. 80.

Baluchistan. A country in southern Central Asia, lying to the south of Afghanistan, and extending to the Persian Gulf. Persia is on the west, and British India on the east. It includes (1) Independent Baluchistan, (2) Quetta and the Bolan, held on a perpetual lease from the Khan of Khelat since '83, and administered by the British Government; (3) British Baluchistan, which includes Sibi, Pishin and other districts assigned to Britain by the treaty of Gundamak; and (4) Afghan and Baluch tribal territories. The total area is about 130,000 sq. m.; population some 500,000 tribesmen. Quetta, administrative centre. The principal chief of Independent Baluchistan is Mir Mahmud Khan, Khan of Khelat, who receives an annual subsidy from the Indian Government of 100,000 rupees a year. The valley is of great strategic importance, commanding the numerous passes to the south of the great caravan route through the Gomal to Ghuzni, Cabul, and Candahar.

Bancroft, Sir Squire, was born in London May 14th, 1841, educated privately, and made his first appearance as an actor at Birmingham, '61. After a successful career in the provinces, he played at the Prince of Wales's Theatre in London '65, and in '67 married Miss Marie Wilton, then the manager of the theatre, and herself a brilliant actress. Together they continued a most successful career till '80, when they opened the Haymarket, after rebuilding it internally, with Lord Lytton's comedy *Money*. After five years of further success they retired from management in July '85, but have since appeared occasionally. A book of reminiscences, jointly written by them, "Mr. and Mrs. Bancroft on and off the Stage," appeared in '88. Mr. Bancroft was knighted on the

occasion of the Jubilee, '97. He has recently devoted much time to Readings throughout the country, by which he has raised large sums in aid of hospitals. Address: 18, Berkeley Square, W.

Bangor, Bishop of. See under PEERS.

Bank Holidays. The Act, which declared that certain days in the year should be kept as public holidays, was brought in by Sir John Lubbock, and passed May 25th, '71. The holidays are, in England and Ireland: Easter Monday, Whit Monday, First Monday in August, and Boxing Day (unless Sunday). Scotland: New Year's Day, Christmas Day (but should either fall on Sunday, then the following Monday), Good Friday, First Monday in May, and First Monday in August.

BANKING.

British and Irish bankers trade with the money deposited with them, by making profits in discounting bills of Exchange for short periods, and in obtaining interest for loans on Exchequer bills and other Government securities, and on railway and other debentures and the stock of public companies, dock warrants, and bills of lading, etc. To a much less extent money is lent by them on real and leasehold property, as the advances on such are generally unpaid for years. Considerable amounts are also lent by bankers on promissory notes, without further security, to highly trustworthy persons. They have frequently advanced large sums to merchants and manufacturers on insufficient security, to sustain their credit, in the hope that they might retrieve their affairs, and thus pay in full both the old and the new loans. By this proceeding many banks have been ruined in England, Scotland, and Ireland. For proper banking by private and joint-stock banks, the better method is that their capital should not be used for making profits on loans as the deposits are, but it should nearly all be invested in first-class securities, subject to little fluctuation in value, and which can at once be converted into money in the event of any large and unexpected demand by depositors. It is highly important also that a sufficient reserve should be kept to provide against commercial depression or panic. All persons of means avail themselves of the services of bankers in receiving and making payments on their account. In connection with this business, bankers not only cash and pass cheques, but present and receive payment for bills and drafts, and collect dividends and annuities, etc. For these services a percentage is charged, or an agreement is made that the customers shall keep an average balance of cash in the bank in proportion to the amount of business transacted for him. Some of the money paid therein is intended to meet the cheques and orders drawn against them in the ordinary course of business, and other sums are deposited for safe custody until required for investment. The former are generally placed under drawing or current, and the latter under deposit accounts. Those portions of either which banks do not keep in their coffers are used in discounting bills, and for loans on securities for short dates. Some provincial banks allow interest at a low rate on daily balances of their customers, but the general rule is to allow interest only on sums specially placed on deposit, this interest varying according to the London rate for the time being.

When a person has an account current at a bank its proprietors are bound to pay his cheques to the full amount of the money held in hand on his account. Bankers are also bound to know their customers' signatures, and if the former cash a cheque with a forged signature they will have to suffer the loss; and if they refuse to cash one from a wrong supposition that the drawer has no funds or insufficient money in the bank to meet it, the bankers will, if any injury results to him from this error, be liable to pay him damages.

When a customer has placed any banking securities, as bills, notes, exchequer bills, stock, coupons, foreign bonds, and others of a similar kind, with his bankers without specifically appropriating them to any purpose, the bankers have a right to retain them until their customer has discharged all debts which may be due to them, even if the debt was not incurred or the loan made on the deposit of the securities. This right of retention of securities which are unconditionally placed in banks is termed a **banker's general lien**, which is part of the law merchant; but it does not, in the absence of a special contract, extend to such securities as are not banking or negotiable. If a banker takes a security payable at a future date his lien has gone. He has no lien on a customer's balance for bills discounted for him during the currency of the bills, nor on any plate, jewels, cash, or securities contained in a box deposited with him in his character of warehouseman and not as banker.

The old practice adopted in Scotland of bankers making advances on cash credit has very greatly added to the progress and prosperity of the inhabitants of that part of Great Britain. This method of lending money is by allowing an account current to be regularly overdrawn to a certain specified limit. The advances are secured by two or more sureties, and interest is paid on actual over-drafts. As the London branches of the Scotch banks conduct their business on the London methods, the system does not generally obtain with them. As regards protesting unpaid bills, the Scotch banking law differs from the English. In Scotland, within six months after their dishonour, the bills and protests can be registered in the Court books, and in six days thereafter execution can be issued against the debtor without any further process.

By the **Bank Charter Act of '44**, only those bankers in the United Kingdom who were entitled to issue notes on May 6th in that year are allowed to do so. It was provided by this statute that the issue of English banks is to be limited to the average amount of notes which they had in circulation during the twelve weeks preceding April 27th, '44, provided that on an average of four weeks they were not to exceed the average ascertained; and no such notes are to be issued in London, or within sixty-five miles thereof, except by the Bank of England. While, therefore, the English banks have a fixed limit of issue, the Scotch and Irish are allowed to issue notes to any amount, provided they hold an equal amount of coin above their authorised amount. Thirty-seven private and twenty-eight joint-stock banks in England and Wales issue their own notes. All the banks in Scotland which are joint-stock, and six banks of this kind in Ireland, also do so. The majority of joint-stock banks in England and Wales, including the largest and most

important, do not issue their own notes. No note payable to bearer on demand can be issued in these parts of Great Britain for less than £5, but the minimum value of Scotch and Irish bank notes allowed to be issued is fixed at £1. Bank of England notes are legal tender for all sums over £5, except at the Bank and its branches, and in Scotland and Ireland. The Bank of England, however, is not liable to pay cash at any of its branches for those notes not made specially payable at the branch at which they are presented for payment, but it is bound to pay in London all notes, whether those of the Bank of England itself or any of its branches. The holder of a bank note is, *prima facie*, entitled to its prompt payment, and he is not affected by the previous fraud of any former holder in obtaining it in the absence of evidence to show that he was privy to such fraud. Country bank notes are generally received as cash, but though taken as such, if they are presented in proper time and not paid, they do not amount to a payment, and the transferrer of the notes is still liable to the holder.

By the Companies Act of '62, which has been amended by subsequent statutes, and especially the Companies Act of '79, it has been provided that no company or association consisting of more than ten persons shall transact banking business unless registered either as "limited" or "unlimited" under the Companies' Acts, or unless it has been formed in pursuance of some other statute or of letters patent. It has been further enacted that a banking company registered as "unlimited" may convert itself into a "limited" one. Any unlimited company may increase the nominal amount of its capital, by increasing the nominal amount of its shares, but no part of such increased capital shall be capable of being called up except in the event of and for the purposes of the winding-up of the company. When no such increase of nominal capital is made, the company may provide that a part of its uncalled capital shall not be capable of being called up except for winding up the company. A limited company may declare that any part of its still uncalled-for capital shall not be capable of being called up except for the company being wound up. A bank of issue registered as a limited company, either before or after the passing of this Act, is not to be entitled to limited liability in respect of its notes, but the members are, as to these, to continue liable as if it had been registered as unlimited, and if the bank is wound up, and the general assets are insufficient to satisfy the claims of both the note-holders and the general creditors, then the members of the banking company, after satisfying the note-holders, are to be liable to contribute towards payment of the debts of the general creditors a sum equal to the amount received by the note-holders out of the general assets of the company, *i.e.*, out of the funds available for the general creditors, as well as for the note-holders. Nearly all the joint-stock banks of England soon afterwards registered themselves as limited companies under the provisions of the '79 Act. The Bank of Scotland, the Royal Bank of Scotland, and the British Linen Company, established last century, were created Corporations before the Crown was empowered by statute law to create trading corporations with unlimited liability. Therefore they have always been limited banks, and

therefore did not require to avail themselves of the recent Act to enable them to become so. All the other Scotch banks, which were carried on by Corporations with unlimited liability, registered themselves without delay as limited companies.

The total number of banks in the United Kingdom, private and joint-stock, up to Nov. '98, as stated in the *Banking Almanac*, '99, was 339. The new banks and branches opened in London and suburbs were 45, and those out of London 239. The branches closed out of London were 13. The number of amalgamations was 7, 1 was in liquidation, and the note issues of 1 bank lapsed.

The Bank of England.

This is the most important bank in the world. It was established in 1694 with a capital of £1,200,000, which has been increased from time to time until it reached £14,553,000 in 1816, at which amount it now stands. It has also a rest, or reserve, of about £3,000,000. Under the Bank Charter Act of '44, the Bank is divided into the Issue and Banking Departments. From the former the Bank is permitted to issue £14,000,000 of notes of its own upon certain securities of which the debt owing to it by the Government, amounting to £11,015,100, formed part. Every note issued in excess of £14,000,000 was ordered to be represented by gold coin or gold and silver bullion in the vaults of the Bank. It was also provided that, if any of the note-issuing banks discontinued issuing their own notes, Her Majesty in Council could authorise the Bank of England to increase its securities in the Issue Department by an amount not exceeding two-thirds of these lapsed issues. The fiduciary issue of the Bank has so risen at different periods from '44 that it now stands at £16,800,000. The last addition of £350,000 was made by Order in Council on Jan. 29th, '94. The aggregate amount of the notes of other banks which have ceased to issue up to this date from '44, and against two-thirds of which Bank of England notes have been substituted, is £4,206,168. The annual sum payable by the Bank for its exclusive privileges has been increased from £120,000, as settled in '33, to £180,000, and all profit from the increase of the issue of their notes beyond £14,000,000 is directed to go to the public. The profit on this amount was, up to '92, the interest at 3 per cent. after deductions for stamp duties and expenses. By the Bank Act of '92 the rate of interest on the Government debt to the Bank of £11,015,100 is to be at the rate of $2\frac{1}{2}$ per cent. per annum until April 3th, 1903, and after that date $2\frac{1}{2}$ per cent., unless the Bank give notice in writing six months before that day that they decline to accept such rate, when the debt may be paid off without further notice, and until payment the interest will continue at $2\frac{1}{2}$ per cent. As regards what are called dead bank notes it is enacted that, when Bank of England notes issued more than forty years have not been presented for payment, the Bank may write off the amount, or any portion of the amount, of these notes from the amount of such issued from the Issue Department, and the Bank Charter Act of '44 is to apply as if the amount of notes thus written off had not been issued. The Bank will, however, be liable to pay any note so written off if it is presented for payment. Another source

of profit to the Department is the gain made in the purchase of foreign coin and bullion brought to it, for which under the Act of '44 the Bank pays at the rate of £3 17s. 9d. per oz., being 14d. per oz. under Mint price.

In the Banking Department the Bank of England, in addition to transacting business as other large English banks do, acts as the banker of the Government in the management and payment of dividends on the National Debt, the issue and withdrawal of Exchequer bills and bonds, the issue of Government loans, and the banking operations connected with the Government offices, the Indian Government, and much of the financial business of Colonial Governments. By the Bank Act of '92 the remuneration to be paid to the Bank of England for the management of the National Debt is to be a yearly sum at the rate of £325 per million pounds of such debt up to five hundred millions, and at the rate of £100 for every million above this amount up to and including the year ending March 31st, 1912, and thereafter from year to year until Parliament otherwise directs. During such period this annual sum is not to be less than £160,000. For the management of Exchequer bonds and Exchequer bills the Bank is to receive £100 per million, and for the management of Treasury bills £200 per million outstanding on the last day of the previous financial year. The Bank also takes charge of the reserves of other bankers in connection with clearing-house transfers, and in consequence of this the reserves of the Bank are generally the only unused money in the country that can be had on a sudden demand. This institution also derives much profit from the employment of its deposits, on which it allows no interest. It is the ultimate resort of all large merchants and traders and others who wish to borrow and cannot get accommodated at other banks. In '47 a great commercial crisis had arisen: the Bank of England was unable to meet all applications for discounts and loans on approved securities, without exceeding its statutory limits. The Governor and Company were, however, informed by the Government that it was prepared to propose a bill to Parliament to indemnify them from such excess. Bank of England notes were therefore issued in exchange for securities beyond the amount limited by law, and Parliament afterwards passed an Act indemnifying the Bank in that respect, and for a short suspension of so much of the '44 statute as limited the amount of such securities. A similar crisis occurred in '57 and in '66, when Government took the same course; although in the latter year no infringement of the law took place, because the commercial panic subsided before the Bank had made advances beyond the legal limits.

The Bank Charter Act of '44 requires a weekly account to be published of certain particulars of the Issue and Banking Department. The one for the week ending Nov. 8th, '99, is as follows, viz. :—

Dr. Issue Department.		£
Notes issued		47,542,085
Cr.		£
Government debt		11,015,100
Other securities		5,784,900
Gold coin and bullion		30,742,085
		<u>£47,542,085</u>

DR.	Banking Department.	£
Proprietors' Capital		14,553,000
Rest		3,179,555
Public deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and dividend ac- counts		7,170,791
Other deposits		41,660,033
Seven-day and other bills		191,208
		<u>£66,754,587</u>

CR.		£
Government Securities		15,450,990
Other Securities		30,548,545
Notes		19,051,115
Gold and silver coin		1,698,937
		<u>£66,754,587</u>

Besides the head office and two branch offices in London, the Bank of England has branches at Liverpool, Manchester, Birmingham, Leeds, Hull, Bristol, Newcastle, Plymouth, and Portsmouth. The management of the Bank is in the hands of a governor, deputy-governor, and twenty-four directors, elected by stockholders who have held £500 worth of stock for at least six months previous to the election. In future, it is provided by a supplemental charter, where stock stands in the joint names of two or more members, the first name in a joint account will be able to vote, unless the other or other members nominate one of such to do so. The supplemental charter also provides for the abolition of the "shuttings" of the transfer books of bank stock, and henceforth the stock may be transferred "ex div." the day after the balance for the dividend has been struck. A director is required to hold £2000, a deputy-governor £3000, and a governor £4000 of the stock. Custom has excluded English bankers from this body, but members of leading firms negotiating foreign loans and engaged in foreign bill broking appear to be eligible. The Court, or Board of Directors, meet every Thursday, when the weekly account is presented. The two governors have the chief administration of the institution, and attend daily at the Bank.

At the half-yearly general Court of the Directors and Company of the Bank of England held on Sept. 21st, '99, the net profits of the half-year ended Aug. 31st were £726,802 as against £731,219 for the corresponding period of '98, and a half-year's dividend of interest and profits was made of £5 per cent. without deduction of income tax.

Fixed Issues and Circulation of Notes.

The present fixed issues of bank notes are as follows, viz. :—

England, Bank of England	£16,800,000
" 37 Private Banks	1,331,105
" 28 Joint-Stock Banks	1,627,795
Scotland, 10 Joint-Stock Banks	2,676,350
Ireland, 6 Joint-Stock Banks	6,354,494

£27,790,744

The average weekly circulation of the banks of the United Kingdom to Oct. 7th, '99, is as follows :—

	£
Bank of England for month ending Oct. 11th	28,226,005
Private Banks	379,598
Joint Stock Banks	851,120
Total in England	29,456,723
Scotland	7,953,840
Ireland	6,407,329
United Kingdom	<u>43,817,892</u>

The *Bankers' Magazine* for November '99 states that in comparison with the corresponding period of last year the returns show an increase in the Bank of England circulation of £672,643, a decrease in private banks of £7354, and a decrease in joint-stock banks of £46,139; in Scotland an increase of £403,608, and in Ireland an increase of £533,049; thus showing that the month ending Oct. 7th as compared with the corresponding period of '98 presents an increase of £619,150 in England and an increase of £1,555,807 in the United Kingdom.

The Clearing-house System.

A clearing house is an establishment in large cities in which the business of banks with other banks is adjusted. Each bank which deals with the London Clearing House sends clerks daily, who take with them the various bills and cheques in possession of their bank or drawn on other bankers. This adjustment establishment, and the bankers connected with it, have accounts at the Bank of England, and the balances, which were formerly settled by cash or notes of this bank, are now settled by transfers from one account to another. The arrangements for clearing are directed by a committee appointed by the banks. There are two paid managers or inspectors to better carry out these arrangements. Accounts are closed at four o'clock. Three-quarters of an hour is allowed for the banks to consider drafts upon them, and to determine whether they are to be honoured. In the meantime the bills and cheques have been classified at the Clearing House, and by 5.30 accounts are adjusted, each bank paying or receiving the balance due to it. The notification of the total amount of bills, cheques, and drafts, passing through the Clearing House is an indication of the state of trade, and as the Metropolis is the main cosmopolitan centre of commerce, this record has a world-wide range. The sums passed through the London Clearing House for '98 reached the enormous total of £8,097,291,000, as against £7,491,281,000 in '97. In the provincial clearing houses cheques are drawn not only on the members' banks actually presenting, but also on their branches within a specified distance of the centre. There are clearing houses at Liverpool, Manchester, Birmingham, Leeds, Newcastle-on-Tyne, and Leicester; and in Scotland at Edinburgh, Glasgow, Aberdeen, Dundee, Greenock, Leith, Paisley, and Inverness. In Ireland the only clearing house is in Dublin.

Discount Market.

As a good store of bills of exchange is declared to be the best reserve in banking, there is always a greater demand for them, when they are good, than the supply, and billbrokers cannot provide anything like the quantity

which banks require. The chief reasons why these bills are not created commensurate with the increase of business, as they were some years ago, are—firstly, because the custom of obtaining loans from bankers, instead of accepting bills, has greatly increased; secondly, because foreign bills drawn on London by traders residing abroad have materially diminished, owing to the development of the system of telegraphic transfers, whereby very large sums are now paid without a bill. In consequence of the insufficient supply of these negotiable instruments, large holders have frequently the discount market under their control, for which reason the Bank minimum rate no longer guides the market for important periods. It is stated that, although about thirty years ago the Bank of England was one of the largest holders of bills of exchange, it is now thought to be the smallest among the large holders. This change, it is alleged, is the result of the immense increase of deposits of other banks which are largely invested in bills, and as these become due are re-invested in other bills, which causes a reduction in discount rates. In consequence of these transactions, and as deposits have increased far more than bills in proportion, longer periods of cheap money have been experienced in recent years than have ever existed. The bank rate of discount was in '99 reduced to $3\frac{1}{2}$ per cent. on Jan. 9th, and to 3 on Feb. 2nd. It was raised to $3\frac{1}{2}$ on July 3rd, to $4\frac{1}{2}$ on Oct. 3rd, and to 5 on Oct. 5th. The market rates of discount on Nov. 10th, '99, were as under:—

60 days bankers' drafts	4 $\frac{1}{2}$
3 months " "	4 $\frac{1}{2}$
4 months " "	4 $\frac{1}{2}$
6 months " "	4 $\frac{1}{2}$
Loans:—	
Day to day	2-2 $\frac{1}{2}$
Short	3 $\frac{1}{2}$
Fortnight (at last settlement)	4 $\frac{1}{2}$
Deposit allowances:—	
Banks	3 $\frac{1}{2}$
Discount houses at call	3 $\frac{1}{2}$
At notice	3 $\frac{1}{2}$

Capital and Reserve Funds, and Balance Sheets.

It appears that in October '99 the whole banking capital commanded in the market an average premium of 244 per cent., and in October '98 the premium was 234 per cent. The average market value of banking capital at the beginning of October, for the past three years, is as follows:—

	'99.	'98.	'97.
	Premium.	Premium.	Premium.
England	249 %	238 %	225 %
Scotland	236 "	228 "	226 "
Ireland	216 "	209 "	196 "
Total United Kingdom	244 %	234 %	222 %

The total amount of the paid-up capital of all the joint-stock banks of the kingdom and the Bank of England is £77,097,587. Beyond their capital these banks hold reserves to about £43,184,212, which amounts are held in the

following proportions by these institutions in different divisions of the country, viz. :—

	Capital, Paid-up.	Reserve Funds.
	£	£
By English Banks, including Isle of Man	60,643,352	33,219,257
" Scotch Banks	9,313,000	6,533,455
" Irish Banks	7,141,235	3,431,500
	£77,097,587	£43,184,212
	£120,281,799	

The 23 private banks which publish accounts have capital and reserves to the amount of about £7,097,753, and the remainder about £3,000,000, so that the total paid-up capital and reserves for all our home banks is nearly £130,000,000. The amount of deposit and current accounts in all the banks of the United Kingdom are estimated to have been in July '99 from £840,000,000 to £850,000,000, and in January last from £810,000,000 to £820,000,000.

Institute of Bankers.

This Institute was founded in '79, and is an association of gentlemen connected with the various branches of banking. Its objects are to facilitate the consideration and discussion of matters of interest to members of this branch of commerce, and to afford opportunities for the organisation of a knowledge of the theory of banking. It has at present in London, the provinces, in India and the Colonies over 3000 adherents: viz. 410 Fellows, who are partners, directors, or managers of banks, 820 Associates, consisting of officials of over 10 years' standing, and about 2300 ordinary members, drawn from the juniors on bank staffs. These different classes subscribe £2 2s., £1 1s., and 10s. 6d. per annum respectively. Papers on banking and financial subjects are read and discussed before the Institute from time to time and published in the official *Journal of the Institute of Bankers*, which also contains matter of interest to bankers generally. The annual examinations for the certificate of the Institute are held in May in London and numerous provincial centres, and attract about 800 candidates. The subjects of examination are political economy, practical banking, commercial law, mathematics and bookkeeping, and most of the leading banks give prizes in connection with these. The offices are at 34, Clement's Lane, Lombard Street, where there is an excellent library and reading-room. The President is Rt. Hon. Lord Hillingdon, and the Secretary is Mr. W. Talbot Agar.

Bank of England. See BANKING.

BANKRUPTCY.

This is mainly regulated in England and Wales by the Bankruptcy Act, '83, the Bankruptcy (Discharge and Closure) Act, '87, the Bankruptcy Act '90, and the rules made thereunder. In all its branches this system is subject to the control of the Board of Trade. For the proper administration of the system there is

the Bankruptcy Division of the High Court of Justice, which has jurisdiction in the City of London and its liberties, and also within the districts of the Metropolitan County Courts. Outside these boundaries the County Courts have bankruptcy jurisdiction. A great portion of this in both the High Court and County Courts is exercised by the registrars, who hear petitions for adjudication in bankruptcy, hold public examinations of the debtors, approve of compositions, and grant discharges when these are unopposed. The Bankruptcy Department of the Board of Trade consists of **Official Receivers**, and a central staff under the **Inspector-General**, who audit trustees' accounts, and overlook the conduct and dealings of these persons, and the other local officials. There is an official receiver appointed to each district, but the same individual may be appointed to this position for two or more districts, or two or more of such receivers may be appointed to the one district. The official receiver is to investigate the conduct of the debtor, and to report the Court respecting it, to take such part as to the Board of Trade may order in his public examination, and to assist when required in his prosecution. It is also the duty of the official receiver to become interim receiver of the debtor's estate, pending the appointment of a trustee, and as manager when a special manager is not appointed, to summon and preside at the first meeting of creditors, to issue proxies, to report to the creditors on any offer by the debtor for a composition or scheme of arrangement, to advertise the proceedings, and to act as trustee during any vacancy in that appointment. In order to be made a bankrupt, it is essential that the debtor shall have committed one or more of the recognised acts of bankruptcy (see ed. '96). The act of bankruptcy on which the petition against the debtor is founded must have occurred within **three months**. An **infant**, though engaged in trade, cannot be made bankrupt, but a **married woman** can be, and in respect of her separate property if she carries on a trade distinct from her husband, or when he is a convict or in exile; as in such cases she is liable to be sued personally as a *feme sole*.

A **Petition for Adjudication in Bankruptcy** may be filed by the debtor, or by any single creditor whose debt amounts to £50 or upwards, but any two or more creditors whose debts in the aggregate amount to £50 may be the petitioning creditors. The first result of a proper bankruptcy petition is the making of a **Receiving Order** by the Court, which does not divest the debtor of his property, but puts the Official Receiver in charge of such, and stays proceedings by unsecured creditors. When this order is made the debtor is bound to give the official receiver full information concerning his affairs and failure, and to make out a proper statement of his assets and liabilities for submission to the first meeting of creditors, which should be held within fourteen days of the receiving order. The debtor may propose at this meeting that his insolvency should be ended by a **composition or scheme of arrangement**, whereby the disabilities of bankruptcy proper may be avoided. If the creditors refuse to assent to this proposal the debtor is to be adjudged bankrupt; but if it is assented to, the assent is provisional. In either event the debtor must still undergo a **public examination**. When the public examination is finished, the matter then

goes before the Court for its approval. The composition or scheme being approved by the Court, is binding on any dissentient minority of creditors, the receiving order is rescinded, and the debtor is remitted to the full control over his affairs. But if the provisions of the composition or scheme are not performed by the debtor he is still liable to be adjudged bankrupt. A debtor who has been thus adjudged bankrupt may, under similar terms and conditions as before bankruptcy, propose a composition or scheme of arrangement with his creditors, and if the offer is sanctioned by the Court the adjudication in bankruptcy is annulled. When it has been resolved that a debtor's property shall be administered in bankruptcy proper the creditors elect a **trustee**, an official holding a certificate of the Board of Trade, to whom he has given security for the due discharge of his duties. All the debtor's property then vests in the trustee, as well as any further property that he may acquire before obtaining his discharge, except his personal earnings. The trustee realises the debtor's estate as quickly as convenient, and distributes it ratably among the creditors. Within certain limits priority is given to rates and taxes, and claims for the pay of clerks, servants, and workmen. From the assets available for distribution, property held by the bankrupt in **trust**, and his trade tools, and the necessary wearing apparel and bedding of himself and family to the value of £20, are excepted, but not goods in his reputed ownership though belonging to another. The trustee generally exercises his duties under the guidance of a **Committee of Inspection** appointed by the creditors, and if no such committee is appointed their duties are performed by the Board of Trade. When the bankrupt's public examination is concluded he may apply for his discharge. The discharge is not given if the bankrupt has committed any of the **statutory offences**, such as not keeping proper books for three years before the bankruptcy, continuing to trade after knowledge of insolvency, contracting a debt without any reasonable expectation of being able to pay it, bringing on bankruptcy by rash and hazardous speculations, or extravagant living, causing unnecessary expense by frivolous or vexatious defences to an action, having given within three months before bankruptcy an undue preference, having previously been adjudged bankrupt, fraud or fraudulent breach of trust, &c. The **crimes** connected with bankruptcy, for which a bankrupt can be **committed for trial**, and their punishment, are set out in ed. '96. In **small bankruptcies**, when the property of the bankrupt is not likely to exceed £300, the official receiver becomes trustee, unless the creditors supersede him. There is no Committee of Inspection, and the proceedings are more summary than in the other bankruptcies. If judgment has been obtained in a County Court against a debtor unable to pay, but whose whole indebtedness is less than £50, the Court may administer his property and order the payment of his debts by instalments.

According to the report of the **Inspector-General in Bankruptcy** for the year ending Dec. 31st, '98, the number of receiving orders made in England and Wales was 4292, involving liabilities of £6,792,735; and the assets realised £2,607,233, leaving an estimated loss to creditors of £5,011,899. The deeds of arrangement registered were 3246, the liabilities thereunder

being £3,846,759, and the assets £1,978,927, causing an estimated loss to creditors of £2,527,474. The failures showed an increase of 256 over those of the previous year. The most noticeable feature was the magnitude of the failures among directors of public companies, whose liabilities in 33 cases were no less than £1,270,026. This is the largest amount of liabilities during the last five years, and its rapid growth in recent years is a fact of considerable significance. Liabilities of over half a million were, as in '97, shown in the grocery and provisions and leather trades. The principal increases of liabilities in '98, as compared with the figures for '97, occurred among the following classes: viz., directors of public companies, £980,963; financial agents, £382,726; wool manufacturers, £187,372; beer, wine, and spirit trades, £146,867; and cotton trade, £132,960; while a large decrease of liabilities occurred in the case of bankers, £622,158; solicitors, £296,274; drapers, £156,673; farmers, £109,548; and corn, flour, and seed, hay, and straw merchants, £102,694. The heavy liabilities under the head of financial and speculative enterprise were mainly due to seven cases, of which the largest was that of Mr. E. T. Hooley. In three years he promoted 26 companies, with a nominal capital of £18,610,000, on which he made a gross profit of £5,028,900; but his reckless and extravagant methods of promotion converted this gross profit into a net loss of £89,300.

Baptists. The Baptists hold that the only Scriptural mode of baptism is by immersion, and that the proper subjects are "believers"—persons of an age to exercise belief. Any other baptism they consider to be contrary to the original institution, contrary to the example of Christ, and also opposed to the spiritual design of the ordinance. Historians, themselves not Baptists, have shown that through many centuries these views have been held amongst the Waldenses, the Albigenses, the Vaudois, the Lollards and Wycliffites. Formerly, on the Continent and in England, they were opprobriously called **Anabaptists**. In 1537 Henry VIII. issued a proclamation against their heresy, as persons who rebaptised themselves. As early as 1611, many Baptists, because of persecution, fled to America, and the feeble remnant in London published a **Confession of Faith** (1611) to vindicate their orthodoxy. In 1620 they memorialised the king for liberty of worship. Confessions of Faith they published again in 1644 and 1646. In 1689 a **General Assembly** of Baptists in London published a **Confession** in thirty-two articles, and a **Baptist Catechism**, after the model of the Assembly's Catechism. The latest returns ('98) give, in the United Kingdom, 2697 churches, 3845 chapels, with 1,305,710 sittings, 1951 pastors, 5111 local preachers, 355,218 Church members, 525,533 Sunday scholars, 51,430 teachers. The colleges for training the rising ministry are: Bristol, founded 1770; Midland, 1797; Rawdon, 1804; Regent's Park, 1810; Pastors', 1856; Manchester (Brighton Grove), 1866; Cardiff, 1807; North Wales, 1862; Scotland, Theological College, 1894; Ireland, Training Institute, 1892. The Baptist Foreign Mission was originated in 1792 (see **MISSIONARY SOCIETIES**). Baptist churches are congregational in government, holding to the order of pastors (bishops) and deacons. The interests of different counties are cared for by local associations; and the wider affairs of the denomination are

attended to by the **Baptist Union of Great Britain and Ireland**, formed in 1812—which Union, while it has no legislative authority, is adapted to secure united action throughout the whole country. In connection with the Union, the General Expenses, Literature, Home Mission, Church Extension, Annuity, Augmentation, and Education Funds have been established. These societies represent the distribution of nearly £13,000 per annum by the Council of the Union, under one executive. An effort is now being made to raise a "Twentieth Century Fund" of a quarter-of-a-million pounds, for Church Extension and other denominational objects. Outside the Baptist Union there are the **Scotch Baptists**, with a plural eldership. In England there are some 300 **Hyper-Calvinistic** churches. It is computed that in the world at large there are 56,682 Baptist churches, 38,721 pastors and missionaries, and 5,136,215 Church members. The election of a vice-president for the Baptist Union takes place at the Spring Assembly of the Union. There is no nomination, and in the ballot a majority of the total votes given is necessary to election. The Vice-President for one year becomes in the ordinary course President during the next year. **President** of the Baptist Union for 1899-1900, Dr. John Clifford, M.A., LL.B., B.Sc., F.G.S.; **Vice-President**, Rev. W. Cuff; **Secretary**, Rev. J. H. Shakespeare, M.A. **Offices** of the Baptist Union, 19, Fumival Street, London, E.C. Consult *The Baptist Hand Book*.

Barbados. A British West Indian island; geographically but not politically one of the Windward group. Area, 166 sq. m.; population, 190,000. Capital, **Bridgetown**. Barbados is of coral formation, and rises in a succession of limestone and coral terraces to a height of 1104 ft.; while it is almost encircled by coral reefs, which render the approach to it dangerous to mariners. The climate is healthy; but violent hurricanes occur, as in '98, and cause much damage. It is administered by a **Governor**, with Executive Committee, consisting of 3 official and 7 unofficial members, a **Legislative Council** of 9 members, and a **House of Assembly** of 24 members, elected annually. Barbados is the headquarters for the British troops in the West Indies. The chief exports are sugar, 38,600 hogsheads in '97, and molasses, 37,432 puncheons. A treaty conceding a 12-per-cent. reduction on sugar entering American ports in consideration of certain reductions of the import duties on American products was signed (June 16th, '99). Asphaltum is also exported. For latest statistics see **BRITISH EMPIRE** (table). See **SESSION**, sect. 44.

Barbuda. A British West Indian island; a dependency of **Antigua**, and under the federal government of the **Leeward Islands** (q.v.). Area, 6289 miles.

Bar, General Council of the. The Council is the accredited representative of the Bar, and its duty is to deal with all matters affecting the profession, and to take such action thereon as may be deemed expedient. The Council consists of: (1) the Attorney General and Solicitor General for the time being, and every former Attorney General or Solicitor General whilst remaining in actual practice at the Bar; (2) 48 practising barristers elected by the whole Bar (not less than 12 of the Inner Bar and not less than 24 of the Outer Bar), one-half of the total number retiring from

office at the time for the close of the election in each year. The Council has power to appoint additional members, not exceeding 6 in number, as the Council may consider desirable by reason of their Parliamentary or professional position. Such members go out of office at the time for the close of the election following their appointment. The time of the annual election is fixed by the Council, and is held as soon as possible after the annual general meeting of the Bar. The number of voting papers sent in at the last three elections was respectively 2105, 1966, and 1940. The Council appoints a Chairman and Vice-Chairman and an Executive Committee, and such standing committees and sub-committees as they may think fit, from time to time delegating to any such committee or sub-committee any of the powers or duties of the Council which the Council may deem desirable. The Standing Committees of the Council are the Executive Committee and the committees on matters relating to professional conduct, on the business and procedure of the Courts, and on Court buildings. The annual general meeting of the Bar is held in the Old Dining Hall of Lincoln's Inn at 4.15 p.m. on the second Tuesday in the Easter sittings; but the Council has power, with the concurrence of the Attorney General, to alter the date, time, and place of the annual general meeting. Any member of the Bar is at liberty to bring forward for discussion at the annual general meeting any resolution, provided that notice thereof shall have been given in writing to the Secretary of the Council not less than seven clear days before the day of meeting, and that in the opinion of the Executive Committee of the Council such resolution is a matter of general interest to the Bar. A statement of the proceedings of the Council is published annually, and copies thereof are supplied to every barrister having an address in the Law List. Surplus copies may be obtained on application to the Secretary. The Council has recently received recognition at the hands of the Legislature. There have been 12 meetings of the Council during the past year, at which the average attendance has been 30. There have also been 52 committee meetings, the attendances at which have numbered 240. **Chairman, 1899-1900, Mr. Joseph Walton, Q.C.; Vice-Chairman, Mr. C. M. Warmington, Q.C.; Hon. Treasurer, Mr. E. P. Wolstenholme; Secretary, Mr. Henry C. A. Bingley; Clerk, Mr. C. Worthy.** **Offices of the Council, 2, Hare Court, Temple, E.C.** **Baring-Gould, Rev. Sabine, M.A.,** Rector of Lew-Trenchard, North Devon, since '81, and formerly Vicar of Dalton, Yorks, and Rector of East Mercia, Essex. He is the eldest son of the late Mr. E. Baring-Gould, of Lew-Trenchard, and was b. at Exeter, Jan. 28th, '34, and ed. at Clare Coll. Camb. His literary activity has been and still is phenomenal. Fiction, theology, history, mythology, archæology, folk-lore, art, music: in all these provinces he has won great triumphs, though perhaps he is best known by his novels. "Mehalah," first published in '80, achieved for him widespread fame, and more recently he has published "Mrs. Curgenvin," and "Cheap Jack Zita," '93, "Noëmi," '95, "The Broom Squire," '96, "Guavas the Tinner" and "Bladys," in '97. A charming "Garland of Country Song" appeared in '94, "Old English Fairy Tales" in '95, a life of "Napoleon" in '96, "A Study of

St. Paul" in '97, "Domitia" in '98, "Pabo the Priest," "Furze-bloom," and "A Book of the West" in '99.

Barnardo's, Dr., "Homes for Orphan Waifs." See NATIONAL WAIFS' ASSOCIATION.

Baronetries Conferred Nov. '98—Nov. '99.

Barry, Mr. Francis Tress, M.P.

Brooke, Mr. Thomas.

Hoare, Mr. Samuel, M.P.

Hornby, Mr. William Henry, M.P.

Salt, Mr. Thomas, Chairman of the North Staffordshire Railway.

Sanderson, Prof. J. S. Burdon, Regius Professor of Medicine, Oxford.

Scott, Mr. John Murray.

Thompson, Sir Henry, F.R.C.S.

Usher, Mr. John.

Way, Rt. Hon. Samuel James, Chief Justice of South Australia.

Webster, Sir Richard, G.C.M.G., M.P., Attorney General.

Barotseland. See RHODESIA.

Barrett, Wilson, is the son of an Essex farmer, and entered the profession in which he has achieved so many triumphs at the age of 17. He became manager of the Burnley Theatre in '74, and has since leased the Grand Theatre, Leeds, and the Court and Princess's Theatres in London. In '96 he scored a great success with "The Sign of the Cross" at the Lyric. This play was written by himself, for he is a dramatist as well as an actor and manager. Other works of his are "Pharaoh," "Now-a-Days," and "The Daughters of Babylon," and he has collaborated with Mr. H. A. Jones, Mr. Sydney Grundy, Mr. W. G. Wills, Mr. Hall Caine, and Mr. G. R. Sims. In '97 he produced "Othello" at the Lyric, and afterwards visited Australia with phenomenal success.

Barrie, J. M., whose writings under the pseudonym of "Gavin Ogilvy" have raised him to great literary eminence in the last few years, was b. at Kirriemuir, Forfarshire, in 1860. He was ed. at Dumfries Academy, and graduated M.A. at Edin. Univ. in '82. After holding a journalistic position in Nottingham he came to London. The introduction to the public of Mr. Barrie's peculiar genius for depicting Scotch village life was accomplished through the columns of the *British Weekly*, and he contributed also to the *St. James's Gazette*, the *Speaker*, and the *National Observer*. His first volume, "Better Dead," appeared in '87; "Auld Licht Idylls" and "When a Man's Single" were published in '88; "A Window in Thrums" and "An Edinburgh Eleven" in '89. In '90 Mr. Barrie issued "My Lady Nicotine," during '91 his first lengthy story, entitled "The Little Minister," was published, and a new story entitled "Sentimental Tommy," and "Margaret Ogilvy," a Memoir, in '96. Mr. Barrie's work for the stage includes an amusing comedy entitled "Walker, London," which had a tremendous run at Toole's Theatre in '92; "Jane Annie," written with Mr. Conan Doyle, and brought out at the Savoy in '93; "The Professor's Love Story," first played in America, and afterwards brought to England by Mr. Willard; and "The Little Minister," produced Nov. 6th, '97, at the Haymarket. Mr. Barrie was, in '94, married to Miss Mary Ansell, who played charmingly in "Walker, London," when it was first produced. Address: Kirriemuir, N.B.

Basutoland. A native province of British South Africa, situated to the north-east of Cape Colony. It lies inclosed between Natal, the Orange Free State, and Cape Colony. Basutoland was disannexed from Cape Colony in 1884, and has since been administered by a Resident Commissioner, under the High Commissioner for South Africa. **Area**, 10,293 sq. m.; **pop.** 250,000, including about 600 Europeans. **Capital**, Maseru. The chief products are wool, wheat, mealies, and Kaffir corn. The natives keep large herds of cattle. See **BRITISH EMPIRE** (table). A meeting of the chiefs was called during Oct. '99 in view of the alleged attempts of the Boers to stir up the country against the British, and the paramount chief pledged the nation to remain loyal, even urging their wish to fight against the Boers. The Resident, Sir Godfrey Lagden, said the Imperial Government required no help, and exhorted the chiefs to check all excitement.

Bath and Wells, Bishop of. See under **PEERS**.

Bath, The Most Honourable Order of. Originally established by King Henry IV., at his coronation, 1399, this order fell into neglect in the seventeenth century, but was revived in 1725, under George I. It was remodelled by the Prince Regent in 1815, to commemorate the auspicious termination of the long and arduous contest in which the empire had been engaged, and was further enlarged in 1845, and now has three classes:—

G.C.B. . Knight Grand Cross Bath.

K.C.B. . Knight Commander Bath.

C.B. . . Companion Bath.

Members of the first two classes, being knights, are, after knighthood, entitled to the prefix "Sir." The G.C.B.s are not to exceed 55 for military service, exclusive of the sovereign and princes of the blood, and those distinguished foreigners upon whom may be conferred the honorary dignity, and 27 for the civil service; of the second class there may not be more than 145 for military and 100 for the civil service, excluding those admitted as honorary members, and except in certain special circumstances when there is power to increase the numbers. Of Companions there may be 988, of whom 705 may be for military and 283 for civil service. An officer must have received a medal or some similar honour, or have been specially mentioned in despatches for distinguished service in action, before he can be nominated. The badge is suspended by a crimson ribbon, with motto *Tria juncta in uno* (Three joined in one). The Dean of the Order is the Dean of Westminster. Sir Albert W. Woods, K.C.M.G., C.B., is Registrar and Secretary; General Lynedock Gardiner, C.B., is Bath King of Arms; and Charles George Barrington, C.B., is Gentleman Usher of the Scarlet Rod.

Baths and Washhouses Act, '99. See **SESSION**, sect. 40.

Bavaria. See **GERMANY**; and for Ministry see **DIPLOMATIC**.

Beauchamp, Earl, Governor of New South Wales. See under **PEERAGE**.

Bechuanaland Protectorate. Bechuanaland until '95 included the Crown Colony of British Bechuanaland and the Bechuanaland Protectorate. In Nov. '95, however, the Crown Colony was annexed to Cape Colony, the

Bechuanaland Protectorate being at that time, by an agreement made in '94, under the administration of the British South Africa Company. In consequence of the Jameson raid the administration of the Protectorate was not transferred to the Company, but is carried on by a Resident Commissioner under the High Commissioner. A division of the British South Africa police maintains order. The Protectorate (area about 386,200 sq. m., **pop.** 101,000) extends from the Molopo river in the south northwards to the Zambesi, and is bounded on the east by the South African Republic and Matabeleland, and on the west by German South-West Africa. It includes the lands of Khama, chief of the Bamangwato, lying south-west of Matabeleland, of Sebele, chief of the Bakwena, Bakoen, chief of the Bangwaketsi, and of Montsioa and Ikanning, all lying to the north of the Molopo. These chiefs, by an arrangement made in '95, when Khama and others visited England, hold their land under the protection of the Queen, an Imperial officer residing with each, and discharging certain judicial and other functions. The boundaries of the territory assigned to each chief have been carefully designated, and a hut tax is levied. The railway from Cape Town to Kimberley is continued through Vryburg and Mafeking to Palachwe, Tati, and Bulawayo. As far as Vryburg the line has been taken over by the Cape Government, but beyond that it is held by the Rhodesia Railways Ltd. and the British South Africa Co. jointly. On the outbreak of war with the Transvaal in Oct. '99, the line running north from Mafeking in British Bechuanaland was torn up by the Boers, and Lobatsi was captured. The Boers, however, mainly confined their attentions to the more southern part of the line within the boundaries of Cape Colony. See **CAPE COLONY** and **TRANSSVAAL**.

Bedford Grammar School, founded 1566; reorganised 1873. Annual income, £3500. Eight leaving exhibitions of £70 and £60 for four years. Two fall vacant annually. The new buildings were opened Oct. 19th, '91. Pupils 800. The school is divided into five sections: (1) Classical, (2) Civil and Military, (3) Technical, (4) Junior Department, (5) Preparatory Department (in a separate new building, opened Sept. '99). There are regular Woolwich and Sandhurst and Navy Classes. There are also workshops with steam-engine, forges, lathes, etc., and an Engineering Corps. Physical and Chemical Laboratories have been remodelled and enlarged in '99. **Alumni** include Sir Henry Hawkins, Lord Farnborough (Sir T. Erskine May), Professor Piazzzi Smyth, Professor Warrington Smyth, and Col. Burnaby. **Head Master**, J. S. Phillpotts, M.A., B.C.L., School House, Bedford.

Bedford Modern School, founded 1566; new scheme 1873. Large endowments. Six exhibitions of £55 and £45 for three years. Two exhibitions annually. Fees £4, £6, and £9, according to age, for boys residing with parents or near relations. Boarders received. Preparation for London matriculation, Cambridge locals, army, engineering, and business generally. Large chemical and physical laboratories, museum, workshop, and smithy. About 570 boys. **Headmaster**, Rev. R. B. Poole, D.D., F.C.P., and 30 assistant masters.

Beerbohm-Tree, Herbert, the actor, is the son of a grain merchant named Beerbohm,

and was b. in London in 1853. Shortly after entering his father's office in '70 he became a member of the Irrationalists Amateur Dramatic Club, and gradually drifted into the profession. His first hit was as the timid curate in "**The Private Secretary**," at the Prince of Wales's; and immediately after he played the grim spy Macari in "**Called Back**." Taking the Comedy Theatre ('87), he produced "**The Red Lamp**"; and in the autumn of the same year took the Haymarket Theatre, where "**Captain Swift**," "**A Man's Shadow**," "**The Village Priest**," "**Hamlet**," "**The Dancing Girl**," "**Hypatia**," Mr. H. A. Jones' "**The Tempter**" ('93), "**A Bunch of Violets**," "**John-a-Dreams**" ('94), "**Tribly**" ('95), and "**Henry IV.**" ('96) have been notable successes. In April '97 he opened his new theatre, "**Her Majesty's**," in the Haymarket. His wife, an admirable Greek scholar formerly connected with Queen's College, is a very refined actress. Address: 77, Sloane Street, London, S.W.

Behring Sea Question, The. See '99 and previous eds., and **ANGLO-AMERICAN COMMISSION**.

BELGIUM.

A kingdom under Leopold II. of Saxe-Coburg, and by the constitution of '31 declared to be a constitutional, representative, and hereditary monarchy. The executive power is vested in the King, the legislative power jointly in King, Senate, and Chamber of Deputies. According to the law passed in '93 amending the Constitution, on the principle of manhood suffrage, tempered by the plural vote, all citizens over 25, who have lived at least a year in the same commune, have a vote. An additional vote is accorded them if they are (1) either 35 years of age, married, with legitimate offspring, and pay a tax of at least 5 fr. to the State; or (2) are 25 years old and own immovable property to the value of at least 2000 fr., or have an income of that value from such property, or for two years have received at least 100 fr. a year from Belgian funds. Two additional votes are given to citizens of 25 years of age, who possess a diploma of higher education or have filled a public or private position implying the possession of such education. No citizen can have more than three votes. From this electorate both Houses of the Legislature are chosen, save for those Senators who are elected indirectly. The Senate is elected for 8 years. The number of members elected directly is equal to half the number of Deputies. The indirectly elected Senators are chosen by the provincial councils, 2 for each province with less than 500,000 inhabitants; 3 for each with more than 500,000 and less than 1,000,000; and 4 for each with over 1,000,000. The Deputies are elected for 4 years, in the proportion of 1 to every 40,000 inhabitants, and number 152. The system of election is that known as *scrutin de liste*. One half retire every 2 years. Senators must be 40, and Deputies 25 years of age. Each Deputy receives 4000 fr. yearly, and a free pass between his home and the capital. Local government is carried on by provincial and communal councils. The country is divided by a difference of language, the Flemish inhabitants in the north using the Flemish tongue in all its varieties of local *patois*, while the Walloons of the southern provinces speak French. The north, too, is chiefly agricultural, and the south industrial. Almost the entire population is of

the Roman Catholic faith, but full religious liberty prevails, and grants are made from the national treasury to all denominations. There are about 6600 elementary schools, and the higher branches of education are well provided for. There is no State religion. Agriculture, mining, iron, sugar, and textile manufacturing are the chief occupations; and textiles, sugar, machinery, and agricultural products are the chief exports. There are 2839 miles of railway in operation. **Area**, 11,373 sq. m.; **pop.** 6,669,732. **Revenue**, '98, £17,567,938; **expenditure**, £17,236,555; **imports**, '98, £131,160,000; **exports**, £120,796,000; **debt**, £104,151,487. For army and navy see **FOREIGN ARMIES** and **FOREIGN NAVIES**; and for Ministry see **DIPLOMATIC**.

Political Parties. The scheme for the revision of the Constitution which occupied the country during '93 and '94 did much to alter the old division of parliamentary parties, mainly because the plan of proportional representation which M. Beernaert, the author of the scheme, declared to be an integral and necessary part of it, did not commend itself to the Chamber, and was not carried. Before '93 there were practically only two parties—the Clerics or Catholics, and the Anti-Catholics or Liberals. Gradually, however, the Liberals separated into three groups, the rank and file calling themselves **Liberals** still, and known as the **Ligue Liberals**, the more advanced Liberals, comprised in the **Association Liberals**, and known as **Progressists**, and the extreme **Socialists**, forming the **Fédération Ouvrière**, or Labour Party. The result of the general election which took place in Oct. '94 was the return of the Catholics to power with an overwhelming majority over both the Liberals and the Socialists. The official returns showed that 104 Catholics, 19 Liberals, and 29 Socialists and Progressists had been elected. As a general rule, the Socialists are stronger in the Walloon provinces, and the Catholics in the Flemish provinces. At the election of one-half of the Deputies (July 5th, '96) the Clericals made still further gains, the ultimate distribution of parties in the Chamber being: 111 Catholics, 12 Liberals, and 29 Socialists. After the May '98 elections the Chamber included 112 Catholics, 28 Socialists, 6 Liberals, and 6 Radicals.

History, '99. The Premier, M. de Smet de Nayer, and the Labour and Industry Minister, M. Nyssens, resigned office (Jan. 23rd), owing to their objection to a Bill for establishing uninominal voting, which the King had decided the Government should bring forward. A rearrangement of offices followed. M. Liebaert was appointed Minister of Finance in the place of M. de Smet de Nayer, and M. Cooreman *vice* M. Nyssens, while M. de Smet de Nayer was made Minister of State. A serious strike broke out in April, involving nearly 50,000 miners in the Mons, Central, and Charleroi coalfields. Popular demonstrations against the Electoral Reform Bill, introduced by M. Vandenpeereboom, proposing a trial of proportional representation in a few large towns, led to rioting in Brussels and throughout the country (June 28th), while violent scenes took place in the Chamber. Eventually the Government agreed to the suspension of their measure pending the consideration of fresh electoral proposals by a committee representing all parties in the Chamber (July 4th). The popular feeling against the Clerical party was very plainly shown during the agitation. The

Parliamentary Committee rejected all the electoral measures submitted to them, the voting on the Government Bill being 8 against, while the other 7 members abstained (31st). The Cabinet, in consequence of this, resigned (Aug. 1st), and M. de Smet de Nayer formed a new Administration. He declared his adhesion to the principle of proportional representation, and it was understood that he would introduce a Bill on the lines of the proposals made by M. Beernaert in '94, correcting the unfair operation of the *scrutin de liste* system, and making the representation in each division proportionate to the strength of parties as revealed by the voting.

Bermuda Islands. A group of small islands and coral reefs, situated in the North Atlantic, 600 miles east of Cape Hatteras. Area of group, 18 sq. m., the principal island containing 16 sq. m. Pop. 17,500. Administered by a Governor with an Executive Council of 6 members, and Legislative Council of 9 members, and an elected House of Assembly of 36 members. It is a naval station, and is becoming a favourite winter resort for Americans and Canadians. There is regular steam communication between Bermuda and New York, Halifax, Jamaica, etc. The chief products are early vegetables, lily bulbs, and onions; and, in return for the reduction of import duties on certain American products, a reciprocal reduction of 20 per cent. on vegetables entering American ports was agreed to by the United States (July 24th, '99.) For latest statistics see BRITISH EMPIRE (table). A cyclone did great damage to property in Sept. '99.

Bernhardt, Mme. Rosine Sarah, was b. in 1844, at Paris; the most distinguished French actress of her day. She is of Jewish descent. She entered the Paris Conservatoire at the age of fourteen, where she studied tragedy and comedy. Joining the staff of the Théâtre Français, she made her *début* in Racine's "Iphigénie," and in Scribe's "Valérie," but was not very successful, and retired for a time from the stage. Her first grand success was as Marie de Neuberg, in Victor Hugo's play of "Ruy Blas." Becoming very popular by her representations in "Junie," in "Andromaque," and in "La Sphinx," she was replaced on the staff of the Théâtre Française. She has frequently visited London since '79, and of late has appeared at one of the London theatres every year. She is also the authoress of a one-act play entitled "L'Aveu," produced in '88.

Besant, Sir Walter, was b. at Portsmouth, 1836. Educated at King's College, Lond., and Christ's College, Camb. Accepted the appointment of Senior Professor in the Royal College of Mauritius, but resigned in consequence of ill health. He made his *début* as an author in '68 with "Studies in Early French Poetry," which was followed five years later by the "French Humourists." In conjunction with the late Mr. James Rice he commenced a successful career as a romance writer; the most popular production of their joint authorship was "Ready Money Mortiboy," which they also dramatised and put on the stage at the Court Theatre.

Of the novels which Sir Walter Besant has published in his own name the best known are, "All Sorts and Conditions of Men," "Children of Gibeon," "Katherine Regina" ('87); "The Inner House" ('88); "For Faith and Freedom," "The Bell of St. Paul's" ('89); "The Demoniac," "Armored of Lyonesse" ('90); "A History of London" ('93); "Beyond the Dreams of Avarice" ('94); "The City of Refuge" ('96); and "The Orange Girl" ('99). He was for many years Secretary to the Palestine Exploration Fund, and in '71 produced, jointly with the late Professor Palmer, a History of Jerusalem. Sir Walter has also interested himself in questions affecting the rights of authors, and was appointed first Chairman of the executive committee of the Incorporated Society of Authors. The establishment of the People's Palace, in the East End of London, was inspired by Sir Walter Besant's book, "All Sorts and Conditions of Men." He received the honour of knighthood, May '95. Address: Froggnal End, Hampstead.

Bible Society, The British and Foreign, was established in 1804, its object being the circulation of the Scriptures. Up to '99 more than 160,000,000 Bibles and portions of the Bible, in 364 languages and dialects, had been issued under its auspices. The expenditure of the Society in '98-9 was over £225,000. Work abroad is carried on not only through the missionary societies, but by some thirty agents in foreign countries, under whom a large staff of colporteurs is engaged in distributing the Scriptures. Bible House, 146, Queen Victoria Street, E.C. Secretaries, Rev. J. Sharp, M.A., and

Bills of Sale. The statute law relating to bills of sale in England is contained in the Acts of 1878, '82, and '90. A bill of sale upon goods or chattels corresponds to a mortgage of real estate; and the above Acts are chiefly directed to prevent the fraudulent granting of bills of sale. Every bill of sale given by way of security for the payment of money is void unless made in accordance with the form in the schedule of the Act of '82. It must be duly attested by one or more credible witnesses not being a party or parties thereto. It must be registered within seven days after making, and the registration must be renewed once every five years. When first registered, a copy of the bill, together with an affidavit of the time of such bill being given, of its due attestation, and of the residence and occupation of the person giving the same, and of every attesting witness, must be presented to the registrar and filed by him. If the bill of sale be given subject to any defeasance, condition, or declaration of trust, such defeasance, condition, or declaration must appear, if not in the body of the bill, at least on the same paper, and must be set forth in the copy filed. A transfer or assignment of a registered bill of sale need not be registered. Bills of sale comprising, in whole or in part, the same chattels, take priority in order of registration. Delays, omissions, or mistakes in the registration of bills of sale may be rectified by the order of any judge of the High Court. A bill of sale executed within seven days after the execution of an unregistered bill of sale will be held void, in so far as it affects the same chattels, unless it is proved not to have been executed for the purpose of evading the law. Any bill of sale not com-

plying with the conditions of attestation and registration, is void as against the giver's trustee in bankruptcy, etc. A bill of sale given in consideration of a sum less than £30 is void. A bill of sale is void except as against the grantor with respect to any personal chattels acquired by him after its execution. But this provision does not apply to growing crops or fixtures or machinery subsequently acquired in substitution for fixtures or machinery specified in the bill. Chattels assigned under a bill of sale are not liable to be seized by the grantee unless (1) the grantor make default in paying the money thereby secured, or in fulfilling any condition necessary to the security; (2) the grantor become a bankrupt, or allow the goods comprised in the bill to be distrained for rent, rates or taxes; (3) the grantor fraudulently remove, or suffer to be removed, from his premises the goods comprised in the bill; (4) the grantor refuse, without reasonable excuse, to produce to the grantee his last receipts for rent, rates, and taxes; (5) execution has been levied on the grantor's goods under any judgment. The Bills of Sale Act '90 exempts letters hypothecating or declaring trusts of imported goods during the interval between the discharge of the goods from the ship in which they are imported and their deposit in a warehouse or reshipment for export, or delivery to a purchaser, from the Bills of Sale Act '82.

BIMETALLISM.

This is the term currently used to denote a **Joint Monetary Standard of Value**. Mr. Balfour, who is a convinced bimetallist, has defined the contention of the bimetallists as being "that if they could by international arrangement fix some ratio of exchange between gold and silver coin they would create an automatic system by which the demand and supply for gold and silver respectively would maintain that ratio at the point they fixed it." Bimetallists complain of the appreciation of gold and the violent fluctuations and uncertainty of exchange between gold standard and silver standard countries; and advocate an agreement on a broad international basis to reopen the mints of the leading nations of the world to the unrestricted coinage of both gold and silver. Its supporters claim that bimetalism is essentially a Free Trade movement, and repudiate the suggestion that it has anything to do with Protection. A detailed discussion of the question appeared in the '87 edition. A **Royal Commission** on currency appointed in '86 issued its report Nov. '88 (see ed. '89). An **International Monetary Congress** held at Paris in Sept. '89 discussed the subject academically, and an **International Monetary Conference** which was convened by the United States, "to consider by what means, if any, the use of silver can be increased in the currency system of the nations," and which met at Brussels in Nov. '92, separated without coming to any conclusion. On March 17th, '96, the House of Commons passed a resolution urging upon the Government the advisability of doing all in their power to secure by international agreement a staple monetary par of exchange between gold and silver. A Bimetallic Congress was held at Brussels in April '96, representatives from Great Britain, France, the United States, Germany, Austria-Hungary, Belgium, Denmark, Holland, Roumania, and Russia being present. Ultimately

the members constituted themselves a permanent committee, and expressed their opinion that a preliminary and immediate agreement might result from the re-establishment of bimetalism by the United States, the reopening of the Indian mints for the coinage of silver, the turning into silver of part of the metallic reserve of the Bank of England, and the absorption of a sufficient amount of silver by the various European States. The Silver party in the United States, however, were decisively beaten at the '96 election, and the Indian Government declined to reopen the Indian mints for the coinage of silver.

The **Bimetallic League** is a society which specially devotes itself to the propagation of bimetallic principles. An indication of its position is afforded by the following resolution, which it passed at its annual meeting in Feb. '94: "That the finances, agriculture, industries, and trade of the British Empire—home, colonial, and Indian—are harassed and embarrassed by the constant appreciation of gold and the great instability and uncertainty of exchange between gold and silver standard countries; that there is no sound remedy for the grave and growing evils resulting therefrom except bimetalism on a broad international basis at a common ratio, to be mutually agreed upon; that, as experience has proved that the remedy would be sound, practical, and effective, and as it has been approved by a majority of the members of the Royal Commission on Gold and Silver, it is the duty of Her Majesty's Government to negotiate without delay with other leading nations for a monetary union on these lines." The President is Lord Aldenham, the General Secretary Mr. Henry McNeil, and the Offices are at 10, Walbrook, E.C.

The **Gold Standard Defence Association** is the corresponding society on the other side formed "to oppose the policy of bimetalism and to unite in defence of the gold standard all those who believe that an adherence to that standard is essential to the commercial position of our country and to the due discharge of contracts. . . . One leading object of the Association is to explain the principles which should govern a sound currency and a trustworthy standard of value; and to show that whilst our present system is in conformity with those principles, the proposals of the bimetalists are in conflict with them." The Association issued a statement in June '95, in which it declared that the evils attributed by bimetalists to the existing currency system either do not exist or are much exaggerated, and that, so far as they do exist, they are not due to the gold standard; that the interests of foreign nations who are possessed of a large amount of over-valued silver, and who owe debts to this country, are not necessarily the same as the interests of this country. A valuable book providing a full exposition of the views of the Association on all sides of the subject was published in '98, entitled "The Gold Standard" (Cassell & Co., Ltd.). The President of the Association is Sir John Lubbock, Bart., M.P.; the Chairman of the General Council, Mr. J. H. Tritton; and the Secretary, the Hon. George Peel, 11, Clement's Lane, E.C.

BIOLOGY, '99.

At the British Association, Mr. Adam Sedgwick, F.R.S., one of the ablest exponents of the biology of to-day, delivered a comprehensive address on "Variation, and some phenomena

connected with Reproduction and Sex." The author's views are distinctly helpful towards the rational interpretation of the manifold questions of evolution. At the first origin of life upon the earth, the variability of living matter must have been of enormous range, we are told, and this points to the suggestion that heredity was then a much less important phenomenon than it is now. The frequent appeal of the biologist, raised by the question "What can the physicists tell us about such and such facts?" met with an unexpected answer from Professor Poynting in the Mathematical and Physical section of the meeting, and his remarks clearly indicate the attitude of physicists. The position taken up was that the assumption that purely physical explanations will suffice to predicate motions and changes, voluntary and involuntary, in living matter, is at present nothing more than "a gigantic extra-polation," to be unhesitatingly rejected if merely a case of ordinary physical investigation. Nothing could be plainer than the limitations imposed by Prof. Poynting. In the living being there was always some individuality, something different from any other living being, and predication in the physical sense and by physical methods was impossible. Hence the biologist must, perforce, limit himself to psychical lines of explanation. Prof. Karl Pearson is continuing his work in statistical biology, that department which follows the trail of natural selection and gives us mathematical data concerning it. His last published paper dealt with longevity in man, as a question of inheritance. The duration of life in the female line under the same aspect is now being discussed. Prof. Pearson says a mortality table exemplifies natural selection at work. The theories involved in the question of the hybridisation of animals in a state of domestication, the subject of practical study by Prof. Cossar Ewart, F.R.S., are of interest to students of heredity, and to the wider circle of those engaged in the selective breeding of animals. The present view of biologists in regard to this subject is that as the result of continued selection there is a diminished variability. The bearing of this upon the breeder's art is obvious. At next year's meeting of the Royal Agricultural Society a special show will be made of Prof. Ewart's hybrids (see his "Pennycook Experiments," Black). An International Conference on the hybridisation of plants, and cross breeding, held under the auspices of the Royal Horticultural Society, proved of exceptional interest. An important survey of the fishes of the Nile is in hand, initiated with the official co-operation of Lord Cromer, and aided by many English zoologists. Mr. G. A. Boulenger, F.R.S., has undertaken the description of the species, and it is intended to issue a work, "The Fishes of the Nile," containing about a hundred plates, and descriptive text. Doubtless additions to the present meagre knowledge of the species inhabiting the Nile waters will have considerable economic value. A point to be borne in mind is that the operations in progress for damming the waters must affect the range of species. Mr. J. E. Moore has headed another expedition to Lake Tanganyika to further investigate the absorbing evolutionary problems presented by the fauna of its waters. Prof. E. Ray Lankester, the chairman of the Exploration Committee, made a powerful appeal in the *Times* for funds, which was liberally

responded to. Prof. McIntosh, F.R.S., issued his "Resources of the Sea" (Clay), a work of value published at an opportune time when complaints are frequent of the restrictions applying to certain fishing areas. Extended criticism is given to the methods and actions of the Scottish Fishery Board. Reference was made in ed. '99 to the scientific expedition to Socotra by Mr. Ogilvie Grant and others. Large collections were made, and a volume on the results is in preparation. The plants, of which some 200 living specimens, or ripe seeds, have been brought over, are stated to be of the highest scientific interest, and of great commercial value. Some are now under cultivation by Prof. Bayley Balfour in the Edinburgh Botanical Gardens. The discoveries attending the remarkable connection between malarial disorders and the mosquito are treated of in the MEDICAL SUMMARY, but it may certainly be claimed that these triumphs are part of the biological progress of the year. The appointment of Prof. E. Ray Lankester, F.R.S., to the post of Director of the Natural History Museum, in succession to the late Sir W. Flower, was a notable personal event. Prof. Burdon Sanderson, F.R.S., delivered the annual Croonian Lecture of the Royal Society on the subject, "The Relation of Motion in Animals and Plants to the Electrical Phenomena associated with it." The first instalment of the long-promised "Index Animalium," by Mr. C. D. Sherborn, may shortly be expected. The prospects of biological inquiry in the projected Antarctic Expedition are engaging the attention of specialists, and not a little divergence of opinion exists as to its place in the whole scheme.

Birkbeck Institution, The, was founded by the late Dr. Birkbeck in 1823, as a mechanics' literary and scientific institute. The foundation stone of the present building, Bream's Buildings, E.C., was laid by the Duke of Albany in '83, and the building was subsequently opened formally by the Prince of Wales. The Institution was incorporated during '91 as part of the City Polytechnic, under a scheme formulated by the Charity Commissioners, and in this way its building debt was removed and a substantial endowment secured.

Birmingham, King Edward's School, comprises three grammar schools for boys, four grammar schools for girls, a high school for boys and a high school for girls. Founded 1552, reorganised 1878; income, £30,000. Numerous scholarships and exhibitions both for boys and girls. The pupils number over 2600. **Head Master**, Rev. A. R. Vardy, M.A. **Motto**, *Domine, Salvum fac Regem*. Some alumni: the late Archbishop of Canterbury (Dr. Benson), the late Bishop of Durham (Dr. Lightfoot), the Bishop of Durham (Dr. Westcott), Sir Alexander Mackenzie, the late Sir E. Burne Jones, etc.

Birmingham University Scheme. A charter has been drafted and presented to the Privy Council for incorporating the University of Birmingham. It is intended that the University shall be a teaching and examining university, and it is proposed to transfer to the University Body when constituted the whole of the endowments, equipment, and staff of Mason University College. These endowments amount to about £200,000, and in addition the committee charged with the promotion of the university

have already succeeded in raising an endowment of upwards of £323,000, so that a university endowment exceeding half a million is already assured. The following are the officers of the University Committee: **Chairman**, The Right Hon. J. Chamberlain, M.P.; **Chairman of the Ex-**

ecutive Committee, Mr. Francis Corder Clayton; **Hon. Treasurers**, Messrs. G. H. Kenrick and Charles Showell; **Secretary**, Mr. G. H. Morley, Mason University College, Birmingham.
Birmingham Water Supply. See ENGINEERING.

BISHOPS AND DEANS.

The following is a list of the territorial prelates of the Church of England, with the date of their appointment to the see, and with the annual income. The table, it will be seen, includes the Suffragans appointed for each see; and the names of the Deans. For biographies of the Bishops see under the alphabetical heading of each in PEERS, HOUSE OF, where also it is shown which Bishops actually sit in the House of Lords:—

See.	Bishop.	Ap- pointed.	Income.	Bishop Suffragan and Title.	Dean.
Canterbury	Temple (Abp.)	1896	£15,000	Dr. W. Walsh, Bp. of Dover	F. W. Farrar, D.D.

Windsor	Dr. Eliot.

Bisley Meeting, '99. See NATIONAL RIFLE ASSOCIATION.

Bismarck Archipelago. A group situated N. of the eastern part of New Guinea, including islands formerly called New Britain, New Ireland, and New Hanover. They have been a German possession since '84. Area 20,000 sq. m.; pop. 188,000. Chief exports copra and cocoa-nut fibre. See COLONIES, ETC., OF EUROPEAN POWERS.

Blackmore, Richard Doddridge, the novelist, was b. in 1825. Ed. at Blundell's School, Tiverton, and Exeter Coll., Oxford. Intending to follow the legal profession, he was called to the bar at the Middle Temple ('52), and commenced his career as a conveyancer. After publishing "Clara Vaughan" in '64, and "Cradock Nowell" two years later, he at once leapt into fame, in '69, by "Lorna Doone: a Romance of Exmoor," a book whose popularity is still very great. Other books from his pen include "Alice Lorraine" ('75), "Mary Anerley" ('80), "Kit and Kitty," "Springhaven," "Perlycross" ('94), "Tales from the Telling House" ('96), and "Daniel" ('97), all sustaining his reputation for poetic description and careful delineation of character. Mr. Blackmore has translated the Georgics of Virgil, and has also written verses, including "The Fate of Franklin," and "Fringilla," a volume of verse, which appeared in '95. Address: Teddington, Middlesex.

Black Rod, Gentleman Usher of the. An officer of the House of Lords appointed by the Crown, who assists at the introduction of peers, has charge of the arrangements for the maintenance of order below the bar, near the Throne, and in the strangers' gallery, and who summons the Commons whenever their attendance is required in the House of Peers. Gen. Sir Michael Biddulph, G.C.B., was appointed to this office in '95 in succession to the late Admiral Sir J. R. Drummond, G.C.B.

Blake, Hon. E., M.P. See under COMMONS.

Blind. See ROYAL NORMAL COLLEGE FOR THE BLIND.

Bloemfontein. Cap. Orange Free State (q.v.).

Board of Agriculture. See AGRICULTURE I.

Board of Education Act. See SESSION, sect. 41.

Board of Trade. See TRADE, BOARD OF.

Bohemia. The population of this province consists of about 4,000,000 Czechs and 2,000,000 Germans. It possesses a Provincial Diet of 242 members, which is competent to legislate in all matters not specially reserved to the Reichsrath. See AUSTRIA-HUNGARY.

Bokhara. A feudatory Central Asian State attached to the Russian province of Turkestan. Conquered in '68, it has been rapidly losing all independence since, and the completion of the Transcaspien railway to Samarcand practically incorporated it with the Czar's dominions. It is the most populous khanate of Turkestan, possessing 2,500,000 inhabitants, while Bokhara (75,000) is the principal trade centre of the region. Area, 92,000 sq. m. The railway station

of Bokhara is situated ten miles from the city, and here the Russians have built a "New Bokhara," allowing the older city, for political reasons, to fall into decay. The Ameer, Sayid Abdul Ahad, is allowed to maintain an army of 20,000 troops for administrative purposes, and these are being drilled by Russian instructors. The products of the country are fruit, tobacco, cotton, corn, silk, and hemp, and the trade is almost entirely in the hands of the Russians.

Bolivia. Bounded on the north by Peru and Brazil; on the east by Brazil and Paraguay; on the south by the Argentine Republic and Chili; on the west by Chili and the Pacific Ocean. Bolivia has no sea-coast, having ceded her own to Chili by treaty, but the latter country is under obligation to procure her an outlet to the sea. Capital, Sucre, pop. 20,000. La Paz, pop. 40,000. Cochabamba, pop. 25,000, and Oruro, pop. 15,000, are also important towns. It is ruled over by a President, elected for four years, with a Congress of two Chambers, elected by universal suffrage, as is also the President. The Roman Catholic is the State religion, but liberty prevails. Education is free and obligatory, though the law is not strictly enforced. The standing army is fixed at 2000 men. It is a very rich country, abounding in minerals, especially copper and silver. It produces potatoes, barley, grapes, coffee, cacao, etc.; and exports wool, rubber, coffee, and minerals. But industry is wanting in the country, which offers a wide field to European labourers. Area, 567,360 sq. m.; pop. about 2,500,000. Revenue, '98, £489,621; expenditure, £488,197. Imports, '98, £3,200,000; exports, £1,500,000. Total debt, '98, about £95,000. For Ministry see DIPLOMATIC.—History, '99. The Government forces were defeated in April by a revolutionary force under Colonel Pando, and President Alonso thereupon fled into Chili.

Bombay. See INDIA; and for Ministry see DIPLOMATIC.

Booth, Rev. William, better known as General Booth, the founder of the Salvation Army, was b. at Nottingham, 1829. Entered the Methodist New Connexion Ministry '50. He resigned, however, in '61, preferring to work as an evangelist amongst those who never attended a place of worship at all. In '65 he established in the East End of London the Christian Mission, out of which grew the world-wide organisation known as the Salvation Army, which has invaded almost every town of England and Wales, and sent missionary contingents into various foreign countries, including France, Switzerland, Holland, Belgium, Scandinavia, Finland, Italy, India, Australasia, U.S.A., Canada, S. America, W. Indies, Java, and Japan. His eldest son is the Chief of the Staff, and his eldest daughter has greatly aided the progress of the movement in Switzerland, France, Belgium and Holland. Other members of his family have also co-operated with him in his missionary enterprise, one son having charge of the work in Australia, a daughter in Canada, and the youngest daughter having been appointed to France. There are in all nearly 14,000 officers employed in the work. He has latterly been much occupied in the attempt to maintain and develop the scheme of social amelioration initiated in Nov. '90 on the lines of his famous book "In

Darkest England and the Way out." Address: 101, Queen Victoria Street, E.C.

Borneo. A large island of the Malay archipelago, divided into various states. Estimated total area 300,000 sq. m.; estimated pop. 1,846,000. Holland claims as a possession 203,714 sq. m. of territory on the south, east, and west of the island, with a population of a million and a quarter. In reality this immense tract is parcelled out into various native states. Those on the coast are more or less under Dutch influence. Of the interior little is even known. The principal Dutch settlements are at Sambas, Pontiana, Banjarmasin, and Koti. On the north-west coast is the State of Sarawak (area 50,000 sq. m., pop. 300,000), which in '88 was constituted an independent state under the protection of Great Britain, all its foreign relations being conducted by Her Majesty's Government. Capital Kuching. Sea-board extends 380 miles. Revenue, '96, £105,000; expenditure, £117,500; imports, '96, £771,120; exports, £741,220. The government was intrusted to Sir James Brooke in '41, who ruled as Rajah till '68, when he was succeeded by his nephew, His Highness the Rajah Charles Johnson Brooke, G.C.M.G. Under the just and equitable rule of the Brookes, Sarawak has been reclaimed from barbarism. North-east of Sarawak is the independent State of Brunei, or Borneo Proper, a territory of less extent. Area about 3,000 sq. m. Capital, Brunei. It is ruled by a Sultan, who, however, is not vested with despotic authority, certain officers of his court having powers similar to a constitutional ministry. A protectorate was proclaimed over Brunei by England in '88, the internal administration being left to the Sultan, but all foreign relations conducted by Her Majesty's Government. Beyond it lies British North Borneo, area 31,000 sq. m., pop. 200,000, which is not an official dependency, but is the property of the British North Borneo Company, to whom a royal charter was granted in '81. In '88 a formal protectorate was proclaimed over British North Borneo. Labuan was made subject to the Company in '89. The administration of the territory is in the hands of a Governor, who is assisted by a Council, and by Residents appointed to preside over provinces and districts; the machinery being similar to that in Crown colonies. The British North Borneo Company sells or leases its lands to planters, and derives its revenues from the proceeds of sales and taxes. About 1,000,000 acres have been alienated, and there are about fifteen estates planting tobacco. For latest statistics see BRITISH EMPIRE (table). Between this and the Dutch territories on the east is the native state of Sulu. The whole island is rich in valuable timber, woods, fruits, spices, drugs and gums, and has a varied fauna. Minerals: coal, iron, gold, diamonds, antimony, quicksilver, etc. Soil exceedingly fertile, and well adapted for the cultivation of all tropical products. Principal exports: sago, beeswax, edible birds'-nests, camphor, rattans, gold, pepper, caoutchouc, gutta-percha, spices, drugs and dyes, etc. The people belong to various races—Malays, Dyaks, Kyans, Negritos, Bugis, and Chinese. Tattooed races, Kanowits, Pakatans and others, inhabit the interior.

Bosnia and Herzegovina. See AUSTRIA-HUNGARY.

Boyle, Sir Courtenay, Secretary to the Board of Trade. Born in Jamaica, Oct. 21st, 1845. Son of Cavendish Spencer Boyle. Educated at the Charterhouse and Christ Church, Oxford. Private secretary to the Lord Lieutenant of Ireland '68 and '82. Inspector to the Local Government Board '73; assistant secretary to the Board of Trade '85; permanent secretary '93; created K.C.B. '92. Married to Lady Muriel Campbell, daughter of 2nd Earl of Cawdor.

Boys' Brigade, The. A movement set on foot sixteen years ago by Mr. W. A. Smith of Glasgow. The aim of the promoters is "the advancement of Christ's Kingdom among boys, and the promotion of habits of obedience, reverence, discipline, self-respect, and all that tends towards a true Christian manliness." Companies are formed in connection with churches, missions, and Sunday schools in all parts of the United Kingdom, and the boys are trained largely by means of military drill and discipline. They wear, with their ordinary clothes, a simple uniform of cap, belt, and haversack. The total number of boys enrolled in the United Kingdom is 35,000, and their ages vary from 12 to 17. The officers number 2900. The movement has spread to America and the colonies. In the United States of America there are 600 companies with 27,000 boys, and in Canada there are 120 companies with 4500 boys. The Duke of York is Patron, the Archbishop of Canterbury is Vice-Patron, and the Earl of Aberdeen is Honorary President. **Brigade Secretary**, Mr. W. A. Smith. **Headquarters** for the United Kingdom, 162, Buchanan Street, Glasgow.

Braddon, Mary Elizabeth, daughter of Mr. H. Braddon, solicitor, was b. in London in 1837. Is a prolific writer, for besides many contributions to general literature, she is the author of between fifty and sixty novels, the best known of which are "Aurora Floyd," "Lady Audley's Secret," "Eleanor's Victory," and "Henry Dunbar," whilst her more recent works are "Vixen," "Ishmael," "Mohawks," "Gerard," "The Venetians," "All Along the River," "Thou art the Man," "Sons of Fire" ('95), "London Pride" ('96), "Under Love's Rule" ('97), "Rough Justice," "In High Places" ('98), and "His Darling Sin" ('99). Miss Braddon formerly edited the *Belgravia* magazine, to which many of her stories were contributed. A drama by her, "Griselda," was produced at the Princess's Theatre, 73. Her husband, Mr. John Maxwell, died early in '95. Address: Anniesley Bank, Lyndhurst, New Forest; and Lichfield House, Richmond.

Bramwell, Sir Frederick, D.C.L., LL.D., F.R.S., was b. 1818, and served his time as a mechanical engineer with John Hague. He is a brother of the late Lord Bramwell, and son of the late George Bramwell, banker. He was elected Associate of the Institution of Civil Engineers in '56, member in '62, a member of the Council of that body in '67, and its President in '84. He has also been President of the Institution of Mechanical Engineers (in '74). **Hon. Secretary** to the Royal Institution since '85. Chairman of the Executive Council of the Inventions Exhibition '84. Sir Frederick was knighted in '81, was created a **Baronet** in '89,

and was in '88 elected **President** of the **British Association** for the Advancement of Science.

BRAZIL.

A republic on the west coast of Central South America, comprising the vast valley of the Amazon and its affluents, as well as the watershed of other great rivers. Until '90 it was an empire under Emperor Pedro II., of the house of Braganza. A revolution then, however, broke out, a National Congress was assembled by the Provisional Government, and a new **Constitution** was drafted, and finally adopted in Feb. '91. The chief feature of this was the establishment of the old provinces as twenty-one separate states, self-governed except for federal purposes, but with all fiscal matters, the maintenance of order, the defence of the country, the currency, reserved to the Federal Government. This consists of a legislative authority, the National Congress, composed of a **Senate** of 63 members, and a **Chamber of Deputies** of 212 members. Congress meets annually on May 3rd for a four months' session. Deputies and senators are paid. The former must have been citizens for four and the latter for six years. Deputies are elected directly, with provision for minority representation, for three years, one member being chosen for every 70,000 of the population. The senators are directly elected, three for each state, for nine years (one-third retiring every three years). The executive authority is in the hands of the **President**, elected for four years only by the people directly. The connection between Church and State has been abolished, and all religions are now tolerated, but the Roman Catholic prevails. Education is free but not compulsory. The chief products are coffee, rubber, sugar and cotton. **Area**, 3,218,082 sq. m.; **pop.** 17,500,000. **Capital**, **Rio Janeiro**, **pop.** 522,651. It is, however, an article of the Constitution that the capital of the Republic shall at some future time be built on the central plateau of Brazil; and a lofty plateau in the state of Gorgaz has been suggested for the purpose. The revenue, '99, was estimated at £10,639,818; **expenditure**, £9,958,280; **imports**, '97, £21,567,660; **exports**, £26,752,224; **external debt**, £34,697,300; **internal**, £16,548,000. See **FOREIGN ARMIES AND NAVIES**; and for Ministry see **DIPLOMACY**.

History, '99.—The Budget statement showed an estimated revenue of 351,000 contos of reis for '99, and an expenditure of 328,000 contos of reis (Dec. 30th). The conversion of the '89 gold 4-per-cent. loan was effected in **March**, the Government giving the holders bonds of the '97 currency 6-per-cent. loan. The basis of exchange was 1800-milreis of the '97 loan for 1000 milreis of the '89 loan. The Government accepted a proposal from Great Britain to refer the dispute as to the boundary between Brazil and British Guiana to arbitration (**March 8th**).

Brema, Marie, mezzo-soprano vocalist, was b. at Liverpool, of German parentage, and made her *début* at the Monday Popular Concerts in '90. She appeared as Lola in "Cavalleria Rusticana," and as Orfeo in '91 under Signor Lago at the Shaftesbury Theatre, and her progress in public favour was very rapid.

In '92 and '93 she sang at Covent Garden during the summer opera season. In '94, at Bayreuth, she sang Ortrud, and in '96 Fricka and Kundry. She was at Covent Garden in '97 and '98, and successfully played Brunnhilde in "Die Walküre." She is a great favourite in America, in Paris, and in Belgium. Since Dec. '96 she has gained much praise for her impersonation of Dalila in Saint-Saëns' Biblical opera.

Bridge, Sir Frederick, Mus. Doc., organist of Westminster Abbey, was b. at Oldbury 1844. Educated at the Cathedral School, Rochester, he subsequently became a pupil of the late Sir John Goss. In '69 he was appointed organist of the Manchester Cathedral, and in '71 Professor of Harmony at Owens College. He has been connected with Westminster Abbey since '75, and was appointed in '90 Professor of Music at Gresham College, and in '96 Conductor of the Royal Choral Society. His compositions, mainly produced at the great provincial festivals, include the "Hymn to the Creator," "Rock of Ages," "Callirhoe," "The Repentance of Nineveh," and "The Cradle of Christ." He was entrusted with the duty of setting to music Tennyson's poem "Crossing the Bar," which was sung at the funeral in Westminster Abbey (Oct. '92). His most successful work is a setting of Rudyard Kipling's "Flag of England" for chorus and orchestra, performed at the Albert Hall in the Diamond Jubilee year with remarkable success. In addition to the above compositions, Prof. Bridge has written many anthems and services, carols, etc., and is the author of four of Novello's Primers on the subject of Counterpoint, Organ Accompaniment, and "Musical Gestures." The latter is a novel system of teaching the rudiments of music by physical exercises. He was knighted in '97. Address: The Cloisters, Westminster Abbey.

Brisson, Henri, is the son of a barrister, and was b. at Bourges July 31st, 1835. Having joined the Paris Bar, he took up journalism and founded the *Avenir National*. After the fall of the empire he was appointed a deputy-mayor of Paris '70, and in '71 became a deputy. He was elected Vice-President of the Chamber in '79, and President in '81, succeeding Gambetta in that position. In '85 he became Premier, but had to resign after holding office for a few months. M. Brisson, however, retained a prominent position as a Radical leader, and was appointed to preside over the Panama Inquiry Committee. In '96 he was again elected President of the Chamber, and held that office till after the '98 elections, when he was defeated by a small majority in favour of M. Deschanel. M. Méline's ministry then resigned, and after several others had failed, M. Brisson formed a Radical administration in June '98, which only lasted till October in the same year.

British and Foreign Anti-Slavery Society. Founded 1839, its first President being Thomas Clarkson. The objects of the Society, which carries on the work of previous anti-slavery societies, the need for which had ended in the emancipation of slaves in British colonies, are: "The universal extinction of slavery and the slave trade; and the protection of the rights and interests of the enfranchised population in the British possessions, and of all persons

captured as slaves." Patron, the Prince of Wales; *Journal, The Anti-Slavery Reporter*; Hon. Sec., Chas. H. Allen. Secretary, Travers Buxton. Office, 55, New Broad Street, E.C.

British Association. Founded at York in 1831, at the suggestion of Sir D. Brewster, for the purpose of stimulating scientific inquiry and for promoting the intercourse of scientific men. The Association meets annually for a session of one week, in some large provincial town, but never in London. An annual volume is issued containing not only the addresses and abstracts of papers communicated to the several sections, but also reports on the state of science, prepared by committees specially appointed, and often assisted by grants of money for conducting researches. The Association is now divided into ten sections, distinguished by letters as follow: A, **Mathematics and Physics**; B, **Chemistry**; C, **Geology**; D, **Zoology**; E, **Geography**; F, **Economic Science and Statistics**; G, **Mechanics**; H, **Anthropology**; I, **Physiology** (established in '93); and K, **Botany** (established in '94). The section of Physiology will only meet in those towns where there are Laboratories suitable for demonstrations. Each section is governed by a president, vice-presidents, secretaries, and committee. (For list of the successive presidents of the whole Association see last "Report.") The last meeting was held at Dover in Sept. '99, under the presidency of Sir Michael Foster. The attendance did not reach much over 1400, being the smallest in recent years. The smallness of the attendance was due to the absence of the class of visitors usually attracted by social functions and excursions, the attendance of leading men and women of science being quite up to, if not above, the average. An interesting feature of the meeting was the visit on the Saturday of some 300 French members of the Association Française pour l'Avancement des Sciences, who were meeting at the time at Boulogne, and of representatives of the Société Géologique de Belge. The presidential address consisted mainly of a review of the progress of science during the century. After a genial appreciation of Sir Douglas Galton, who had died during the year, Sir Michael Foster touched upon the vast changes that science had effected in the ordinary conditions of life, and then dwelt successively on the discovery of oxygen, the birth of electricity in 1799, the condition of geology a hundred years ago, the progress made in the biological sciences, the problems connected with the nervous system, and Darwin's "Origin of Species." After referring to the gulf between 1799 and 1899, and remarking that not only did scientists now know more, but that knowledge was much more widely diffused among the many, he spoke of science as a growing inheritance, and of the triumphs of science as intellectual triumphs. Science was a strengthening discipline. Referring to the relation between science and politics, he contended that the increased power given by science to modern means of destruction was already becoming a bar to the use of that power. Sir Michael's eloquent insistence upon the international brotherhood of science was cordially received as a caution against allowing the feeling which had just been aroused by the close of the Dreyfus trial to interfere with

the cordial relations between the British and the French savans. In concluding, he recognised the importance of antarctic research, asked for an index of scientific literature, and proposed what he called an international Witenagemote of science. The meeting got through a great deal of good work, without being marked by anything very sensational. Prof. Poynting, president of the Mathematical and Physical Section, distinguished between the methods pursued by and applicable to physics and biology; and also cautioned physicists against the immoderate use of the ether theory. Prof. J. J. Thomson discussed at length the question whether the atom is the smallest existing quantity of matter. In the Botanical Section, Prof. Marshall Ward opened an important discussion on symbiotic fermentation. Dr. Horace L. Brown, president of the Chemical Section, gave an original and able address on the fixation of carbon by plants. In the Geological Section Mr. R. Etheridge, F.R.S., maintained that the recent discoveries of coal in Kent indicated the existence of a chain of concealed coal-basins connecting the Franco-Belgian coal-fields with those of south-western Britain. Prof. Boyd Dawkins gave a history of the discoveries of coal in Kent, and described the borings now in progress; and Mr. Walcot Gibson showed that the productive coal-measures of Staffordshire occur farther west than has been supposed. The address of the president of the Geological Section was postponed until the arrival of the French and Belgian visitors on Saturday, when Sir Archibald Geikie gave an eloquent address on geological chronology. Some exceedingly interesting papers were brought before the Zoological Section by the president (Mr. Adam Sedgwick, F.R.S.), Mr. J. J. Lister, and others. In the Geographical Section, Sir John Murray (president) discussed the National Antarctic Expedition; Mr. and Mrs. Rickmers described their journey in Central Asia; Capt. Welby gave a paper on his journey to Southern Abyssinia and Lake Rudolf; and Dr. Haddon gave notes on his recent expedition to New Guinea and Borneo. Comparatively little interest was excited by the meetings of the Section of Economics and Statistics. The chief interest in the Mechanical Section was excited by Sir William White's address on naval construction. In the Anthropological Section, Mr. C. H. Read urged the establishment of an Imperial Bureau of Ethnology. The section of Physiology produced a large number of valuable papers of great scientific importance. The Association is to meet in Bradford in 1900 and in Glasgow in 1901. Secretary, G. Griffith, M.A., Offices, Burlington House, W.

British Astronomical Association, founded Oct. '90 for "the encouragement of a popular interest in astronomy, the association and organisation of amateur observers for mutual help, and the circulation of current astronomical information." It was also intended to meet the requirements of those who found the subscription of the Royal Astronomical Association too high, or its papers too advanced, or who were, as in the case of ladies, practically excluded from becoming Fellows. It already numbers upwards of 1100 members, and about 12 "Observing Sections" are in active operation for the combined study of the sun, the moon, the various planets, and for other astronomical

research. The meetings are held on the last Wednesday of the month, from October to June inclusive, at Sion College, Victoria Embankment, E.C. The subscription is 10s. 6d. per annum; entrance fee 5s. The present President is Mr. W. H. Maw, F.R.A.S. The senior Secretary is Mr. James G. Petrie, F.R.A.S. A flourishing branch was started in Manchester in March '92, under the presidency of the Rev. W. Sidgreaves, F.R.A.S., Director of Stonyhurst Observatory. The Association has since established prosperous branches in Glasgow for the West of Scotland, Edinburgh for the East of Scotland, and in Sydney, N.S.W., and Melbourne, Victoria, for the Australasian Colonies. Inquiries and applications for membership should be made to the Assistant Secretary, Mr. T. F. Maunder, F.S.A.A. Office, 26, Martin's Lane, Cannon Street, E.C. A journal is published every month during the session, besides occasional memoirs, under the editorship of Mr. E. Walter Maunder, F.R.A.S., of the Royal Observatory, Greenwich.

British Bechuanaland, now part of CAPE COLONY (*q.v.*).

British Central Africa. See RHODESIA.

British Central Africa Protectorate, The. A portion of British Central Africa lying round the shores of Lake Nyasa, and extending to the banks of the Zambesi. It includes all British Nyasaland, as well as the Shiré Highlands and the greater part of the basin of the river Shiré. The expenses of administering the Protectorate are partly met out of revenue locally raised, and further by an annual grant from the Imperial Government. The administration is in the hands of a Commissioner acting under the Foreign Office. The port of British Central Africa is Chinde, at the mouth of the Zambesi, where a small concession has been granted by the Portuguese Government. The area of the Protectorate is about 38,000 sq. m.; the European inhabitants number about 350, and the native inhabitants are about 850,000. A number of forts recently erected guard the frontier in all directions, especially on the north and south-east, from the ingressions of the slave-trading Arabs and Yaos. The armed forces of the Protectorate consist of 200 Sikhs and 1600 negroes. Most of the officers of this force are Indian officers lent, together with the Sikhs, by the Indian Government. The principal occupation of the European settlers is planting; and many thriving plantations of coffee, sugar, cinchona, and tobacco have been established. Rubber and ivory are also exported. The chief towns are: Blantyre (pop. 6500), Zomba (headquarters of the Administration), Fort Johnston (the principal port on Lake Nyasa and naval dépôt), Karonga (north end of Lake Nyasa), the starting-point for Tanganyika, and Kotakota (west coast of Lake Nyasa). The Protectorate is divided into 12 Districts, and these are managed by a number of Collectors and Assistant Collectors, Judicial Officers, etc. There is at least one judicial Officer, and in some cases two or three, in each District. Almost the entire trade of British Central Africa is with the United Kingdom. There is telegraphic connection through Umtali with the South African system; and the Trans-African Telegraph, a special article upon which appears under the separate heading ENGINEERING, has reached Lake Tanganyika. See also DIPLOMATIC, EAST AFRICA GERMAN, RHODESIA, etc.

British Columbia. A province of the Dominion of Canada which lies between the Rocky Mountains and the North Pacific Ocean, and from the United States boundary to 60° N. lat. Area, 383,000 sq. m. Pop. 150,000. Minerals consist chiefly of coal, silver, and gold. Vancouver Island contains large deposits of good steam coal, and there are other large deposits in the inland parts of the colony. Gold has been found in the Kootenay, Cariboo, and Cassiar districts, near the Columbia river, in great abundance, and a rush thither set in in '95 and '96. The town of Rossland became the centre of the district. The gold output in '97 was £527,268; silver, £654,567; copper, £53,252; and lead, £278,102. There were also 882,854 tons of coal raised. An important industry is carried on in tinned salmon. There are also valuable timber and fruit-growing industries established. Capital, Victoria, on Vancouver Island, pop. 24,000. Vancouver City on the mainland is the terminus of the Canadian Pacific Railway (*q.v.*). The government of the colony is administered by a Lieut.-Governor and a responsible ministry. There is a Legislative Assembly consisting of 33 members. Three members are sent to the Dominion Senate, and six to the House of Commons. Manhood suffrage prevails in provincial elections. See BRITISH EMPIRE (table), and DIPLOMATIC.

British East Africa. See EAST AFRICA PROTECTORATE.

British Empire League, The, was established in '94, with the object of maintaining and strengthening the connection between the United Kingdom and the outlying portions of the Empire, by the discussion and promotion of questions of common interest, more particularly those relating to trade arrangements and mutual defence. Its founders had been for the most part active members of the Imperial Federation League, who felt that the dissolution of the League, without anything being done to replace it, would be a misfortune. The objects and constitution of the League (which have been adopted by the Imperial Federation League in Canada, now known as the British Empire League in Canada) are: to secure the permanent unity of the Empire; to promote trade between the United Kingdom, the Colonies and India, and to advocate the holding of periodical meetings of representatives from all parts of the Empire for the discussion of matters of general commercial interest, and the consideration of the best means of expanding the national trade; to consider how far it may be possible to modify any laws or treaties impeding reciprocal trade arrangements between the United Kingdom and the Colonies, or between British Colonies; to promote closer intercourse between the different portions of the Empire by cheaper and more direct steam and telegraphic communication; to develop the principles on which all parts of the Empire may best share in its general defence; and to assimilate, as far as local circumstances permit, the laws relating to copyright, patents, legitimacy, and bankruptcy throughout the Empire. Particulars of the proceedings of the League, and the steps which are being taken to carry out its objects, are given in the *British Empire Review*, the monthly organ of the League, price 6d. Secretary, Mr. C. Freeman Murray. Office, 112, Cannon Street, London, E.C. See IMPERIAL FEDERATION.

BRITISH EMPIRE,

We furnish below a table of the British Empire, with its Colonies, Dependencies, and Protectorates, throughout the world, showing the geographical distribution of the various parts of it, their respective capitals, area, population, public revenues and expenditure, imports and exports, the dates at which they were acquired, and their political status and government. The dependencies are classified thus:—(a) Colonies possessing a full constitution, with responsible government; (b) colonies in which the legislature is partly elective and partly controlled by the governor, styled representative government; (c) Crown colonies, which are ruled directly by the Imperial Government, through their respective governors and local officials; (d) dependencies subordinate to the government of others, provinces and parts of colonies, administered by functionaries appointed by the governments on which they are dependent; (e) protectorates, internally independent, but more or less subject to British control, by treaty and otherwise; (f) places nominally belonging to Great Britain, but either unoccupied or not under authority. Territories occupied by troops, but not declared to be actually British possessions (e.g., Egypt, Soudan), have not been included in this table, and many small possessions, like the numerous

COLONIES, ETC.

islands in the Pacific, are not given a place. Details of various dependencies will be found under their respective headings elsewhere. The figures given in the Table are as far as possible the latest received in England. The British Empire extended over an area of 8,329,000 sq. m. in '37, but it covered an area of 11,250,000 sq. m. in '97: that is, in 60 years it increased by 2,921,000 sq. m. Of the total 11,250,000 sq. m., 9,115,000 sq. m. are under settled government. The population, which was in '37 168,000,000, had increased to about 400,000,000 in '97. In '37 there were about 25,750,000 British in the United Kingdom and about 1,500,000 in the Colonies, making a total of 27,250,000. In '97 there were 39,500,000 in Great Britain and 10,500,000 in the Colonies, giving a total of 50,000,000. The total revenues of the Empire amounted to about £75,000,000 in '37, the United Kingdom having a revenue of £50,000,000, and India and the Colonies about £25,000,000. In '97 the revenue of the United Kingdom was, roughly, £110,000,000; India, £62,500,000; Australasia, £30,000,000; Canada, £8,000,000; Cape Colony and Natal, £7,000,000; other Colonies, £7,500,000; making a total of £225,000,000.

* Including payments on account of the Ashanti Expedition '96

British Guiana. A British colony in north of S. America. Coast extends from Orinoco to Corentyne river, 300 miles, and the colony runs inland 400 miles. The area of the colony, including the territory up to the Schomburgk line which is claimed by Venezuela, is estimated at about 109,000 square miles. In connection with the long-standing frontier dispute between the two countries, it was agreed in Nov. '96 between Great Britain and the United States, Venezuela concurring, that 50 years' holding, whether by political control or actual settlement, should be regarded as giving a valid title, all disputed points being referred to arbitration. The treaty of arbitration was signed (Feb. 2nd, '97), Lord Herschell (on whose death Lord Russell of Killowen was appointed) and Mr. Justice Collins being appointed arbitrators for England, and Chief Justice Fuller and Justice Brewer for the United States, with the right to choose a fifth arbitrator. Professor Maertens, of St. Petersburg University, was afterwards selected as the fifth arbitrator and president of the arbitral tribunal. The award is given in the **History** below. Pop. 286,484. The colony is divided into three counties—Essequibo, Demerara and Berbice. Capital, **Georgetown** (Demerara), pop. 53,000, a picturesque, well-built city and port, provided with various excellent modern institutions; second town and port, **New Amsterdam** (Berbice), pop. 9000. The population is mixed, including whites, negroes, aboriginal Indians, East Indian coolies, and Chinese. Rich alluvial low-lying plains extend forty to seventy miles from the coast, and are the seat of cultivation and settlement. The staple article cultivated is sugar-cane, but this industry has been terribly damaged by the competition of bounty-fed beet growers on the Continent. Gold mining is now attracting considerable attention. The chief lack of the colony is labourers to develop its great agricultural and mineral resources. The gold output in '97-8 was worth £453,722. Government representative. Executive in hands of Governor and Executive Council; legislation conducted by Court of Policy of fifteen members, seven official and eight elected. For finance measures six elected representatives are added, forming Combined Court. Civil law is modified Roman-Dutch; criminal law is English. **Exports** consist chiefly of sugar, gums, molasses, and gold. See **BRITISH EMPIRE** (statistics) and **VENEZUELA**.—**History**, '99. The Governor, in his address after the opening of the Legislature, in February, stated that the deficits for the last three official years amounted to \$469,307, and that the floating debt on March 31st, '98, was \$787,000. An agreement providing that, in return for a reduction in the import duties upon certain American products, sugar from the colony should get a reduction of 12½ per cent. on entering an American port, was arrived at (June 15th) and signed (July 18th). It was feared in the colony that the reduction on American imports would produce a considerable deficit of revenue, and the question arose as to whether the sugar planters should not bear a considerable portion of this. The Colonial Secretary apparently took the view that they should. In accordance with the terms of the Arbitration Treaty the arbitrators met at Paris in June '99, Lord Russell of Killowen having taken Lord Herschell's place. Sir Richard Webster, Sir Robert Reid, and Mr.

G. R. Askwith ably argued the British case, and were opposed by M. Prevost, M. Solay, Mr. Tracey, and Mr. Harrison, ex-President of the United States. The award, delivered on Oct. 3rd, '99, was made unanimously, and gave Great Britain the Schomburgk line with the exception of Barima Point, at the mouth of the Orinoco, and a strip of territory between the rivers Winamu and Cuyuni. It was decided that the mouth of the Orinoco should be open to the British, and both banks of a part of the Cuyuni, where the Schomburgk line had given them only one bank. British Guiana, in fact, only had to give up a few hundred of the 60,000 sq. miles she claimed, and the important gold-field areas remained hers uncurtailed. The award gave great satisfaction in the colony.

British Honduras. A Crown colony in Central America, bounded by Yucatan on N., Guatemala W. and S., and Caribbean Sea E. **Area**, 7562 sq. m. The population (34,277) includes whites, aboriginal Indians, Caribs, negroes, East Indians, and Chinese. The chief towns are Belize (6972), Corosal (1514), and Orange Walk (1967). Near the coast the country is swampy, with numerous lagoons abounding. The northern district is a flat plain; but on the west, away from the coast, hills and valleys, clothed with timber, abound, and rich grassy plains afford excellent pasturage. The chief rivers are the Hondo, the New river, and the Old or Belize river. The products are chiefly logwood and mahogany, with bananas, cocoanuts, plantains, rubber, and rum. The Government is composed of the Governor, an Executive Council and a Legislative Council of three official and five unofficial members. See **BRITISH EMPIRE** (table) and **DIPLOMATIC**.

British Medical Association. First formed at Worcester, July 19th, 1832, and called the Provincial Medical and Surgical Association. Its name was changed at Birmingham in '56 to the present one. Its principal objects are:—(1) Collection of useful information, whether speculative or practical, through original essays or reports of provincial hospitals, infirmaries, or of private practice; (2) increase of knowledge of the medical topography of England through statistical, meteorological, geological, and botanical inquiries; (3) investigations of the modifications of endemic and epidemic diseases in different situations and at various periods, so as to trace, so far as the present imperfect state of the art will permit, their connections with peculiarities of soil or climate, or with the localities, habits, and occupations of the people; (4) advancement of medico-legal science, through succinct reports of whatever cases may occur in provincial courts of judicature; (5) maintenance of the honour and respectability of the profession generally in the provinces by promoting friendly intercourse and free communication of its members, and by establishing among them the harmony and good feeling which ought ever to characterise a liberal profession. The Association now numbers more than 18,000 members, and expends upwards of £1500 a year in scientific investigation, scholarships, and committees,—such as examination of the action of chloroform; a committee on therapeutics, which recently issued a valuable report; a committee on railway servants' eyesight, which is now turning its attention to mariners' eyesight; a committee on the investigation of feeble

minded school-children; a committee to investigate the clinical evidence with regard to anæsthetics on the human subject; and other topics. The Association in the United Kingdom is divided into thirty-eight branches, and there are also thirty-three Colonial branches, the Association extending its influence throughout Greater Britain. The annual subscription is one guinea per annum. The organ of the Association is the *British Medical Journal*. See MEDICAL SUMMARY, '99. General Secretary, Francis Powke. Offices, 429, Strand, London, W.C.

BRITISH MUSEUM.

This Museum was founded in the year 1753, when the collection of Sir Hans Sloane and the Harleian collection of manuscripts were acquired, and an Act of Parliament was passed "for providing one general repository for the better reception and more convenient use of the said collections, and of the Cottonian Library, and of the additions thereto." The famous collection of MSS. made by Sir Robert Cotton, which was presented to the nation by Sir John Cotton, his descendant, in 1700, was virtually, however, the beginning of the Museum.

Growth of the building.—The above collections were then designated "The British Museum," deposited in Montagu House, Bloomsbury, in 1754, and opened to the public on Jan. 15th, 1759. Admission at first was very restricted, but gradually extended, till the present arrangement, by which the Museum is opened on every week-day (and on Sunday afternoons since May '96). It was soon found that as the collection grew the space available was insufficient, and in 1816 temporary additions had to be made to the old building to accommodate the Elgin marbles. In '23 it was determined to erect a new building in place of Montagu House, and by '45 the four sides of the present Museum, designed by Sir Robert Smirke, were erected, and Montagu House removed. Further additions afterwards became necessary, and in '57 the magnificent reading-room, with its book-galleries, was built. During the years '80-83 the transference of the natural history collections was made to the new Museum in Cromwell Road, South Kensington. In '79, with the White Bequest of £65,411, a new gallery was built for the Mausoleum marbles, and the White wing was erected on the south-east side, for the accommodation of the Prints and Drawings Department, a reading-room for newspapers and parliamentary papers, two exhibition galleries, and working-rooms for the Department of Manuscripts. Space for the future extension of the buildings has been provided by the purchase in '95 of the rows of houses, with their gardens, which abut on the Museum on the east, north, and west; the ground thus secured forming, together with that already occupied, an isolated square plot of 13 acres.

Departments.—Originally there were only three departments in the Museum: viz., MSS., Printed Books (including coins and medals, and prints and drawings), and Natural History. The MSS. Department has been considerably increased by the addition of private collections, including the famous collection of Royal MSS. presented by George II. in 1757, and by purchase, till it now contains upwards of 55,000 volumes, besides Greek, Coptic, and Latin

papyri, charters, and seals. The Printed Book Department now contains the enormous number of about 2,000,000 volumes, and receives, under the Copyright Act of '42, a copy of every book published in the United Kingdom. The annual increase from all sources amounts to about 46,000 volumes, exclusive of continuations, music, newspapers, etc. The most important additions to this department have been the collection given by George II., containing books collected by English sovereigns from Henry VII.'s time; the Civil War and Commonwealth Tracts, 1641-60, given by George III. in 1762; the Garrick collection of plays, bequeathed by David Garrick in 1779; the Cracherode bequest, 1799; the natural history library of Sir Joseph Banks, Bart., given in 1820; the "King's Library" of George III., '23; and the Grenville collection received in '47. The National Library contains not only the finest and most extensive collection of English literature in the world, but also the best library in each European language existing out of the country in which that language is spoken. The progress of printing is splendidly illustrated by the collections in this department. In consequence of the inconvenient extent to which the manuscript catalogue of the printed books had attained (altogether nearly 3000 large folios), it is now being put into print as rapidly as the funds will permit. It is hoped that the new printed catalogue will be complete in about 600 parts by the year 1900. An Oriental Printed Books and MSS. Department has been recently created. The Antiquities Department was formed in 1807, and in '61 was subdivided into three departments—viz.: 1. Greek and Roman Antiquities, which include the Hamilton collection, purchased in 1772, the Townley marbles, purchased in 1805, and, by later additions; the Parthenon sculptures, better known as the Elgin marbles, the Phigaleian marbles, the Payne-Knight collections, the Lycian marbles, the Mausoleum remains, and many other choice specimens of Greek sculpture, bronzes, fictile vases, gems, and ornaments. 2. The Coins and Medals, originating in the Cottonian and Sloane collections, which have grown to be a very large and interesting department, and include magnificent specimens of Anglo-Saxon, English, Greek, Roman, Oriental, and other coins. In '72 the finest specimens of Greek and Roman coins in the Wigan collection were purchased for £10,000. 3. The Egyptian and Assyrian Antiquities, known up till '86 as the Oriental Antiquities Department, which are an especially valuable and complete collection of Egyptian, Babylonian, Assyrian, Phœnician, and Semitic antiquities. The names of Sir Henry Layard, Sir Henry Rawlinson, and other explorers are inseparably connected with this department, which contains vast stores of invaluable information as to the history, the literature, and the social life of the peoples named. The British and Mediæval Antiquities and Ethnographical Collections were, till '66, attached to the last-named department, but in that year they were formed into a separate department. It contains all antiquities found in the British Isles, Anglo-Saxon, Celtic, or Roman, and glass-work, pottery, arms, ivories, and other antiquities illustrating life in the Middle Ages. There are also fine collections of glass, pottery, and majolica, of prehistoric antiquities, of ethnographical objects, and of Oriental antiquities. The Prints and Drawings Department contains one of the

most noted collections of its kind. The original drawings of old masters, etchings, and engravings of the various schools of eminence, are of extreme interest and value. The famous collection formed by the late Mr. John Malcolm, of Poltalloch, has been recently purchased by special parliamentary grant, and added to the Department.

The Museum is open on weekdays from 10 a.m. to 6 p.m.; after 4 p.m. in January, February, November, and December, and after 5 p.m. in March, September, and October, only certain of the galleries remain open: viz.,—on Mondays, Wednesdays, and Fridays, exhibitions of manuscripts, printed books, prints and drawings, porcelain, glass, majolica, pre-historic, British, mediæval and ethnographical collections; on Tuesdays, Thursdays, and Saturdays, Egyptian, Assyrian, Semitic, Greek and Roman galleries; religious and American collections. On Sunday afternoons the Museum is open from 2 to 4 p.m. in January, February, November, December; from 2 to 5 p.m. in October; from 2 to 5.30 p.m. in March, September; from 2 to 6 p.m. in April; from 2.30 to 7 p.m. in May, June, July, August. The Museum is closed on Good Friday and on Christmas Day. Students are admitted to the several departments under regulations to be obtained from the Director.

Admission to the reading-room is by ticket. A reader's ticket is granted to persons over twenty-one years of age on a written application, stating object of researches, etc., and accompanied by a recommendation from a householder, who must be a person of recognised position, and who must certify that the applicant will make proper use of the reading-room. The authorities will not accept the recommendations of hotel and lodging-house keepers in favour of their lodgers. The total number of visitors to the Museum in '98 (exclusive of readers) was 612,275, of whom 570,417 attended during the day, and 41,858 on Sundays. The average daily number of visitors in the daytime was 1828, on Sunday afternoons 805. The visitors to the reading-room numbered 199,886, a daily average of 627; the total number in '96 was 191,363, and in '97 188,628.

British New Guinea. See NEW GUINEA.

British North Borneo. See BORNEO.

British South Africa Company. On Oct. 29th, '89, a Royal Charter was granted to this Company, conferring upon it large administrative powers in the region north of Cape Colony, now known as Rhodesia, and authorising it to promote trade and commerce and to work mineral and other concessions in those regions. Rhodesia includes British Central Africa, north of the Zambesi, and Mashonaland and Matabeleland, south of the Zambesi, and covers a total area of about 750,000 square miles. Dr. Jameson was the Administrator of the Company's territories till the incursion into the Transvaal, when he was succeeded by Earl Grey, and the control of the military forces of the country was placed entirely in the hands of the Imperial Government. Earl Grey resigned the position of Administrator on the promulgation of the Southern Rhodesia Order in Council '98, under which Administrators were appointed to the two provinces of Mashonaland and Matabeleland. The Administrator of Mashonaland, and Senior Administrator of Southern Rhodesia, is Mr. W. H.

Milton; the Administrator of Matabeleland is Captain the Hon. A. Lawley. The authorised share capital of the Company amounts to £7,000,000. The London Office is at 15, St. Swithin's Lane, E.C. For officials see DIPLOMATIC. See also article on RHODESIA.

British Women's Temperance Association. This Association was formed at Newcastle in 1876, and has now, in the twenty-second year of its existence, branches in all parts of the United Kingdom. Its objects are the union of Women's Temperance Societies, the spread of temperance principles, the control and ultimate suppression of the liquor traffic, and the moral and religious elevation of the people. Its work is divided into seven chief sections: viz., Preventive, Educational, Evangelistic, Social, Political, Legal, and "Organisation," to be adopted by local societies in proportion as one or another of the above departments is found most advantageous. Under these headings much useful and philanthropic work is carried on by means of the Association; and there is also a special department for young people, which numbers 97 branches. The President is Lady Henry Somerset, Eastnor Castle; Acting Vice-President, Mrs. Eva Maclaren, 56, Ashley Gardens, Victoria Street, London, S.W.; Hon. Corresponding Secretary, Miss Agnes Slack, Ripley; Office, 47, Victoria Street, S.W.

Brooke, Rev. Stopford A., M.A., was b. 1832. Educated at Trin. Coll., Dublin, where he graduated ('56), winning the Downe Prize and Vice-Chancellor's medal for English verse. He was formerly Chaplain to the Queen and Chaplain to the Empress Frederick of Germany. In '80 Mr. Brooke seceded from the Church of England because he could not accept the orthodox views on miracles, and became minister of Bedford Chapel, Bloomsbury. In '95, however, after a lengthy illness, he found himself compelled to retire from the post. He is the author of several works, among which are "Life and Letters of the late F. W. Robertson," a "Primer of English Literature," an able review of which is to be found in Mr. Matthew Arnold's "Miscellaneous Essays," "The Early Life of Jesus," several volumes of sermons, a volume of poems issued '88, a "History of English Poetry," a work on Early English Literature, which subject he has made peculiarly his own, a lecture delivered in '93 entitled "Theology in English Poetry," an able criticism of "Tennyson: his Art and Relation to Modern Life" ('94), and "The Old Testament and Modern Life" ('96).

Brunei. See BORNEO.

Bryan, William Jennings, was born at Salem, Marion County, Illinois, March 19th, 1860. Educated first at a public school at Salem, he afterwards went to the Whipple Academy at Jacksonville, and then to Illinois College, where he took high honours in classics. Deciding to follow a legal career, he studied at the Union Law College, Chicago, and first practised for himself at Jacksonville. In '87 he removed to Lincoln, Nebraska, and in '90 he was elected to Congress as an extreme Free Silver man. Re-elected in '92, he afterwards lost his seat because of his uncompromising views on the Silver question, which alienated some of his own supporters. His oratorical abilities were then made good use of in advocating the Silver cause, while he still kept up his law practice and edited an Omaha newspaper. In '96 he

attended the Democratic Convention at Chicago, and after a speech full of impassioned rhetoric, which roused the delegates to almost frenzied enthusiasm, he was nominated for the Presidency, but was beaten at the election on Nov. 3rd, when Mr. M'Kinley received an overwhelming majority of votes. At the beginning of the Spanish-American war he was appointed Colonel of the Nebraska Volunteers (June 4th, '98), but saw no fighting. He kept himself well to the front, however, and is credited with a desire to be again nominated for the Presidency.

Bryce, Rt. Hon. J., M.P. See under COMMONS.

Buckhounds, Master of the. Has control of the royal hunts, and charge of the royal inclosure at Ascot. The office is in the department of Master of the Horse. See MINISTRY.

Buckle, George Earle, son of the Rev. George Buckle, canon of Wells Cathedral, was b. near Bath 1854. He is editor of the *Times*, to which post he was appointed in '84, having previously been connected with the editorial staff of that journal. He was educated at Honiton Grammar School, Winchester, and New Coll., Oxford, of which he was a scholar. He won the *Newdigate Prize for English Verse* in '75, took a First Class in *Littérature Humaines* '76, and a First Class in Modern History in the following year. He was subsequently elected to a *Fellowship of All Souls' Coll.*, and was called to the bar at Lincoln's Inn in '80.

Budget. See FINANCE NATIONAL, and SESSION, sect. 57.

Building Societies. For a critical article on these societies and their legal position, see ed. '94. For the Building Societies Act of '94, see SESSION, sect. 54, in ed. '95.

BULGARIA.

Bulgaria is bounded on the north by the Danube, on the west by Serbia, on the south-west and west by Turkey, and on the east by the Dobruja. By the Treaty of Berlin, '78, it was constituted an autonomous and tributary principality under the suzerainty of the Porte. The executive power is vested in the Prince, assisted by a council of ministers, and the legislative power in a single chamber, the *Sobranje* or National Assembly, elected for five years by manhood suffrage in the proportion of one member to every 20,000 of the population. There is also a Great *Sobranje*, consisting of delegates elected in the proportion of one to 10,000 of the population, to which constitutional and other questions must be referred. In '85 Eastern Roumelia was united to Bulgaria, and the amount of tribute and the share of the Turkish debt to be assumed by Bulgaria were left to be fixed by the Powers. Prince Alexander of Battenberg was the first ruler of the country, but he was overthrown in '86, and succeeded by Prince Ferdinand of the House of Coburg, who was elected unanimously by the National Assembly as Prince in '87. The State religion is that of the Orthodox Greek Church, but there are many Mahomedans amongst the inhabitants. Education is free and obligatory. The chief exports are corn, wine, wool, tallow, and other agricultural and pastoral produce. The bulk of the trade is with Turkey, Great Britain, and Austria. Railways connect Sofia

with Constantinople and Belgrade, and Rustchuk with Varna. Area (including Eastern Roumelia, now also known as Southern Bulgaria), 38,390 sq. m.; pop. 3,376,467. Capital, Sofia, pop. 47,000. Revenue, '99, £3,363,888; expenditure, £3,361,421; imports, '98, £2,509,210; exports, £2,661,480; public debt, '99, £8,281,960.—See DIPLOMATIC and FOREIGN ARMIES.

History, '99.—The *Sobranje* passed a measure authorising the Government to convert the entire public debt into a 5-per-cent. loan of the nominal amount of 290,000,000 fr. (Dec. 20th, '98). The Finance Minister, in his Budget statement (24th), estimated the revenue of the coming year at 84,090,000 fr., and the expenditure at 84,030,000 fr. He said the economic situation was improving, and the land under cultivation and the amount of agricultural produce increasing. The resignation of M. Stoiloff and his colleagues was announced (Jan. 28th), owing, it was said, to differences of opinion with the Prince as to railway and financial policy. M. Grekoff succeeded as Premier. Princess Marie Louise died (31st), after giving birth to a daughter the day before. The new Ministry announced in February that they would discontinue the policy of hostility to the Eastern Railways Company pursued by their predecessors, and drop some of the projects of railway and harbour works designed and in some cases initiated by them; but the lines from Sofia to Shumla, and from Rustchuk to Tirnovo, and the harbour works at Varna and Bourgas, would be gone on with. The elections in May resulted in a victory for the Ministry, whose supporters numbered 104 as against 53 Opposition candidates returned. The personal followers of M. Radoslavoff, however, were found to account for 74 of the 104 Ministerialists, the other 30 being Stamboloffists, and eventually M. Grekoff resigned. M. Ivantchoff, Minister of Public Instruction, and a follower of M. Radoslavoff, was thereupon instructed to form a new Ministry (Oct. 12th). This he succeeded in doing, M. Radoslavoff taking the important post of Minister of the Interior. In view of the financial situation Prince Ferdinand announced (Nov. 10th) that he would forego half of his Civil List for 1900, and the Government decided to make reductions in the salaries of civil, military, and ecclesiastical functionaries.

Buller, General Sir Redvers Henry, V.C., G.C.B., K.C.M.G., was b. 1839. Ensign '58. Served in the campaigns in China ('60), Ashanti ('73-4), South Africa ('78-9), when he commanded the Frontier Light Horse in the Zulu war and won his V.C., Egypt ('82-4), and Soudan ('84-5). Has received four medals with seven clasps, and five other decorations. All his regimental service has been in the 60th King's Royal Rifles. He has held twelve staff appointments, and was Quartermaster-General of the Army '87-90, and Adjutant-General of the Army '90-97. In '82 he married Audrey, daughter of the 4th Marquis Townshend, and widow of the Hon. G. T. Howard. He was under-Secretary for Ireland for a short time in '87. In '99, during the Transvaal troubles, he was appointed to the chief command of the British forces in South Africa. See CAPE COLONY, NATAL, and TRANSVAAL. Address, Downes, Crediton, Devon.

Bülow, Bernhard von, was born in 1850, and is a son of Herr von Bülow, who was Foreign Secretary of Germany, under Prince Bismarck, '73-9. He entered the German Foreign Office in '73, and acted as Secretary of Embassy in

Rome, St. Petersburg, and Vienna, holding the important post of *Chargé d'Affaires* to Greece during the Russo-Turkish war. At the conclusion of that war he was appointed one of the Secretaries of the Berlin Congress, and after more diplomatic service in Paris and St. Petersburg, he was appointed Minister to Roumania '88, and to Italy '93. During '97 he acted as Foreign Secretary for a time, while Baron von Marschall was on leave, and was at last definitely appointed to that office.

Bundesrath. See GERMANY and GERMAN POLITICAL PARTIES.

Burial Laws Amendment Act, '80. This is an Act to enable the burial of Nonconformists and others in Church of England burial-grounds without the service of the Church of England, and in some cases with other services. It was long opposed by churchmen on the ground that its advocates had no real grievances, but regarded it as a stepping-stone towards Disestablishment. It provides that any one responsible for the burial of a deceased person may give forty-eight hours' notice in writing, and in the form prescribed in the first schedule to the Act, to the incumbent of any place or his substitute, that it is intended to bury the deceased in the churchyard of such place without the rites of the Church of England, and that the incumbent or his substitute shall then be free to permit such burial. The burial shall take place in accordance with such notice, and the public are to have free access to such burial, which may be carried out either with the service of any Christian Church or without any service. But the proceedings are not to be made the occasion of bringing into contempt any church or denomination. Ministers of the Church of England are empowered to use the burial service of the Church of England at a burial in unconsecrated ground. In cases where that burial service is not allowed to be used, or when requested so to do by the person responsible for the burial of the deceased, they are empowered to use such service, consisting of prayers taken from the Book of Common Prayer and portions of Scripture, as may be approved of by the Ordinary. The Act extends to the Channel Islands, but not to Scotland or Ireland. An influential deputation of M.P.s, representing both Churchmen and Nonconformists, waited on the Home Secretary (Oct. 24th, '99) to urge upon the Government the introduction of a measure to give effect to the recommendations of the Select Committee on Burial Grounds, made in July '98. That Committee represented the Church of England and Nonconformists in nearly equal proportions, and came to the unanimous conclusion that it was desirable to consolidate, simplify, and amend the laws relating to burial, and made certain recommendations with that object, which met with a generally favourable reception. Amongst these recommendations the chief were as follows: The local authority should have power to apply for the consecration of part of a cemetery, or, if they would not apply, a reasonable number of parishioners might apply, and then the Local Government Board should intervene to apply for consecration. But consecration should not prevent the performance in consecrated ground of Christian and orderly services other than that of the Church of England. In unconsecrated ground he system of allotments to particular religious

bodies under the Burial Acts should be continued. Chapels erected in cemeteries at the cost of the ratepayers should be unconsecrated and open to all, but religious bodies should be able to erect their own chapels at their own cost. All ecclesiastical fees other than fees for services rendered should be abolished in cemeteries hereafter provided by local authorities, but the existing fees in existing cemeteries should be continued until the next vacancy, or for 15 years, whichever period should be the longer, with facilities for commutation by local agreement. The scale of fees should be fixed by the local authority. The 48 hours' notice to incumbents required by the Burial Laws (Amendment) Act '80 should be abolished, the local authority deciding what notice should be given in respect both to consecrated and unconsecrated ground. Further provision should be made for the compulsory acquisition, when necessary, of land for parochial cemeteries. The Home Secretary, in reply, admitted the desirability of improving, amending, and simplifying the Burial Laws. He did not think it was possible to amend and to consolidate the law in one and the same Bill. The most important thing was to try and amend the present law, hoping and trusting that a subsequent occasion might be found for consolidation; and he would promise to have a Bill following the lines of the report of the Committee ready at the commencement of the 1900 Session, and to use his best efforts to induce his colleagues to include it in their programme.

Burma comprises a vast tract of country in southern Asia, bounded on the north and west by the mountainous ranges of Thibet, Assam, and Manipur, on the east by Chinese territory, and partly on the south-east by Siam. An agreement between Great Britain and France in Jan. '96 made the Mekong the boundary between the Shan States and Indo-China. There are three great tribal families in the country, the chief of which is the Mran-má (from which the word Burma is derived); and while distinct from the Aryans in India and the Chinese on the other side, the natives to some extent partake of the peculiarities of both. The country politically is regarded and governed as part of the Indian Empire, a Lieut.-Governor being appointed by the Viceroy, with a Legislative Council of five official and four non-official members, all nominated. The country is fertile, especially in the valley of the great river Irrawaddy. Gold, amber, and jade are found, and ruby mines exist in North Burma. Buddhism is the prevailing religion; it is of a peculiar type, which allows perfect tolerance to all other creeds, but prevents proselytism. **Upper Burma** was annexed by proclamation on Jan. 1st, '86. The system of district administration is now perfected, passing upwards from the township, through the subdivisions to the district and the commissionership. The Chins or Kachins are inhabitants of the outlying highlands of the Bhamo and Katha districts of Upper Burma. The Shan States lie between Burma and Indo-China. With regard to railways, at the beginning of '98 it was stated that 261 miles were either in progress or sanctioned for construction, and 887 open for traffic. The first passenger train on the Mandalay-Kunlon line ran from Maymyo to Mandalay on July 1st, '99. See CHINA (map). **Area**, including both Upper and Lower Burma,

171,430 sq. m.; pop. 7,605,560.—**History.** '99. The delimitation of the Chinese frontier to the Salween was completed in February, with the result that the frontier line from the river Nam-yang runs due east. Great indignation was caused during the year by an outrage upon a Burmese woman at Rangoon committed by British soldiers. The officers of the regiment showed much apathy and indifference, and the civil authorities were almost as bad. An order of the Governor-General in Council was published (Oct. 20th) reprobating the conduct of the guilty parties and of the officers, and it was announced that disciplinary measures would be taken, and the regiment moved to another station.

Burnand, F. C., the editor of *Punch*, was b. Nov. 1836. Educated at Eton and Trin. Coll., Cambridge. Called to the bar '58, and practised for two years, then took to dramatic work, principally devoting himself to burlesque, of which "Ixion" and "Black-eyed Susan" may be said to have inaugurated the era of "long runs." Wrote several musical pieces for the German Reed Entertainment. Wrote "Contrabandista," "Cox and Box," and "The Chieftain" ('94) comic operas, music by

Arthur Sullivan. Among his travesties, "The Ride to Khiva," "One and Three," "Chikkin Hazard," "Gone Wrong," "Across the Dark Continent," and "Strapmore," went through a considerable number of editions. Among plays, of which he has written about a hundred, "The Turn of the Tide" and "Our Club" enjoyed great popularity. Author of "Happy Thoughts" in *Punch*. Became, after some years' connection with *Punch*, its editor ('80). Later productions include "Very much Abroad," "Quite at Home," "Rather at Sea," which form part of the "Happy Thought Series," and the "Zigzag Guide to Kent Coast," illustrated by Phil May.

Burns, John, M.P. See under COMMONS.

Butt, Clara, was b. in Sussex in 1872. After studying at Bristol she gained a Royal College of Music scholarship, and in '92 appeared for the first time in London at the Albert Hall in the "Golden Legend," and directly afterwards at the Lyceum in the opera "Orfeo." Her success was at once assured, and she became in great demand as a singer. She has taken part in the two last Handel Festivals.

Caicos Islands. Southern islands of the Bahama group. With Turk's Island are under government of Jamaica. Salt raking, sponge fishing, and the cultivation of sisal grass for hemp, are the chief industries.

Caine, Thomas Henry Hall, the eminent novelist and dramatist, was born of Manx parentage in 1853, and commenced his career as an architect in Liverpool. From contributing to both the *Builder* and the *Building News* he became connected with journalism, joined the staff of the *Liverpool Mercury*, and wrote in the *Academy* and the *Athenaeum*. Resided with Dante Rossetti in London till the poet's death in '82. Published "Sonnets of Three Centuries" ('82), and also "Recollections of Rossetti," while in '83 "Cobwebs of Criticism" appeared. During the last fifteen years his skill as a novelist has been exemplified in "The Shadow of a Crime" ('85), "A Son of Hagar" ('86), "The Deemster" ('87), which was dramatised under the title of "Ben-my-Chree" ('87), "The Bondman" ('90), "The Scapegoat" ('91), and "The Manxman" ('94), a dramatic version of which was also performed by Mr. Wilson Barrett. The last-mentioned work began the era of the one-volume novel. "The Christian" was published on Aug. 9th, '97, and nearly a hundred thousand copies were sold in England, and as many more in the United States, within the first year after publication. Mr. Hall Caine has travelled in Iceland ('90), in Russia ('92) on behalf of the persecuted Jews; and in '95 visited the States and Canada, where he represented the Society of Authors, and obtained important concessions from the

Canadian Parliament as to the Canadian Copyright demands. In '98 he visited the United States again in order to produce a dramatic version of "The Christian." In Oct. '99 it was also produced in England, first at Liverpool and afterwards in London. Address: Greeba Castle, Isle of Man.

Calcutta, Bishop of. See WELLDON, REV. J. E. C.

Cambodia. A province of Indo-China, and a French protectorate since '63. Capital, Pnompenh, on the Mekong. The reigning sovereign is King Norodom, but there is a French Resident at Pnompenh, and each of the subordinate provinces is under the political and administrative control of a French Resident. The chief products of the country are rice, cotton, tobacco, and fish. Area, 46,000 sq. m.; pop. about 2,000,000. See COLONIES, ETC., OF EUROPEAN POWERS AND INDO-CHINA.

Cambon, M. Pierre Paul, the French Ambassador in London, was born in 1843, and was trained as a barrister in early life, and then for some years was engaged in Departmental administrative work, being appointed Prefet du Nord in '77. He went as Minister to Tunis in '82, and there made his mark. In '86 he was appointed Ambassador to Spain, and was transferred to Constantinople in '91. Here he proved himself a very strong man, so strong that it is said the Sultan cordially hated him, and in '98 he succeeded the Baron de Courcel at the French Embassy at Albert Gate, S.W.

Cambridge, H.R.H. George William Frederick Charles, 2nd Duke of, K.G., P.C., K.P., G.C.M.G., G.C.H., G.C.B., G.C.S.I., (creat. 1801), grandson to George III. and first cousin to the Queen, was b. at Hanover March 26th, 1819. He became a colonel in the British army in '37, and succeeded his

father Adolphus Frederick, 1st Duke of Cambridge, in '50. Four years later ('54) he was raised to the rank of major-general, on his appointment to command the two brigades of Highlanders and Guards united to form the first division of the army sent against the Czar Nicholas of Russia in the Crimean war of '54-6. In '56 he was promoted to the rank of General; in '61 appointed Colonel-in-chief of the Royal Artillery and Royal Engineers; and in '62 raised to the rank of Field Marshal. He was subsequently appointed Commander-in-chief of the British army, and the appointment perpetuated by letters patent '87. It came to an end, however, with the scheme of Army Reform evolved during '95, and the Duke retired in the autumn. He is Ranger of Hyde Park and Richmond Park. See ROYAL FAMILY, ANNUITIES TO.

Cambridge University. About the middle of the thirteenth century students began to collect in hostels. The endowed colleges gradually absorbed the hostels, the last of which was annexed to Trinity in 1540. The legislative bodies are the Senate, which consists of graduates, and the Council, a smaller body elected therefrom. Like Oxford, the University underwent important changes in 1882, as did also many of the colleges in both universities. The following is the list of colleges: (*Founded 1257*), *Peterhouse—Head*, J. Porter, D.D.—*Undergraduates*, 61; (1326), *Clare*, E. Atkinson, D.D., 181; (1347), *Pembroke*, C. E. Searle, D.D., 203; (1348), *Gonville and Caius*, N. M. Ferrers, D.D., 193; (1350), *Trinity Hall*, H. Latham, M.A., 206; (1352), *Corpus Christi*, E. H. Perowne, D.D., 69; (1441), *King's*, A. A. Leigh, M.A., 140; (1448), *Queens'*, H. E. Ryle, D.D., 99; (1473), *St. Catherine's*, C. K. Robinson, D.D., 72; (1496), *Jesus*, H. A. Morgan, D.D., 116; (1505), *Christ's*, John Peile, Litt.D., 157; (1511), *St. John's*, C. Taylor, D.D., 255; (1519), *Magdalene*, Hon. L. Neville, M.A., 58; (1546), *Trinity*, H. M. Butler, D.D., 693; (1548), *Emmanuel*, W. Chawner, M.A., 178; (1595), *Sidney Sussex*, Charles Smith, M.A., 69; (1800), *Downing*, Alex. Hill, M.A., M.D., 54. *Hostels* (1882), *Selwyn*, A. F. Kirkpatrick, D.D., 99; (1884), *Non-Collegiates*, 113. Total, 3016. The examinations necessary for the degree of Bachelor are the Previous ("Little Go"), General, and Special examinations. Candidates for Honours have to pass an additional examination in Mathematics, French or German with their Previous. The *Triposes*, which for Honour candidates take the place of the General and Special, are Classical, Mathematical, History, Law, Theology, Moral Science, Natural Science, Oriental Languages, and Mediæval and Modern Languages. A Mechanical Sciences Tripos was established in '92. Women are admitted to the examinations for honour students, and reside mostly in Newnham College and Girton College. (See article WOMEN, HIGHER EDUCATION OF.) Vigorous efforts have been made to secure the advantages of degrees for women by resident and non-resident members of the University, but hitherto without success. Students of not less than two years' standing at an affiliated college, on being admitted members of the University, may, under certain conditions, be deemed to have already kept three of the terms required for any degree; it is the same with adult students under a committee working in concert with the University in places where there is no affiliated college. **Affiliated colleges** are: University

College, Nottingham; St. David's, Lampeter; Firth, Sheffield; University College of Wales, Aberystwith; and the Universities of New Zealand, Adelaide, Calcutta, and Cape of Good Hope; University of Allahabad; Punjab University; University of Bombay; University of Toronto; St. Edmund's College, Old Hall, Ware; University of Madras. **Affiliated centres**: Hull, Derby, Scarborough, Newcastle-upon-Tyne, Sunderland, Norwich, Exeter, Plymouth, Stonehouse and Devonport. The theological college of the Presbyterian Church of England was in '99 transferred to Cambridge and renamed Westminster College, though it has no official connection with the University. Many public schools are inspected by the University, and thousands of scholars in the Grammar and High Schools of the country compete in the Cambridge Local Examinations, while those who attend the University local lectures are also to be numbered by thousands. (See also UNIVERSITY EXTENSION.) The undergraduates have a most able organ, called the *Granta*, edited by Mr. R. C. Lehmann. **Degrees**: D.D., B.D., Sc.D., Litt.D., M.A., B.A., M.D., M.B., M.Ch., LL.D., LL.M., LL.B., Mus.D., Mus.M., Mus.B. Chancellor, His Grace the Duke of Devonshire, K.G., LL.D. Vice-Chancellor, A. Hill, M.D. (Downing); High Steward, Lord Walsingham. **Parliamentary representatives**, Prof. R. C. Jebb, Litt.D. (*q.v.*), and Sir J. E. Gorst, M.A. **Proctors**, '99-1900: W. W. Buckland, M.A. (Caius), G. B. Shirres, M.A. (Trinity Hall). **Registrary**, John Willis Clark, M.A. Consult *Camb. Univ. Calendar*.

Cameroons. A territory on the Bight of Biafra, West Africa, annexed by Germany in 1884. Its coast line extends for about 200 miles along the Bight. An agreement was concluded in April '93 settling the boundary between the territory and the Niger Coast Protectorate. In November of the same year an agreement was signed at Berlin fixing the boundary line between the Cameroons and the Niger Territories. This agreement gave Germany the command of the Benue and access to Lake Chad. The boundary between the French and German sphere was settled by an agreement made in Feb. '94. Starting from the point where the southern boundary of the Cameroons meets 15° E. long., the frontier runs in a N.E. direction to a point about 30 miles E. of Yola, and thence on to Lake Chad. Cacao and tobacco are grown, and a flourishing trade is carried on in ivory and palm-oil. Cocoa is becoming a considerable export. The area is 191,130 sq. miles, and the population 4,570,000. The exports for the year '96 amounted to £266,566, and the imports to £277,184. See COLONIES, ETC., OF EUROPEAN POWERS, and NIGERIA (map).

CANADA, DOMINION OF.

The Dominion of Canada consists of the upper portion of the North American continent except Labrador, which belongs to Newfoundland, and Alaska, which belongs to the United States, and is 3,653,946 sq. miles in extent. In 1867 the provinces of Ontario, Quebec, Nova Scotia, and New Brunswick united under one federal government; in '70 Manitoba and North-West Territories were added, the latter by purchase in '69 from Hudson Bay Company; British Columbia joined in '71, and Prince Edward Island in '73. In '80 an Order in Council was issued, annexing to the Dominion such British

possessions in North America, other than Newfoundland, as were not previously in the Dominion. The districts of Assiniboia, Saskatchewan, Alberta, and Athabasca were created by Minute of Council in '82, and by Orders in Council, '95 and '97; the remaining territory was subdivided into the districts of Ungava, Franklin, Mackenzie, and Yukon, the last-named being made a separate territory in '98. Newfoundland remains independent. Federal capital, **Ottawa**, Ontario, pop. 55,000; chief cities, Montreal, 250,000; Toronto, 195,987; Quebec, 75,000; Halifax, 45,000; St. John, 42,500; Winnipeg, 38,733. The population in '99 amounted to about 5,350,000. The French number 1,415,090, or 29.4 per cent. The Indians number about 100,000. Canada is the largest of all the British possessions, embracing nearly one-half the whole empire. The climate varies, being in the east cold but clear in winter, warm in summer; while the climate of British Columbia resembles that of England. The winter is dry, healthy, and invigorating. The mineral deposits are practically inexhaustible, particularly coal, iron, copper, and gold. The recent discoveries of gold in British Columbia are referred to in the article under that heading. During '97 extraordinarily rich finds of gold were made on the banks of the Klondike river, in the extreme N.W. of the Dominion. The scene of these finds lies actually in the North West Territories (*q.v.*), near where the British section of the Cordillera belt of mountains touches the international boundary between Alaska and Canada, and about 53 miles S.E. of the junction of Forty Mile Creek with the river Yukon. The mineral output of '98 included gold, £2,740,000; silver, £516,660; copper, £431,920; coal, £1,645,600 (4,172,655 tons), making, with other smaller mineral products, a total of £7,551,440. The fisheries on both the Atlantic and Pacific coasts are extremely valuable, and the timber supply is very rich. Agriculture is successfully carried on in all parts, and in Manitoba and the territories the wheat-growing as well as general farming capabilities are immeasurable. Ranching has in late years also proved profitable. **Government.** The federal parliament is modelled after that of the United Kingdom, with a Senate of 81 members nominated for life, 24 from Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Manitoba, 3 from British Columbia, 4 from Prince Edward Island, and 2 from the Territories. The House of Commons consists of 213 members elected quinquennially on a low suffrage, 92 coming from Ontario, 65 from Quebec, 20 from Nova Scotia, 14 from New Brunswick, 6 from British Columbia, 5 from Prince Edward Island, 7 from Manitoba, and 4 from the North-West Territories. The number of members sent by the provinces is in proportion to the population, and a readjustment takes place every ten years after each census. The senators are paid \$1000 per annum, and the members \$10 a day during the session, with a maximum of \$1000. The Governor-General, representing the Queen, receives £10,000 yearly, and is assisted by a Privy Council chosen by himself. In each of the provinces a Lieut.-Governor, appointed by the Governor-General in Council, represents the executive authority. In Quebec and Nova Scotia the legislature consists of **two Houses**, with a responsible Ministry. In New Brun-

wick, Ontario, Manitoba, British Columbia, Prince Edward Island, and the North-West Territories there is only one Chamber, the Legislative Assembly, and a responsible Ministry. The limits of federal and provincial jurisdiction are regulated by the British North America Act, which passed the Imperial Parliament in '67, and is the constitution of the Dominion. The Dominion Parliament has exclusive legislative power in all matters except those specifically delegated to the provincial legislatures. Local self-government has been extensively developed in all the provinces. There is no State church, but the Roman Catholic Church in the province of Quebec has secured to it the privileges enjoyed by it previous to British rule, of collecting tithes, etc. The estimated strength of the chief religious bodies is: Roman Catholics, 1,992,017; Methodists, 847,765; Presbyterians, 755,326; Church of England, 644,059; Baptists, 303,839. Elementary education is free, and is liberally supported by the provincial Governments, the schools in British Columbia and the N.W. Territories being wholly supported by Government. There are altogether 17,272 public schools of all grades, with 20,832 teachers and 1,017,088 pupils. Besides these there are many private schools, and each province has one or more universities. The Governor-General appoints the judges of the Superior Courts, and county courts in the provinces, and over all is the Supreme Court at Ottawa, with appellate civil and criminal jurisdiction throughout the Dominion. The military establishment consists of (1) an Imperial military and naval garrison at Halifax, and a naval station at Esquimaux, on the Pacific, altogether comprising about 2000 troops; (2) a militia force—the active division, in which the term of service is three years, and which numbers about 35,000 men, and the reserve, consisting of all between the ages of 18 and 60 who do not serve in the active force. The Imperial Government takes charge of the naval defence of the country. There were in '97 sixty-five main lines working in the Dominion of Canada, with a total mileage of 16,687. The two principal systems are, of course, those of the Canadian Pacific and Grand Trunk of Canada Railways. **Revenue**, '98-9, £9,359,275; **expenditure**, £8,352,070; **exports**, '98-9, £33,565,185; **imports**, £33,099,145; **net debt**, £53,200,000. **Public works** cost £36,343,596. For Ministry see **DIPLOMATIC**; see also **BRITISH EMPIRE** (table). **Political Parties.**—The two chief political parties in Canada are known by the time-honoured names of Conservative and Liberal. From the date of confederation, in 1867, the Liberals were only in power once till their signal victory in '96. The late Sir John Macdonald, the leader of the Conservative party, held office from '67 to '91, with the exception of five years, when a Liberal administrator under Mr. Mackenzie was in power. When Sir John Macdonald died he was succeeded by Sir John Thompson; and Sir Mackenzie Bowell followed him on his death, Dec. 12th, '95. The Manitoba Schools question and other questions shook the Government's position during '95 and '96, and after some internal dissensions Sir Charles Tupper became Premier on the eve of the dissolution of Parliament in April '96. At the General Election which followed there were the following parties

in the field—the **Conservatives**, led by Sir Charles Tupper, advocating protection and preferential trade, if possible, with Great Britain and the Colonies, new steam and cable services, and the strengthening of the defences of the Dominion; the **Liberals**, led by Sir Wilfrid Laurier (*q.v.*), advocating fiscal reform in the direction of free trade, modified only by revenue requirements, the extension of the franchise, the enlargement of the trade of Canada, and a policy of non-interference with provincial politics; the **McCarthyites**, seceders from the Conservative party; and the **Patrons of Industry**, forming practically the Labour party. In the electoral fight all the Catholic influence was thrown on the side of the Conservatives, chiefly because of the Manitoba schools issue; but this intervention probably did more harm than good, for in Quebec, where it might possibly have been expected to have effect if anywhere, the Liberals triumphed signally. There were finally elected 118 **Liberals**, 86 **Conservatives**, and 8 **Independents**, the latter being on the whole supporters of the Liberals.

History. '99.—The postage on letters for all parts of Canada and the States was reduced (Jan. 1st) from 3 to 2 cents per ounce, the estimated annual loss being about \$800,000. Great disappointment was manifested throughout the Dominion in April, when it became known that the Imperial Government had modified its attitude on the Pacific Cable question, proposing an annual contribution to the cost of working it instead of sharing the cost of construction and maintenance with Canada and Australia, as was originally agreed. In his Budget statement the Finance Minister estimated the revenue for the current year at \$46,632,398, and the expenditure at \$42,026,028 (May 2nd). A Redistribution Bill was introduced by the Government, with the object of giving additional members to those provinces in which there had been a sufficient increase of population, and of dealing with the boundaries of federal constituencies, which it was said had been unfairly manipulated in their own favour by previous Conservative Governments. The Senate, however, threw out the Bill on the ground that the Constitution only contemplated redistribution measures after each decennial census (July 20). The House of Commons unanimously passed the Government resolution providing for Canada's contribution of five-eighths of the cost of the Pacific Cable (25th). See separate article on **PACIFIC CABLE SCHEME**. Statistics showing the effect of the preferential tariff rates on British trade were published in October. The exports of British and Irish produce to Canada from August 1st, '98, to July 31st, '99, were £6,178,684; in the same period of '97-8 they were £5,707,106, in '96-7, £5,033,138. Thus the exports showed an increase of over 8 per cent. for '99 over '98, and of 22 per cent. for '99 over '97. At a Cabinet meeting (12th) it was decided to send a force of 1000 men to aid the Imperial Government in the South African war. The troops left Quebec (30th) amidst the utmost enthusiasm, Lord Minto and Sir Wilfrid Laurier delivering stirring farewell addresses. When the news of the reverse at Nicholson's Nek, near Ladysmith, was received, a second contingent was offered to the Imperial authorities, who, however, intimated that the circumstances did not necessitate further aid (Nov. 8th). Throughout the year discussions went on in the press, and many

references were made in the Dominion Parliament, as to the Anglo-American Commission, and the differences which had arisen between Canada, the United States, and Great Britain as to the Alaskan boundary and other matters referred to the Commission. The matter is fully discussed, including the Canadian contentions on the points in dispute, in the separate articles on **ALASKA** and **ANGLO-AMERICAN COMMISSION**.

Canals. See eds. '95 and '96 for an article giving particulars as to the mileage, traffic and revenue of the canals in the United Kingdom, and as to the canals of France and Germany. See also **ENGINEERING**.

Canary Islands. Off N.W. African coast. Belong to Spain, and are ruled as an integral province of the kingdom. Bananas, potatoes, and tomatoes are the most valuable products. The population of Teneriffe is 95,000, of Grand Canary 75,000, and of Palma 32,000. See **COLONIES, ETC., OF EUROPEAN POWERS**.

Canon Law. See previous eds.

Canons. See **CHURCH OF ENGLAND**.

Canterbury, Archbishop of. See under **PEERAGE**.

Cape Breton Island. A portion of Nova Scotia (*q.v.*). See **BRITISH EMPIRE** (table).

CAPE COLONY.

Cape Colony occupies the extreme southern portion of Africa. Its boundaries are: west, the Atlantic Ocean; north, the Orange river and the Bechuanaland Protectorate; east, the Orange Free State, Basutoland, and Natal; south, the Indian Ocean. The area of the colony is 292,000 sq. m., and the pop. 2,044,000. Whites number about 400,000, about 240,000 being of Dutch, and 160,000 of British origin. Capital, **Cape Town**, pop. 83,898; other chief towns, Port Elizabeth, pop. 23,266, the chief commercial port; Grahamstown, pop. 10,498, the capital of the eastern province; Kimberley, pop. 28,718, the seat of the diamond trade; Queenstown, King Williamstown, and Panmure, or East London. Simon's Bay is an Imperial naval station 22 miles south of Cape Town. The **Transkeian Territories** and **Walfisch Bay** have some separate provincial status. The Transkeian Territories are ruled by resident magistrates under the direct control of the Government of the colony; and Walfisch Bay, an isolated port on the coast of Damaraland, is also administered by a resident magistrate. **Pondoland**, which up till then had been a protectorate, became an integral portion of the colony in March '94, and the Crown colony of Bechuanaland in '95. **Executive** in the hands of a Governor and responsible Ministry of five principal ministers. The Parliament consists of a Legislative Council of 23 members, and a House of Assembly of 79 members, increased in '99 to 95 members. Members of the Legislative Council are elected for seven years, and of the Assembly for five years. The members of both Houses are paid. The electors are the same in each case, and are qualified as occupiers of property worth £75, or receiving a salary equivalent to £50. The laws are founded on a modification of the Roman-Dutch Law. Both English and Dutch languages are used in Parliament and the Courts. The colony possesses a complete system of local self-government, elective councils

maintaining the roads in all the divisions. There are also municipal councils and village management boards. The status of certain of the natives as to land tenure is regulated by the Glen Grey Act, passed in Aug. '94. By it certain districts are set apart for the natives by proclamation, and divided into allotments of about eight acres per head for each family at a quit-rent of 15s. yearly. The titles to these allotments are inalienable and non-transferable, except with the consent of the authorities; but on death they pass according to native usage. A labour-tax of 10s. a year is imposed on every able-bodied male in the settlement, unless he can show that he has been at work for three months in the year. The sale of liquor is prohibited under severe penalties. Existing electoral rights are maintained under certain conditions, and district councils, with extensive powers of local self-government, exist in each proclaimed district. The natives elect half the members on the district council, the other half being nominated by the governor. All the natives are gradually being placed under the operation of the Act. There is a University at Cape Town (Royal Charter 1877), and there are more than 2500 State-aided elementary schools, besides private and religious institutions; but education is not compulsory. The principal denominations are Dutch Reformed, Episcopalian, Independent, Presbyterian, Wesleyan, and Roman Catholic, which receive from the Government small annual appropriations "for religious worship." For defence, besides the Imperial troops, who in '99 numbered 545 officers and 8240 non-commissioned officers and men, there is a force of Cape Mounted Rifles, numbering 1015 officers and men; the Cape Police, numbering about 2000; Volunteers, 7007; and every able-bodied man between 18 and 50 is liable to be called out for military service. The colony possesses 2250 miles of Government railway open, and extensions are being laid into Matabeleland and elsewhere. Government lands are granted, leased, or may be rented on easy terms. The chief minerals worked in the colony are copper, coal, and gold. The chief diamond fields are in Griqualand West. The principal exports are gold, diamonds, wool, Angora hair, ostrich feathers, hides and skins, copper ore, and aloes. Revenue, '98, £6,321,560; expenditure, £6,817,000. Imports, '98, £17,248,134; exports, £26,991,648. Public debt, '99, £28,377,921. See BRITISH EMPIRE (table), and for Ministry, etc., see DIPLOMACY.

Political Parties.—For some years previous to the Jameson Raid and the fall of Mr. Rhodes there were three political parties at the Cape, the regular Ministry, the Opposition, and the Afrikaner Bond, under Mr. Hofmeyr. It was through the support rendered to him by the Bond that Mr. Rhodes was enabled to carry out his great schemes for opening up Rhodesia and British Central Africa. All this was changed, however, by the Raid. When Mr. Rhodes resigned office in Dec. '95 he was succeeded by Sir Gordon Sprigg, who still could count upon the support of some of the more moderate members of the Bond. Other parties, however, speedily formed themselves, for the furtherance of ultra-British or ultra-Dutch views, and eventually the members of Parliament were grouped somewhat as follows: the Government party, including several progressive Dutch members; the Opposition, consisting largely of

the Afrikaner Bond members with pronounced Dutch sympathies; and a third party of Independents, under Mr. Rose-Innes, insisting, nevertheless, upon the supremacy of Great Britain in South Africa. The election for the Legislative Council in March '98 was won by the Progressive party, led and inspired by Mr. Rhodes, on a policy of free food products, compulsory education, railway development, and restricted sale of liquor to natives, as to internal affairs; coupled with the larger policy of the federation of the Cape, Natal and Charterland under the British flag. Many Dutch voters must have cast in their lot with the Progressives in order to give the majority. The elections for the Assembly, later in the year, were very closely fought, the main struggle being between the Bond and the supporters of Mr. Rhodes, or the Progressives, as they termed themselves. Ultimately there were elected 40 Bond candidates and 39 Progressives, though a large majority of the votes were cast for the Progressives. The Independent party, led by Mr. Rose-Innes, practically disappeared. Sir Gordon Sprigg thereupon resigned, and Mr. Schreiner, with the support of the Bond, formed a Ministry, which was strengthened by the elections rendered necessary for the new seats created by the Redistribution Act, though in the actual votes cast the Progressives claimed a decided majority. Mr. Schreiner has publicly declared himself to be "a true Imperialist," and the desire of himself and the Bond leaders to keep the Colony loyal was conclusively demonstrated during the Transvaal war.

History, '99.—The House of Assembly passed the third reading of the Redistribution Bill (Nov. 28th, '98), which was finally approved by both Houses (Dec. 7th). Sixteen new seats were then created; and the elections for these and other seats vacant at the time took place early in '99. The result was a victory for the Afrikaner party, who held a majority over both the Progressives and the Independents of 8, and over the Progressives alone of 13. The situation in the Transvaal at this time absorbed public attention, and great disappointment was felt in Cape Town that the Conference arranged by President Steyn's invitation between the High Commissioner and President Kruger at Bloemfontein had failed to produce an agreement on the Outlander Franchise question; but Sir Alfred Milner had a splendid reception on his return to Cape Town (June 7th). Steps were taken during this month and subsequently to organise the military forces in the Colony and in South Africa, so as to ensure the security of the frontier. Party feeling in the Colony ran high, the Afrikaner leaders naturally sympathising with the Boers; but also using their endeavours to persuade President Kruger to grant reforms in the Transvaal Franchise laws. The Premier, Mr. Schreiner, in a newspaper interview, expressed his opinion that the modified proposals (see TRANSVAAL) made by the Boer Government (July 7th) were adequate, and should secure a peaceful settlement. The Afrikaner Bond, when the proposals had been modified and improved, largely through the influence of Mr. Hofmeyr, passed resolutions expressing joy and satisfaction at the reasonable and liberal conditions conceded (22nd). The Progressive party, on the other hand, almost

unanimously expressed their approval of the terms laid down by the High Commissioner at the Bloemfontein Conference. The Treasurer in his Budget speech estimated the revenue for the current year at £6,544,000, and the expenditure at £6,878,000 (Aug. 1st). Major-Gen. Sir W. E. Butler, commanding the British troops at the Cape, was recalled (16th), and replaced by Lieut.-Gen. Sir F. W. E. F. Forester-Walker. A proclamation was issued by the High Commissioner imposing heavy penalties on any person inciting the Basutos to rebellion (Sept. 15th). On the 19th Sir Alfred Milner sent a dispatch to the President of the Orange Free State informing him that to protect the line of communication with the north, a British force would be stationed near the Free State borders; but this movement was in no way directed against the Free State. He added that the Imperial Government hoped for a friendly settlement of the differences with the Transvaal; but if this hope should be disappointed, looked to the Free State to preserve strict neutrality, and to prevent armed intervention by any of its citizens, and in that case were prepared to give formal assurances that the integrity of the Free State territory would be strictly respected under all circumstances. President Steyn replied that he regretted the sending of troops northwards, and that it might be considered by his burghers as a menace, but he would do all in his power to allay excitement. In a speech to the Raad (21st) the President said the Free State were bound to help the Transvaal in trouble. Replying to a petition to the Queen signed by 58 Members of Parliament, and asking for the appointment of the Joint Commission of inquiry accepted by the Transvaal, Mr. Chamberlain said that the Imperial Government could not adopt such a suggestion, for the reasons stated in the Note presented to the Transvaal on Sept. 12th (see TRANSVAAL). The Government's own proposals for a final settlement would be shortly communicated to the Transvaal. One of the main objects of the Imperial Government's policy was to secure to the non-Dutch inhabitants of the Transvaal similar rights and privileges to those enjoyed by the Dutch in the Cape Colony. The thousands of refugees who arrived in Cape Town from the Rand during September and October severely taxed the available accommodation. The Town Council voted £1000 for their relief. Mr. Rhodes gave £500, and a Citizens' Relief Fund was opened. Rand relief committees in Cape Town and elsewhere had previously done much to meet the difficulty, the Rand Committee of Johannesburg having disbursed £20,000 according to a report issued Oct. 10th. In compliance with suggestions made by Sir Alfred Milner and supported by Mr. Chamberlain, the Lord Mayor of London opened a Mansion House Fund for the relief of the refugees, which by Nov. 14th amounted to £164,000. News of the Boer ultimatum reached Cape Town (10th), and the High Commissioner issued a proclamation warning all persons that to abet the enemy during a state of war with Great Britain would be high treason. Mr. Schreiner also sent a circular to the field-cornets throughout the Colony urging them to soothe the race feeling, to refrain from rash action, and to show themselves loyal to the Queen. In closing the session of Parliament he said the duty of all was to save the Colony as far as possible from being involved in the vortex

of war. When hostilities were begun by the Transvaal and the Orange Free State, all available troops were sent to De Aar, the most important junction of the Cape railway system; and Kimberley, in which Mr. Rhodes placed himself, was fully prepared against attack. At Mafeking Colonel Baden Powell commanded a strong and efficient force; but Vryburg, about midway between Kimberley and Mafeking, was regarded as being weak, and was soon afterwards taken by the Boers, who were welcomed by the Dutch inhabitants. An armoured train from Mafeking with two guns was ambushed and captured by the Boers (12th), the line was broken up, the telegraph wires were cut, and very quickly both Mafeking and Kimberley were isolated so far as railway and telegraph communication was concerned. All the Volunteer regiments in the colony were called out for service (15th). A proclamation declaring British Bechuanaland and Griqualand West part of the Transvaal was issued by the Boers (18th); and the Orange Free State also proclaimed an annexation of territory, including the Kimberley district. A successful sortie was made from Kimberley (24th), and the Boer commander, Commandant Botha, was killed. Gen. Sir Redvers Buller arrived at Cape Town (31st), and was greeted with great enthusiasm. Early in November the bridges over the Orange River were seized by the Boers, and an advance into the Colony was begun, with the result that the British troops evacuated Stormberg and Naauwpoort, concentrating on Queenstown and De Aar. By the 13th transports carrying 674 officers and 13,362 non-commissioned officers and men of all arms had arrived at the Cape. Kimberley and Mafeking held out stoutly, and the Boers had by no means improved their position so far as the Colony was concerned.

Cape Verde Islands. Lie 350 miles from Cape Verde, the westernmost point of Africa. Belong to Portugal. Capital, **Praia**. Coaling station, St. Vincent. Area, 1650 sq. m.; pop. 120,000. Imports about £60,000; exports about £50,000. Chief products coffee, tamarinds and millet. The people are Portuguese and Negro. See also COLONIES, ETC., OF EUROPEAN POWERS.

Carlisle, Bishop of. See under PEERAGE.

Carlos I., King of Portugal, is the son of King Louis I., and was born Sept. 28th, 1863. Prior to his accession to the throne he was known as the Duke of Braganza. In May '86 he married Marie Amélie, daughter of the Comte de Paris. He succeeded his father as King of Portugal in Oct. '80. During the financial difficulties of '92 the King and the royal family renounced 20 per cent. of the endowments paid them by the nation, a sacrifice of £23,000 a year. He visited England in Nov. '95.

Carnegie, Andrew, was b. at Dunfermline, Scotland, Nov. 25th, 1837, and went with his family to the United States in '48. Beginning life without the usual school education, and after working in various humble positions, as a telegraph messenger for instance, he got a footing in the railway world and became superintendent of telegraphs for the Pennsylvania Railroad Company. The foundation of his great fortune was laid, however, when he took a leading share in the establishment of iron works at Pittsburg, which eventually developed into the vast concern known as the Carnegie Steel Company, located at the Homestead Works. It is estimated that at the

present time these works are capable of producing 3,000,000 tons of steel a year. In an article in the *Times* (May 13th, '99) it was stated that the output of steel for the year by the Carnegie Steel Company would be nearly twice that of the whole United Kingdom by the Bessemer process in '98, and considerably more than the total output of British open-hearth steel in the same year. In '99 Mr. Carnegie sold out all his interest in the Company, and realised a fortune estimated at £40,000,000. He has long been known as a philanthropist, and has given millions to build free libraries, art galleries, and various other educational and charitable institutions, notably in Pittsburg and Alleghany cities, though he has made many benefactions in the United Kingdom also.

Caroline Islands. This archipelago, or group of islands, in all numbering five hundred, lies between the Philippines and the Marshall Islands, in the Pacific Ocean, and to the north of German New Guinea. After the Spanish-American war, the Caroline, Pelew, and Marianne or Ladrone Islands (except Guam) were left under Spanish rule; but they were sold during '99 to Germany for 25,000,000 pesetas. The chief islands in the Caroline group are Yap, Ponape, and Kusai. Area, 560 sq. m.; pop. 36,000. The Pelew group, the most westerly of the groups, consist of 26 small islands, the largest of which is Babel-thuap. The pop. is about 10,000. The Ladrone are divided into two groups, the northern and southern. The former are volcanic and uninhabited, and the latter have a population of about 10,000. Area of Ladrone 420 sq. m. For administrative purposes there are three divisions: (1) the Eastern Carolines, capital Ponape; (2) the Western Carolines and the Pelew Islands, capital Yap; (3) the Ladrone, capital Saypan. The whole group was put under the Governor of German New Guinea. See COLONIES, ETC., OF EUROPEAN POWERS.

Cathedrals, English. See article on the CHURCH OF ENGLAND.

Cayenne. A French settlement in Guiana, South America. Pop. 13,000. See COLONIES, ETC., OF EUROPEAN POWERS and FRENCH GUIANA.

Celebes. A large island of the Asiatic archipelago. Area, 72,000 sq. m.; pop. about 2,000,000. Part of the island is an "Outpost" of Dutch India, containing the towns of Menado, Port Rotterdam, and Vlaardingen or Macassar. The remainder broken up into native states, which, however, recognise the authority of the Dutch. See DUTCH EAST INDIES.

Census of '91 (England and Wales, Ireland and Scotland). On April 6th, 1891, when the last enumeration was taken, the total population of the United Kingdom consisted of 37,732,922 persons, being an increase of 2,848,074 upon the enumerated population in '81. (In the middle of '99 the population was estimated at 40,559,954 persons.) The decennial rate of increase was 8·2 per cent., lower than in either of the two next preceding decennia, in which it had been 8·8 and 10·8 per cent. respectively. The population of England and Wales was returned as 29,002,525 (estimated at 31,742,588 in the middle of '99), being an increase of 3,028,086, equal to 11·65 per cent. on the number returned at the previous census of '81. Of the 29,002,525 enumerated, 14,052,901 were males, and 14,949,624

females. This excess of 886,723 females would be greatly reduced if the army, navy and merchant service abroad were not excluded from the enumeration. The number of males so serving is 196,541. The rate of increase in the population of England and Wales during the last decennium was not only less than in the previous one, but lower than in any previous decennial period since the first enumeration in this country in 1801. The population of London—i.e., the London of the Registrar-General, which, with the exception of the parish of Penge, coincides with the administrative county of London—was at the last enumeration 4,211,056, being an increase of 395,512, or 10·4 per cent. upon the population of '81. The population of Ireland at the time of the census was 4,704,750 (estimated at 4,535,516 in the middle of '99), including 2,318,953 males and 2,385,797 females. The decrease in the decade from '81 to '91 was 470,086 or 9·08 per cent., though the number of English in Ireland during that time had increased from 69,382 to 74,523, and of Scotch from 23,328 to 27,323. The returns for Scotland showed that the population on census day '91 was 4,025,647 (estimated at 4,281,850 in the middle of '99), including 1,942,717 males and 2,082,930 females. The total increase of the decade '81 to '91 was 260,074, or 7·77 per cent. The final report on the returns, analysing them in many different ways, was published as a Parliamentary paper in Jan. '04.

Central America. A federation of the Republics of Honduras, Nicaragua, and Salvador, which are described under their respective alphabetical headings, took place in '98. On June 28th, '95, by the treaty of Amapala, they had already united under the title of the Greater Republic of Central America. The union was confirmed by a new treaty signed at Managua on Aug. 27th, '98, by which the name was changed to the United States of Central America. But on Nov. 30th, '98, the federation was dissolved, each state resuming its sovereignty as an independent Republic.

Ceylon. An island almost joined to the southern extremity of India by a chain of reefs and sandbanks called Adam's Bridge. Its extreme length is 266 miles, and its width 140 miles. It is a British Crown colony. Area, 25,365 sq. m.; pop. 3,235,432. Divided into nine administrative provinces. Capital, Colombo, pop. about 127,000. Chief production for export was formerly coffee; now tea is the chief staple, and more attention is paid to cocoa, coconut, and other palms. Grain and rice are cultivated, with cinnamon, caoutchouc, etc. Railways extend over 266 miles. Crown lands are sold at an upset price of Rs. 10 per acre, but often realise much more. Bulk of population Cingalese, then Tamil coolies, Moormen (Arabs), Eurasians, and Malays. Europeans about 8000. An aboriginal nomadic race, the Veddahs, occupy the interior, but they only number about 2000. The Government is in the hands of a Governor nominated by the Crown, an Executive Council of 5, and a Legislative Council of 17 members, which is composed of the Executive Council, 4 other official members, and 8 non-official members. The basis of the law is Roman Dutch, but the criminal law has been remodelled from the Indian Penal Code. More than half of the population are Buddhists. The Hindus also are strong, and the Mohammedans and Christians about

equal one another. Education is unsectarian, and in the case of vernacular schools free.

Chagos Archipelago. A large scattered group of coral islands in the Indian Ocean, being a southward extension of the Maldive group, 1200 miles from Mauritius and 800 from Ceylon. A dependency of the former, which supplies a Resident Magistrate and police force. Chief of the group are the **Oil Islands**, of which **Diego Garcia** is the largest and most important.

Chairman of Committee of Ways and Means. A member of the House of Commons who is elected when the House goes into Committee of Ways and Means, or Supply, for the first time in a new parliament, and holds office until the dissolution of that parliament. He is nominated by the Government, but is regarded as an officer of the House. The salary of the office is £2500 a year. The Chairman of Ways and Means usually presides when the House is in committee, whether on financial business or on a bill, but he may request one of several temporary or deputy chairmen nominated by the Speaker at the commencement of each session to act for him. His place is not in the chair of the Speaker, but at the table where the Clerk, who retires with the Speaker, has sat. When the House is informed of the unavoidable absence of the Speaker, the Chairman of Ways and Means performs his duties, and exercises his authority in relation to all proceedings of the House as Deputy Speaker until the next meeting of the House, and so on from day to day on the like information being given to the House. He may also take the chair as Deputy Speaker, when requested to do so by the Speaker, without any formal communication to the House. The recent holders of the office include the late Mr. Raikes, '74-80; Sir Lyon (now Lord) Playfair, '80-83; Sir A. Otway, '83-5; Mr. Leonard Courtney, '85-92; Mr. Mellor, '93-5; and Mr. James William Lowther, the present chairman, who was elected in '95. The Chairman of Committees in the House of Lords is appointed at the commencement of every session. The holders of the office have been the late Lord Redesdale, '51-86; the late Duke of Buckingham and Chandos, '86-9; and the Earl of Morley since '89.

Chamberlain, Rt. Hon. J., M.P. See under COMMONS.

Chambers of Commerce. See LONDON CHAMBER OF COMMERCE and ASSOCIATION OF CHAMBERS OF COMMERCE.

Chancellor, Lord High, who is appointed by mere delivery of the Great Seal to him by the sovereign, is principal legal adviser of the Crown, is by prescription Speaker of the House of Lords, and may act in that capacity even though he be not a peer; he is by virtue of his office a privy councillor, and as the first existing great officer of State he takes precedence of all but royal dukes and the Archbishop of Canterbury. He presides, if present, when the House of Lords is sitting as an appellate court. He is president of the Chancery Division of the High Court and of the Court of Appeal, and is one of the Judicial Committee of the Privy Council. In the absence of the sovereign he reads the Queen's Speech at the opening and prorogation of parliament, and he is always one of the Commission for giving the royal assent to bills. He is visitor of all hospitals of royal foundation, the general guardian of all infants, idiots, and lunatics, and has the general

supervision of all charitable trusts. His patronage is very extensive. He nominates the puisne judges and county court judges; and, except for Lancashire, he appoints the county magistrates, generally accepting the nominations of the lords-lieutenant and the borough justices. He is the patron of twelve canonries and a large number of livings. On retiring from office he receives a pension of £5000 a year, but in such case he commonly assumes the Lord Chancellor and the Lords of Appeal in Ordinary in the transaction of the judicial business of the House of Lords. Any one who has filled the office of Lord Chancellor may also, at the request of the Lord Chancellor, sit in the Court of Appeal, but he shall not be required to sit and act in the Court unless upon request he consents so to do. The holder of the office may not be a Roman Catholic. The present Lord Chancellor is Lord Halsbury (see PEERAGE).

Chancellor of Ireland, Lord, is head of the Irish judicial establishment, principal legal adviser of the Lord-Lieutenant, and exercises in Ireland many of the powers which in England are vested in the Lord High Chancellor. The office may be held by a Roman Catholic. See MINISTRY.

Channel Islands, The, lie in the southern part of the English Channel, 10 to 30 miles from the French coast. Anciently an appanage of the Duchy of Normandy, they have belonged to England since the Conquest. Total area about 76 sq. m.; pop. 92,272. Divided into two separate governments, called **Bailiwicks**, that of **Jersey** (area 45 sq. m., pop. 54,518), and that of **Guernsey** (area, with Alderney, Sark, Herm, Jethou, etc., 31 sq. m., pop. 37,754). The capitals are respectively St. Heliers and St. Pierre. Granitic rock is the foundation of the islands. They are extremely fertile and picturesque. Agriculture is largely carried on, fruit and vegetables being raised for export. Industries are farming, market gardening, and fishing. Much cider is made. Dairy farming is a great feature, and the breed of cattle is celebrated. The fisheries are important, embracing lobster, oysters and cod. The climate is moist and mild. Each Bailiwick enjoys a kind of autonomy. The Crown appoints a Lieutenant-Governor and a Bailiff to each, and each has its representative legislature called the **States**. The English Church is the established religion, and the islands are included in the see of Winchester. Relics of Norman custom survive in the administration. Taxation is exceedingly light. The people are an intermixture of French and English. Both languages are spoken, but the former is official. For Lieut.-Governors, etc., see DIPLOMATIC.

Channel Tunnel, Bridge, etc. See ENGINEERING.

CHARITABLE SOCIETIES.

The following list includes most of the principal charitable and philanthropic institutions that have offices in London, and are either wholly or in part dependent upon voluntary contributions. The figures indicate the last reported annual receipts. The list does not include charities connected with the **City of London** (see CITY GUILDS). **Hospitals and Dispensaries** will be found in an article under that heading.

Actors' Benevolent Fund (£4099), C. I. Colton, 8, Adam Street, Adelphi.

Royal Masonic Institution for Girls (£16,478), F. R. W. Hedges, 5, Freemasons' Hall, Great Queen St., W.C.

Royal National Lifeboat Institution (£68,023), C. Dibdin, F.R.G.S., 14, John St., Adelphi.

Royal National Mission to Deep Sea Fishermen (£21,000), F. H. Wood, Bridge House, 181, Queen Victoria St., E.C.

Royal Naval Benevolent Society (£1806), R. H. Clark, R.N., 18, Adam St., Adelphi, W.C.

Royal Naval Scripture Readers' Society (£1783), Col. M. H. Farquharson, R.M., 112, St. Martin's Lane, W.C.

Royal Normal College and Academy of Music for the Blind (£8111), A. Miall, Upper Norwood.

Royal School for Daughters of Officers of the Army (£7588), G. W. Forster, 16, Cockspur St.

Royal School for Naval and Marine Officers' Daughters (£4470), S. Rayson, 32, Sackville St.

Royal Society for the Assistance of Discharged Prisoners (£2504), Lieut.-Col. H. B. Buchanan, 32, Charing Cross.

Royal Society for the Prevention of Cruelty to Animals (£30,000), J. Colam, 105, Jermyn St., St. James's.

Royal Victoria Patriotic Asylum (see Royal Commission of the Patriotic Fund).

St. Margaret's Home for Invalid and Incurable Children (£300), Frank Lloyd-Palmer, Sec., Anerley.

St. Marylebone Female Protection Society (£930), Miss E. Godwyn Hopkins, 157 & 159, Marylebone Rd.

School for the Indigent Blind (£6682), Rev. J. W. St. Clare Hill, M.A., St. George's Circus, Southwark, founded 1799.

Seamen's Christian Friend Society (£2729), Rev. G. J. Hill, 255, Burdett Rd., Commercial Rd., E.

Shipwrecked Fishermen and Mariners' Royal Benevolent Society (£22,783), G. E. Maude, 26, Suffolk St., Pall Mall East, S.W.

Shoeblacks' Home, North-West London Brigade (£409), C. C. Birch, T. W. Scarfe, Supt., 241, Marylebone Rd.

Société Française de Bienfaisance (£1379), L. Dégremont, Hon. Sec., 67, Newman St., Oxford St., W.

Society for Irish Church Missions to the Roman Catholics (£22,577), W. Pasley and Rev. N. F. Duncan, 11, Buckingham St., Adelphi.

Society for Promoting Christian Knowledge (£47,077), Revs. W. O. B. Allen, M.A., and E. McClure, M.A., Northumberland Avenue, Charing Cross.

Society for Promoting Special Religious Services in Theatres, Halls and Mission Rooms (established 1859) (£2000), Capt. Lowe and Rev. T. C. Udall, Financial Secs., 3, Bridewell Place, New Bridge St., E.C.

Society for Promoting the Employment of Additional Curates (£62,594, including legacies), Rev. Paul Petit, M.A., 39, Victoria St., S.W.

Society for the Promotion of Permanent and Universal Peace (£2811), W. E. Darby, LL.D., 47, New Broad St.

Society for the Promotion of the Due Observance of the Lord's Day (£870), Rev. F. Peake, M.A., LL.D., 20, Bedford St., Strand.

Society for the Propagation of the Gospel (Women's Mission Association) (£8377), Miss E. F. Mackenzie, 19, Delahay St., Westminster.

Society for the Relief of Distress (£1556), A. Dunn-Gardner and Lt.-Col. G. E. Perryn, Hon. Secs., 78, Jermyn St., S.W.

Society for the Relief of Widows and Orphans of Medical Men (£3326), J. B. Blackett, 11, Chandos St., Cavendish Sq., W.

Society for the Rescue of Young Women and Children (£5506), C. Stuart Thorpe, 79, Finsbury Pavement, E.C.

Society for the Suppression of Mendicancy (£1299), Eric A. Buchanan, 9, Red Lion Sq., W.C.

Society (Incorporated) for Improving the Condition of the Labouring Classes (£3975), A. Humphreys, 8, Southampton Row, Holborn, W.C.

Soldiers' and Sailors' Families Association (£6420), Col. Gildea, Chairman and Treasurer,

23, Queen Anne's Gate, S.W.; Capt. G. E. Wickham-Legg, Sec.

Soldiers' Daughters' Home (£7423), Lt. C. R. Low, F.R.G.S., 5, Robert St., Adelphi, W.C.

Solicitors' Benevolent Association (£7108), J. T. Scott, 9, Clifford's Inn, E.C.

South American Missionary Society (£16,253), Rev. E. P. Cachemaille, M.A., Capt. E. Poulden, R.N., 1, Clifford's Inn, Fleet St.

Spanish and Portuguese Church Aid Society (£6661), Rev. T. J. Pulvertaft, M.A., Church House, Westminster.

Stainer Homes for Deaf and Dumb Children (£3059), Miss Helen Ball, 13, Paddington Green, W.

Stockwell Orphanage (£14,140), F. G. Ladds, Clapham Rd.

Strangers' Home for Asiatics, etc. (£5099), Maj.-Gen. F. E. A. Chamier, Hon. Sec., West India Dock Rd., Limehouse.

Sunday School Union (£7106), Messrs. Groser, Edmunds, and Robottom, 56, Old Bailey, and 57, Ludgate Hill.

Surgical Aid Society (£15,500), R. C. Tresidder, Salisbury Sq., Fleet St.

Temporary Home for Lost and Starving Dogs (£5685), Henry J. Ward, 4, Battersea Park Rd., S.W.

Thames Church Mission Society (£2879), F. Penfold, R.N., 31, New Bridge St.

The Missions to Seamen (£43,284), Com. W. Dawson, R.N., and Rev. E. B. Backhouse, 11, Buckingham St., Strand.

United Kingdom Beneficent Association (£27,511), Ernest Squire, 7, Arundel St., Strand, W.C.

United Kingdom Railway Officers' and Servants' Association and Railway Orphan Fund (£9090), A. James, 21, Finsbury Pavement, E.C.

Universal Beneficent Society (£2348), S. Sutherland Safford, 15, Soho Square.

Universities' Mission to Central Africa (£34,798), Rev. D. Travers, M.A., and C. J. Viner, 9 and 10, Dartmouth St., S.W.

Victoria Orphanage, Paddington (£284), Miss F. Ashdown, 27, Kilburn Park Rd., N.W.

Warehousemen, Clerks' and Drapers' Schools for Orphan and Necessitous Children (£11,942), J. Wells Thatcher, 4, Ludgate Hill, E.C.

Wesleyan Home Mission and Contingent Fund (£35,976, exclusive of legacies), Rev. Henry J. Pope, D.D., Wesleyan Centenary Hall, Bishopsgate St. Within, E.C.

Widows' Friend Society (£1277), Chas. Woolard, 57a, Coleman St., E.C.

Work-Girls' Protection Society (£851), Miss A. E. Bernard, Hon. Sec. and Lady Superior, St. Mary's Home, 132, New Kent Rd., S.E.

Working Ladies' Guild (not stated), Mrs. A. C. Garbett, 251, Brompton Rd., S.W.

Working Lads' Institute (£840), Rev. Thomas Jackson, Working Lads' Institute, 279, White-chapel Rd., E.

Zenana Bible and Medical Mission, or Indian Female Normal School and Instruction Society (£19,972), J. C. Andrews, Finance Sec., 2, Adelphi Terrace, Strand, W.C.

Zenana Medical College (£800), Dr. G. De G. Griffith, Hon. Sec., 58, St. George's Rd., S.W., A. McCluer, Assist. to Hon. Sec.

Consult, for further and fuller information, Low's "Handbook to the Charities of London," and "The Classified Directory to the Metropolitan Charities."

Charity Commissioners for England and Wales, The. The Charity Commission was created by the Charitable Trusts Act 1853 (16 & 17 Vict. c. 137). Four commissioners were appointed, three of them being paid; and two at least of these three (one of the two being the Chief Commissioner) must be barristers-at-law of not less than twelve years' standing at appointment. No paid commissioner can sit in the House of Commons during tenure of office. The Board are empowered, "from time to time, as they may see fit, to examine and inquire into all or any charities in England and Wales, and the nature and objects, administration, management, and results thereof, and the value, condition, management, and application of the estates, funds, property, and income belonging thereto." Certain large exceptions, however, are specified: the Universities of Oxford, Cambridge, London, Durham, and all colleges or halls of any of them; all cathedral or collegiate churches, all buildings registered as places of worship, with the Registrar-General of Births, etc., and *bona fide* used as places of meeting for religious worship; Queen Anne's Bounty; the British Museum; friendly or benefit societies, savings banks, institutions or societies for religious or other charitable purposes, funds or property of missionary or similar societies, and generally all undertakings (independent or dependent) wholly maintained or carried on by voluntary contributions. But this exemption "shall not extend to any cathedral, collegiate, chapter, or other schools"; the colleges of Eton and Winchester, however, were exempted by the amending Act of '55. The secretary to the Commission for the time being is a corporation sole, by the name of "The Official Trustee of Charity Lands," for taking and holding charity lands; and the Commissioners from time to time appoint, with the approval of the Treasury, "The Official Trustees of Charitable Funds," who must lay their accounts before Parliament yearly. The original jurisdiction of the Commissioners was subsequently extended by another Charitable Trusts Act, passed in '60, and other Acts. In '74 the Endowed Schools Acts amending Act transferred to them all the powers and duties of the Endowed Schools Commissioners. But under the Board of Education Act '99 any of the powers of the Commissioners in regard to Education may by Order in Council be transferred to the Board of Education. In '82 the Prison Charities Act empowered them to make schemes respecting prison charities. In '83 the Municipal Corporations Act empowered them to make schemes for the administration of the property of certain dissolved corporations. In '83, also, the City of London Parochial Charities Act empowered them to inquire into and to frame schemes for the future application and management of the Parochial Charities of the City of London. In '89 the Welsh Intermediate Education Act empowered them to make schemes for educational endowments and certain rates and Treasury grants in Wales and Monmouthshire. An account of their proceedings under the above-mentioned Acts will be found in their annual reports (Eyre & Spottiswoode). The last report gives an analysis of the purport of 682 orders made by the Commissioners during the year '98, and states that the total sum of stocks and investments held by the official trustees of charitable funds at the end of that year was £19,550,601.

divided into 20,463 separate accounts. The present **Chief Commissioner** is Sir Henry Longley, K.C.B.; the second, C. H. Alderson, Esq.; the third, Sir George Young, Bart.; the fourth (unpaid), J. Grant Lawson, Esq., M.P. **Secretary**, Daniel R. Fearon, Esq., C.B., Gwydyr House, Whitehall, S.W.

Charity Organisation Society, The, was established with the object of improving the condition of the poor—(1) by promoting co-operation among existing charities and between charities and the poor law; (2) by securing due investigation and fitting action in all cases; and (3) by repressing mendicancy. The Archbishop of Canterbury is **President** of the Society, which consists of a federation of district committees, one or more existing in each of the poor-law divisions of the Metropolis, and of a central council at which every committee is represented. The primary objects of the local committees are to afford to all charitable institutions and individuals an easy means of exchanging information and of working together, to prevent overlapping in relief, and to secure the investigation of cases with a view to referring them to the proper quarter for assistance. In suitable cases assistance is given in the form of loans. It also investigates cases of begging-letter writing. An annual "Charities Register and Digest" is published, containing detailed information respecting charities in or available for London (price 4s.). **Special committees** appointed by it have reported on such subjects as "Charity and Food," "Exceptional Distress," "Medical Reform," "The Condition of the Feeble-minded and Epileptic," "Feeding of School Children," "Homeless Cases," "Old Age Pensions," "The Better Administration of the Poor Law," etc. **Organ, Charity Organisation Review** (monthly, price 6d., or 7s. 6d. per annum); other papers are issued. **Secretary**, C. S. Loch. **Central Office**, 15, Buckingham Street, Adelphi, W.C.

Charles I., King of Roumania, was b. 1839. He ascended the throne after Prince Alex. John had been expelled ('66). In '81 the Roumanian representatives unanimously proclaimed him King instead of Prince of Roumania. His Majesty wears the Russian cross of St. George, which he received from the Emperor Alexander II. In '69 he married the Princess Pauline Attilie Louise of Wied, who is known in literary circles under the *nom de plume* of "Carmen Sylva." In Jan. '93 the Crown Prince Ferdinand, nephew of the King, was married amidst great rejoicings to the Princess Marie of Edinburgh, and a son and daughter, Carol and Elizabeth, have been born to them.

Chartered Accountants, Institute of. See INSTITUTE OF CHARTERED ACCOUNTANTS.

Charterhouse School, Godalming. Founded 1611, and until 1872 situated near Smithfield, London, on ground that once belonged to the Carthusian Monastery. One of the nine great public schools of the Public Schools Commission. Sixty scholarships are tenable in the school, and there are ten or more vacancies annually. Twenty-one exhibitions to the Universities, each of the annual value of £80, tenable for four years. **Chairman**, Archbishop of Canterbury. **Pupils**, 550. **Head Master**, G. H. Rendall, M.A., Litt.D. **Motto**, *Deo dante dedi*. **Alumni** (some): R. Crashaw, Thackeray, Grote, Blackstone, Wesley, Addison, John Leech, Havelock,

Thirlwall, Lord Liverpool, Steele, Milner Gibson, Sir G. Paget, G. Manners-Sutton; Archbishop of Canterbury, Lord Ellenborough, T. Manners-Sutton, Lord Chancellor of Ireland, Lord Dalhousie, Sir George Bowen, G.C.M.G., Prof. Palmer, formerly Professor of Latin at Oxford, Dean Liddell, Sir Richard Webster, Q.C., M.P., Attorney General; Prof. Jebb, M.P., Professor of Greek at Cambridge; Prof. Nettleship, late Professor of Latin at Oxford; F. T. Palgrave, late Professor of Poetry at Oxford; Rt. Hon. J. G. Talbot, M.P. for Oxford University; Sir H. Seymour King, K.C.I.E., M.P.; Sir Evan McGregor, K.C.B.; Dean of Salisbury; Sir Courtenay Boyle, K.C.B.

Cheltenham College, Gloucester. Founded 1841, mainly through the efforts of George Simon Harcourt, Esq., and Captain James Shrubbs Iredell. Incorporated by Act of Parliament in '94; is governed by a President and twenty members of Council. There are **three departments**—the classical, the military and civil, and the junior. Numerous **scholarships** are attached to the College. The pupils number 650. **Principal**, the Rev. R. Waterfield, M.A. **Head Master** of the Modern, W. M. Baker, M.A. **Bursar**, A. A. Hunter, Esq. Among the **alumni** of Cheltenham College are the Rt. Hon. Lord James of Hereford, Chancellor of the Duchy of Lancaster; the Rt. Hon. W. E. H. Lecky, M.P.; the Rt. Hon. John Morley, M.P.; Sir C. S. Scott, K.C.B., K.C.M.G., British Ambassador at St. Petersburg; the Rt. Rev. R. E. Trefusis, D.D., Bishop of Crediton; the Rt. Rev. C. O. Mules, Bishop of Nelson; Very Rev. F. Pigou, D.D., Dean of Bristol; Rev. W. W. Merry, D.D., Rector of Lincoln College, Oxford; Briton Riviere, Royal Academician; Sir R. T. Reid, Q.C., M.P., ex-Attorney-General; Lord Low, Scottish Judge; Sir L. H. Jenkins, Chief Justice of Bombay; General Sir J. Davis, K.C.B.; General Sir A. P. Palmer, K.C.B.; Lieut.-General Sir C. Warren, G.C.M.G., K.C.B.; Major-General Sir C. W. Wilson, K.C.B., K.C.M.G.; Major-General Sir F. Carrington, K.C.B., K.C.M.G.; Brigadier-General Sir R. C. Hart, V.C., K.C.B.

CHEMISTRY, '99.

The solidification of hydrogen was accomplished during '99 by Prof. Dewar, F.R.S. He had been making direct experiments without success, and this interesting addition to knowledge arose out of collateral work. In the course of experiments on electric resistance thermometers, where liquid hydrogen was used, it was noted that there was almost invariably a slight leak of air, which became apparent by its being frozen into an air snow, where it met the cold vapour of hydrogen coming off. When the pressure got reduced below 60 mm. the effect of the leakage on the liquid hydrogen was remarkable, as it solidified into a white solid froth. Other experiments were immediately arranged which settled the discovery definitely. Prof. Dewar says that the last doubt as to the possibility of solid hydrogen having a metallic character has been removed, and for the future hydrogen must be classed among the non-metallic elements. The same author has contributed new work on the properties of liquid hydrogen. As a cooling agent its extraordinary power is well known. One of the most notable uses for it now lies in the pro-

duction of high-vacuum tubes. Vaeua of very high tenuity are easily and simply obtained by immersing a closed tube in the liquid. The air in the tube immediately becomes solidified; if the tube is so arranged that the portion containing the accumulation of solid air is sealed off, the other part has, according to Sir W. Crookes, a pressure amounting to only one-ten-millionth of an atmosphere. With regard to liquid air and its industrial applications much has been written that will not bear criticism. As a refrigerating medium it is never likely to compete with ice; and in other respects the sanguine American forecasts of its adoption are in the main speculative. Sir W. Crookes is responsible for victorium, a new element associated with the rare earth yttrium. Certain substances, such as the ruby, emerald, alumina, and yttria, emit light or phosphoresce when enclosed in a vacuum glass bulb and submitted to molecular bombardment from the negative pole of an induction coil. Sir W. Crookes has been working since '79 on the spectra presented by these bodies, but chiefly in connection with the yttria group. The atomic weight of victorium is probably near 117. This author published a reply in book form to the critics of his presidential address before the British Association (ed. '99) in regard to the future wheat supplies of the world, and their relationship to chemical problems. The whole subject was much discussed during the year, and Sir W. Crookes, it must be said, was severely handled. In the *Chemical News* he briefly alluded to a so-called new gas, etherion, first announced by Mr. C. F. Brush, of Boston, U.S.A.; he regards it as simply aqueous vapour, whereas Mr. Brush referred to it as an occluded gas of insignificant molecular weight, but of very high specific heat and molecular velocity, existing in glass and other solids. Sir Norman Lockyer read an ambitious paper before the Royal Society on the *Chemical Classification of the Stars*. Recent research has thrown such light on the chemistry of the heavens that this well-known authority does not hesitate to draft a scheme of definite chemical groupings. So bold and important a step has naturally attracted much attention; but, as a rule, chemists and astronomers have adopted a tone of neutral criticism. The scheme in its word-endings has received valuable aid from Dr. Murray, the eminent philologist. The Home Office inquiry on the use of phosphorus in the manufacture of lucifer matches resulted in a parliamentary blue book of some 236 pages. The commission reported that with due selection of workpeople, strict administrative conditions, and the substitution of machinery for hand labour, the dangers hitherto attending the use of yellow phosphorus can be overcome. The safety of acetylene gas generators formed the subject of a report to the Society of Arts, and it was shown that illumination by the gas is safe enough under proper conditions of generation, but this should not be left to unskilled hands. From the scientific department of the Imperial Institute, Prof. Dunstan, F.R.S., and Mr. H. Brown contributed a paper in economic chemistry on *Hyoscyamus muticus*, and the nature of its alkaloid—*hyoscyamine*. The plant is a species of henbane occurring in certain districts in India, and has long been used in Indian medical practice as a virulent drug. Prof. Dunstan was led to examine the plant, as there is at present a considerable

demand for atropaceous drugs and their alkaloids. Dr. Horace Brown, F.R.S., as president of the chemical section of the British Association, delivered an address dealing with the fixation of carbon by plants. As regards the reproduction in the laboratory of the first stages of Nature's great synthetic process, Dr. Brown says that we can only hopefully look forward to this when we have succeeded in finding some simple chemical means of fixing the initial products of the reduction of carbon dioxide. Discussion took place at the Dover meeting also on a proposed international committee on atomic weights, which will doubtless have some practical issue. In '98 this important matter was taken up independently by the Deutsche Chemische Gesellschaft, which appointed a committee; and subsequently a table of atomic weights was reported, with the adoption of $O = 16$ as the standard of reference. Following this, the American Chemical Society appointed a committee, and it is pretty certain that the atomic weight question will be heard of at the Congress of Chemists to be held in Paris in 1900. It is one that might suitably be referred to international decision. There is considerable talk in scientific circles respecting an international federation of the great learned societies of Europe and America, and it is quite possible that some such association of academies may actually come into existence. A conference of this "cartell of academies," as it is called, was recently held at Wiesbaden, attended by delegates from all the great national scientific societies, to ratify laws and constitution; and as a result there will be held in Paris, in 1900, what has been aptly called the "first select Witanagemote of the world's science." The profound influence such international fraternity must have on the progress of chemistry will be felt in the general agreement in respect of questions now in a see-saw position. That of atomic weights, alluded to above, is a case in point. It is important to direct attention to so remarkable an amalgamation relating to science and its likely bearing on chemistry, particularly as little public allusion has been made to it. General Waterhouse furnished an important note on the action of light upon metallic silver, which may find applications in industrial chemistry. The salient point is the receptivity of such metallic surface to impress an image, one which after due exposure to sunlight may subsequently be developed. The latent image may also be developed mechanically by the use of mercury vapour and other chemical agents. Sir W. Roberts-Austen, chemist to the Mint, mentions that he has recently seen a silver plate bearing a device produced by a so-called secret process, which he suggests is due to an analogous method. The Davy medal of the Royal Society was awarded to Dr. E. Schunck, F.R.S., for work on the chemistry of chlorophyll. The obituary of the year includes two chemists of the first rank—viz., Sir Edward Frankland and Prof. Bunsen, of Heidelberg. In chemical literature the American committee on indexing presented a report of progress. Just issued are: "Bibliography of Chemistry, 1492-1897," by H. C. Bolton; "Index to the Literature of Thallium." Prof. S. P. Thompson brought out an interesting little book, "Michael Faraday, his Life and Work"; and Prof. Tilden, "A Short History of the Progress of Scientific Chemistry in our own Times."

Among valuable published papers were: "Derivatives of Camphoric Acid," Part III., by F. S. Kipping; "The Electro-Chemical and Electro-Metallurgical Industries in '98," by J. Kershaw (*Electrical Review*); "The Thermal Expansion of Pure Nickel and Cobalt," by A. E. Tutton; "On the Influence of the Temperature of Liquid Hydrogen on the Germinative Power of Seeds," by Sir W. Thiselton-Dyer." Consult *Journal of the Chemical Society*, *Journal of the Society of Chemical Industry*, *Science Abstracts*.

Chester, Bishop of. See under PEERAGE.

Cheyne, Rev. Thomas Kelly, M.A., D.D., was b. in London 1841. Ed. at Merchant Taylor's School and Worcester Coll., Oxford. Elected ('69) Fellow of Balliol Coll., and in '81 was appointed rector of Tendring, Essex. In '83 he received an honorary D.D. degree, in company with Bishop Westcott and Dr. Martineau, at the tercentenary of the University of Edinburgh. In '85 he became Oriel Professor of the Interpretation of Holy Scripture at Oxford, and a Canon of Rochester. Professor Cheyne is one of the most eminent authorities on Biblical exegesis. By his articles in the *Encyclopædia Britannica* (75-81) he co-operated with the late Professor Robertson Smith in naturalising the Continental methods of criticising the Old Testament. His *Bampton Lecture*, '89, on the Psalter, excited much controversy in consequence of his seeking to show that all or almost all the Psalms were of a Post-Exilic origin. He was a member of the Old Testament Revision Company, and is the author of numerous works on the Old Testament, including "The Prophecies of Isaiah," "Job and Solomon," "The Book of Psalms, a New Version"; "Aids to the Devout Study of Criticism," ('92), "Founders of Old Testament Criticism" ('93), an "Introduction to the Book of Isaiah" ('95), a new Translation of the book of Isaiah and a new edition of the Hebrew text of Isaiah ('97-8). Address: South Elms, Oxford, and The Precincts, Rochester.

Chichester, Bishop of. See under PEERAGE.

Children's Country Holidays Fund. This and similar funds have recently arisen in London to organise holidays, never less than two weeks, for poor sickly city children by boarding them with country cottagers, who are paid 5s. a week per child; and much good has resulted from the movement. The C.C.H.F. sends about 30,000 children annually. **Patroness**, H.R.H. the Princess of Wales; **Secretary**, E. J. Urwick; **Treasurer**, Hon. A. Lyttelton, M.P. **Office**, 10, Buckingham St., Strand. Similar efforts in Liverpool, New York, Berlin, etc., have been equally successful. The **Secretary** of the Liverpool branch is Miss Sampson, 5, Bold Street, Liverpool.

Children's Fresh-Air Mission, The, was established in '82 to provide change of air for poor children in London, specially in the Holborn, Clerkenwell, and St. Luke's districts. In '98, 3334 children were thus sent out into the country for two or three weeks, making a total since '82 of 38,795 children. The **Treasurer** is Mr. Walter Hazell, M.P., the **Secretary** Miss Rowley, and the **Office** is at St. Peter's Schools, Onslow St., Clerkenwell Road, E.C.

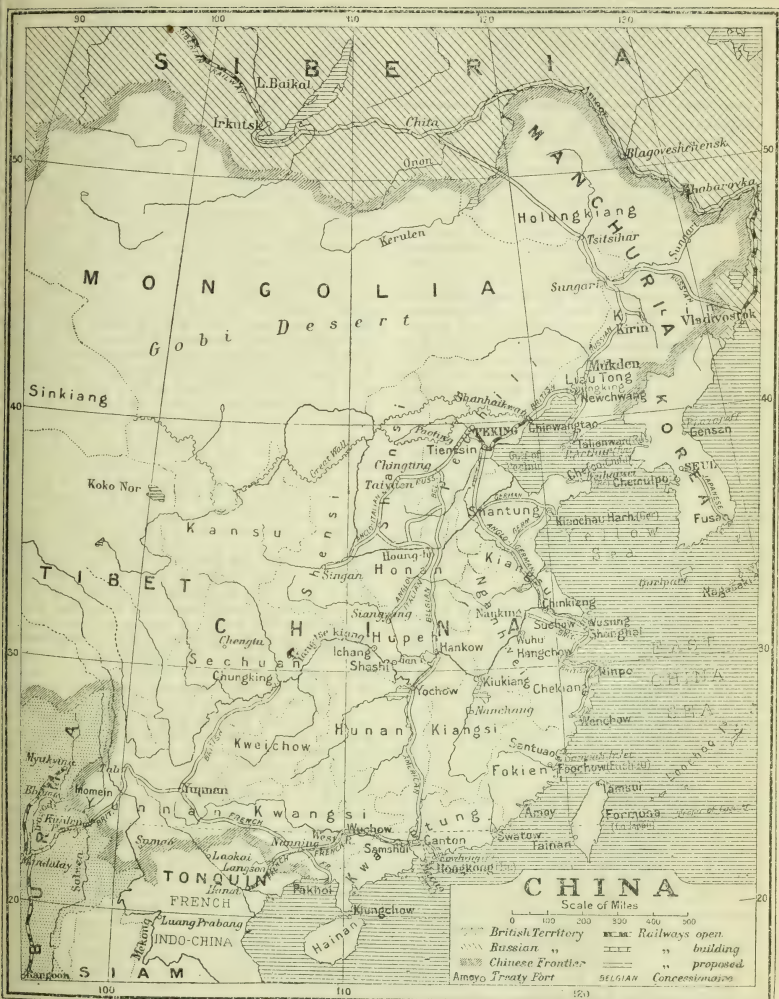

Chili. A republic governed by a President elected for five years, to whom the executive power is confided, and a Senate and Chamber of Deputies, who form the legislature. The Senate, of 32 members, is elected by the pro-

vinces for six years; the Chamber, of 94 members, by the departments for three years, by electors possessing a small property qualification. The republic is divided into 23 provinces, and these are subdivided into 74 departments and one territory. The Roman Catholic is the State religion, but all others are tolerated; universal and gratuitous education is given at the national charge. Wheat, wine, and minerals are the chief products of the country. The yield of nitrate, in which industry a large amount of British capital is employed, is very large. By a law passed in '97, the army is not to exceed 9000. There is also a national guard, composed of citizens between the ages of 20 and 40. The Conversion Law of Nov. 26th, '92, changed the currency from paper to gold, at the rate of 24d. for each paper dollar, but a subsequent Act of Feb. 11th, '95, made the rate 18d. per peso or dollar. The new gold coins are 20, 10 and 5 peso pieces, while the peso and fractional coinage are of silver. Financial troubles led in '98 to the issue of paper money to the extent of 50,000,000 pesos, though it was proposed to withdraw the paper after four years. **Area**, 293,970 sq. m.; **pop.** in '95, 3,317,264; **capital**, Santiago, pop. 302,000. **Revenue**, '97, £6,407,925; **expenditure**, £6,346,075; **debt**, '98, **external** £17,734,970, **internal** about £6,600,000 sterling; **imports**, '98, £7,669,653; **exports**, £12,605,208. For Ministry, etc., see DIPLOMACY; see also FOREIGN NAVIES.—**History**, '99. A new Government was formed in Dec. '98, all the members being opposed to a paper currency. But the evil effects of the issue of \$50,000,000 of paper currency in July '98 were only too apparent, and the conversion law of '95 practically collapsed. Exchange fell to 112d., and gold jumped to a premium of 53 per cent. A rearrangement of the Cabinet took place in May, and in June it fell, and was replaced by another under Señor Silva Cruz. This in turn gave way to a Cabinet with Señor Rafael Sotomayor as Premier, and Señor Salinas as Finance Minister (Sept. 3rd).

"Chiltern Hundreds." See PARLIAMENT AND PARLIAMENTARY PROCEDURE.

CHINA.

The most populous, and, excluding Siberia, the largest empire in Asia. China Proper is remarkable as the most compact nationality in the world, having an area of 1,336,841 sq. m., with a pop. of 386,000,000. The rest of the empire includes the dependencies of Manchuria, Mongolia, Thibet, Jungaria, and East Turkestan, which cover an area of 2,881,560 sq. m., and contain about 16,680,000 souls. Various districts have been "leased" to European powers: e.g. Wei-hai-Wei in Shantung, and the Kow-lung district opposite Hong Kong to Great Britain; Port Arthur, Talienvan, and a strip of territory to Russia; Kiao-Chau in Shantung to Germany; and the bay of Kwang-Chau-Wan to France. The government of the country is in theory most carefully organised, although in practice it is far otherwise. At its head is the Emperor, supreme priest and king, whose name is Kwang Hsu; but it should be said that in '98 the Empress Dowager assumed charge of the Government, restoring the Regency she had twice exercised before. The Nei-ko or Cabinet, which includes two Manchu members, two Chinese, and two assistants from the Han-lin or Great College

administers the empire under the supreme direction of the Privy Council. Seven boards or councils, each presided over by a Manchu and a Chinese, are entrusted, in subordination to the Nei-ko, with all civil appointments, with all financial matters, with the direction of rites and ceremonies, with military affairs, with public works, with criminal jurisdiction, and with the conduct of naval affairs. The Tsung-li-yamen is entrusted with the control of foreign affairs, the maritime customs, etc. The board of Censors is theoretically superior to the central administration, and in practice possesses considerable power, through the right of access to the sovereign which its members enjoy. The eighteen provinces are divided among a certain number of governor-generals, who are assisted by governors of districts and by the "taotais" of the cities. As to the army and navy, see separate articles on FOREIGN ARMIES and FOREIGN NAVIES. Agricultural pursuits occupy the majority of the people, the chief products being tea, silk, cereals, and sugar. There is also much coal in all the provinces, and in the Lui-Yang district, in the province of Hu-nan, there is a vast coalfield, the area of which is about 21,000 sq. miles. The coal here is worked to some slight extent at present, and finds an outlet through Han-kow, on the Yang-tse-Kiang. There are also large quantities of coal in the northern provinces of Shansi and Honan. The greater part of the country is only very partially developed, and much benefit will accrue to native and foreign trade when a proper system of railways is established. Very little has been done in this direction at present, though, as will be seen from the accompanying map, many concessions have been granted. The British Under-Secretary of State for Foreign Affairs said in Feb. '99 that concessions for 2800 miles of railway had been granted to British investors. Various ports, called the treaty ports, which number thirty-three in all, have been thrown open to European trade, and about 10,000 Europeans reside in these ports, of whom about 4000 are British subjects. Shanghai is the great foreign centre, more than half of the Europeans residing here. The effect upon the freedom of trade produced by the opening of these ports has, however, been in a great degree neutralised by the imposition of local transit dues, which are termed *likin*, and are collected at innumerable barriers set up for that purpose. The Imperial Customs dues are collected by the great service organised by Sir Robert Hart, and known as the Imperial Maritime Customs of China. Nearly 900 Europeans are engaged in its service, of whom about 500 are British. The three chief religions established in the country are Confucianism, Buddhism, and Taoism, the Buddhists largely preponderating. The revenue and expenditure are estimated at from £12,000,000 to £15,000,000; imports, '98, about £31,250,000; exports, about £24,000,000. As nearly as possible two-thirds of the total trade of the country is done by Great Britain and her colonies. The liabilities before the war with Japan were very small, but now amount to over £50,000,000. For Ministry see DIPLOMATIC; see also SESSION, sect. 8.

History, '99.—The French Minister at Peking presented an ultimatum to the Tsung-li-Yamen to the effect that if a French missionary who had been taken prisoner by Szu-chuan

rebels were not released in ten days French troops would cross the frontier (Dec. 6th, '98). The Yamen replied that the release could only be obtained by negotiation, and asked for delay, to which the French Minister acceded. Eventually the rebels were defeated by the Imperial troops, and the missionary was released. The ladies of the Diplomatic Body were for the first time received by the Dowager Empress at the Palace (13th), and expressed their congratulations on Her Majesty's birthday. The Tsung-li-Yamen gave an official pledge to Sir Claude MacDonald that the Government would not alienate the railways named in the Northern Railway Extension contract to any foreign power (26th). Hsu Ching-cheng, a member of the Tsung-li-Yamen, was appointed Chief Director of the Northern Railways in place of Hu-Yu-fen (Jan. 26th, '99), but Sir Claude MacDonald informed the Government that he refused to recognise the appointment till certain charges of maladministration alleged against Hu had been investigated. If he were innocent he should insist upon his reinstatement. As a matter of fact, however, Hsu-Ching-cheng was finally recognised, and although Hu was declared innocent he was not reinstated. The opening of Nan-ning-fu, on the Yu-kiang near the Tonquin frontier, was agreed to by the Yamen (Feb. 3rd). The Russian Minister protested against the terms of the New-chwang railway extension loan subscribed in London (27th). He objected to the clauses providing that the chief engineer should be British, and that a European railway accountant should assist the Director-General in supervising receipts and expenditure conflicted with the conditions of the Russo-Chinese agreement. He also objected to the condition that the loan should be secured on the earnings of the new lines north of the Great Wall. The Tsung-li-Yamen replied denying that the terms conflicted with the Russian agreement, and the British Government made an emphatic declaration that the contract could not be altered, at the same time guaranteeing its support to China. The Italian Minister, Signor Martino, demanded a lease of Sammun Bay, on the coast of Che-Kiang, on the same terms as Kiao-chau had been leased to Germany, with the right to run a railway to Po-yang Lake, and the concession of a sphere of influence covering the southern and larger part of the province of Che-kiang (March 1st). The demand was rejected by the Tsung-li-Yamen (6th) by the return of the dispatch of the Italian Minister, but regret was afterwards expressed for this discourtesy. The Italian Minister repeated his demands, and called upon the Tsung-li-Yamen to ask for the return of the dispatch. The Tsung-li-Yamen accordingly requested the return of the dispatch; but a new turn to the affair was given by the announcement from Rome that the Italian Minister had been recalled, and that Italian affairs at Peking would be in the charge of the British Minister till a successor to Signor Martino was appointed. The Russian Minister at last withdrew his protest against the terms of the New-chwang railway loan (April 14th). Chinese troops fired upon the police party in the Kow-lung territory during the preparations made by the Hong-Kong authorities for taking it over, and accordingly a detachment of the Hong-Kong regiment was sent to the spot. Upon being charged the Chinese bolted. Lady Blake

hoisted the British flag outside Kow-lung (18th), and the territory was thus formally transferred to British occupation, and speedily reduced to order. As a consequence of Li Hung Chang's report on the question of the Yellow River floods, an Imperial decree was issued (24th) directing the Board of Revenue to provide the sum of 400,000 taels for the purchase of the material required for the works on the Yellow River, and 600,000 taels for erecting dykes. In addition, 2,000,000 taels were to be furnished by the Government treasuries throughout the Empire for the purpose of deepening the mouth of the river. An agreement was signed during this month by Russia and Great Britain in regard to their Chinese railway policy and interests, providing against mutual interference with one another's railway enterprises in Manchuria and the Yang-tse-Kiang district, and closing the difference of opinion as to the New-chwang line. After lengthy negotiations between the British, American, and German consuls, an arrangement for the extension of the foreign settlement at Shanghai was completed, and approved by the Viceroy (May 4th). An agreement to build a line from Tientsin to Chin-Kiang was reported (7th), the first section, from Tientsin to the southern border of Shantung, to be under German and Chinese control; and the second, from Shantung to Chin-Kiang, under British and Chinese management. The required loan was fixed at £7,400,000 at 5 per cent., and the term for building the railway at five years. The Russian Minister made a demand for a concession for a branch line connecting the Russian Trans-Manchurian railway system and Port Arthur with Peking, *via* Shan-hai-kwan (12th). It was at once obvious that this would damage all the existing and projected railways, particularly the New-chwang extension, and Great Britain opposed the concession. The Marquis Salvago Raggi, the new Italian Minister to China, asked the Tsung-li-Yamen to grant concessions to an Italian syndicate for a railway from the Che-Kiang coast to the Po-yang Lake for mining rights in the Ninghai district, and for a railway along the western hills to Peking (Aug. 11th). It was understood that the demand as to Sammun Bay had been withdrawn, commercial facilities only being required. The Tsung-li-Yamen refused all the requests except as to mining rights (Sept. 4th). An agreement for the construction of a railway from Lung-chow to Nan-ning-fu, in which the Chinese Government undertook to provide part of the capital, and to employ only French materials and French engineers, was signed (15th). Yo-chow-fu, on the Yang-tse-Kiang, in the province of Hu-nan, was opened to foreign trade (Nov. 13th).

Chitral is a small state on the Indian frontier, lying N.-W. of Kashmir, N.-E. of Afghanistan, and directly S. of the province of Wakhan, which came into prominence during the Pamirs dispute. On the west of it lies Kafiristan. It is a country of great strategical importance. See '96 ed., for a full account of the circumstances which resulted in the occupation of the country by British troops in '95. Shuja-ul-Mulk is the Mehtar, and receives a subsidy from the Indian Government. See INDIA.

Choate, Joseph Hodges, American lawyer, succeeded Mr. Hay as U.S. Ambassador to Great Britain in '98, arriving in England on March 1st, '99. Born at Salem, Massachu-

setts, Jan. 24th, '32, and a graduate at Harvard University, '52, he has attained eminence at the American Bar, to which he was admitted in '55. Mr. Choate is a nephew of Rufus Choate, the great American lawyer, orator, and Senator, of whom a bronze statue was erected at Boston on Oct. 15th, '98. Mr. Choate attended the ceremony of unveiling his uncle's statue, and in the course of an address said that to his example, inspiration, and sympathy, he owed whatever success had attended his own professional efforts. In '98 Mr. Choate was president of the American Bar Association, and devoted his address in that capacity to a vindication of the institution of trial by jury. He was chairman of the convention held to revise the Constitution of the State of New York in '94. He has appeared in many notable cases, including that involving the validity of the provisions as to income tax in the tariff law of '94, in which the Supreme Court of the United States upheld his contention that the income tax could not be collected, but leaving the remainder of the tariff law in force.

Christian IX., King of Denmark, was b. 1818. He is the son of the late Duke William of Schleswig-Holstein-Sonderburg-Glücksburg, and father of the Princess of Wales, the dowager Empress of Russia, and the King of Greece. By the Treaty of London, signed May 8th, '52, he was appointed the successor to the throne of Denmark, and, by the law of succession of that country passed July '52, on the death of King Frederick VII., he ascended the throne Nov. 15th, '63. In the beginning of his reign arose the famous dispute about the duchies of Schleswig and Holstein, which by the Treaty of Peace of Vienna ('64) he had to surrender. He married in '42 the Princess Louise, the daughter of the Landgrave William of Hesse-Cassel. Her mother was a sister of Christian VIII., the predecessor of Frederick VII. Queen Louise died in '98. The heir to the throne is the Crown Prince Frederick, whose second son, Prince Karl, was married to H.R.H. Princess Maud of Wales in '96.

Christian Evidence Society. Founded in 1870 by the then Bishop of London, the late Earl of Harrowby, and others, Churchmen and Non-conformists, with the conviction that it was necessary to do something to counteract the progress of unbelief amongst various classes. In '98 445 indoor and 423 open-air lectures were given, and 118 students were examined. **President**, Archbp. of Canterbury; **Vice-President**, Sir G. G. Stokes, Bart., F.R.S.; **Chairman**, Earl Halsbury; **Secretaries**, Rev. T. T. Waterman, B.A., Rev. C. L. Engström, M.A. **Offices**, 26, Charing Cross, S.W.

Christie, William Henry Mahoney, C.B., F.R.S., **Astronomer Royal**, was b. at Woolwich 1845, is a son of the late Professor S. H. Christie, F.R.S., and was ed. at King's Coll. School, London, and Trinity Coll., Camb., and became a Fellow of his college. Graduated B.A. ('68) as fourth wrangler. Appointed ('70) chief assistant at the Royal Observatory, Greenwich, London. On Sir G. B. Airy's retirement ('81) appointed **Astronomer Royal**. He contrived and introduced several valuable improvements in the scientific apparatus there in use, including new forms of spectroscope, of altazimuth, and of domes. He is the author of the "Manual of

Elementary Astronomy." Address: The Observatory, Greenwich.

Christ's Hospital (Blue Coat School), London. Founded 1547. The new scheme of the Charity Commissioners received Her Majesty's assent on Aug. 15th, '90, and came into force in Jan. '91. (Copies of the scheme may be obtained at the Counting House of Christ's Hospital, 1s. each.) It provided that the boys' boarding school should contain 700 pupils, the preparatory school 120 juniors, and the girls' school 350 scholars, these three establishments being known as **Hospital schools**. Two day-schools, accommodating 600 boys and 400 girls, should subsequently be started. In this way education was ultimately to be given under the new scheme to 2170 children, instead of nearly 1200, and many more female scholars were to be educated. With relation to two-thirds of the scholars at the Hospital schools, fees ranging from £10 to £20 may be charged if the Council of Almoners consider "that the parents or next friends are in a position to contribute substantially towards the child's education and maintenance." The system by which entrance to the Hospital schools is gained under the new scheme is by nomination or by competition. Presentation to 325 places lies in the hands of the President, certain City companies, and various officials. One hundred scholars may be nominated by the Council of Almoners (which numbers forty-three members), and 150 scholars, whose names have been submitted by donation governors, may compete for places. The more notable change in the construction of the school is the distribution of the remainder of places. From metropolitan schools of a public elementary nature come 179 successful competitors; various parishes which have hitherto possessed nominative powers supply 12 scholars; and 400 places are at the disposal of boys and girls nominated by the governors of endowed schools at which they have attended for the period of two years. Numerous exhibitions and prizes which have existed in the past still remain as inducements. Hospital exhibition funds provide exhibitions to universities; there are also the *Times* scholarship, the "Moses," "Thomson," "Rowed," and "Pitt Club" exhibitions. The new scheme also made provision for the removal of the boarding school to a new site as soon as was found conveniently practicable. A site at Wimbledon was considered, but finally the governors purchased an estate of 1200 acres near Horsham, and the foundation stone of the new buildings was laid by the Prince of Wales Oct. 23rd, '97. The land cost £53,000, and the estimated cost of the buildings is about £300,000. The work is expected to be finished by the summer of 1901. In July '96 the scheme of '90 was modified in certain particulars, so as to admit to the Royal Mathematical School the sons of naval officers as formerly, and also to allow of the admission of children by direct presentation on the part of donation governors rather than as the result of competition. Further modifications, principally as to the ages of admission, have also been made by recent amending schemes. **Head Master**, Rev. Richard Lee, M.A. **Alumni**: among a numerous list may be noted Bishops Stillfleet, Middleton (Calcutta), and Rowley Hill (Sodor and Man), Coleridge, the poet; Leigh Hunt, Charles Lamb, Thomas Barnes, a late editor of the *Times*; James Scholefield,

Regius Professor of Greek for Cambridge; and Sir Henry Sumner Maine, K.C.S.I.

Church, Anglican. See **ANGLICAN CHURCH** and **CHURCH OF ENGLAND**.

Church Army. A working-man's Church mission to working-men, founded in 1882, directed by a committee acting under the Council, amongst whom are three archbishops and most of the English bishops. There are upwards of 800 trained workers, men and women, constantly at work throughout the Metropolis and the provinces. As many as 80,000 copies of the *Church Army Gazette* (3d.) are sold weekly, the profits of which cover the salaries of all the paid central staff. Officers and branches in India, Australia, United States, Canada, and West Indies. A sum of over £150,000 is required annually. Nearly the whole of the headquarters staff are honorary workers. **Headquarters**, 130, Edgware Road, London, W.; **Hon. Chief Secretary**, Rev. W. Carlile; **Hon. Treasurer**, Sir Hugh Low, G.C.M.G. The **Evangelistic Department** (**Hon. Secretary**, Edward Clifford, Esq.) selects and trains working-men and working-women for spiritual work among the masses. There are several hundreds of evangelists and colporteurs locally employed, and some 250 mission nurses in parochial and rescue work. Other institutions connected with the Army are eight-days' missions to Prisons, Workhouses, and Reformatories; a magic lantern mission; 65 mission and colportage vans working all the year round in different dioceses; tent work amongst harvest-men—hay, fruit, hop, corn; and coffee tavern for training evangelists. A Fresh Air Fund for giving poor children a week in the country; a Bible and Prayer Union; a Juvenile Brigade, etc., etc. Various Church societies and parishes are furnished with trained evangelists and mission nurses. Suitable candidates are trained free. **Evangelists' Training Home**, 130, Edgware Road; **Publication Department**, 130, Edgware Road; **Mission Nurses' Training Home**, 21, Nutford Place, W.; **Printing Works**, Salisbury Mews, Gloucester Place, W.; **Training Home Mission Hall**, 72, Crawford Street, W.; **Church Army West-end Church**, Upper Berkeley Street, W. The **Social Department** (**Hon. Sec.**, Colin F. Campbell, Esq.) of the Church Army tries to raise the hopeless outcasts of society—tramps, criminals, drunkards, discharged prisoners, and fallen women, and also to assist the deserving poor. This is done chiefly through labour, rescue, and lodging homes, of which there are upwards of 90 in London and the provinces. The labour homes, holding a maximum of 25 inmates, receive from the workhouses, gaols, casual wards, streets, etc. On the Emigration Test Farm and Market Garden, in Surrey, able-bodied men and youths, after being tested, receive practical instruction in farm work, and are then emigrated to the colonies. Many have been sent to Canada, where the Army has an Emigration Agency, and, in almost every case, they have done well. Over 21,000 cases of men, women, and boys were dealt with in '98: over 50 per cent. of all received turned out well. There are Boys' Homes, Girls' Homes, First Offenders' Homes, and Inebriate Homes. There is also a Home registered under the Inebriates Act for habitual drunkards. **Home Office**, Local Government Board, Prison Commissioners, Charity Organisation Society, Corporation of London, Boards of Guardians, the

Archbishop of Canterbury, etc., approve and support the social work of the Society.

Church Association, The. Instituted in 1865, to maintain the principles and doctrines established at the Reformation, and to preserve the purity of Protestant worship in the Church of England; to resist all innovations in the order of the service as prescribed by the joint authority of the Church and State, whether these innovations consist in vestments, ornaments, gestures, or practices borrowed from the Church of Rome; and especially to prevent "the idolatrous adoration of the Sacrament of the Lord's Supper"; to resist all attempts to restore the use of the confessional, and every exercise of that priestly authority which was put down at the Reformation. The Association also seeks to vindicate for the laity their rightful share in all departments of Church life, and aims at the restoration to the parishioners of the election of churchwardens, giving to them a veto upon the appointment of incumbents by patrons, and the absorption of the ecclesiastical courts into the general judicature of the country. With a view to the next general election, the Association has prepared a scheme which is now being worked in 265 constituencies by that department known as the National Protestant League. The plan is to enrol in each constituency one hundred Parliamentary voters who appoint a Parliamentary committee, secretary, etc., and then proceed to canvass for other voters. The object aimed at is to influence candidates at parliamentary and local elections in the Protestant interest. A number of works, such as "The Protestantism of the Prayer Book," by Dyson Hague; "The Prayer Book Articles and Homilies," by Tomlinson; "The Secret History of the Oxford Movement," by W. Walsh; "An Indictment of the Bishops: The Historical Grounds of the Lambeth Judgment examined and found to be false," by Tomlinson, and nearly 300 tracts, bound in five volumes, have been published. Colporteurs for the dissemination of Protestant literature have been appointed in a number of counties. Several Protestant vans have also been started. **Organ of the Association, The Church Intelligencer.** **Chairman,** Capt. Cobham; **Secretary,** Henry Miller. **Offices,** 14, Buckingham Street, Strand.

Church Committee for Church Defence and Church Instruction, The. Its object is to give instruction to the people in town and country in all matters connected with the history of the Church; to encourage learning the truth and soundness of the position of the Church of England; and also to combine men and women of every shade of political and religious opinion in the maintenance and support of the Established Church; and generally to encourage the co-operation of the clergy and laity for the promotion of measures conducive to the welfare and efficiency of the Church. No question touching doctrine is entertained at its meetings. **Secretary,** Mr. T. Martin Tilby, Church House, Westminster.

CHURCH CONGRESS, '99.

The thirty-ninth annual Church Congress met in London on Tuesday, Oct. 10th, '99. In the morning the Bishop of London was welcomed at Guildhall by the Lord Mayor and Sheriffs, after which there was the opening service at St. Paul's Cathedral, at which the Lord Mayor

and Sheriffs attended in state, and the Archbishop of Canterbury preached a sermon on the Unity of the Church. In the afternoon the Bishop of London, at the Albert Hall, delivered the Presidential Address, his subject being the responsibility thrown upon the Church by the nation. He declared that, as the nation is expanding, so the Church must educate the world and bring it to Christ, and he sketched in eloquent terms his ideal of the Church of England rooted in the minds and hearts of the English people. The first subject for discussion was "The Church in London in this Century," opened by the Archdeacon of London, the Bishop of Stepney speaking of the needs of East London, the Bishop of St. Albans of London over the Border, and Canon Edwards of South London. "The Place and Work of the Laity" was spoken to by Mr. G. W. E. Russell, who urged that the laity should have more voice in all that concerned the Church and her services. Mr. T. Cheney Garfit and the Dean of Norwich also read papers, and Canon Gore read a paper on "The Proper Position of the Laity in the Government of the Church," in which he described how a mediæval parish meeting consisting of men and women managed the affairs of the parish, and suggested a return to this practice. The subject "The Church and the Evangelisation of the World: within the Empire," so far as regards the Colonies, was taken by Bishop Barry, late of Sydney; as regards India and Ceylon, by Bishop Johnson, late of Calcutta; and "Beyond the Empire," by Sir John Kennaway, M.P., President of the Church Missionary Society. "The Social and Religious Condition of the Jews" was spoken to by the Dean of Worcester, and the Rev. M. M. Ben-Oliel gave some most interesting facts regarding Judaism. "The Church and Modern Society" was the subject of Wednesday afternoon's meeting at the Albert Hall. Mr. J. Johnston read a paper on "Commercial Morality"; Archdeacon Diggle on "Speculation and Gambling"; Mr. George Livesey, chairman of the South Metropolitan Gas Company, on "Certain Needful and Needless Sunday Employments"; and the Rev. Henry Stevens, whose paper was read by Archdeacon Emery, on "Sunday Amusements." The Dean of Hereford spoke on the latter subject, and said that a bloated plutocracy was undermining the moral character of the country by its Sunday parties and amusements.

On Wednesday afternoon and evening there were sectional meetings. Under the presidency of Mrs. Creighton a meeting for women was held, at which the Hon. Mrs. A. T. Lyttelton, Miss Clifford and others read papers on "The Training and Payment of Women Church Workers," and on "Women's Settlements." The Bishop of Hereford presided over a meeting where the Bishops of Chichester and Marlborough read papers on "Purity" and "Temperance." The Bishop of Bristol was the chairman of a meeting to discuss "The Impoverishment of the Clergy and its Remedies." The claims of the Queen Victoria Clergy Fund were brought forward by Sir W. Paget Bowman, registrar of the Corporation of the Sons of the Clergy; Mr. J. Duncan, secretary of the Clergy Pensions Institution, spoke on "Clergy Pensions," and Mr. Montagu Barlow on "Tithe Rating." At Kensington Town Hall the Bishop of Rochester presided over a meeting, and spoke on "The Church and Education: the

Inexpediency of an Imperial Policy which excludes Religious Education." Mr. Holiday read a paper on "The Lines of Progress in (a) Elementary Education," and Canon Bell, head master of Marlborough College, on "(b) Secondary Education." On Wednesday evening there was a service held in Westminster Abbey, with an address by the Bishop of Richmond on "Church Music," at which illustrations of the music of the sixteenth, seventeenth, eighteenth, and nineteenth centuries were given by the choir. At the Church House the Bishop of Llandaff held a meeting on "The Church in Wales," the Bishops of Llandaff and St. Asaph spoke on "The Church in this Century," the Dean of St. Asaph on "The Welsh Language in relation to Education in Wales," the rector of Llandudno on "The Welsh Language in relation to Church Services," and the Dean of St. David's on "Welsh Hymnology." One of the most interesting was the mass meeting for men at the Albert Hall, at which the Bishop of London presided, and spoke of the responsibility of the opinions which men individually formed, and of the body of opinion created. The Archbishop of Canterbury, who was received with tremendous applause, followed the lines of the President's speech, and enforced the necessity of having knowledge as the foundation upon which opinion must be based. Dean Farrar and Sir Edward Clarke, Q.C., M.P., also spoke.

The subject on Thursday morning was "The History of Nonconformity in this Century, and its Influence on the Life and Work of the Church," upon which Prebendary Henry Wace read a paper containing some striking statistics. Canon Overton devoted himself chiefly to the Wesleyans. Dean Farrar read a paper on "The Possibilities of a Better Understanding with Nonconformists in the Future," and Canon Bell, Archdeacon Sinclair, the Dean of Ripon and the Bishop of London also spoke.

The subject for Thursday afternoon was "The Church and her Services." "The Principles of Ritual" was opened by the Rev. A. Robertson, Principal of King's College, London. Lord Halifax, President of the English Church Union, who was very well received, in his paper advocated the return to the ritual of the Early Middle Ages, that being the time at which the art of ritual had reached its highest and best point. Archdeacon Cheetham said that the first condition of right ritual was that it should be Catholic. "The Question of maintaining a type of Anglican Service and the Limits of possible Variations" was the subject of a paper by Prebendary Webb Peplow, who said that if both ministers and people were loyal to the Prayer Book in every detail of their services, there would be no real question as to maintaining in essentials the type of Anglican Service bequeathed to us by our fathers. The Rev. W. Allen Whitworth, vicar of All Saints', Margaret Street, followed, and on the "limits of possible variation" said that after the appointed offices had been said, no one wished to forbid the use of the Church for such devotions as might be found helpful. Mr. Holiday, Mr. Paul Swain, Mr. Frederick Hyndman, and the Rev. E. Denny spoke. On Thursday evening the Lord Mayor entertained the members of the Congress at a conversation at Guildhall, when about 3000 people attended.

On Friday, at what was considered a

devotional meeting, the Bishop of Thetford spoke on "Experimental Religion, its Doctrinal Character and True Foundation (a) as set forth in Holy Scripture." Canon Newbolt, Professor Ryle, and Mr. Eugene Stock also spoke; and Prebendary Gibson, vicar of Leeds, and Mr. P. Swain spoke on "(b) as expressed in the Prayer Book." On Friday afternoon, at the Albert Hall, the subject was "The Church and Social Questions: (a) Relations of Economical Knowledge to Christian Charity, (b) Conciliation in Labour Disputes, (c) Old Age Pensions, (d) Housing of the Poor." Professor Hewins read the first paper; Mr. George Harwood one on Conciliation in Labour Disputes; Mr. F. Rogers on Old Age Pensions; Mr. Beachcroft, L.C.C., on the Housing of the Poor. Canon Blackley opened the general discussion, and the Rev. Percy Dearmer, of the Christian Social Union, spoke. Canon Scott Holland, in a stirring speech on the ruin of the homes of the poor, wound up the debate. The closing meetings took place on Saturday at the Albert Hall; in the afternoon for Young People, when Lord Hugh Cecil, the Bishop of Sierra Leone, Mr. A. Lyttelton, M.P., and Mr. Rowland Hill spoke; and in the evening for "Church Choirs and Choral Societies," when papers were read by Sir Hubert Parry, Sir George Martin, Professor Villiers Stanford and others. A very large and interesting Ecclesiastical Art Exhibition was held at the Imperial Institute, and there was also another Exhibition by the Clergy and Artists Association held in Lord Leighton's house. The Congress in 1900 will be held at Newcastle-on-Tyne.

Church Discipline Bill, '99. See SESSION, sect. 43.

Church House. Originated early in '86 by a few clergy meeting at Westminster, who had observed the urgent need of such a building. Subsequently the Bishop of Carlisle suggested that the erection of such a House should be the Church's method of celebrating the Queen's Jubilee. An executive committee was appointed, and funds have been collected to the amount of over £100,000. On Feb. 23rd, '88, a charter of incorporation was granted. The committee acquired in July '88, at a cost of £52,000, the freehold of a block of buildings, about an acre in extent, which is bounded by the south side of Dean's Yard, Westminster, by Tufton Street, Little Smith Street, and to a large extent by Great Smith Street. Plans for the Church House have been prepared by Sir Arthur Blomfield, A.R.A. The principal elevation faces Dean's Yard, and the ground plan shows a group of buildings enclosing a quadrangle slightly irregular in form. The style of the building is Late Tudor, with suggestions from Hampton Court Palace. In the first part of the permanent buildings, the Great Hall block, there are spacious halls for the meetings of both Houses of Convocation, twelve rooms used as offices for Church Societies, and a great hall, capable of accommodating 1350 persons, which was opened Feb. 11th, '96, by the Duke and Duchess of York. At present the work of the Corporation is being conducted in the temporary premises, 9, 10, and 11, Dean's Yard. Here there are reading-rooms, library, writing-room, committee-rooms, offices, etc., for the use of members. The Church House proved its great usefulness during the Lambeth Conference, as it was the house of call of all the Bishops attending the Conference. All

the meetings, over eighty in number, of the various committees of the Conference were held in its rooms. On an average 500 meetings of Church Societies are held each year in the committee-rooms and halls. **Membership** of the Corporation (open to all members of the Church of England) may be obtained by the annual subscription of one guinea. Life membership, £10 10s. Associates of the Corporation must be recommended by a member of the Corporation, and pay an annual subscription of at least 5s. **Secretary**, Mr. Sydney W. Flamank, Dean's Yard, Westminster, S.W.

Church in Ireland (Presbyterian). History. Presbyterianism arose in Ireland through the plantation of Ulster by Scottish settlers in the reign of James I. The colonists at first conformed to the Episcopal Church, which was Calvinistic in doctrine and recognised the validity of Presbyterian orders. After 1634, however, the Irish prelates endeavoured to depose all Presbyterian ministers who would not submit to episcopal ordination and follow the Anglican ritual. In self-defence the Presbyterians left the Established Church, and in 1642 they organised their first presbytery at Carrickfergus. During the protectorate of Cromwell the Presbyterians were kindly treated, but after the Restoration the severest pains and penalties were enforced against them for their nonconformity. At the Revolution of 1688 the gallant conduct of the Presbyterians in defending Londonderry and supporting William III. gained for them the *regium donum*, an annual bounty of £1200. During the reign of Queen Anne this bounty was withdrawn and Presbyterianism was proscribed, but with the accession of George I. toleration was granted and the *regium donum* restored. During the eighteenth century many of the ministers of the Irish Presbyterian Church adopted Arian views, but in 1827, chiefly through the influence of Dr. Cooke, the Church again declared its adherence to Trinitarian doctrine, and the Arians withdrew from its communion. Side by side with the Irish Presbyterian Church there sprang up congregations representing the various dissenting churches of Scotland, the majority being connected with the Secession Church; and in 1840 the seceders joined the older Church. By the disestablishment scheme of 1871 the Church lost the *regium donum*, but the commutation granted by Government, supplemented by the gifts of the people, has more than compensated for the loss.—**Statistics.** Synods, 5; presbyteries, 36; congregations, 569; ministers, 656; elders, 2042; communicants, 106,424; average income, £208,761. There are two theological halls, viz., Magee College, Londonderry, and the Assembly's College, Belfast. Vigorous home mission work is carried on in Ireland, and foreign missions are conducted in India and China. **Moderator** for '99, Rev. D. A. Taylor, M.A., Comber.

Church Lads' Brigade, The. Founded permanently in 1891, in order to promote a spirit of discipline and respect among the elder boys of a parish. It combines strict discipline with systematic religious education, and aims at teaching the great lessons of order, obedience, and discipline voluntarily submitted to. There were, in '98, 1018 companies formed, and the general income in support of the work was in that year £1229. **Secretary's Address**, Church House, Westminster.

Churchmen's Union. Founded at the Bradford Church Congress, '98. Its aims are: (1) To defend and maintain the teaching of the Church of England as the historic Church of the country, and as being Apostolic and Reformed. (2) To uphold the historic comprehensiveness and corporate life of the Church of England, and her Christian spirit of tolerance in all things non-essential. (3) To give support to those who are honestly and loyally endeavouring to vindicate the truths of Christianity by the light of scholarship and research; and, while paying due regard to continuity, to work for such changes in the formularies and practices of the Church of England as from time to time are made necessary by the needs and knowledge of the day. (4) To work for the restoration to the laity of an effective voice in all Church matters; and (5) To encourage friendly relations between the Church of England and all other Christian bodies. The membership is open to all who approve of the programme of the Society, and it embraces most of the Broad Churchmen within the Anglican Communion. **Offices**, 18-20, Temple House, London, E.C. **Organ**, *The Church Gazette*.

Church of England Sunday-School Institute (founded 1843). The objects are to extend, improve, and develop the Sunday-school system in the Church of England, and to secure efficient teaching in Church Sunday schools. There is a central office, through which information in regard to the needs of Sunday schools is ascertained, and all over the country branch or local Sunday-school Associations, numbering 405, are established. Free grants of Sunday-school requisites are made to Sunday schools both at home and abroad where necessary. The Institute provides lesson notes, manuals, and other publications useful to Sunday-school teachers and scholars, and sends experienced representatives to attend meetings of Sunday-school teachers for the purpose of giving lectures and training lessons, and affording information on all matters connected with the management and working of Sunday schools. It arranges normal classes and practical lectures on the art of teaching at convenient centres throughout the country, and conducts a yearly examination of Sunday-school teachers in England and Wales, Scotland, Ireland, and the Colonies, and awards certificates of various grades and prizes to the successful candidates. **Offices**, 13, Serjeant's Inn, Fleet Street, E.C.

Church of England Temperance Benefit Society. This Friendly Society was founded in '78. Its objects are to receive subscriptions, and to make allowances in times of sickness and death. The Society is based on the principle of a common fund: that is, every member has for security the funds of the Society as a whole and not merely the assets of the local branch or lodge. According to the last actuarial report, for the five years ending Dec. '97, the actuarial surplus was £972, the assets being equal to 20s. 2d. in the £ of the liabilities. It has 160 lodges in England and Wales, with a total membership of 7000 (men, women, boys, and girls). Claims paid for sickness and death exceed £30,000, members' funds exceed £28,000. There are two sections, one for total abstainers and another for temperate non-abstainers. The **President** is Canon Ellison (late Chairman of the C.E.T.S.). The official

organ of the Society is the *Church Friendly Magazine*, published monthly. The registered Office is at the Church House, Westminster, S.W.

CHURCH OF ENGLAND, THE ESTABLISHED.

The Church of England, properly so called, owes her foundation to St. Augustine, who was sent to England by Pope Gregory the Great in 596. Queen Bertha, the wife of Ethelred the King, was a Christian, and on St. Augustine landing in what is now Kent, the King gave him every facility for doing all he desired towards spreading that religion in the country—and in a very short time the King himself was converted. St. Augustine was made the first Archbishop of Canterbury in 597—the 1300th anniversary of which event and of the foundation of the Anglican Church was celebrated during '97.

Government.

The government of the Church is carried on by Bishops (of whom there are thirty-four, two of them Archbishops), who superintend the work in each diocese, and who are aided in the episcopal work of confirmations, consecration and opening of burial grounds by suffragans, of whom there are twenty-three. The Bishops are appointed by the Queen, in virtue of her supremacy, their appointment being ratified by the Church, by their election by the Dean and Chapter of the Cathedral of the diocese, in pursuance of a *congé d'élire* sent to them by the Crown. The suffragans are appointed by the Bishops themselves. The whole of England is divided into parishes of various sizes; for the inhabitants of each parish there is appointed a parish priest whose duty it is to minister to them. A certain number of parishes grouped together form a Rural Deanery; they in their turn added together form an Archdeaconry; a Diocese, over which the Bishop presides, is made up of two or more Archdeaconries. The Archdeacon—the *oculus episcopi*—assisted by the Rural Deans, reports as to the state of the livings. There are also in the diocese laymen who hold ecclesiastical appointments to control the temporal and legal business. There are the Vicars General (for the Province of Canterbury Sir J. Parker Deane, Q.C., D.C.L., and for York Lord Grimthorpe), Chancellors (usually barristers), registrars, surveyors, architects, etc. Each parish has two Churchwardens to look after the temporal affairs connected with the Church. There are in each Rural Deanery Rural-decanal Conferences, composed of the clergy and leading laymen—and in each Diocese a Diocesan Conference in which Church questions are discussed. The spiritual government of the Church is in the hands of the Houses of Convocation (*q.v.*), but for any change in Church government which affects the temporal or legal position of the Church or its members the sanction of Parliament must be obtained. There is also a House of Laymen (*q.v.*) in each Province, which meets to confer on Church questions. The Cathedral in each diocese is the seat—the "*Cathedra*"—of the bishop, but he has no voice in the government of the Cathedral, which is vested in the Chapter, of which the Dean is the head. The Deans and Canons are appointed by the Crown; the Minor Canons, who sing the daily Offices, and the various officers of the Cathedral, are appointed by the Chapter. There are two Deaneries

which are called Peculiars—Westminster and Windsor—the Abbey and St. George's Chapel being outside the jurisdiction of the bishops of the diocese in which they are severally situate. There are a few Deans in name only, such as the Dean of Battle—a survival of the title of the Abbot of Battle Abbey; there is also the Dean of the Chapels Royal (the Bishop of London), and the Dean of the Closet—but their offices are connected with the Royal Household. The dioceses, roughly speaking, are coterminous with the counties of which the chief town is the See, though there are important exceptions. All the dioceses of England and Wales (except those of York, Durham, Liverpool, Newcastle, Ripon, Manchester, Carlisle, Wakefield, Chester, and Sodor and Man, which form the Province of York) are in the Province of Canterbury. London is in four dioceses: London (Middlesex), St. Albans (Herts), Rochester (Surrey), and Canterbury (Kent).

Doctrines.

The doctrines are those of the Early Church, based upon Holy Scripture, appealing to the Catholic Fathers for interpretation, teaching the Creeds put forth at the first four General Councils, and referring to the Ancient Church practices and customs as the rule for the guidance and government to-day of what is the lineal descendant, through the bishops, of the Church founded by the Apostles. The Book of Common Prayer contains all the Services of the Church—they are almost entirely translations of those used in very ancient times. Besides assenting to all contained in the Prayer Book the Clergy at their ordination are required to subscribe the XXXIX Articles—though the latter are not binding on the laity. The tenets of the Anglican Church differ from those of the Roman in not acknowledging the supremacy of the Pope—in not accepting the Roman doctrine of the Mass, nor the veneration of relics and Saints, nor the worship of the Virgin Mary—all which doctrines date from the middle ages; but they agree with the Roman in acknowledging the first four Councils, and in accepting the episcopal form of government, and the necessity of valid Orders in the Church. The Church differs from the leading Nonconformist bodies in insisting on the importance of Apostolical succession, in order that its ministers may properly administer the Sacraments, and disagrees also with the Nonconformist view of the meaning of the "Catholic" Church, which by them is held to be the whole body of Christians rather than those who hold the doctrines "always, everywhere, and by all believed," which is the ancient definition of the word "Catholic."

Statistics.

The number of clergy in England and Wales is about 23,000, rather more than 14,000 of whom are beneficed. The Archbishops and twenty-four Bishops have seats in the House of Lords as spiritual peers. Since '36 nine new bishoprics have been created: Manchester, Ripon, Liverpool, Newcastle, St. Albans, Southwell, Truro, Wakefield, and Bristol. The new See of Birmingham is proposed. The funds contributed to the Central Diocesan Societies and Institutions and administered by their executive for the year ending Easter '98 were:—Home Missions, including funds for church extension, missions to soldiers

and sailors, temperance work, etc., £588,919; Foreign Missions, £929,867; societies for the circulation of literature and other agencies in connection with educational work, £70,519; the clergy (educational assistance), £8,151; assistance for poorer clergy, their widows and orphans, £155,913; philanthropic work, including industrial schools, orphanages, cottage hospitals and nursing institutions, £424,603, making a total of over £2,205,976; with the costs of diocesan inspection and maintenance of training colleges given below. The funds locally raised, retained and administered by the clergy for parochial purposes alone were: for the maintenance of assistant clergy, £651,418; church collections and Easter offerings for the same, £128,917; for maintenance of church services, £1,209,271; for the support of the poor, £527,868; for other purposes (religious or secular) £208,886; for fabrics and fittings of churches, £1,166,049; burial grounds, £34,354; endowment of benefices, £148,473; parsonage houses, £87,841. There is an average attendance of 1,871,000 children in Church schools, the contributions in '98 being £684,364, the interest on invested funds £109,561, and £342,371 spent on new or enlarged school buildings. The cost of Diocesan Inspection of Schools is about £15,000. There are thirty training colleges for teachers, the cost of maintenance being £14,000. The Church Schools Company was established in '83 for the purpose of providing schools for the boys and girls above the class attending elementary schools; there are now twenty-eight schools belonging to the Company, with an attendance of over 2000.

"The Crisis in the Church."

The ritual disputes and what the newspapers call "**The Crisis in the Church**" continued during '99 with more or less severity. In consequence of a report in a newspaper of a service held at St. Alban's, Holborn, on All Souls' Day, the Bishop of London wrote to Father Suckling, the vicar, calling his attention to the instructions issued by the Bishop earlier in the year, and asking for a submission of all additional services for the Bishop's sanction; this Mr. Suckling agreed to do, and subsequently the vicar stated that all the services at St. Alban's would be altered so as to be in accordance with the Bishop's wishes and orders. On Dec. 19th, '98, the Archbishop of York published a Pastoral Letter on "The Present Distress," in which his Grace gave directions on various points of ceremonial and manner of conducting services. The Bishop of London, acting in accordance with his earlier instructions, wrote at Christmas '98 to Canon Fleming, informing him that he must say the Service of Holy Communion in its entirety—a letter which called forth from the Canon (and from others of a like school of thought) protests against the mode of conduct of their services being interfered with. The proposed use of a processional cross presented to St. Paul's Cathedral brought forth loud protests from Mr. Kensit, Prebendary Webb-Peploe, and others, and in order that there should be no profanation of the services, the Dean decided not to use it for a time. 'On Jan. 13th, '99, there was a meeting of the High

Church clergy, numbering some two hundred, at the Holborn Town Hall, at which resolutions dealing with canonical obedience to the Bishops were dealt with. Copies of these resolutions were sent by the conveners of the meeting to every Bishop. In consequence of the Rev. G. Bayfield Roberts having proposed one of the resolutions, the Bishop of Worcester withdrew his licence to officiate in that diocese. On Jan. 31st a demonstration was held at the Albert Hall, convened by a united committee representing many Protestant bodies, admission being by ticket only, at which 10,000 people were present. The object of the meeting was to uphold and maintain the Protestantism of the nation. Lord Kinnaird took the chair, and he and many others attacked the "Romanising Bishops and the Romanising Governments which had successively appointed them." The Archbishop of Canterbury's name was received with hisses, and ultimately a telegram was despatched to the Queen asking her to give her Prime Minister directions to take the necessary steps in the next session of Parliament to suppress the Romish practices now in vogue in thousands of churches. At a sitting of Convocation in February the Archbishop of Canterbury stated that the Archbishop of York and himself had agreed to sit together to hear matters referred to them in accordance with the passage in the Preface to the Prayer Book. An address of confidence in the Bishops was numerously signed by influential laymen and forwarded to the Archbishops and Bishops at the end of February.

At a meeting of the members of the **English Church Union** at the Cannon Street Hotel, on February 28th, a statement was drawn up and forwarded to the Queen, the Bishops, the Members of both Houses of Parliament and others, in which the Union, after stating that they had taught nothing contrary to the Catholic Faith, declared that the Church could not, consistently with her principles, release herself from the obligations imposed upon her by her relation with the rest of the Catholic Church; that her prescribed doctrine, discipline, and ceremonial remain in force and operation; it denied the creation of a new religious establishment in the sixteenth century; it denied the right of Parliament to determine the doctrine, discipline, and ceremonial of the Church. If the nation was not prepared to recognise the Church on the lines which have always been hers, then the principles of the Church must not be bartered for the sake either of establishment or endowment. It declared that the Union in the interpretation of rubrics could not admit that omission to prescribe is equivalent to prohibition to use; what was legitimate when the Prayer Book was first used is legitimate now; and it concluded by entreating the rulers of the State not to run the risk of certain disaster by forcing upon the Church the decisions of secular courts in spiritual matters. Following this was a memorial to the Queen from the Churchmen's Union protesting against the manifesto of the English Church Union. The Bishop of Winchester wrote a letter to Lord Halifax in which he criticised the declaration, to which Lord Halifax replied.

The subject of **Confession** has been much debated both in the press and in Parliament, and many of the Bishops took occasion either to write to the priests in their dioceses, or spoke on the subject, but each of them only in

the way of counsel. With reference to the Archbishops' decision to hear ritual disputes the Church Association issued a statement saying that it was the duty of Churchmen to resist and to repudiate every attempt on the part of the Bishops to rehear personally questions already settled by the Supreme Court; and the Church Association would be no party to any such proceedings. At the sitting of Convocation an important memorial, the desirability of Reservation of the Blessed Sacrament in the cases of Communicating the Sick was presented by many influential medical men. On May 1st a deputation headed by the Duke of Rutland and Lord Egerton presented to the Archbishops of Canterbury and York at Lambeth Palace a memorial signed by 10,000 laymen of the Church expressing confidence in the Bishops and sympathy with their efforts to secure obedience to the rules of the Prayer Book. On the same day at the annual meeting of the Church Association the conduct of the Bishops was the subject of much adverse criticism by the people present. The congregation of St. Cuthbert's, Kensington, presented a memorial to the Archbishop appealing for protection.

The Archbishops' Inquiry.

The Inquiry before the Archbishops of Canterbury and York as to Incense and Processional Lights commenced at Lambeth Palace on May 7th. The clergymen whose conduct of divine service was the subject of the inquiry were the Rev. H. Westall, of St. Cuthbert's, Philbeach Gardens, London, and the Rev. E. Ram, of St. John's, Timberhill, Norwich; and the Bishops who referred the questions of interpretation of the rubrics to the Archbishops were the Bishops of London and Norwich respectively. Mr. Dibdin and Mr. T. H. L. Errington appeared as counsel for the Bishops, the experts being the Rev. Professor Collins, Mr. Franey and Mr. Sturge. The counsel for the clergy were Mr. H. C. Richards, Q.C., Mr. Hansell, and Mr. Digby Thurnam, the experts being the Revs. W. H. Frere, T. A. Lacey, W. J. Scott, and D. Stone, Messrs. Athelstan Riley, W. J. Birkbeck, T. J. Micklethwaite, and W. H. St. John Hope. The first point taken was that of Incense, and the arguments for and against its use took up the whole of five days, after which the Archbishops reserved their judgment. On June 7th the Archbishops resumed the hearing of the legality of Processional Lights: in this case Mr. Errington appeared for the Bishop of London; and Mr. Hansell for Mr. Westall; the appeal was from the Bishop of London only, the Bishop of Norwich not having in this instance referred the matter to the Archbishops; at the conclusion of the arguments, as in the last case, judgment was reserved. On July 17th the Archbishops heard the question of Reservation of the Blessed Sacrament for the Sick and Dying. Mr. Hansell, Mr. Mecklin, and Mr. Digby Thurnam appeared for the clergy, who in this case were the Rev. A. S. Altham, vicar of All Saints', Wellingborough, and the Rev. E. Lee, of Doncaster; and the Rev. J. E. Hill, a priest in the St. Albans diocese, who, though called, did not appear, as he afterwards explained, through an error. Mr. Dibdin, Mr. Kempe, and Mr. Talbot appeared as counsel for the Archbishop of York (as Diocesan of Mr. Lee) and the Bishops, and Prebendary Montague Villiers, the Rev. A. H. Holland,

the Rev. C. E. Brooke, Lord Halifax, and Drs. Symes and Cowell gave evidence in support of the clergy. On Sept. 30th the Archbishop of Canterbury gave the decision that he and the Archbishop of York had come to with regard to the 'Liturgical use of Incense and the carrying of Lights in Procession, which was shortly as follows:—There is no direction in the Prayer Book either enjoining or authorising either of these practices. Any ornament which does not fall within the limitations of the rubric when they are spoken of as ornaments to be used by the "ministers at all times of their ministration," and such as were in use in the Church of England by the authority of Parliament in the second year of Edward VI., are outside the purview of the rubric altogether. Every clergyman is bound by the 36th Canon to use the form prescribed by the Prayer Book and none other: the only authority which can bind or authorise him to make any variation is either an Act of Convocation, legalised when necessary by Act of Parliament, or by the Order of the Crown issued with the advice and consent of the Metropolitan under the Act of 1559, or a direction of the Ordinary under the Uniformity Act Amendment Act 1872. Nothing can be clearer than the words of the Act of 1559 prohibiting the use of any ceremony not ordered in the Book of Common Prayer. His Grace quoted the Act, which enacts that all the clergy are bounden to say and use the services in such order and form as is mentioned in such book, and "none other or otherwise." These last words are clearly meant to exclude all variations. This Act of 1559 was fully accepted by the Church at the time, and its authority was never questioned; and in the Manuscript Prayer Book signed by Convocation on December 20th, 1661, the Act of 1559 is set forth at full length in the beginning, and is thus formally adopted by the authority of the Church. There is nothing to prevent the use of incense for sweetening the air of a church. The three chief reasons for omitting the use of incense at Holy Communion were—the desire for greater simplicity, the desire for conformity with the New Testament account of the original institution of the Great Sacrament, and the desire for reviving the ways of the primitive Church. Yet even now the liturgical use is not by law permanently excluded from the Church's ritual. The Crown with the consent of the Archbishop of Canterbury could order it. [The Archbishops state that they are far from saying that incense is in itself an unsuitable or undesirable accompaniment to divine service, but they are obliged to come to the conclusion that its use in the public worship, and as a part of that worship, is not enjoined or permitted by the law of the Church, and it is their duty to request the clergy who use it to discontinue that use. If used at all it must be to sweeten the church, and outside the worship altogether. The same line of reasoning is applicable to the case of carrying lights in procession, and the Archbishops are obliged to request the clergy to discontinue that practice also. In conclusion the Archbishops "entreat the clergy, for the sake of the peace of the Church, which we all so much desire, to accept our decision thus conscientiously given, in the name of our Common Master, the Supreme Head of the Church, whose commission we bear."

This decision was sorrowfully received by the High Church or Catholic party, not so much on account of the decision itself as of the reason which the Archbishops gave for coming to the conclusion they did. Most of the Bishops have issued letters to their dioceses, asking those clergymen whom the decision may affect to comply with the ruling. It is only fair to say that the greater number of the clergy affected have *loyally accepted the decision*, and have agreed to carry out their Bishop's request. Sir William Harcourt wrote to the *Times* a long letter to welcome the substantial progress made. Lord Halifax as President addressed a letter to the lay members of the English Church Union, in which he criticised the decision at length, and advised that no change in the services should be made until the matter was pressed home by the Diocesan, and that the laity should stand by their clergy in whatever course the clergy might deem it their duty to take, even if they felt that they must resist the officers of the Church. This letter was the subject of much comment, and consequent upon it Dean Hole resigned his membership of the Union. The Archbishop of York, in a letter addressed to his clergy asking them to conform to the Archbishops' opinion, said that personally he regarded incense as one of the most beautiful and most significant symbols of divine service, and he felt sympathy for those clergymen who were now requested to discontinue its use. A large meeting of the English Church Union was held on October 9th, at St. James's Hall, to consider the Archbishops' opinion. An enormous crowd assembled, and hundreds were turned away from the doors. Lord Halifax, referring to the great spiritual awakening in the Church of England, now called the Oxford Movement, said it had been constantly thwarted, with hardly an exception, by the rulers of the Church: if it had not been for the resistance of the clergy and laity to the demands of the Bishops, the Oxford Movement would have been strangled long ago. Referring to the decision, he thought it would before long have vanished to the limbo to which Archbishops Tait's and Thomson's decisions have long since been consigned. If the Church be really bound by such an interpretation of such an Act of Parliament, she must free herself from bonds which are incompatible with her new life. Canon Gore moved a resolution that greater spiritual autonomy and powers of self-government should be allowed to the Church, and said a really representative Church Government was what was wanted. Canon Body, on the Archbishops' decision, said that, speaking for himself — there was only one possible position, that was absolute obedience. Father Dolling, Canon Knox Little, Mr. Athelstan Riley and Mr. P. Swain also spoke. See SESSION, sect. 9.

CHURCH OF IRELAND, THE.

St. Patrick is universally recognised as the Apostle of Christianity in Ireland, and he probably went to that country as a missionary bishop A.D. 432. He planted there a native church and raised up a native priesthood, and during the sixth and seventh centuries missionaries from Ireland poured out to Britain and other European countries. Up till the twelfth century the Irish Church was independent, but it then became subject to Rome, and so remained

till the Reformation. In 1800, by the Act of Union, the Church was united to the Church of England. In '69 the Irish Church Disestablishment Act was passed, taking effect on Jan. 1st, '71. Since then the Church has flourished in spite of the loss of the revenues and property formerly belonging to her. The government is in the hands of a General Synod composed of three distinct orders—the bishops, the clergy, and the laity. The bishops form one House, and 208 of the clergy and 416 of the laity form a Second House—the House of Representatives. Both sit together to constitute the Synod. This latter House is elected triennially by the 23 diocesan synods throughout the country. The General Synod meets annually at Dublin on the second Tuesday after Easter. The affairs of each diocese are managed by a diocesan synod acting through a diocesan council. The financial affairs of the Church are in the hands of the Representative Church Body, composed of archbishops and bishops, 13 clergymen, and 26 laymen chosen by the diocesan representatives in the General Synod, with 13 co-opted members, making a total of 65 members. This body holds the property of the Church in trust. The sum handed over by the Church Temporalities Commission to this body was £8,081,075, which comprised £7,581,075, the life annuities of the bishops and clergy paid as commutation money, and £500,000 compensation for private endowments. The funds in hand on Dec. 31st, '98, amounted to £8,077,246, and are appropriated to the following purposes: Commutation, £1,245,377; Parochial sustentation, £4,616,022; Episcopal sustentation, £567,229; Glebes purchase, £346,460; Miscellaneous purposes, £1,255,074. And there are besides balances due to parishes, etc., £47,081. Total, £8,077,246. The annuitants now only amount to about 225, and the interest on commutation capital more than pays these, so that in many dioceses 10 to 12 per cent. is paid to the clergy as bonus on their stipends. The number of clergy in the church is 13 bishops, 1200 incumbents, and 360 curates. The Church population is estimated at 600,703. The incumbents are elected by Boards of Nomination, consisting of 1 bishop, 3 diocesan and 3 parochial members. The incumbents nominate their curates. Bishops are chosen by the members of the diocesan synods, and the Primate by the bishops from amongst themselves. The average stipend of an incumbent is £200 with house, and of a curate £120. Bishops receive from £1500 to £2000, and the Archbishops £2500 with houses free of rent. The Church Sustentation Committee in London, conducted by the Misses Nugent, raise an annual sum for poor parishes in the west and south of Ireland, which needs to be largely augmented, and contributions will be received by these ladies. The Secretary of the Representative Church Body is Mr. Thos. Greene, 52, St. Stephen's Green, Dublin.

CHURCHES OF SCOTLAND.

Under this head the Established, the Free, the United Presbyterian, and the "Auld Licht" Churches are dealt with, beginning with

1. Church of Scotland.—History. Christianity was introduced into Scotland in the fourth century, and the Church that resulted differed in several respects from the rest of Western Christendom. The chief distinction lay in its

government. Three orders of clergy were recognised—bishops, priests, and deacons; but the bishops had no dioceses, and were in subordination to the abbots who presided over the great missionary college at Iona. St. Columba, the first of these abbots, like some of his successors, was a simple presbyter. Gradually the early Scottish Church assimilated to the Roman use, although it was not till the fifteenth century that metropolitans were appointed, with jurisdiction over the other sees. At the Reformation prelacy was abolished, and the Church of Scotland was constituted on its present basis. A long conflict ensued between the adherents of prelacy and presbytery, but in the end the latter prevailed, and the Reformation constitution was ratified by William and Mary, and in 1707 was confirmed by the British Parliament.—**Doctrine.** The standards of the Church of Scotland are the Confession of Faith and the Larger and Shorter Catechisms compiled by the Westminster Assembly of 1643. The doctrine they contain is Protestant and Evangelical, following the theological teaching of Augustine and Calvin.—**Polity.** The Church of Scotland is Presbyterian in government—i.e., it recognises the equal episcopacy of all presbyters. Its congregations are ruled by a board of elders or presbyters elected for life from the Church members. This is known as the Session, and the minister of the parish is *ex-officio* president. Its duties are chiefly spiritual, the temporal affairs of the Church being committed to a deacon's court, or to a board of managers, elected for a term of years. Over the Session is the Presbytery, consisting of the ministers and one elder from each congregation within a certain district. Over this again is the Synod, composed of representatives from the presbyteries of a province; and over all is the General Assembly, the supreme court of the Church, which meets yearly in Edinburgh in May. The Assembly is summoned by royal warrant, and the Queen's Commissioner is present at its sittings.—**Worship.** The Church of Scotland uses no liturgy in the conduct of public worship, but the order of service is prescribed by the Westminster Directory of Worship (1643). As this Directory has become obsolete, every minister is practically left to his own discretion in conducting the service. At present the tendency in the Church is towards greater uniformity and order, and many clergymen use the Euchologion, a service-book issued by the Church Service Society.—**Statistics.** Ministers, 1700; elders, 9400; communicants, 648,476; congregations, 1600; presbyteries, 84; synods, 16; income, £484,275, exclusive of seat-rents, bequests, tithes or tithes, and Government grants. There are 17 churches in England connected with the Church of Scotland, and 4 at popular places of resort on the Continent, and vigorous missions are carried on in India and Africa. Commissioned chaplains for Presbyterian troops are chosen chiefly from the Church of Scotland, but clergymen of the Free Church of Scotland and of the Presbyterian Church in Ireland are also eligible for appointments. In '99 the General Assembly lodged a complaint with the Secretary for India on the ground that the military authorities in India did not provide adequate church accommodation for Presbyterian troops. In '96 Her Majesty decreed that during his year of office the Moderator of the Church of Scotland should take rank with bishops of the Church of Eng-

land. Moderator for '99, Rev. Dr. Pagan Bothwell. Lord High Commissioner for '99, the Earl of Leven and Melville.

2. Free Church of Scotland.—This Church has the same government, doctrines, and worship as the Established Church, and only differs from it in receiving no State support and admitting no State control in its affairs.—**Origin.** The Free Church originated through the evils brought about by the working of the Patronage Act of 1712. This Act deprived the people of the right to choose their minister, and invested it in the heritors or patrons of each parish. A shadow of the popular right still remained in the "call" of the parishioners inviting the presentee to be their minister; but this call was sustained by presbyteries, although signed by a mere fraction of the people. The Moderates or Broad Churchmen, who were the dominant party in the Church of Scotland during the whole of the eighteenth century, were favourable to the rights of the patrons; but when, in the beginning of the present century, the Evangelicals became the majority, they attempted to enforce the popular rights. Accordingly the General Assembly of 1834 passed the **Veto Act**, declaring that no minister should be intruded on any parish contrary to the will of the people. A conflict at once ensued between the civil and the ecclesiastical courts, but in Aug. '42 it was brought to an end by the decision of the House of Lords, which practically affirmed the right of the civil courts to review and control all such proceedings in the courts of the Church. At the next meeting of the General Assembly (May 18th, '43) 474 ministers, headed by Dr. Chalmers, left the Church of Scotland and formed the Free Church. This event is known as **The Disruption**. The Free Church was speedily organised, and steps taken to build churches, mansees, and schools. The liberality, self-denial, and enthusiasm of its people carried the Free Church safely through the trying years that followed the Disruption. Since then its progress has been gradual and peaceful.—**Statistics.** Congregations, 1109; communicants, 404,828; ministers, 1144; synods, 16; presbyteries, 75; income, £713,743. There are 3 theological colleges and 3 normal schools for teachers. At the Disruption all the foreign missionaries of the Church of Scotland threw in their lot with the Free Church, which at once assumed full responsibility for their support. Its missions are in India, South and Central Africa, Syria, and Arabia. It also supports 18 Continental charges.—**Sustentation Fund.** This famous fund was established by Dr. Chalmers to insure a fixed stipend for every minister of the Church. All the members of the Free Church are expected to contribute according to their will and ability to this fund. Out of the fund each minister in '98-9 received £167, the surplus being divided among such ministers as received an official income of less than £200.—**Efforts at Union.** All attempts to unite the Free Church and the United Presbyterian Church have hitherto failed through the opposition of the Highland ministers of the Free Church, who hold strongly to the principle of a state religion, and refuse to unite with a Church that rejects it. In '76 the **Reformed Presbyterian Church** united with the Free Church. This Church (popularly known as the Cameronian) traced its descent to the Covenanters who refused to conform to the State Church because

at the Revolution of 1688 the Covenant was not enforced. Patronage in the Church of Scotland was abolished by Act of Parliament in 1874, and thus the chief cause of the Disruption, and the principal obstacle that prevented the Free Church from uniting with the Established, was removed. But as by that time the majority of the Free Church Assembly had adopted "voluntary" principles, and were therefore opposed to State connection of any kind, the Assembly has repeatedly declared that no union is possible so long as the mother Church is established by the State. In '92 a **Declaratory Act** was passed by the General Assembly of the Free Church, giving a liberal interpretation to the doctrines of the Westminster Confession of Faith. In '93 four ministers and about a thousand members of the Free Church in Skye and Inverness seceded from the Church, because of the adoption of the Declaratory Act, and constituted the "**Free Presbytery of Scotland.**" They now claim to have 5000 adherents. In '96 the General Assembly unanimously agreed to reopen union negotiations with the United Presbyterian Church on the invitation of the latter. In '97 both Churches agreed to appoint committees to draw up a basis of union. In '99 the terms of union were approved by both Churches. It is hoped that the union will take place next year. Moderator of the Free Church for '99, Rev. James Stewart, M.D., D.D., Lovedale, South Africa.

3. United Presbyterian Church.—This Church was constituted in 1847 by the union of the Secession and the Relief Churches. The Secession Church owes its origin to the obnoxious Patronage Act of 1712, which deprived the parishioners of their right to elect their minister, and vested the right in the heritors or patrons of the parish. A number of violent settlements followed, and it became common for ministers to be inducted with the aid of dragoons. Many appeals and petitions against such action were sent to the General Assembly, but the Moderates or Broad Churchmen, who then formed the majority of the court, decided in 1730 to receive no further complaints. Two years later the Rev. Ebenezer Erskine, of Stirling, publicly protested against this act of the Assembly. For this he was immediately censured, and soon after was deposed from the ministry. Along with seven other ministers, who supported his action, he made a secession from the establishment, and constituted a new Church, which from its origin was strongly evangelical. The growth of the Church was long retarded by many unhappy divisions among its members, but these were finally healed, and at the union with the Relief Church in '47 the original 7 congregations had increased to 384.—**Relief Church.** After 1747 the Moderates in the Church of Scotland showed a disposition to deprive the people of all right to interfere in the election of their ministers. In 1749 a crisis was reached in the presbytery of Dunfermline, for this court refused to proceed with the settlement of a minister contrary to the wishes of the parishioners. The General Assembly commanded the presbytery to induct the presentee, but six ministerial members refused to obey. One of these, the Rev. Thomas Gillespie, of Carnock, was singled out for punishment, and in 1752 he was deposed from the ministry. In 1758 the Rev. Thomas Boston, of Jedburgh, joined Gillespie, and in 1761 the people of Colinsburgh,

in Fife, formed the third congregation. As they all sought relief from patronage, they adopted the name of the Relief Church. This Church kept in close touch with English Nonconformity, and became more liberal in doctrine and spirit than its sister Churches in Scotland. At its union with the Secession Church it numbered 113 congregations.—**Constitution of the United Presbyterian Church.** In doctrine and worship it agrees with the Established and Free Churches, as it also does in government, with this exception, that it has no intermediate courts between its presbyteries and its supreme court, and the latter is not called an Assembly, but a Synod.—**Statistics.** Presbyteries, 29; congregations, 583; communicants, 197,476; ministers, 614; income, £423,106. There is a well-equipped theological college in Edinburgh, and extensive missions are supported in India, China, West and South Africa, and in the West Indies. In '97 the United Presbyterian Church celebrated its Jubilee. Moderator for '99, Rev. John Robson, D.D., Aberdeen.

4. United Original Secession Church, popularly known as "**Auld Lights.**"—This Church was constituted in 1842 by the union of two small bodies that had separated at different times from the Secession Church. The "**Auld Lights**" are severely orthodox in theology and simple in worship. They believe in the principle of a union between Church and State.—**Statistics for '99.** Churches, 30; ministers, 27; elders, 180; communicants, 3668; income, £6030. Moderator, Rev. A. J. Yuill, Glasgow.

Church Rates. Originally, like tithes, a charge upon the land of a parish for the maintenance of the church fabric. In later years levied as a rate, and paid by occupiers. Nonconformists having objected to them, they were abolished in 1868. The churches and services are now provided and maintained solely by Churchmen and Church endowments, whereby all apparent injustice to Nonconformists is entirely removed, and the rights of Nonconformist parishioners in the church fabric are not impaired. The Act of '68, however, did not abolish church rates in cases where, at the time of the passing of the Act, money had been borrowed and remained due on the security of the church rate, or where the rate was applicable to purposes other than "**ecclesiastical purposes**" as defined by the Act, or had been originally authorised to be levied by special legislation in consideration of the abolition of tithes or for other valuable consideration. In several parishes voluntary church rates are levied, principally for the purpose of paying the interest and principal in respect of loans raised on the security of that rate prior to the passing of the Act of '68, but occasionally for the purpose of defraying vestry expenses.

Church Reform League, The, was inaugurated at the Church House, Westminster, on Nov. 27th, 1895, and includes amongst its supporters several of the bishops and a considerable number of leading clergy and laity. It is concerned solely with Church reform; it is in no sense a party organisation; it is entirely non-political, and it does not deal with questions of doctrine. The League advocates various reforms concerning the position of the laity, discipline, patronage, and finance; but its foundation principle is that Church reform should be carried out by the Church herself through her own assemblies. It maintains that, saving the supremacy of the Crown

according to law, and, in respect to legislation, subject to the veto of Parliament, the Church should have freedom for self-government, by means of reformed Houses of Convocation (which should be thoroughly representative, with power for the Canterbury and York Convocations to sit together if desired), together with a representative body or bodies of the laity. **General Secretary**, Alfred Holdsworth, Esq., Office, Church House, Dean's Yard, Westminster.

Cinque Ports, The. A group of seven ports (originally five, whence the name) situated on the south coast of England (in Sussex and Kent). **Hastings, Romney, Hythe, Dover and Sandwich** were the original ports, **Winchelsea and Rye** being added afterwards. The original Cinque Ports were created by William the Conqueror, and were endowed with various important privileges in consideration of their furnishing a certain quota of ships of war, for the king's use, when demanded. The **Lord Wardenship** is now only an honorary dignity. Its holders have no special jurisdiction. The **Marquis of Salisbury** is the present Lord Warden, and was installed in his office Aug. 15th, '96.

City and Guilds of London Institute for the advancement of technical education. This Institute was established by the Corporation and Livery Companies of the City of London to promote the applications of science and art to productive industry. The Institute consists of a Board of Governors, a Council, and an Executive Committee. The total income amounts to about £35,000 a year. The operations of the Institute are divided under the following heads:—(1) The **City and Guilds' Central Technical College** at South Kensington, the object of which is to give London a college for higher technical education in which advanced instruction is provided in those kinds of knowledge which bear upon the different branches of industry; the main purpose of the instruction given is to qualify students to become mechanical, civil, electrical and chemical engineers, technical teachers, principals, superintendents, and managers of chemical and other manufacturing works. It was built and equipped at a cost of over £100,000, and was opened in '84. (2) The **City and Guilds' Technical College**, Finsbury, is an intermediate college, with which have been incorporated the provisional classes started in the Cowper Street Schools in '79, and the City School of Art. The college includes day classes for those who are able to devote two or three years to systematic technical education, and evening classes for those who are engaged in industrial or commercial occupations in the daytime, and who desire to receive supplementary technical instruction in the evening. It fulfils therefore the functions of a finishing technical school for those entering industrial life at a comparatively early age; of a supplementary school for those who are already engaged in workshops; and of a preparatory school for the City and Guilds' Central Technical College. It was opened in '83, the building and equipment having cost about £40,000. (3) The **South London School of Technical Art**, Kennington Park Road, provides instruction in the following subjects: modelling, drawing and painting from the life, and house decoration. (4) The **Leather Trades' School**, in Bethnal Green Road, is entirely an evening

school for apprentices and others engaged in boot and shoe manufacture. The school is conducted by a joint committee of the Institute, the Leathersellers' and Cordwainers' Companies, and the Boot and Shoe Manufacturers' Association. (5) **Technological Examinations**, the objects of which are to encourage the formation of technical classes throughout the country, and, by the publication of carefully prepared syllabuses for the guidance of the committees and teachers of these classes, to place the teaching on a sound educational basis. The examinations are held during the month of May in over sixty different subjects. (6) The Institute co-operates with the London School Board on the joint committee on Manual Training, which was formed for the purpose of introducing manual training, both for boys and girls, into elementary schools in the Metropolis. **President**, H.R.H. the Prince of Wales; **Chairman of Council**, The Right Hon. the Earl of Halsbury, Lord Chancellor; **Chairman of the Executive Committee**, Sir F. Abel, Bart., K.C.B., F.R.S.; **Treasurer**, E. L. Beckwith, Esq.; **Hon. Sec.**, Mr. John Watney; **Assist. Sec.**, Mr. A. L. Soper. **Head Office**, Gresham College.

City Churches Preservation Society, The, founded in 1894, has been instrumental in saving St. Mildred's, Bread Street, E.C., and St. Mary Woolnoth, from demolition. The Society considers that to destroy any of the beautiful City churches would be unnecessary, and an act of vandalism. **Chairman**, Mr. H. C. Richards, Q.C., M.P.; **Hon. Sec.**, Mr. Alfred Moore, 7, Leadenhall Street, E.C.

City Companies. See LONDON, LIVERY COMPANIES OF.

City of London College. This institution (known as the Metropolitan Evening Classes at Crosby Hall) was founded in 1848 by the Rev. Charles Mackenzie, M.A., and was constituted the City of London College in '60. The building in White Street, Moorfields, was erected at a cost of £16,000 (in '83). It is now a constituent Institute of the "City Polytechnic." Evening classes are held in the various branches of science, literature, art, and commerce. There are large and commodious chemical and biological laboratories, also Art studios, to meet the requirements of the students. There are also a good library and a spacious reading-room. **Principal**, Sidney Humphries, B.A., LL.B.; **Secretary**, Mr. D. Savage.

City of London Police. See POLICE.

City of London School, Thames Embankment. Established by the Corporation of London in 1834. Tenable at the Universities or other places of higher education are 26 **scholarships** varying from £80 to £20; and about 20 others tenable at the school. Pupils admitted between the ages of 7 and 15. The average number in '98-9 was 698. **Head Master**, Mr. A. T. Pollard, M.A. Its distinguished alumni include: the late Sir J. R. Seeley, K.C.M.G., the Rt. Hon. H. H. Asquith, M.P., Sir Andrew Scoble, Sir George Newnes, the Rt. Hon. C. T. Ritchie, M.P., Dr. Huggins, Rev. E. A. Abbott, D.D., W. S. Aldis, J. S. Reid, D.Lit., D.Sc. **Secretary**, Mr. A. J. Austin.

Civil and Mechanical Engineers' Society, The, was established in 1859. The meetings are held in the Hotel Victoria, Northumberland Avenue, S.W., on the first Thursday in each month. The '99-1900 session commenced Nov. 2nd, '99, and will end June 7th, 1900. The

President is Mr. B. Baines Dudley, A.M.I.C.E., and the Hon. Sec., Mr. A. S. E. Ackermann, A.M.I.C.E., M.S.I. The offices are at 53, Victoria Street, Westminster, S.W.

Civil List, The, is the annual grant of Parliament to the monarch, the yearly sum now being £385,000, the whole of which is devoted to Her Majesty's household and personal expenses, with the exception of £1200, which may be granted in pensions. The grant originated in the reign of William and Mary, and covered the payment of civil offices and pensions, when the amount was £700,000, £400,000 being derived from the Crown revenues and £300,000 from excise duties. Since this resulted in debt on the part of the king, the Court of Exchequer decided that, if he chose, the king could alienate his whole revenue. The List, after having reached £800,000, and in 1777 (George II.) £900,000, was, on the accession of William IV., cleared of all salaries, etc., upon it, and placed at £510,000, including a pension list of £75,000. The purposes to which the pensions were applied were, in 1834, limited to the deserving and needy; and in 1838, the year of Queen Victoria's coronation, it was provided that, in place of a grant of £75,000 for civil list pensions, "Her Majesty should be empowered to grant in every year new pensions on the civil list to the amount of £1200, all such pensions to be in strict conformity with the House of Commons' resolutions of 18th February, 1834" (1 Vict., c. 2).

Civil Service. One of the oldest institutions of the country, and probably dates from the earliest monarchical times. It is only within perhaps the last hundred years that the English Civil Service has assumed its present vast proportions. The Civil Service comprises all persons who serve the Queen in a civil capacity, as opposed to those employed in the military and naval services. The total number of persons so employed cannot be far short of half a million. The chief department of the Civil Service is the **Treasury**, which exercises a control over all other departments, and from whom alone authority is obtained for all expenditure. Perhaps next in importance is the **Exchequer and Audit Department**, which is charged with the audit of the accounts of all other departments, and is required to see that the expenditure of each is in accordance with the authorities received from the Treasury. The **Foreign Office** (including the diplomatic service), the **India Office** and the **Colonial Office**, together with the **Home Office**, probably rank next amongst the numerous departments of the Home Civil Service. The three revenue departments—namely, the **Post Office**, **Inland Revenue**, and **Customs**—are of course important branches of the service; there are also, amongst what are known as the **spending departments**, the **War Office**, **Admiralty**, **Board of Trade**, **Office of Works**, **Education Office**, **Privy Council Office**, the **Stationery Office**, and many other smaller offices.—Most of the clerkships in the Civil Service are now thrown open to public competition, and the various offices are grouped into two grades. The recommendation of the **Playfair Commission** which sat in 1874 to inquire into the Civil Service—namely, that the Service should be divided into a **Higher** and a **Lower Division**, with a specified scale of salaries irrespective of office for each division—has never been fully carried out. Most of the better-class offices are grouped under Grade I., and the remainder under what

was formerly known as Grade II.; in these latter, however, most of the vacancies are being filled up by the appointment of Lower Division clerks under the **Playfair scheme**. The Civil Service Commissioners conduct the examinations not only for home services, but also for Indian, military, naval, and colonial services. During '98 they examined 35,580 candidates in all. There were 211 competitions for the home services, of which 96 were open competitions. Full particulars of all examinations for the Civil Services, and of the situations to be competed for, can always be obtained on application to the **Civil Service Commission**, at Cannon Row, S.W. (Annual report is published by Eyre & Spottiswoode.) For details see **FINANCE, NATIONAL**; see also **INDIAN CIVIL SERVICE**.

Clarke, Sir Edward, M.P. See under **COMMONS**.

Clergy, Deceased (Dec. '98—Nov. '99). See **OBITUARY**.

Clerk of the Parliaments. See **PARLIAMENTS, CLERK OF THE**.

Clifford, Rev. John, M.A., LL.B., B.Sc., F.G.S., D.D., ex-President of the Baptist Union, President of the National Council of Free Evangelical Churches '98, was b. Oct. 16th, 1836, at Sawley. In Feb. '93, during the course of a lecture, he stated that when a boy of eleven he was a "threader" in a lace factory, and had often worked from 4 a.m. on the Friday till 6 p.m. on the Saturday. In '55 he entered the General Baptist College. After his third year at the College he accepted an invitation from the Praed Street church, Paddington. He graduated B.A. at London University in '61, B.Sc. with honours in Logic and Philosophy, and in Geology in '62, in '64 taking the degree of M.A. (bracketed first); and in '66 that of LL.B. with honours in the Principles of Legislation. The honorary degree of D.D. was conferred on him in '83 by Bates' University, U.S.A. His growing success at Praed Street led to the erection of **Westbourne Park Chapel**, which was opened Sept. '77, and in which he still continues to minister. He visited Australia and the States during '97. His works include the following: "Is Life worth Living?" "The Dawn of Manhood," "Daily Strength for Daily Living," "Christian Certainties," "The Inspiration and Authority of the Bible," "Typical Christian Leaders," "Social Worship," and "God's Greater Britain." Address: 50, St Quintin Avenue, North Kensington.

Clifton College, Bristol. Opened 1862, received charter '77. It is under a Council of fifteen, the Earl of Ducie being President, and the Bishop of Hereford Chairman of the Council. It has classical, modern, and military sides, and Junior and Preparatory Schools; and prepares pupils specially for Woolwich, Sandhurst, and Cooper's Hill, also for the Royal Navy. Three exhibitions, of £25, which may be increased to £50 a year, tenable at the Universities, and at least eleven scholarships, varying in value from £25 to £80 and admitting of augmentation to £100 a year, tenable at the College, offered annually. Pupils, 600. **Head Master**, Rev. Michael George Glazebrook, M.A. **Secretary**, W. D. L. Macpherson. Motto, *Spiritus intus alit*.

Closure. See **PARLIAMENTARY PROCEDURE. Clubs for Ladies.** See the **Alexandra**, the **Denison**, the **Somerville**, the **University**, the **Pioneer** and other Clubs in the list of **CLUBS**.

Coal. For a commercial review of the industry during the year see TRADE, '99, and for a general and statistical article on the subject see MINING.

Coburg. Duke of Saxe-Coburg, late Duke of Edinburgh. See SAXE-COBURG.

Cochin-China. Lower or French Cochin-China consists of a portion of the old Annamese province of Champa, and comprises the whole of the Mekong delta, but comprehends little or none of Cochin-China proper. Area, 23,082 sq. m.; pop. 2,034,453. Capital, Saigon. The country is divided into 21 districts, each administered separately by a French officer, and is represented by one deputy at Paris. The French population numbers about 5000, and there is an army of occupation of 1830 French troops, besides about 3000 Annamese soldiers. Successful attempts have been made to develop the colony. The chief product is rice, but cotton, pepper, and copra are also exported. See ANNAM, COLONIES, ETC., OF EUROPEAN POWERS, and INDO-CHINA.

Cocos (or Keeling) Islands. A dependency of the Straits Settlements (*q.v.*).

Colombia. A republic of Central America, formed by the union in 1861 of nine states as the "United States of New Granada," which in '63 became the "United States of Colombia." After the termination of the revolution, which prostrated the country in '84-5, a new constitution was promulgated in Aug. '86 by the National Council of Bogota. By this constitution the independence of the nine states was abolished, a central authority was set up, and the country was styled the "Republic of Colombia." The nine states are now simple departments, their presidents being reduced to governors under the direct nomination of the President of the Republic, whose term of office is six years. The Senate, as before, consists of 27 members, 3 from each department, and the House of Representatives of 66 members, elected by universal suffrage, each department forming a constituency and returning one member for 50,000 inhabitants. Industries are

chiefly confined to agriculture and the rearing of cattle. The great attraction of Colombia is its mineral wealth. Rich mines of gold, silver, iron, copper, lead, etc., and precious stones exist in the country. **Area**, 513,845 sq. miles; **population** about 6,000,000. **Capital**, Bogota. **Estimated revenue**, '97-8, \$37,461,000; **expenditure**, \$41,429,180; **foreign debt**, with several years' accumulated interest, about £2,700,000, chiefly due to English creditors; **imports**, '98, \$11,346,028; **exports**, \$19,735,733. See DIPLOMATIC.

Colonial College, The, is situated at Hollesley Bay, on the coast of Suffolk, and the instruction of the pupils is admirably adapted to its object—the training of youths for colonial life. Pupils are received from the public schools, etc., and turned into practical, handy men, able to use their eyes and hands as well as their brains. There is a large estate, covering 2000 acres, of arable, pasture, and wood land, with a dairy of fifty cows, as well as fruit, vegetable, and nursery gardens. The scientific teaching is under the charge of professors in each of the various departments, from veterinary science to surveying and other branches of instruction. Since '87 over six hundred students have passed through the College. The College Magazine, *Colonia*, published three times a year, contains valuable and impartial information concerning the Colonies, supplied by the old students of the College.

Colonial Institute. See ROYAL COLONIAL INSTITUTE.

Colonial Loans Bills and Colonial Loans Act, '99. See SESSION, sect. 44.

Colonial Office. The authority of the Crown throughout our colonial dependencies is exercised by the **Secretary of State for the Colonies**, now the Rt. Hon. Joseph Chamberlain, M.P., who took office in Lord Salisbury's Government in July '95. Governors of colonies are selected from those whose names he submits for the Queen's approval; the enactments of all colonial legislatures come before him for approval or disallowance, and in some cases the veto has been exercised; and in his office the constitution of new colonial legislatures is planned. The direct executive action of the department is mainly confined to Crown colonies, protectorates, etc. (for a full list of which see BRITISH EMPIRE, table). In the self-governing colonies the department is consulted on such points as extradition, copyright, and commercial treaties. An **Emigrants' Information Office** (*q.v.*) is attached to the department. Crown colonies are represented in London by Crown Agents, and colonies having responsible governments by Agents-General. The names of the Crown Agents and a list of the colonies on whose behalf they act and whom they represent, will be found under the heading "Colonies" in the DIPLOMATIC article. The names and offices of the various Agents-General will also be found in the same article under the alphabetical headings of the various colonies which they represent. The **British Settlements Act '87** enables Her Majesty in Council to provide for the government of her possessions acquired by settlement, and by Order in Council to establish all such laws and institutions, and constitute such courts and officers, and make such provisions and regulations for the administration of justice as may appear to be necessary.

Commercial Intelligence Office. See TRADE, BOARD OF.

Commissionaires, Corps of. The members of this institution, which was founded in 1859 by Captain Sir E. Walter, K.C.B., are retired soldiers and sailors of Her Majesty's regular forces. At first the Corps was composed of wounded men who had served in the Crimea and Indian mutiny; but very shortly the demand for the services of Commissionaires led to an increase in the number, which has been steadily maintained, and now exceeds 2500. There are divisions in Belfast, Birmingham, Edinburgh, Glasgow, Leeds, Liverpool, Manchester, Newcastle-on-Tyne, Nottingham, and Cardiff, all being subject to the same discipline and regulations. The men are employed in every capacity where high qualifications are required, and thus may be engaged for permanent or temporary service. Office, 419, Strand, W.C.

Commons Act. See SESSION, sect. 45.

COMMONS, HOUSE OF.

I. ALPHABETICAL AND BIOGRAPHICAL LIST OF MEMBERS.

II. ALPHABETICAL LIST OF CONSTITUENCIES AND POLLINGS.

(With Summary Tables showing State of Parties since '86 and the Representation of the Metropolis.)

With certain exceptions any male of full age may be elected to represent a constituency in the House of Commons. English and Scotch peers are entirely disqualified, but Irish peers may be returned for any constituency in Great Britain. All English, Scotch, and Irish judges; clergymen of the Established Church of either of the two kingdoms; Roman Catholic priests; the holders of various offices specially excluded by statute (including revenue officers); persons who have been convicted of certain offences; aliens (unless a certificate of naturalisation has been granted to them by the Secretary of State, and they have taken the oath of allegiance); imbeciles; Government contractors (except contractors for Government loans); and sheriffs and returning officers within the constituencies for which they act,—all these are disqualified. No candidate requires any property qualification, and no member receives any payment or allowance whatsoever from the country for his service in the House or on any committee thereof. The Speaker (*q.v.*) is the first to take the oath and subscribe the roll in a new House of Commons, and is followed by the other members, who come to the table without any ceremony, and are presented to him by the clerk. Members returned after a general election are introduced by two other members. The form of oath taken is as follows: "I, ———, do swear that I will be faithful and bear true allegiance to her Majesty Queen Victoria, her heirs and successors, according to law. So help me God." Quakers, Moravians, Separatists, and others

are permitted to make an affirmation to the same effect as the oath; and by 51 & 52 Vict., ch. 46, every person upon objecting to being sworn, and stating, as the ground of such objection, either that he has no religious belief, or that the taking of an oath is contrary to his religious belief, shall be permitted to make an affirmation instead of taking an oath in all places and for all purposes where an oath is and shall be required by law. Succession to a peerage of England, or of Great Britain, or of the United Kingdom, disables the person so succeeding from being elected to, or from sitting or voting in, the Commons. A seat in the House is vacated by death, or on acceptance of any office of profit under the Crown; and there are also certain disabilities attached to bankruptcy. All the principal members of the Government, on accepting office, vacate their seats, and are eligible for re-election; but the vacating rule does not apply to such offices as Secretary to the Treasury or other similar appointments which are not held direct from the Crown. A change from one office held direct from Crown to another does not involve going again to the constituency. In theory a member cannot resign, but he can accept the office of honour or profit under the Crown of the stewardship of the Chiltern Hundreds, or of the manors of Northstead, which is granted to him by the Chancellor of the Exchequer, and resigned immediately its purpose is served. When a seat becomes vacant during a session, a new writ is moved for at the commencement of an ordinary sitting, generally by one of the whips of the party to which the late member belonged. Provision is also made for the issue of writs during the recess without the intervention of the House, it being enacted that the Speaker may, on the production of a certificate signed by two members that a member has died, or accepted an office held direct from the Crown, or has been called to the House of Lords, or that the seat has become vacant by the bankruptcy of a member, order a writ to be issued for a fresh election to fill the vacancy thus caused. But a writ may not be issued during the recess on the acceptance of the Chiltern Hundreds or of the like offices. The Lunacy (Vacating of Seats) Act, 1886, provides a procedure by which the seat of any member who may have been received into a lunatic asylum shall be declared vacant.

The Act of Union with Ireland increased the number of members of the House of Commons to 658, and though it stood nominally at this figure until the end of the Parliament of '80-85, the disfranchisement of 4 constituencies returning 6 members, and the suspension of 12 writs in 7 cities and boroughs, had reduced the total of members to 640. The Redistribution Act did not alter the apportionment of members to Ireland or Wales, but increased the number returnable by Scotland from 60 to 72, and these 12 new seats being added to the nominal number of the House brought it up to 670.

COUNTRY.	Population 1891.	Electors 1899.	M.P.s (actual) 1899.	M.P.s (by pop.) 1899.	M.P.s (by electors) 1899.
England	27,484,394	4,917,980	465	488	499
Wales	1,518,131	290,157	30	27	30
Scotland	4,025,647	671,128	72	71	68
Ireland	4,704,750	721,018	103	84	73
United Kingdom	37,732,922	6,600,283	670	670	670

From these figures it may be easily seen that if the 670 seats were proportionately redistributed (1) according to population in '91, England would gain 23 seats, Wales would lose 3, Scotland would lose 1, while Ireland would lose 19 seats; and that (2) according to numbers of electors England would still gain, in fact she would be even better represented if the seats were allotted on this basis, as she would be entitled to 34 more; Wales would neither gain nor lose; Scotland would lose 4 seats and Ireland 30. The calculations include the University representation. A word as to the parts of the House which the different sections of members occupy may be added here. The benches are fixed in two long rows, extending on either side from the chair to the bar, and each row is divided midway by a narrow passage known as the gangway. The front bench to the right of the chair and above the gangway is the **Treasury Bench**, and upon it sit the leader of the House and as many of his Ministerial colleagues as can find accommodation there. The other benches on the Ministerial side are occupied by supporters of the Government, Conservatives and Liberal Unionists, also. In the last Parliament but one ('86-92) the Liberal Unionists sat on the Opposition benches, which are to the left of the chair, with the Liberal members; on the change of Ministry in '92 they crossed the floor with the Liberals, two benches below the gangway being by arrangement set apart for their use. From '80 the Nationalists have always sat in opposition; they retained their places on this side when the Liberals took office in '92. Thus, during the Home Rule debates of '93, the Nationalists who supported the Government sat on the Opposition side, while the Liberal Unionists, who opposed, spoke from the Ministerial side. By ancient custom the two members for the **City of London** sit on the **Treasury Bench** on the first day of the meeting of a new Parliament. The legislative duties of Ministers are familiar to most readers, but a word or two concerning some of them may be said here. If the **Secretary for War** and the **First Lord of the Admiralty** are peers, the Financial Secretary to the War Office generally, and the Secretary to the Admiralty, have charge of the Estimates. The **Education Estimates** for England and Wales are introduced by the Vice-President. A goodly number of the **Civil Service Estimates** are in charge of that hardly-worked official, the **Financial Secretary to the Treasury**; and he is bound to be well up in a large mass of detail, not only as regards them, but other Parliamentary matters, for he arranges the course of Government business in the House of Commons. The **Patronage Secretary** as principal Ministerial whip endeavours to secure a good attendance of members of his own side when Government business is being transacted, issuing on important occasions **summonses**, which are also called **whips**, and which, according to the urgency of the case, are emphasised by three, four, or five underlines. He is aided in his important party duties by the Junior Lords of the Treasury and the holders of subordinate Household appointments, or some of them; and with their assistance, too, he tells for the Government in divisions (*q.v.*). See PARLIAMENT AND PARLIAMENTARY PROCEDURE, SPEAKER, ELECTION, etc.

1. Alphabetical and Biographical List of Members.

(Revised to Nov. '99.)

The following is a list of members of the House corrected to Nov. 13th, '99. The names of those returned at the General Election of '95 who have since, for any reason, ceased to be members will be found alphabetically arranged at the end of this list. A prefixed * denotes that the member was in the last Parliament.

A list of the pollings in the various constituencies will be found on pp. 159-170; and on p. 171 there is given a summary showing the state of parties at successive periods down to Nov. 14th, '99. See also POLITICAL PARTIES (UNITED KINGDOM), and SESSIONS, PARLIAMENTARY, '99.

***Abraham, W. (L.)**, elected for Glamorganshire, Rhondda D., '95; sat for same constit. '85-95; s. of the late Mr. T. Abraham, collier and copper smelter; b. '42; E. Fermanagh, for which county he served the office of High Sheriff in '84. Riversdale, Ballinamallard, co. Fermanagh. *Carlton*.
- Arnold, Alfred (C.)**, elected for Halifax '95; *y. s.* of the late Rev. Frederick Arnold, rector of Brimington, Derbyshire; *b.* '35; *E.* Sidney Sussex College, Camb.; called to the Bar, Inner Temple, '78, joining Northern Circuit; J.P. for West Riding, Yorks. Clare Hall, Halifax. *Carlton and Junior Constitution*.
- ***Arnold-Forster, H. O. (L.U.)**, elected for Belfast, West, '95; sat for same constit. '93-5; 2nd *s.* of the late Mr. W. D. Arnold, Director of Public Instruction in the Punjab, and adopted son of the late Right Hon. W. E. Forster; *b.* '55; *E.* Rugby and University College, Oxford (B.A. 1st class in History); Lincoln's Inn '79; North-Eastern Circuit; Director of Cassell & Co., Ltd. 9, Evelyn Gardens, S.W.
- Arrol, Sir W. (L.U.)**, elected for Ayrshire, South, '95; *s.* of Mr. Thomas Arrol, of Glasgow; *b.* '39; when only eight years old was a piercer in a cotton mill; afterwards apprenticed as a blacksmith; now partner in the firm of William Arrol & Co., contractors and engineers, the contractors of the new Tay Bridge and Forth Bridge; created a knight at the opening of the latter '90; J.P. for Ayrshire, and Hon. LL.D. Glasgow. Dennistoun, Glasgow, and Seafield, Ayr.
- ***Asher, A. (L.)**, elected for Elgin Burghs '95; sat for same constit. '81-95; 2nd *s.* of the late Rev. W. Asher, D.D., Inveravon, Banffshire; *b.* '35; *E.* Elgin Academy and Aberdeen and Edinburgh Universities; called to the Scotch Bar '61; Advocate Depute '69-74; Q.C. '81; Solicitor-General for Scotland '81-5, '86, and Aug. '92-March '94; D.L. for Edinburgh City and County; LL.D. for Aberdeen and Edinburgh Universities; Dean of the Faculty of Advocates of Scotland '95. Heriot Row, Edinburgh. *Brooks's, Reform, and Devonshire*.
- ***Ashmead-Bartlett, Sir E. (C.)**, elected for Sheffield, Ecclesall D., '95; sat for Eye '80-85, and Ecclesall '85-95; *e. s.* of the late Mr. Ellis Bartlett, of Plymouth, New England; *b.* '49; *E.* Torquay and Christ Church, Oxford (B.A. 1st class Final Schools '72, M.A. '76); called to the Bar, Inner Temple, '77; formerly in the Privy Council Office; Civil Lord of the Admiralty '85 and '86-92, 22A, St. James Street, S.W. *Carlton, Wellington, and St. Stephen's*.

- Ashton, T. G. (L.)**, elected for Bedfordshire, South, or Luton D., '95; sat for Cheshire, Hyde D., '85-6; *e.s.* of the late Mr. Thomas Ashton, J.P., D.L., of Hyde, and Ford Bank, Lancs.; *b.* '55; *E. Rugby and University College, Oxford* (M.A. '82); J.P. for Lancashire and Cheshire. Ford Bank, Lancashire, and Hyde, Cheshire. *Brooks's, Reform, and New University.*
- ***Asquith, Right Hon. H. H. (L.)**, elected for Fife, East, '95; sat for same constit. '86-95; *b.* '52; *E. City of London School and Balliol College, Oxford*, where he graduated B.A. '74, 1st class Classics, Craven University Scholar, and Fellow of Balliol; called to the bar, Lincoln's Inn, '76. His maiden speech in Parliament attracted much attention, and has been followed by successes on the public platform and at the Bar. He was engaged with Sir C. Russell on behalf of Mr. Parnell at the **Parnell Commission**, Q.C. '90. He appeared also in the "Baccarat" trial, '91. The honour of moving the amendment to the Queen's Speech, on which the division that displaced Lord Salisbury's Government in Aug. '92 took place, was given to Mr. Asquith, and he was afterwards appointed to the important post of **Home Secretary** (salary £5000 per annum) in Mr. Gladstone's late Government, and sworn of the Privy Council. He scored several successes in the course of the Home Rule debates, and rose rapidly to the first rank in the House. It was his ill fate to incur a certain amount of disapproval for his conduct during the frequent labour disputes of '93, but his firm and consistent attitude commanded the approval of the House and the country generally. He was entrusted with the conduct of the Disestablishment of the Church of Wales Bill, which he introduced during the '94 session. He also intervened in the cab strike which occurred in May and June, and settled it by an award which, on the whole, satisfied both parties. His marriage with Miss Margot Tennant, daughter of Sir Charles Tennant, took place on May 10th, '94, and was a most brilliant ceremony. Mr. Gladstone and most of Mr. Asquith's Ministerial colleagues were present. Mr. Asquith of course left office with his colleagues on the defeat of the Rosebery Ministry in June '95, and he has since resumed practice at the bar. In a speech which Lord Rosebery made at Edinburgh in '96, after resigning the leadership of the party, he specially designated Mr. Asquith as destined to high office in the future. *Brooks's, Athenæum, and National Liberal.*
- ***Atherley-Jones, L. (L.)**, elected for Durham, North-West, '95; sat for same constit. '85-95; 3rd s. of the late Ernest Jones, Chartist; *b.* '49; *E. Manchester Grammar School and Brasenose College, Oxford* (B.A. '74); called to the Bar, Inner Temple, '75; North-Eastern Circuit. 25, Pembroke Road, Kensington, and 4, Paper Buildings, E.C. *Devonshire, Savage.*
- Atkinson, Right Hon. J., P.C. (C.)**, elected for Londonderry, North, '95; *b.* '44; called to the Irish Bar, King's Inns, Dublin, '65, and English Bar, Inner Temple, '90; Q.C. '80; Bencher of King's Inns '85; Solicitor-General for Ireland '89; Attorney-General and Privy Councillor for Ireland '92; reappointed Attorney-General for Ireland '95. 68, Fitzwilliam Square, Dublin.
- Austin, Sir John, Bart. (L.)**, elected for Yorkshire, West Riding, East or Osgolders D., '99; sat for same constit. '86-95, '95-9; s. of the late Mr. John Austin, of Kippax, Yorks; *E. Kippax Grammar School*; J.P. for West Riding, Yorks; Chairman of Visiting Committee of County Justices for York Castle; formerly Chairman of the Castleford School Board. In the first Session of '99 Sir John resigned his seat, owing to a vote of censure being passed upon him (by a majority of one) by the Osgolders Liberal Association, at a meeting convened to consider his action in voting against the Scotch Local Veto Bill and the Church Discipline Bill; he, however, stood for re-election, and came out head of the poll by 2925 votes. Red Hill House, Castleford, Normanton.
- ***Austin, M. (N.)**, elected for Limerick, West, '95; sat for same constit. '92-5; member of the Labour Commission. 55, Doddington Grove, Kennington Park.
- ***Bagot, Captain Josceline (C.)**, elected for Westmorland, Kendal D., '95; sat for same constit. '92-5; *e. s.* of the late Colonel C. Bagot; *b.* '54; entered the Grenadier Guards '74; *m.* '85 Theodosia, dau. of Sir John Leslie, Bart.; retired Captain '86; J.P., D.L., and C.C. for Westmorland; Major Westmorland and Cumberland Yeomanry; formerly aide-de-camp to Marquis of Lorne when Governor-General of Canada '82-3, and to Lord Stanley of Preston '88-9; moved Address '99; Parliamentary private secretary to Financial Secretary to Treasury '97-8, and to Home Secretary since '99. Levens Hall, Milnthorpe, Westmorland. *Carlton and Guards.*
- ***Bailey, J. (C.)**, elected for Walworth '95; sat for same constit. from May '95; s. of Mr. William Bailey, of Mattishall, Norfolk; *b.* '40; Director of Harrod's Stores; a founder of the Constitutional Club. Shortgrove, Newport, Essex, and 1, Prince's Gate, S.W. *Carlton, Junior Carlton, and Constitutional.*
- ***Baillie, J. E. B. (C.)**, elected for Inverness-shire '95; sat for same constit. since June 13th, '95; *e. s.* of the late Mr. Evan Peter Montagu; *b.* '59; *E. Eton*; J.P. for Inverness-shire. Dochfour, Inverness.
- Bainbridge, E. (L.)**, elected for Lincolnshire, Gainsborough D., '95; Managing Director of the Nunnery Colliery Co., Sheffield; Chairman of the L.D. & E.C. Railway Co.; J.P. for Sheffield, Derbyshire, and Ross-shire. Whitehall Court, S.W.
- ***Baird, J. G. A. (C.)**, elected for Glasgow, Central, '95; sat for same constit. '86-95; *b.* '54; *E. Eton and Oxford*; served in the 16th Lancers; D.L. for Ayrshire; Major Ayrshire Yeomanry. Wellwood, Muirkirk, Ayrshire, and 89, Eaton Square, S.W. *Carlton.*
- ***Baker, Sir J. (L.)**, elected for Portsmouth '95; sat for same constit. '92-5; woollen merchant at Portsmouth, Southampton, Brighton, etc.; Alderman, J.P., and twice Mayor of Portsmouth, for 21 years Chairman of the Portsmouth School Board; Director of the Woking Water Co. and Borough of Portsmouth Waterworks; knighted '95. Northend House, Portsmouth. *National Liberal.*
- ***Balcarres, David Lindsay, Lord (C.)**, elected for Chorley '95; sat for same constit. from June '95; *e. s.* of J. Ludovic, 26th Earl of Crawford and 9th of Balcarres; *b.* '71; *E.*

Eton and Oxford; was President of the Oxford Union Society; is Captain in the 1st Volunteer Battalion Manchester Regiment. Haigh Hall, Wigan; Dunect House, Aberdeen; Balcarras, Colinsburgh, Fife; and 2, Cavendish Square, W.

***Baldwin, A. (C.)**, elected for Worcestershire, Bewdley D., '95; sat for same constit. '92-5; s. of Mr. G. Baldwin, of Stourport; *b.* '41; head of ironwork firm, Wilden; D.L. Worcester, and J.P. for Worcestershire and Staffordshire. Wilden House, Stourport, and 3, St. Ermin's Mansions, S.W. *Carlton and Athenæum*.

***Balfour, Right Hon. A. J. (C.)**, elected for Manchester, East, '95; sat for same constit. '85-95; *b.* '48; *e. s.* of Mr. James Maitland Balfour, of Whittingehame (*d.* '56), and Lady Blanche Gascoigne Cecil, 2nd dau. of 2nd Marquis of Salisbury. *E.* Eton and Trinity College, Camb. (M.A. '73); was private secretary to Lord Salisbury when Secretary of State for Foreign Affairs '78-80, and was employed on the special mission of Lords Salisbury and Beaconsfield to Berlin '78. In the early portion of his parliamentary career he acted for a time with the so-called "Fourth Party"; President of the Local Government Board in Lord Salisbury's first Administration '85-6; Secretary for Scotland, with a seat in the Cabinet, and Vice-President of the Committee of Council on Education for Scotland, '86-7; Chief Secretary for Ireland '87-91. He carried the Crimes Act through Parliament in that session; member of the Gold and Silver Commission '87-8; created the Congested Districts Board for Ireland '90; First Lord of the Treasury and Leader of the House on the death of Mr. W. H. Smith '91; Leader of the Opposition on the Conservatives going out of office in '92; First Lord of the Treasury and Leader of the House since June '95. For a short time during '98 he had charge of Foreign Affairs while Lord Salisbury was abroad through ill-health. Author of "A Defence of Philosophic Doubt" ('79), "Essays and Addresses" ('93), and "The Foundations of Belief, being Notes Introductory to the Study of Theology" ('95). D.L. for East Lothian and Ross-shire; late Captain East Lothian Yeomanry; P.C. '85; F.R.S. '88; Hon. LL.D. Edinburgh '81, St. Andrews University '85, Cambridge '88, Dublin and Glasgow '91; Hon. D.C.L. Oxford '91; Lord Rector of St. Andrews '86, Glasgow '90; became Chancellor of Edinburgh University '91; member of the Senate of London University '88; Captain of the Royal and Ancient Golf Club of St. Andrews '94-5; President of the National Cyclists' Union '96. Baroness Burdett-Coutts '81, and assumed her name. 1, Stratton Street, W. *Carlton*.

***Burns, J. (Labour)**, elected for Battersea '95; sat for same constit. '92-5; s. of Mr. Alexander Burns, engineer, formerly of Ayrshire. He was b. in very humble circumstances in '58 at Vauxhall, and attended Christ Church school at Battersea till he was ten years of age, when he went to work at a local candle factory. He then became a rivet boy in an engineer's workshop at Vauxhall, and later apprenticed himself to an engineer at Millbank, and served till he was twenty-one. Throughout youth he was an omnivorous reader, and during his apprenticeship got into trouble with his employers because of an open-air address which he delivered.

He imbibed his Socialistic theories from a fellow-workman in an engineering shop, this man, a Frenchman, being a refugee from Paris after the Commune. He worked as foreman engineer for twelve months on the Niger (West Africa), and on his return spent his savings in a six-months' tour through Europe. He first attracted public attention by his speeches on Socialism at an Industrial Remuneration Conference in London, and since then has constantly addressed working-class audiences. He became prominent in his own trade society (the Amalgamated Engineers), and at the General Election in '85 he stood as a Socialist candidate for the western division of Nottingham, but obtained only 598 votes. He played a leading part in the unemployed agitation of '86, and was one of the heads of the crowd which on Feb. 8th, '87, broke from the control of its leaders and caused a riot in the West End. He contested the right of public meeting in Trafalgar Square, and suffered six weeks' imprisonment for resisting the police ('87). He was one of those who organised and won the great victory of the Dock Labourers in '89. In all matters relating to labour he is an authority, respected by both employers and employed, and he is constantly being appealed to by workmen and their organisations for help and advice. He has four times been elected a member of the London County Council for the Battersea Division, on which body he has been the author of direct employment, and had much to do with its labour policy; and has been twice chosen to represent the constituency in the House of Commons. There he very soon made his mark, and his speeches are recognised as weighty and authoritative contributions to debate. 108, Lavender Hill, S.W.

***Burt, T. (L.)**, elected for Morpeth '95; sat for same constit. '74-95; s. of Mr. Peter Burt, miner; b. '37; Secretary to the Northumberland Miners' Union '65; member of the Labour and Mining Royalties Commission '91; President of the Trades Union Congress '91; Parliamentary Secretary to the Board of Trade Aug. '92—July '95. 20, Burdon Terrace, Newcastle-on-Tyne, and 26, Palace Street, Buckingham Gate, S.W. *Reform*.

***Chamberlain, Right Hon. J. (L.U.)**, elected for Birmingham, West, '95; sat for Birmingham '76-85, West '85-95. *b.* In London, July '36; *E.* University College. In '54 his father joined the firm of Nettlefold, the well-known screw makers of Birmingham. He also joined the firm, and for many years devoted himself almost exclusively to business, his spare time being given up to the study of politics. His first introduction to public life was in '70, as one of the leaders of the defeated unsectarian candidates for the **School Board of Birmingham**. But in '73 he was elected **chairman**. During this period he was also a member of the Town Council, of which he became **Mayor** ('73). On the death of his father he retired from the firm, in order to devote all his energies to public life. To him was due the transfer of the gas and water works to the borough authorities, and he was the author of the improvement scheme which has entirely transformed the face of central Birmingham. He was re-elected Mayor in '74, and again in '75. In '74 he opposed Mr. Roebuck in Sheffield, but was defeated by a large majority. In '76, on the retirement of Mr. Geo. Dixon from Parliament, Mr. Chamberlain was elected for Birmingham without opposition, and he has represented the town ever since. In '77 he laid before the House an exposition of the Gothenburg licensing system, but produced no impression upon members. He has recently again expressed his belief in the efficacy of the system. At this period he sat below the gangway, among the Home Rulers, with whose aspirations he was supposed to have some sympathy. When the Liberals returned to power Mr. Chamberlain became **President of the Board of Trade**, with Cabinet rank. He passed a Patents Bill and a Bankruptcy Bill, and after his exit from office ('85) he increased his reputation as a political leader considerably more than during the three previous years, his freedom from office giving him greater latitude. He attacked Conservatives and Whigs with almost equal bitterness. After the general election of '85 Mr. Chamberlain held the office of **President of the Local Government Board** until his divergence of views on the Irish policy of Mr. Gladstone caused his resignation (March 27th, '86). He was appointed **Chief Commissioner** to the Conference at Washington for the settlement of the dispute between the

United States and Canada on the Fisheries Question. Revisited United States on the occasion of his marriage with Miss Endicott (Nov. 15th, '88). On the elevation of Lord Hartington to the peerage as Duke of Devonshire through his father's death, Mr. Chamberlain was enthusiastically nominated the **leader of the Liberal-Unionist party** in the House of Commons. During the general election of '92 he spoke and worked with great effect, and his influence in the Midlands was very marked. His influence in the House throughout the Home Rule debates was just as great, and he made himself a tireless leader of all the assaults on the Bill. During the '94 session he strongly opposed the Government in most of their measures, but took practically no part in the Disestablishment debate. In the autumn he made several speeches in the north, and showed an inclination to outline a policy of social reform for the joint Unionist party. In the course of one of these speeches he made the significant statement that the gulf between him and the Liberal party could not now be bridged over. On the formation of the Coalition Ministry in June '95 Mr. Chamberlain took office under Lord Salisbury as Colonial Secretary. In '96 he had to deal with the Ashanti and Transvaal difficulties, and showed considerable energy in his efforts to develop commercial intercourse between Great Britain and her colonies. The Workmen's Compensation Act, '97, was greatly indebted to his advocacy during its passage through the House, and he was again prominent by his vigorous handling of Colonial matters. In '98 he made the famous "long spoon" speech in reference to foreign affairs, and declared himself strongly in favour of an alliance with the United States. The negotiations with the Transvaal, which ended in war, occupied him fully during '99. See **SESSION and TRANSVAAL**. Lord Rector of Glasgow University '97-9; LL.D. Camb. '92; D.C.L. Oxford '96; LL.D. Dublin '99. Highbury, Moorgreen, Birmingham, and 40, Prince's Gardens, S.W. *Athenæum* and *Devonshire*.

***Chamberlain, J. Austen (L.U.)**, elected for Worcestershire, East, '95; sat for same constit. '92-5; *e. s.* of the Right Hon. J. Chamberlain, M.P.; *b.* '63; *E.* Rugby and Trinity College, Camb. (M.A. '89), also studied at Paris and Berlin; appointed Civil Lord of the Admiralty July '95. Highbury, Moorgreen, Birmingham, and 40, Prince's Gardens, S.W.

(C.), elected for Plymouth '95; sat for Southwark '80, Plymouth '80-95; *b.* '41; *E.* City Commercial School, Lombard Street, and Crosby Hall; obtained writership in India Office by open competition '59, retired Oct. '60; Tancred Law Student 61; called to the Bar, Lincoln's Inn, '64; created Q.C. '80; elected a bencher of his Inn '82. He was made Solicitor-General in Lord Salisbury's '86 Administration, and received the honour of knighthood. Sir Edward was for some time a reporter in the House of Commons, and was on the literary staff of the *Morning Herald* and *Standard*. He made his mark in the celebrated *Penge case*, and successfully defended Mrs. Bartlett in the notorious *Fimlico poisoning case*. Has published two volumes of political and forensic speeches. His principal speech in the House of Commons was on Feb. 13th, '93, when he followed Mr. Gladstone in the debate on Home Rule. He declined to take office in '95 because of the regulations as to private practice imposed on the Solicitor-General and Attorney-General, and in '97 refused the offer of the appointment of the Master of the Rolls. Spoke strongly in regard to the Transvaal question in the House of Commons Oct. '99, expressing the opinion that if Parliament had been sitting in August and September there would have been no war. Thorncote, Staines, and 37, Russell Square, W.C. *City Carlton, Garrick, St. Stephen's, Press, and Carlton.*

Harrow*; assumed name of his maternal grandfather as heir to his mother's estate; inherited baronetcy from his uncle, Captain Sir Alexander Collingwood Dickson, R.N.; *m.* '96, Ann Beauclerk Dundas, *g.d.* of Lord Napier of Magdala; member of the L.C.C. for Holborn since '98; J.P. for Wilts; Captain Wilts Yeomanry; High Sheriff for Wilts '90. *Hartham Park*, Corsham and *Hilmarton*; *Sydenham*, Roxburghshire, N.B.; and 8, *Chesterfield Gardens*, Mayfair. *Carlton, Turf, and Marlborough.*

Dilke, Right Hon. Sir C. W. (L.), elected for Gloucester, Forest of Dean D., '95; sat for Chelsea '68-86, Gloucester, Forest of Dean D., '92-5; *e. s.* of the late Sir C. W. Dilke, M.P.; *b.* '43; *E. Trinity Hall*, Camb.; called to the

Bar, Middle Temple, '66; P.C. He began his career after leaving college by a tour round the world, to which he owed it that he was able to write his book on "Greater Britain," a standard work on our empire beyond the seas, '68. After his return he lectured in '71 at Newcastle on "The Cost of the Crown" in a most uncompromisingly Radical fashion, which provoked universal attention. He married in '72, but his wife died in Sept. '74. In '74 he was returned to the House of Commons for Chelsea, and soon formed an alliance with Mr. Chamberlain. He was appointed Under-Secretary of State for Foreign Affairs in '80, and President of the Local Government Board '80 to '85. In '86 the case of Crawford v. Crawford and Dilke came on, and was twice tried. In the first trial, just before which he married Mrs. Mark Pattison, a divorce was granted; but Sir Charles Dilke was dismissed from the case and given his costs. On his application the Queen's Proctor subsequently intervened, and a second trial followed; but Sir Charles Dilke's application to be made a party in the second trial was refused by the Court and by the Court of Appeal. Sir Charles had been elected for Chelsea at the '85 election, but was defeated in '86. At the general election of '92 he was returned to the House of Commons for the Forest of Dean, after an absence of six years, and was re-elected unopposed in '95. He is proprietor of the *Athenaeum* and of *Notes and Queries*. Besides "Greater Britain," Sir C. Dilke's chief works are "The Fall of Prince Florestan," "The Present Position of European Politics," '87, "The British Army," '88, "Problems of Greater Britain," '91, and with Mr. Spenser Wilkinson, "Imperial Defence," '92. 76, *Sloane Street*, S.W.

Dillon, J. (N.), elected for Mayo, East, '95; sat for Tipperary '80-83, Mayo, East, '85-95; s. of the late Mr. John Dillon, M.P., of '48 celebrity; *b.* '51; *E. Catholic University*, Dublin, and became a L.R.C.S.I., afterwards making politics his vocation. Returned as Nationalist for Tipperary '80. Mr. Dillon was closely identified with the Plan of Campaign; and in Nov. '86, while carrying that plan into operation at Loughrea by receiving the rents of the tenants, was arrested by the police. He was subsequently tried for the offence, but not convicted. At the Mell petty sessions, Drogheda, on May 11th, '88, for "having on April 8th, at Tullyallen, co. Louth, taken part in the criminal conspiracy known as the Plan of Campaign," he was sentenced to six months' imprisonment. The sentence was confirmed on appeal on June 21st. He was sent to Dundalk prison, but was liberated Sept. '88. He returned in '90 from a tour of the Australian Colonies, where he collected large contributions in aid of the Irish Nationalist party. Was arrested (September) and tried on a political charge, but escaped with Mr. W. O'Brien, M.P., to Cherbourg, when out on bail. He afterwards visited the United States, and in Feb. '91 surrendered himself, and was imprisoned in Ireland. Released from Galway gaol on July 30th, and delivered a speech, repudiating Mr. Parnell's leadership, at Mallow. Mr. Dillon is one of the most earnest of the Irish party, and his speeches, both in the House and out of it,

- always carry weight. Elected Chairman of the Irish party, in succession to Mr. Justin M'Carthy, at the opening of the session of '96, re-elected '97 and '98, but declined to stand in '99, and no appointment to the position was made. *M.* '95, Elizabeth, *d.* of the Hon. Sir James Mathew, *g.-n.* of Father Mathew, the apostle of Temperance, North Great George's Street, Dublin.

***Goschen, Right Hon. G. J. (C.),** elected for St. George's, Hanover Square, '95; sat for City of London '63-80, Ripon '80-85, Edinburgh, East, '85-6, St. George's, Hanover Square, '87-95; *b.* in London '31; *E.* Rugby under Dr. Tait, and at Oriel College, Oxford, taking a 1st class in Classics. Soon after he entered the firm of Fröhling & Goschen, and became a Director of the Bank of England in '56. In

'65 he was appointed Vice-President of the Board of Trade, and in '66 Chancellor of the Duchy of Lancaster, with a seat in the Cabinet. In '68 he joined Mr. Gladstone's Cabinet as President of the Poor Law Board, and in '71 succeeded Mr. Childers as First Lord of the Admiralty. Mr. Goschen was unable to join Mr. Gladstone's Government in '80, owing to his opposition to the extension of the franchise, so he was appointed special Ambassador to the Porte, in which capacity he was instrumental in settling the Montenegrin and Greek frontier questions in '80 and '81. When Mr. Gladstone launched his Home Rule Bill, in '85, Mr. Goschen was among the first to enrol himself in the opposition. He, however, failed to secure his seat in Edinburgh at the '86 election. On the resignation of Lord R. Churchill in Dec. '86, Mr. Goschen accepted the *Chancellorship of the Exchequer* as a Liberal Unionist with the full sanction of Lord Hartington. He was defeated in the Exchange Division of Liverpool (Jan. 26th, '87), but in the following month was successful in the St. George's, Hanover Square, Division. The *Budgets* which he introduced in '88 and '89 were vigorously attacked by Mr. Gladstone because of their proposals with reference to the death duties. His scheme, however, for the reduction of the interest on the national debt was cordially accepted by all parties, and successfully brought to a conclusion in July '89. He is the author of several financial and political pamphlets, and of the well-known work on "The Theory of Foreign Exchange." He has also published a number of addresses on educational and social subjects, including two on the "Cultivation and Use of the Imagination," delivered at Liverpool '77, and at Edinburgh University, and one on "Intellectual Interest," delivered by him as Lord Rector to the students of Aberdeen University in '88. He is a Privy Councillor. He joined Lord Salisbury's Cabinet in June '95 as First Lord of the Admiralty, and was re-elected for St. George's, Hanover Square. Seacox Heath, Hawkhurst, and 69, Portland Place, W. *Athenæum and Carlton.*

Goschen, G. J., jun. (C.), elected for Sussex, North or East Grinstead D., '95; *e. s.* of the Right Hon. G. J. Eton and Christ Church, Oxford; J.P. and County Alderman for Herts; Major Herts Yeomanry Cavalry, '72-89; Hon. Lieutenant-Colonel '86; Deputy-Chairman of Herts Quarter Sessions; Chairman of Great Gaddesden School Board; appointed Chairman of the Standing Orders Committee and Committee of Selection '99, in succession to Sir J. Mowbray. Great Gaddesden Place, Hemel Hempstead. *Carlton.*
- ***Hamilton, Right Hon. Lord G. (C.),** has been in Parliament since '68 until '85 for Middlesex, and since '85 for the Ealing Division; 3rd s. of the late Duke of Abercorn; b. at Brighton '45; E. Harrow. Was ensign Rifle Brigade '64-8, when he was transferred to the Coldstream Guards. Under-Secretary for India '74-8, and Vice-President of the Committee of Council on Education '78-80; First Lord of Admiralty '85-6 and '86-92; Chairman of London School Board '94-5; Secretary of State for India July '95; is a P.C.; appointed Capt. of Deal Castle '99. 17, Montague Street, W. *Carlton.*
- ***Hammond, John (N.),** elected for co. Carlow '95; sat for same constit. '91-5; s. of Mr. Edward Hammond, of Carlow; b. '42; Carlow merchant; J.P. for co. Carlow, and member of Local Town Commissioners and Poor Law Boards. 4, Norfolk Street, Strand, W.C.
- ***Hamond, Sir Charles F. (C.),** elected for Newcastle-on-Tyne '95; sat for same constit. '74-85; s. of Mr. G. F. Hamond, of Blackheath; b. '17; E. Proprietary College, Blackheath; called to the Bar, Middle Temple, '65; Northern Circuit; J.P. and D.L. for Newcastle; Town Councillor and Alderman for 40 years. 20, Lovaine Place, Newcastle.
- ***Hanbury, Right Hon. R. W. (C.),** elected for Preston '95; sat for Tamworth '72-8, Staffordshire, North, '78-80, Preston '85-95; s. of Mr. R. Hanbury, of Tamworth; b. '45; E. Rugby and Corpus Christi College, Oxford; J.P. and D.L. for cos. Derby, Staffordshire, and Warwickshire; late Captain Queen's Own Royal Yeomanry; Hon. Colonel 5th Lancashire Artillery Volunteers; Privy Councillor and Secretary to the Treasury '95. Ilam Hall, Ashbourne, Derbyshire. *Carlton.*
- ***Hanson, Sir R., Bart. (C.),** elected for City of London '95; sat for same constit. '91-5; 2nd s. of the late Mr. Samuel Hanson, of London;
- b. '40; E. Rugby and Trinity College, Camb. (M.A. '67, LL.D. '87); merchant; Alderman of Billingsgate Ward '80; Sheriff for London and Middlesex '81-2; Lord Mayor '86-7; J.P.; Commissioner of Lieutenancy for London; J.P. and D.L. for Tower Hamlets and Middlesex; late member of the School Board and C.C.; Knight Commander of the Orders of Couronne de Chêne of the Netherlands, and Saviour of Greece; knighted '82; created a baronet '87; Hon. Colonel City of London Militia; Past Master of Merchant Taylors' and Shipwrights' Companies. 4, Bryanston Square, W.
- ***Harcourt, Right Hon. Sir W. V. (L.),** elected for Monmouthshire, West, '95; sat for Oxford City '68-80, Derby '85-95; s. of the late Rev. W. V. Harcourt, of Nuneham Park, Oxford; g. s. of a former Archbishop of York; b. '27; E. Trinity College, Camb. (1st class honours in Classical Tripos, and Senior Optique '51); called to the Bar, Inner Temple, '54; Q.C. '66; appointed Whewell Professor of International Law, Camb., '69; m. '59, d. of Lady Theresa Lewis, by whom he has a son, Lewis (b. '63), and in '76 his second wife, Mrs. Ives, daughter of the late Mr. J. L. Motley, the historian, by whom he has a son, Robert (b. '78). Sir W. Harcourt entered Parliament as Liberal member for Oxford ('68-80). On seeking re-election after his acceptance of office in Mr. Gladstone's Administration he was defeated by Mr. Hall, who was subsequently unseated on petition. Meantime, by the voluntary retirement of Mr. Plimsol, a seat was found for Sir William Harcourt at Derby, for which constituency he sat till he was defeated at the general election in '95. He has held the following offices: Solicitor-General '73-4; Secretary of State for the Home Department '80-85; Chancellor of the Exchequer '86 and '92-5. His '94 Budget, which considerably extended the application of the principle of graduation to the Income Tax and reformed the Death Duties, is claimed by his friends as his greatest achievement. His leadership of his party in the '96 session was acknowledged by friend and foe to have been masterly. He took a prominent part in the proceedings of the British South Africa Committee during '97; and in '98 and '99, in a series of weighty letters to the *Times*, he attacked the Romanising movement in the Church of England. Retired from the Leadership of the Liberal Opposition in the Commons during the Recess '98, but actively intervened in the '99 Sessions, strongly condemning the Government's policy as to the Sinking Fund and the conduct of the negotiations with the Transvaal. Under the *nom de plume* of "Historicus" he wrote to the *Times* the well-known letters on International Law. He is one of the most clever of parliamentary debaters and platform speakers. Is a P.C. and LL.D. Malwood, Lyndhurst, Hants. *Devonshire, Reform, etc.*
- ***Hardy, L. (C.),** elected for Kent, Ashford D., '95; sat for same constit. '92-5; y. s. of the late Sir John Hardy, Bart., of Burton-on-Trent; b. '54; E. Eton and Christ Church, Oxford (M.A. 1st class History '76); J.P. for West Riding, Yorks; D.L. and J.P. Kent. Sandling Park, Hythe, Kent, and 42, Lowndes Square, S.W.
- ***Hare, T. L. (C.),** elected for Norfolk, South-West, '95; sat for same constit. '92-5; s. of

the late Sir Thomas Hare; *b.* '59; *E.* Eton; J.P. and D.L. for Norfolk; Lieutenant 24th Regiment '79-80, and 1st Battalion of Scots Guards '80-85. Stow Hall, near Downham, Norfolk.

***Harrington, T. C. (P.)**, elected for Dublin, Harbour D., '95; sat for Westmeath '83-5, Harbour D. '85-95; s. of Mr. D. Harrington, of Castletown; *b.* '51; *E.* Castletown, Catholic University, and Trinity College, Dublin; Secretary of the Irish National League; called to the Irish Bar '87; formerly part proprietor of the *Kerry Sentinel*; imprisoned under the Crimes Act. 6, Cavendish Row, Dublin, and Artane Lodge, co. Dublin.

Harwood, G. (L.), elected for Bolton '95; s. of Mr. Richard Harwood, J.P.; *b.* '45; *E.* Chorlton High School and Owens College, Manchester (M.A. London); head of the firm of Richard Harwood & Son, Brownlow Fold Mills, Bolton; called to the Bar, Lincoln's Inn, '90; ordained by the Bishop of Manchester, and served as a deacon '86-9; author of "Dis-establishment," "The Coming Democracy," "From Within," and "A Candidate's Speeches." Russell Street, Bolton, and 9, Stanley Gardens, London, W. *Athenæum, Reform.*

Haslett, Sir James (C.), member for North Belfast since the decease of Sir E. Harland, in Jan. '96; s. of a Presbyterian minister; *b.* '32; is a chemist and druggist in Belfast; is a J.P. for, and has twice been Mayor of that city, and was member for the Western D. '85-6. Princess Gardens, Belfast.

Hatch, E. F. G. (C.), elected for Lancashire, (South-East), Gorton D., '95; s. of the late Mr. J. W. Hatch, by Matilda A., *d.* of the late Hugh Snell, of Callington, Cornwall; *b.* '59; *E.* privately; senior partner and founder of the firm of Hatch, Mansfield, & Co., of 1, Cockspur Street, S.W., and a Director of the Fine Arts Insurance Company; unsuccessfully contested Gorton D. of Lancashire '89 and '92. Has travelled in America, Canada, South Africa, India, and in China and Japan, and takes much interest in Foreign and Colonial affairs, the social condition of the people, and development of the Empire. 11, Mount Street, Grosvenor Square, W. *Carlton, Junior Carlton, and Ranelagh.*

***Hayden, John Patrick (P.)**, elected for Roscommon (South D.), July '97; s. of the late Mr. Luke Hayden, of Roscommon; a journalist; is brother of the late Mr. Luke P. Hayden, of Roscommon, who sat for Leitrim (South), from '85-92, and Roscommon (South) '92-7; and was elected to succeed him on his decease in '97. Proprietor of the *Westmeath Examiner*.

***Hazell, Walter (L.)**, elected for Leicester July '95; sat for same constit. '94-5; only s. of the late Mr. Jonathan Hazell; *b.* '43; Chairman of Hazell, Watson, & Viney, Ltd.; joint founder of the Children's Fresh Air Mission and of the Self-Help Emigration Society, Treasurer of the Peace Society, and worker in various social movements. 9, Russell Square, W.C. *National Liberal and City Liberal.*

***Healy, M. (N.)**, elected for Cork City '95; sat for same constit. 85-95; s. of Mr. Maurice Healy, of Bantry; *b.* '59; *E.* Christian Brothers School, Lismore; Solicitor '82.

Ashton Lawn and Southmall, Cork. *National Liberal.*

***Healy, Thomas J. (N.)**, elected for Wexford, North, '95; sat for same constit. March '92-5; *e.* s. of Mr. Maurice Healy, of Bantry; *b.* of Timothy Healy; *b.* '54; *E.* National School, Lismore; admitted Solicitor '88. Fortview, Wexford, and 12, Westmorland Street, Dublin. *National Liberal.*

***Healy, Timothy M. (N.)**, elected for Louth, North, '95; sat for Wexford '80-83, Monaghan '83-5, Londonderry, South, 85-6, Longford, North, '87-92, Louth North, '92-5; *b.* in Bantry, '55; joined Mr. Parnell in '80, when he lectured in America. Took an active part in the Land League agitation '80, and was arrested in the autumn for a speech at Bantry, and committed for trial, but was acquitted. Elected for Wexford borough without opposition. Took a very active part in the discussions of the Land Bill of '81, and obtained the insertion of words excluding the improvements of tenants from rent. The clause has since come to be known as the "**Healy clause**." Was brought on motion by the Crown before the Queen's Bench for a speech in '82, and ordered to find bail for good behaviour, or be imprisoned for six months. Refusing bail, he was imprisoned, but was released after he had served four months of his sentence. Returned for Monaghan in '83, and in '85 for both North Monaghan and South Derby; elected to sit for the latter. Failed to secure his return in '86, but in Feb. '87 was returned unopposed for North Longford. Called to the Irish Bar in '84. Author of "A Word for Ireland," and text-books on the Land Acts. He took a prominent part in the struggle of '91 against Mr. Parnell's leadership, and is recognised as one of the ablest members of the Irish party, though considerable differences exist between him and some of his colleagues. He was expelled from the Parliamentary Committee in Nov. '95 by a majority of six, and his disapproval of Mr. Dillon's leadership has been plainly manifested since; Q.C. '99. 1, Mountjoy Square, Dublin. *National Liberal.*

***Heath, J. (C.)**, elected for Staffordshire, North-West, '95; sat for same constit. '92-5; 2nd s. of Mr. R. Heath, of Biddulph Grange, Congleton; *b.* '52; *E.* Clifton College; iron-master; J.P. for Staffordshire; Captain Staffordshire Yeomanry '76, Major '90, Lieut.-Col. '97, Col. '98. Crawley Court, Winchester, and 54, Cadogan Square, S.W.

***Heaton, J. Henniker (C.)**, elected for Canterbury '95; sat for same constit. '85-95; s. of the late Lieutenant-Colonel Heaton of Rochester; *b.* '48; *E.* Kent House Grammar School and King's College, London; engaged in pastoral pursuits, and part proprietor of one of the largest newspaper properties in Australia; N.S.W. Government Commissioner to Amsterdam Exhibition '83, and to Indian and Colonial Exhibition '86; represented the Tasmanian Government at the Berlin Telegraph Conference '85; the successful advocate of Imperial Penny Postage, which was brought into operation between Great Britain and certain of her colonies on Christmas Day '98, for which in '99 he had conferred upon him the freedom of Canterbury, and after-

wards the freedom of the City of London; author of "Australian Dictionary of Dates and Men of the Time"; appointed by Mauritius to negotiate its new constitution, '84; introduced telegraph money orders in England, parcel post to France, and carried out numerous other postal reforms; inaugurated Parliamentary chess matches between Great Britain and America. 36, Eaton Square, S.W. *Carlton, Portland, and Savage.*

Hedderwick, Thomas Charles Hunter (L.), who, on the retirement of the late Sir J. Pender, won for the Liberals the seat for the Wick Burghs (June '96), is the 2nd s. of the late Mr. Robert Hedderwick, Queen's Printer and Publisher, of Glasgow, and founder of the old *Glasgow Weekly Citizen*; b. '50; M.A. Glasgow Univ.; called to the Bar, Middle Temple, '76, joining the North-Eastern Circuit; was a Member of the Executive Committee of the Eighty Club '87-'92; J.P. for Lanarkshire. Published, '87, a translation of the old German Puppet Play of Dr. Faust, with Notes; '92, a Manual of Parliamentary Election Law; '94, a Practical Handbook on the Sale of Food and Drugs Act. Appointed '98 a member of the Select Committee on Election Law, and '99 a member of the Select Committee on the question of Pensions for Aged Deserving Poor. Biggar Park, Lanarkshire; The Manor House, Weston Turville, Bucks; 2, Garden Court, Temple. *Reform.*

Secretary to the Royal College of Music; elected Chairman National Education Association '98. Shockerwick House, Bath, and 46, Bryanston Square, W. *Reform, Athenaeum, Brooks's, and Travellers*.

***Morley**, Right Hon. John (L.), elected for Montrose Burghs '96; b. at Blackburn '38; E. Cheltenham and Lincoln College, Oxford; called to the Bar, Lincoln's Inn, '73, but eventually took to literature rather than the law. For some time he edited the *Literary Gazette*, and from '67 to '83 he conducted the *Fortnightly*. He edited the *Pall Mall Gazette* '80-83, and *Macmillan's Magazine* '83-5. His literary career was then in part abandoned for politics. In '83 he was elected for Newcastle-on-Tyne, and when Mr. Gladstone propounded his Home Rule scheme he found in Mr. Morley, whom he made Chief Secretary for Ireland, one of his ablest and most enthusiastic supporters. He fought hard then and during the tenure of power by the Conservative Government, and in '02 he was re-appointed Chief Secretary. His Irish administration ('02-5) was most successful; but at the general election of '05 he was defeated at Newcastle, which seat he had held for 12 years. On the retirement of Mr. Shiress Will, he was, in Feb. '06, returned for the Montrose Burghs, and was thus enabled to resume his parliamentary career. He was one of the strongest opponents of the Government's action with regard to the Transvaal during '99. Mr. Morley's literary works include a number of books on the French philosophers of the eighteenth century, an essay on Compromise; *Lives of Cobden*, of Edmund Burke, and of Walpole, and a Romanes lecture on Machiavelli '97; while he is designated as the writer of the authoritative *Life of Mr. Gladstone*; Hon. LL.D. of Glasgow and Cambridge Universities; Hon. D.C.L. of Oxford; is Trustee of the British Museum, a Bencher of Lincoln's Inn, and F.R.S.; P.C. 57, Elm Park Gardens, S.W.

Morrell, G. H. (C.), elected for Oxfordshire, Mid or Woodstock D., '95; sat for same constit. '91-2; e. s. of the late Rev. G. K. Morrell, D.C.L.; b. '45; E. Rugby and Exeter College, Oxford, M.A., B.C.L.; called to the Bar, Inner Temple, '71; J.P., D.L., and County Alderman for Oxfordshire; High Sheriff '85; J.P. for Berkshire; Lieutenant-Colonel and Hon. Colonel (V.D. '95) 1st Volunteer Battalion (University) Oxfordshire Light Infantry '79-98, when he retired. Headington Hill Hall, near Oxford, and Streatley House, on

Thames, Berks. *Carlton, Junior Carlton, and New University*.

Stanley, Arthur (C.), elected for Lancashire, South-West (Ormskirk) D. '98, in succession to the late Sir A. B. Forwood; is son of the 16th Earl of Derby and brother of Lord Stanley, who has been M.P. for the Houghton D. of Lancashire since '92; *b.* '69; *E.* Wellington Coll.; was private secretary to Mr. Balfour, First Lord of the Treasury, for a few months in '92, and then entered the Foreign Office; afterwards entered Diplomatic Service, being appointed third secretary at Cairo in '95.

***Stanley**, E. J. (C.), elected for Somerset, Bridgwater D., '95; sat for West '82-5, Bridgwater D. '85-95; *e. s.* of the late Mr. E. Stanley, of Cross Hall, Lancashire; *b.* '26; *E.* Eton and Christ Church, Oxford; J.P. and C.C. for Somerset; High Sheriff '80; D.L. for Lancashire and Somerset. Quantock Lodge, Bridgwater, and 29, Belgrave Square, W. *Travellers' and Carlton.*

Stanley, Sir Henry M. (L.U.), elected for Lambeth, North, '95; *b.* at Denbigh '41, and passed his childhood in the workhouse at St. Asaph. Subsequently he sailed as cabin boy to New Orleans, where he was adopted by a Mr. Stanley, whose name he took, but whose death without making provision for him again compelled him to rely on his own efforts. After a series of adventures he became a journalist during the American civil war, being attached as reporter to the staff of the *New York Herald*. In '68 he was sent to accompany the British expedition into Abyssinia, as war correspondent for that paper. Subsequently he made a tour to the Black Sea, and thence through Persia into India. In '69 Livingstone, in Africa, had not been heard of for a long time. Mr. Gordon Bennett, proprietor of the *New York Herald*, ordered Stanley to "go and find him." Early in '71 Stanley left Zanzibar and plunged into the unknown continent. Before the end of that year he had found Livingstone. In '73-4 he accompanied the British expedition into Ashanti, up to Coomassie, as a war correspondent again. In '76 the *New York Herald* and the London *Daily Telegraph* conjointly sent him to Central Africa, to take up the thread of Livingstone's discoveries. He left Zanzibar in that year, and in '77 emerged on the west coast, having circumnavigated Victoria Nyanza, and forced his way in spite of terrible obstacles down the whole course of the hitherto unknown Congo. In '79 the King of the Belgians gave him the command of an expedition formed by the International African Association, with which he may be said to have made what is now the *Congo Free State* (*g.v.*). In Jan. '87 he started on the expedition for the relief of Emin Pasha, after receiving the freedom of the City of London. In '90, having accomplished his task, he returned to England, and published

his book entitled "In Darkest Africa." His marriage with Miss D. Tennant took place at Westminster Abbey July 12th. After a lecturing tour in America, Mr. Stanley delivered many lectures in various parts of the kingdom, visited Australia in '92, settled down in London, took out a certificate of naturalisation, and stood as Unionist candidate for North Lambeth at the general election '92. He was, however, defeated. During the Uganda controversy he declared strongly against the evacuation of that country. In Nov. '93 he published "My Dark Companions and their Strange Stories." He is an Hon. D.C.L.; LL.D. and Ph.D. of Oxford, Cambridge, Durham, and Halle Universities; G.C.B. '99. Richmond Terrace, Whitehall, S.W.

***Stanley**, Lord (C.), elected for Lancashire, West Houghton D., '95; sat for same constit. '92-5; *e. s.* of Earl of Derby; *b.* '65; *m.* '89, Lady A. Montagu, *d.* of the 7th Duke of Manchester; entered the army; Lieutenant 2nd Battalion Grenadier Guards '85-95; aide-de-camp to his father, Governor-General of Canada, '88-90; J.P. and D.L. for Lancashire; appointed a Lord of the Treasury '95; Prov. Grand Master of Freemasons for East Lancashire '99. Cowork Park, Sunningdale, and 36, Great Cumberland Place, W.

The following are the names, politics, constituencies, and dates of election of those gentlemen who have been members of the present House, but who for some cause have ceased to be members. As the record is confined to the present Parliament, the earliest date of service does not go back beyond '95, although many of those who have since ceased to be members were in the House long anterior to that date. Under the subsequent list of Constituencies particulars of the pollings both in the case of the original representatives and of their successors when such have been elected will be found. Some biographical particulars of some of those who died Nov. '98-99 will be found under heading OBITUARY.

2. Alphabetical List of Constituencies and Pollings.

(Revised to Nov. 14th, '99.)

The following is an alphabetical list of the Parliamentary constituencies of the United Kingdom, with the names of the member or members returned by each, and, where there was a contest, the figures polled by the candidates at the last general election, and at every subsequent bye-election to Nov. 14th, '99. In the case of recounts, etc., the revised figures will also be found as well as those announced at the election by the returning officer. The great majority of the old constituencies were by the last Redistribution Act split up into divisions each returning one member, and the names of these divisions are given in parentheses after the name of the county or borough; thus, the Luton or South Division of Bedfordshire appears as Beds (S. or Luton). Therefore, in seeking for the figures with regard to any special division of a county or borough, the county or borough should be turned to in its proper alphabetical place, and the local division will be readily found. The few places which, like the City of London, Leicester, etc., were not broken up into single-member divisions, and still return two members, are distinguished in the alphabetical list of constituencies by a figure thus (2). The figures in brackets, e.g. [5280], show the number of electors on the register revised according to the latest returns.

Aberdeen (N.) [9953]. W. A. Hunter (L) - - - 4156 J. L. Mahon (Lab) - - - 608	Ayr Burghs [6813]. C. L. Orr-Ewing (C) - - - 3057 W. Birkmyre (L) - - - 2722	Berks (E. or Wokingham) [11,319]. Sir G. Commons and Open Spaces Act, '99. See SESSION, sect. 45.

Commons and Footpaths Preservation Society. This Society was formed in 1865 for the preservation and protection of common land, roadside waste, village greens, footpaths, bridlepaths, and other rights-of-way by land and water, and open spaces generally throughout the country. The society has a number of branches in England and Wales, and a large number of local authorities are affiliated to it. The minimum subscription is 5s. per annum, while a 10s. 6d. subscription entitles a member to legal advice gratis. The society has published a number of pamphlets explanatory of its work, and is issuing a series of maps showing all rights-of-way and open spaces in the home counties. It has assisted in the purchase of many London open spaces, and has special machinery for dealing with all railway, water, and other bills introduced into Parliament each session which contemplate interference with common land or rights-of-way. Practically all modern legislation affecting the preservation of commons and rights-of-way has emanated from the society, and a number of important legal suits have been fought at its instance. Among other Acts promoted by it are the "Law of Commons Amendment Act '93," and the "Commons and Open Spaces Act '99." In '99 the **National Footpath Preservation Society**, late of 42, Essex Street, Strand, was amalgamated with the Commons Preservation Society. The Society is governed by an Executive Committee, under the Chairmanship of the Rt. Hon. G. J. Shaw-Lefevre. **President**, the Duke of Westminster, K.G.; **Vice-Presidents**, Lord Ribblesdale, the Rt. Hon. G. J. Shaw-Lefevre, Mr. Edward North Buxton; **Treasurer**, Sir John T. Brunner, Bart., M.P.; **Secretary**, Mr. Lawrence W. Chubb; **Telegraphic Address**, "Commonweal, London"; **Offices**, 1, Great College Street, Westminster, S.W.

Comoro Islands, The. A group of volcanic islands in the Mozambique Channel, between the east coast of Africa and the north-west coast of Madagascar. **Area**, 620 sq. m.; **pop.** 53,000. The group consists of four small elevated islands—**Great Comoro**, **Mohilla**, or **Little Comoro**, **Anjuan**, erroneously called **Johanna**, and **Mayotte**. Mayotte (area 143 sq. m., pop. 9598) is a French possession, and its Administrator also controls the other islands. Commercially the most important is Mohilla, which carries on a brisk trade with Madagascar, Zanzibar, Mozambique, and the rest of the mainland. The people are Mohammedans, speak Arabic, and are akin to the mixed races of Zanzibar.

CONGO FREE STATE.

The Congo Free State was constituted and defined by the general Act of the International Congo Conference of Berlin, '85, and entered into treaties with all the great Powers, by which its status as a sovereign power, under Leopold II., King of Belgium, was recognised and its boundaries were settled. By a Convention made in '90, Belgium, to which King Leopold had bequeathed all his sovereign rights in the State, was given the right of annexing the State after a period of 10 years. Its area is estimated at 900,000 sq. m., and the population is estimated to be about 20,000,000. The estimated European population is 1678. The capital is Boma, on the Lower Congo. The central Government is at Brussels, and consists of King Leopold, and three departmental chiefs, for Foreign Affairs, Finance, and the Interior, under a Secretary of State. At Boma there is a Governor-General, with a local government; and European Commissioners, assisted by civil and military officials, govern the fifteen administrative districts. Among the chief exports are ivory, rubber, nuts, palm oil. Gold, copper, and other metals have been discovered. Districts are suitable for growing sugar, cotton, coffee, etc. The army consists of about 15,500 natives commanded by European officers. The State has 6 steamboats on the Lower Congo and 14 on the Upper Congo, besides a small flotilla of sailing boats. An agreement between Great Britain and the Congo Free State was signed at Brussels, May '94, settling the boundaries of their respective territories in the Upper Nile valley, and granting to the Free State, during the reign of King Leopold, a lease of that portion of territory lying between the Congo-Nile watershed and the Nile, bounded on the north by the 10th parallel of north latitude, and on the south extending to Mahagi on Lake Albert. It was further agreed that the lease of the territory between the 25th and 30th meridian of E. longitude, comprising the Bahr-el-Ghazal, might be continued to King Leopold's successors. France at once negotiated an agreement with the Free State, which was afterwards signed at Paris (Aug. 10th, '94). By this the frontier between the Free State and French Congo (*q.v.*) was traced, following the *thalweg* of the Oubanghi to the confluence of the Mbomu with the Welle, thence

along the *thalweg* of the Mbomu and the watershed between the Congo and the Nile up to its intersection with long. 30° E. France was also given "the right of police" along the left bank and over the course of the Mbomu. The only other important article bound the Free State to renounce all occupation and to exercise no political influence W. or N. of a line starting from the intersection of long. 30° E. with the watershed of the Congo and Nile basin, and following the meridian to its intersection with parallel 5° 30' N. lat., and thence proceeding along that parallel to the Nile. By this article the Free State renounced its right to occupy so much of the territory leased to it by Great Britain under the agreement of May '94 as lies to the west of the 30th meridian of E. long. and north of 5° 30' N. lat. This territory thus renounced included the Bahr-el-Ghazal province (*q.v.*). In '97 the Free State troops effectively occupied Refaj, on the Nile. A railway about 250 miles long connects Matadi and Stanley Pool. It is contemplated to make a branch to Leopoldville, 6½ miles, and among other auxiliary lines one is projected to connect the Lubefu with the Lomami and the Lualaba. In July '99 the Government authorised a preliminary survey for new branch lines to connect the region of the Welle and the Nile with that of Tanganyika, the main line running westward from Stanley Falls. It was estimated that the scheme would involve the construction of 930 miles of railway at a cost of £6,000,000 or £8,000,000. Revenue, '99, £793,343; estimated expenditure, £778,715; public debt, '93, £6,000,000; imports, '98, £997,092; exports, £1,005,290. See DIPLOMATIC and EGYPT (map).

Congregationalism. It is claimed for the Congregational system of church government that it is apostolic; that each congregation of believers gathered by the apostles was in itself a complete church; that each church was free from the control of other churches and of the State; and that every member of the church had the right to take part in its management. The first Congregational church in England, of which there is any record, was formed in London about the year 1571. Robert Fitz was the minister, and his "True Marks of Christes Church" is the first document relating to English Congregationalism known to be in existence. The most prominent name in connection with Congregationalism at this time is that of the Rev. Robert Browne, who left the Established Church, and, in conjunction with the Rev. Robert Harrison, formed a Congregational church at Norwich in 1580. One of the most famous of the early churches in England was formed at Scrooby, in Lincolnshire. It met in the house of William Brewster, under the pastoral care, for a time, of Richard Clyfton (who had relinquished a living at Worksop). The famous John Robinson, M.A., succeeded him. To escape persecution, members of this church fled to Holland, from whence, after twelve years, they crossed the Atlantic and landed at New Plymouth—the Pilgrim Fathers of the *Mayflower*. At this time the Congregationalists were sometimes called "Brownists" (after the Rev. Robert Browne), sometimes "Separatists" (because they would keep the church separate from the world), and sometimes "Independents." This last designation Congregationalists themselves soon adopted, and have ever since retained, because it signifies that they hold "all particular churches of

Christ to be of equal authority, and none to have jurisdiction over another." At the time of Cromwell's death a general council of Congregationalists was meeting in the Savoy. This council issued a "Declaration of Faith and Order." Of course the "Declaration" was not binding upon any particular church; at the same time it is almost as important in the history of Congregationalism as the Westminster Confession is in the history of Presbyterianism. The Restoration placed Congregationalism in a very different position from that which it enjoyed under the Protectorate, nevertheless the denomination was greatly and permanently strengthened by the Act of Uniformity (Aug. 24th, 1662), which drove 2000 ministers and many thousands of laymen out of the Established Church. Under the later Stuarts Congregationalists had their full share of persecution. After the passing of the Act of Toleration (May 24th, 1689) they took an active part in the extension of civil and religious liberty, and in forwarding movements of a philanthropic character. They were chief amongst the founders of the London Missionary Society (1795), and the first tract for the Religious Tract Society was written by Dr. Bogue in 1799. In 1831 the Congregational Union of England and Wales was formed, and an International Council of Congregationalists met in London in July '91. The second International Council was held at Boston, U.S.A., in Sept. '99. From what has been said above it will be seen that Congregational polity is based upon three ideas: the right of each individual to take part in the government of the community; the autonomy of the local church; and its independence of all external ecclesiastical authority. While complete in itself, the local church may voluntarily unite with other churches for consultation and common action. But no resolution of any such Union binds the individual church without its own consent. Usually each church has one minister or pastor, who is chosen by the free suffrages of the membership; but there is nothing to prevent there being more than one, and in fact such cases are not uncommon. In addition to the pastor or pastors, home missionaries and evangelists are sometimes appointed, whose work is distinct from, though subject to the supervision of, the regular pastorate. There are two orders of church officers only: bishops, elders, or pastors, who are the presidents or administrative rulers in the spiritual department of church life; and deacons, who have charge of its secular affairs. There are in the British Isles 4919 Congregational churches and branch churches (mission stations in Scotland not included). There is a general union of the churches, known as the **Congregational Union of England and Wales**, which meets twice a year, in May at London, and in October at various places in the provinces. There are twelve colleges belonging to the denomination in the three kingdoms (beside four in the Colonies), in which between 400 and 500 students are being trained for the regular ministry. The British Congregational churches raise for the support of religious worship, and for philanthropic purposes, in connection with their own organisations, upwards of £1,000,000 per annum. County or district associations exist for the purpose of upholding and extending evangelical religion, of promoting the spiritual intercom-

munion of the churches, strengthening their fraternal relations, facilitating co-operation in everything affecting their common interest, aiding weak churches, and carrying on mission work within their respective areas. **The Congregational Church Aid and Home Missionary Society** supports mission work through the county unions. For foreign missions see **MISSIONARY SOCIETIES (London Missionary Society)**. Congregationalism is also a prominent form of church life in the **United States of America**, throughout the British dependencies, and in other parts of the world. **Offices of the Congregational Union of England and Wales**, Memorial Hall, Farringdon Street, E.C. **Secretary**, Rev. W. J. Woods, B.A.; **Chairman**, 1900, J. Carvell Williams, Esq., M.P.

Connaught and Strathearn, H.R.H. Prince Arthur William Patrick Albert, 1st Duke of (creat. 1874), Earl of Sussex, P.C., K.G., K.T., K.P., G.C.S.I., G.C.M.G., G.C.I.E., G.C.V.O., K.C.B., **General**, Colonel of the Scots Guards, and Col.-in-Chief of the Rifle Brigade, A.D.C., was b. 1850. The third son of the Queen. Mar. the Princess Louise Margaret, youngest dau. of Prince Fredk. Charles of Prussia (79). Commanded 1st Brigade, 1st Division, in the Egyptian Expedition (82). Late Commander-in-Chief at Bombay, and of the Southern District in England. In April '93 he was promoted to the rank of full General, and was Commander-in-chief at Aldershot '93-8. By the death of Prince Alfred of Saxe-Coburg in '99, he became the heir-apparent to the Duchy; but he and his heirs renounced their rights in favour of the young Duke of Albany.

Constantinople. The capital of Turkey, situated on the waterway between the Black Sea and Mediterranean. Its population exceeds a million. To protect it, the Berlin Treaty left on the European side a portion of territory about the size of England and Scotland combined (80,000 sq. m.), and a population of 5,250,000. See **TURKEY**.

Consumption and other Forms of Tuberculosis, National Association for the Prevention of. The Association consists of ordinary and of life members. The subscription of ordinary members is 5s. annually. Life members give a donation of £5 5s. The methods employed by the Association include the education of public opinion and the stimulation of individual initiative by means of a central bureau for the collection and distribution of information as to modes of diffusion of tuberculosis and measures of prevention; the circulation of pamphlets and leaflets setting forth in plain language the results of scientific investigation of the above points; public lectures by men approved by the Council; addresses at congresses and other public gatherings; co-operation with other societies having for their object the promotion of public health; the co-operation of the public press; the holding of periodical congresses, and the issue of an annual report; the promotion of the establishment on a self-supporting basis of open-air sanatoria for tuberculous patients; the influencing of Parliament, county councils, boards of guardians, and other public authorities on matters relating to the prevention of tuberculosis. **President**, H.R.H. the Prince of Wales; **Chairman of Council**, Sir William Broadbent, Bart., M.D. All communications should be addressed to the **Secretary**, at the office, 20, Hanover Square, London, W.

CONVOCATION.

There are two Convocations, or Provincial Synods, of the clergy of the Church of England for the two Provinces of Canterbury and York. The greater importance of the Synod of Canterbury, until recent years, has led to its being commonly spoken of as **Convocation**. It was silenced in 1717, and its meetings were, with few exceptions, merely formal until 1852, from which date it has regularly met for business, generally thrice yearly for a week at a time. It consists of two Houses. In the Upper House sit the Archbishop and Bishops of the province in their scarlet Convocation robes; in the Lower House, the Deans, Archdeacons, and Proctors elected to represent the cathedral chapters and the beneficed clergy. The members of the Lower House wear the academic dress, the doctors their scarlet gowns. With every new Parliament a new Convocation is summoned by the Archbishop in obedience to a royal writ. When the Crown desires to refer to the Convocation any question affecting the Church, **Letters of Business** are issued directing it to take that question into its consideration. If the Convocation wishes to make any alteration in the canons of the Church, it prepares draft amended canons, and submits them to the Crown, both Convocations concurring in the same proposals. If the advisers of the Crown approve, the "royal licence" is issued, and the canons are enacted and promulgated by the Convocations and bind the ecclesiastical courts. Where the law of the Church has been settled by statute—as is the case with the rubrics and services of the Prayer-Book, and many other matters—it cannot be altered without the authority of Parliament. In the absence of Letters of Business Convocation is free to discuss all questions concerning the interests of the Church and the spiritual welfare of the nation.

*[In the Lower Houses those marked * are Proctors for the Chapter; those marked † Proctors for the Clergy.]*

PROVINCE OF CANTERBURY.

1. The Upper House.—Archbishop of Canterbury, *President*; Bishops of London, Winchester, Bangor, Bath and Wells, Chichester, Ely, Exeter, Gloucester, Bristol, Hereford, Lichfield, Lincoln, Llandaff, Norwich, Oxford, Peterborough, Rochester, St. Albans, St. Asaph, St. Davids, Salisbury, Southwell, Truro, and Worcester.

2. The Lower House.—*Prolocutor*: Right Rev. George H. Sumner, D.D., Bishop Suffragan of Guildford. **Canterbury**—Dean F. W. Farrar. Archdeacons Right Rev. W. Walsh and B. F. Smith; *F. J. Holland, †Revs. H. Bartram and F. H. Murray. **London**—Deans Gregory and Bradley; Archdeacons Sinclair, Thornton, and Furze; *Revs. Canons Duckworth and C. H. Turner (Bishop Suffragan of Islington); †Rev. A. J. Ingram and H. W. Villiers. **Winchester**—Dean Stephens; Archdeacons Sumner, Sapte, and Henry Haigh; *Rev. Canon Warburton, †Rev. Canon Musgrave and W. Durst. **Bangor**—Dean Lewis; Archdeacons Pryce and Williams; *Canon D. W. Thomas, †Revs. T. Edwards and E. Hughes. **Bath and Wells**—Dean Jex-Blake; Archdeacons Browne, Fitzgerald, and Ainslie; *Rev. Canon Buckle, †Rev. Prebendaries W. Michell and

F. A. Brymer. **Bristol**—Dean Pigou; Archdeacon Robeson; *James George Tetley, †Canons F. V. Mather and Hon. M. J. G. Ponsonby. **Chichester**—Dean Randall; Archdeacons F. J. Mount and R. Sutton; *Rev. Canon Sanderson, †Revs. A. H. S. Barwell and J. J. Hannah. **Ely**—Dean Stubbs; Archdeacons Emery, Chapman, Bathurst, and Vesey; *Canon Lowe, †Rev. W. Cunningham and J. H. Macaulay. **Eton College**—Provost Hornby. **Exeter**—Dean Cowie; Archdeacons C. T. Wilkinson, E. G. Sandford, and Seymour; *Rev. Canon Edmunds, †Rev. Prebendary Martin and Tudor. **Gloucester**—Dean Spence; Archdeacons Haywood and Sheringham; *Rev. Canons M. W. F. St. John, †Rev. Canons Jones and Proctor. **Hereford**—Dean Leigh; Archdeacons Bather and Stanhope; *Rev. Canon Poole, †Revs. E. F. Clayton and C. S. Palmer. **Lichfield**—Dean Luckock; Archdeacons T. B. Lloyd, H. M. Scott, and E. Lane; *Sir L. Stamer, Suffragan of Shrewsbury, †Revs. C. N. Bolton and E. Philips. **Lincoln**—Dean Wickham; Archdeacons Kaye and Perry; *J. H. Overton, †Revs. A. S. Wilde and G. W. Jeudwine. **Llandaff**—Dean Lewis; Archdeacons W. C. Bruce and Edmondson; *Rev. Canon Thompson, †Revs. J. T. Harding and B. Lloyd. **Norwich**—Dean Lefroy; Archdeacons Perowne, Gibson, Neville; *Rev. Canon Robinson and Bishop Lloyd (Suffragan of Thetford), †Revs. Canon C. Frere and Hoare. **Oxford**—Dean Paget; Archdeacons Pott, Bishop Randall and Bourke; *Rev. Canon Bright, †Revs. Canon E. Savory, and H. Barter. **Peterborough**—Dean Ingram; Archdeacons Thicknesse, Lightfoot, and Mitchinson (Assistant Bishop); *Canon Clayton, †Rev. Canons Yates and H. L. Watson. **Rochester**—Dean Hole; Archdeacons Cheetham, Richardson, and Burney; *Rev. Canon Jelf, †Rev. Canons Erskine Clarke and R. R. Bristow. **Salisbury**—Dean Boyle; Archdeacons Lear, Sowter, and Buchanan; *Rev. Canon Kingsbury, †Rev. Canons E. S. Bankes and Prebendary R. B. Hutchings. **St. Albans**—Archdeacons Johnson (Bishop Suffragan of Colchester), Lawrance, and Stevens; †Revs. J. M. Procter and J. W. Irvine. **St. Asaph**—Dean Williams; Archdeacons D. R. Thomas and D. Evans; *Rev. Canon Fletcher, †Revs. D. Jones and W. Ll. Nicholas. **St. Davids**—Dean Howell, Archdeacons Protheroe, Bevans, James, and Hilbers; *J. Lloyd, D.D. (Bishop Suffragan of Swansea), †Revs. Canon T. R. Walters and D. Jones. **Southwell**—(no dean); Archdeacons Frere and Richardson; *none; Rev. Canon Gray and Rev. C. J. Hamilton. **Truro**—(no dean); Archdeacons Cornish and Du Boulay; *Rev. Canon Worlledge, †Rev. Canon Thynne and Rev. J. S. Tyacke. **Windsor**—Dean Rev. J. F. Eliot; *Canon Right Rev. Bishop Barry. **Worcester**—Dean Forrest; Archdeacons Walters, Bree, and E. A. Knox (Bishop Suffragan of Coventry); *Rev. Canon Knox Little, †Rev. C. A. Dickens and Rev. E. A. Waller. **Vicar-General**: Sir J. P. Deane, Q.C., D.C.L.; **Registrar**: Sir John Hassard, K.C.B.; **Actuary**: F. Cobb, Esq.; **Apparitor-General**: Sir J. A. Hanham, Bart. **Clerk**: Mr. Arthur Ryder, Church House, Westminster.

PROVINCE OF YORK.

1. **The Upper House**.—Archbishop of York, **President**; Bishops of Durham, Liverpool,

Ripon, Manchester, Carlisle, Chester, Sodor and Man, Newcastle, and Wakefield,

2. **The Lower House**.—**Prolocutor**: Rev. Chancellor T. E. Espin, D.D., D.C.L. **York**—Dean Purey-Cust; Archdeacons R. J. Crosthwaite (Bishop of Beverley), C. C. Mackarness, W. H. Hutchings, and J. R. Eyre; *Rev. Canons Blunt (Bishop of Hull) and Wright; †Rev. Canons Faber, Argles, Watson, Stanbridge, Temple, and Revs. C. N. Gray, J. Gilmore, and H. T. Sale. **Durham**—Dean Kitchin; Archdeacons Long and Watkins; *Rev. Canon Tristram, †Rev. Canons Falconer, Bailly, Savage, and Chancellor Espin. **Carlisle**—Dean Henderson; Archdeacons Prescott, Diggle, and Phillips; *Canon Ware (Bishop of Barrow), †Rev. Canons Stock, Bell, Sherwen, Ayre, and Bower, and Rev. E. A. Askew. **Chester**—Dean Darby; Archdeacons Barber and Woosnam; *Rev. Canon Feilden; †Rev. Canons Wood and Gore, and Revs. W. E. Torr and S. A. Boyd. **Liverpool**—(no dean); Archdeacons Madden and Taylor; *none; †Rev. Canons Jones, Blundell, Penrhyn, and Spooner. **Manchester**—Dean Maclure; Archdeacons Wilson, A. F. Clarke, and Rawstorne; *Rev. Canon Crane, †Rev. Canons Rogers, E. J. Russell and Hawkins, Right Rev. F. A. R. Cramer-Roberts (sometime Bishop of Nassau), Revs. C. H. Lomax and S. Hastings. **Newcastle**—(no dean); Archdeacons Hamilton and Martin; *none; †Rev. Canons Lister, Waite, Long and Rogers. **Ripon**—Dean Fremantle; Archdeacons Kilner, Danks, and Waugh; *Canon Gibbon, †Rev. Canons Owen, Eddowes, and Wood, and Revs. R. P. Daniell-Bainbridge, V. J. Ryan, and A. J. G. Nash. **Wakefield**—(no dean); Archdeacons Brooke and Donne; *none; †Rev. Canons Grenside, Ivens, and J. W. Bardsley, and Rev. W. F. Norris. **Sodor and Man**—(no dean); Archdeacon Gill; *Rev. Canon Moore; †Canon Clarke. **Synodal Secretary**: Rev. Canon Wright, The Rectory, Stokesley, R.S.O., Yorks; **Registrar and Notary**: H. A. Hudson, Esq., Minster Yard, York; **Treasurer**: Canon J. W. Stanbridge.

Cook, Edward T., M.A., was ed. at New College, Oxford, where he attracted attention, both by his scholastic ability and by the speeches which he delivered at the Oxford Union. He was also one of the prime movers in the Palmerston Club. On leaving Oxford, he was for some years secretary of the London branch of the **University Extension** movement, and subsequently joined the staff of the *Pall Mall Gazette*. He is an enthusiastic disciple of Mr. Ruskin, and wrote a work entitled "**Studies in Ruskin**" ('90). He has also compiled a "Handbook to the National Gallery" and a companion volume for the "Tate Gallery." He succeeded Mr. Stead as editor of the *Pall Mall Gazette* in '90, and when the paper changed hands in '92 resigned, but resumed work with all his old staff on the *Westminster Gazette*. In '96 he was appointed editor of the *Daily News*.

Cook's Islands Federation. A group of six islands, with a few islets, situate in the eastern Pacific, between 18° 15' and 21° 47' S. lat., and 157° and 160° W. long. Excepting a few small lagoon islands, this group is the only British possession in the eastern Pacific between Fiji and the Marquesas. The other islands are French. Cook's Islands are very fertile and healthy, with a population of about 8000 Maoris and 150 to 200 Europeans. The

chief island is Rarotonga, about 53 miles in circumference, with a population of 3000. The principal products are coffee, copra, and lime-juice, with a considerable export of oranges and other tropical fruits to New Zealand. These exports are capable of large increase as the islands get more settled and cultivated. There is a Federal Government, which confines itself to federal work. Each island has its own local government, and raises a local revenue in its own way.

CO-OPERATION.

The co-operative societies of the United Kingdom are united under the **Co-operative Union**, which was established after 1869, the year in which the first Co-operative Congress was held. A **Central Co-operative Board** was then formed, consisting of London and provincial members. This Board now consists of seven sections—the Midland, Northern, North-Western, Scottish (including North of Ireland), Southern, South-Western and Western. The general secretary is Mr. J. C. Gray, and the offices are at Long Millgate, Manchester. These seven sectional Boards meet periodically in their respective districts, and the full Board meets twice every year—on the Saturday before the meeting of the Congress, and once during the Congress. The governing body of the Union is the **United Board**, the members of which are appointed by the above seven sectional Boards as their representatives. This organisation directs and promotes the cause of co-operation. The number of societies already enrolled under the Union (which enrolment is conditional on the payment of $\frac{1}{4}d.$ per quarter per member) is about 1073, and the number of registered societies, according to the latest published returns, in Great Britain 1640. The members of these societies number 1,646,078, their share capital is £19,759,039 sterling, sale of goods ('98) £65,460,871; their net profit was £7,165,753, and their investments amounted to £11,681,296. Besides its great distributive business, the **English Wholesale Co-operative Society**, whose headquarters are at Manchester, Newcastle, London and Leicester, engages in the production of boots and shoes at Leicester and Heckmondwike, soap and candles at Irlam, biscuits, sweets, etc., at Crumpsall, preserves, etc., at Middleton, lard, etc., at Hartlepool, woollen goods at Batley and Leeds (clothing factory), corn-milling at Dunston-on-Tyne, urniture at Broughton, and printing and stationery at Manchester. The **Scottish Wholesale Society** at Glasgow, in addition to its distribution, manufactures boots and shoes, shirts, tobacco, and confectionery, and carries on tailoring works, cabinet and printing works, with branches at Dundee, Leith, and Kilbarnock. Banking and shipping business is one by the Wholesale Societies, which own steam vessels with a registered tonnage of 313. There are also a Co-operative Newspaper Society and a Co-operative Insurance society.

During '98, 181 new co-operative societies are registered. Out of the 181, 33 societies are distributive, 14 productive, 87 agricultural and dairying, and 47 for special objects. The application of co-operation to Farming has been much discussed among co-operators of late years: 66 co-operative societies (not including those holding less than 10 acres of land) in England have engaged in farming, and there

are three strictly **Farming Societies**—the North Seaton Society, Northumberland, 28 acres, capital £365; the Assington Society, Suffolk, 222 acres, capital £2069; and the Coln St. Alwyn's Society, Gloucester, 242 acres, capital £1080. Altogether co-operation under this form deals with 5506 acres, with a capital of £105,235. The rent paid in '98 was £8176. The profits were £3925, as against £1394 in losses. There are also 13 **Agricultural Supply Associations** in England, with a total of 4416 members, £56,038 capital, and sales £103,668. Great attention is paid by the Union to propagandist and educational work. The examinations held under the management of the Educational Committee of the Co-operative Union on Auditing, Bookkeeping, and the Principles of Co-operation attract an increasing number of students every year. By means of local festivals, social meetings, concerts and lectures, illustrated by lantern slides, the principles of co-operation are being extensively made known among the working classes of the country. The fifteenth annual report of the **Women's Co-operative Guild** shows that 42 new branches were started during the year, bringing the total up to 262, with a membership of 12,537. The thirty-first **Annual Congress** of delegates from Co-operative Societies in Great Britain and Ireland was held at Liverpool in May '99, the total number present being 1205. The President was Mr. F. Hardern, J.P., of Oldham, who delivered the inaugural address. Among the subjects discussed during the sitting of the Congress were the representation of co-operators in Parliament; how to make Co-operation succeed in large centres of population; and Education. The next meeting of the Congress will take place at Cardiff, in Whit-week, 1900. While there are a number of ordinary distributive co-operative societies in Ireland, Co-operation is represented there chiefly by co-operative agricultural societies, of which there are nearly 400, with a membership of 40,000 farmers.

Cooper's Hill College. See ROYAL INDIAN ENGINEERING COLLEGE.

Cooper, Thos. Sidney, R.A., was b. 1803, at Canterbury. After struggling against adversity in his early life, in '23 he entered the R.A. school, through the influence of Sir Thomas Lawrence, and subsequently set up as a drawing master at Canterbury. Travelled to Brussels, where, under the auspices of Verboeckhoven, the animal painter, he became a very successful artist. First exhibited at the Academy in '33, becoming A.R.A. in '45 and R.A. in '67. As an animal painter he is supreme. His "**Cattle Reposing**" and "**King of the Meadows**" are amongst the best of his numerous paintings. Mr. Cooper's works have been more frequently copied, perhaps, than those of any other living artist. After becoming famous he returned to his native city, in the affairs of which he takes a lively interest. He presented its corporation with an **Art Institute** in '82. He has written his reminiscences.

Copper. See TRADE, '99.

Copyright, English. The first English Copyright Act, passed in the reign of Queen Anne, gave the author an absolute right of fourteen years, with an additional fourteen years in case of the author or his representative surviving this term. By an Act of George III. the period was increased to twenty-eight years, and the remainder of the author's life, if any. The Act at present in force (5 & 6 Vict., c. 45)

fixes copyright at forty-two years, or the period of the author's life, with a grace of seven years, whichever is the longer. Copyright covers literary, dramatic, artistic, and musical property. To copyright a book or other article in Great Britain and Ireland a copy, with a fee of 5s., must be deposited with the Registrar, Stationers' Hall, London, E.C. The Act provides that the owner of a copyright shall present one copy of the article protected, within three months from the day of publication, to the Library of the British Museum without demand, and one copy each, if demanded, to the Bodleian Library, Oxford, the University Library, Cambridge, the Advocates' Library, Edinburgh, and the Library of Trinity College, Dublin. To secure copyright in America, not only must there be simultaneous publication in both countries, but the American copy must be set up and printed in America. The Copyright Bills introduced in the House of Lords in '98 and again in '99 will be found described in the article on SESSION, sect. 49, together with the memorandum thereon of Lord Thring. It is probable that the Bill will be carried in the 1900 Session. See INTERNATIONAL COPYRIGHT.

Corsica. An island of the Mediterranean, separated from Sardinia by the Strait of Bonifacio. Area, 3376 sq. m.; pop. 278,501. Chief town, Ajaccio.

Costa Rica is the southernmost republic of Central America. Capital, San José. It is governed by a President elected for four years and a Chamber of 32 representatives, elected in the proportion of one member for every 8000 inhabitants, for four years by the "respectable" inhabitants, half of the deputies retiring every two years. Constitution promulgated in 1870, but frequently interrupted by pronunciamientos, and practically suspended from '70 to '82. Education compulsory and free. There were 327 primary schools with 21,913 scholars in '96. All religions tolerated, but the Roman Catholic is the State religion. Chief exports, coffee and bananas. Valuable metals exist in various parts of the country, and mining industry is making progress. Area, 23,000 sq. m.; estimated pop. 309,683. Revenue, '98-9, £1,682,640; expenditure, £1,612,131. Foreign debt, £2,100,000. Internal debt, £225,029. Imports, '98, £851,780; exports, £1,131,845. For Ministry, etc., see DIPLOMATIC; see also CENTRAL AMERICA.

Cottage Arts Association. See HOME ARTS ASSOCIATION.

Cottage Homes Bill. See SESSION, sect. 50.

Cotton. See TRADE, '99.

Countess of Huntingdon's Connexion, The, owes its existence to the religious revivals in the eighteenth century, with which Whitefield and the Wesleys are so prominently identified. The Countess of Huntingdon (d. 1791) had been a member of the Established Church, but finding that the parochial system interfered with her intense desire to have the gospel preached in every place in England, she cast in her lot with the Nonconformists. The liturgy formed part of the religious worship in her chapels, and it is still used in some of them. The Connexion has never been numerically strong. During life her control was absolute. Her successors were unable to exercise a similar control; and although a trust was created a few years after her death, many leasehold chapels lapsed into other hands. At one time the preaching stations numbered over a

hundred; now those under the Trustees amount to over thirty, not including village stations vigorously maintained by the principal churches, and Countess's chapels which are beyond the control of the Trustees. Cheshunt College, of which the Rev. O. C. Whitehouse, M.A., is the Principal, has been rebuilt. New Spa Fields Church has been erected. The Connexion chapels generally have been adapted to the religious requirements of the age, and the Trustees have faithfully endeavoured to maintain an evangelical ministry in every chapel of the Connexion. All its ministers have to subscribe to the "Fifteen Doctrinal Articles" of the Church of England, as do the professors of Cheshunt College and the students, with a view of carrying out the Countess's idea—the continuance of an earnest evangelical ministry. Offices, 36, Finsbury Pavement, E.C.

COUNTY COUNCILS.

Full particulars as to the constitution and powers of County Councils will be found in the article on LOCAL GOVERNMENT. Under this heading will be found a list corrected up to date, of the chairmen, clerks, and other principal officers of the County Councils of England and Wales. The constitution of the LONDON COUNTY COUNCIL is given under that heading, and there are added various particulars of interest, including a brief summary of the more important proceedings of the Council during the past year.

Anglesey.—Chairman, David Rees; Clerk, J. Lloyd Griffith, Anglesey; Chief Constable, Lewis Prothero, Menai Bridge.

Bedford.—Chairman, His Grace the Duke of Bedford; Vice-Chairman, Viscount Peel; Clerk, W. W. Marks, Bedford; Chief Constable, Lt.-Col. F. J. Josselyn; Surveyor, W. H. Leete.

Berks.—Chairman, W. G. Mount, M.P.; Clerk, J. T. Morland, Reading; Deputy Clerk, F. Morland, Reading; Chief Constable, Col. A. Blandy; Surveyors (Bridges and Buildings), J. Morris, Reading; (Highways), H. J. Tollit, Oxford; Treasurer, H. Collins, Reading.

Brecknockshire.—Chairman, C. Evan Thomas; Clerk, H. Edgar Thomas, Brecon; Chief Constable, E. R. Gwynne; Surveyor, William Williams.

Bucks.—Chairman, The Rt. Hon. Lord Cottesloe; Clerk, W. Crouch, Aylesbury; Chief Constable, Major Otway Mayne; Surveyor, R. J. Thomas.

Cambridgeshire.—Chairman, A. Sperling, LL.M., D.L., J.P.; Clerk, S. R. Ginn, D.L.; Deputy Clerk, A. Wright, LL.M.; Chief Constable, C. Stretten; County Surveyor, W. M. Fawcett, M.A.; Treasurer, E. H. Parker, M.A.

Cardiganshire.—Chairman, Rev. J. Mason Jones; Clerk, H. C. Fryer, Aberystwyth; Chief Constable, H. Evans; Surveyors, R. Lloyd, D. Davies.

Carmarthenshire.—Chairman, Joseph Maybery, Llanelly; Vice-Chairman, John Lloyd, Abergwili; Clerk, T. Jones, Llandovery; Deputy-Clerk, D. S. M. Jones, Llandovery; Treasurer, R. Peel Price, Llandovery; Chief Constable, W. Philipps, Llandilo; Surveyors, Daniel Phillips, Carmarthen, W. Bowen Davies, Golden Grove.

Carnarvonshire.—Chairman, J. R. Pritchard; Clerk, J. H. Bodvel-Roberts, Carnarvon; Chief Constable, Lt.-Col. A. A. Ruck; Surveyor, E. Evans.

Cheshire.—Chairman, Col. G. Dixon, Astle Hall, Chelford, Cheshire; Clerk, R. Potts, Chester; Chief Constable, Lt.-Col. J. H. Hamersley, Chester; County Surveyor, H. F. Bull, Chester Castle.

Cornwall.—Chairman, Earl of Mount-Edgcombe; Clerk, Christopher L. Cowland, Bodmin. Chief Constable, Richard M. Hill; Surveyors, S. W. Jenkin, T. J. Hickes.

Cumberland.—Chairman, H. C. Howard; Clerk, C. B. Hodgson, Carlisle; Chief Constable, Sir John Dunne, D.L.; County Surveyor, G. J. Bell; Financial Secretary, William Dobinson; Organising Secretary, Technical Education, C. Courtenay Hodgson.

Denbighshire.—Chairman, J. Watkin Lumley; Clerk, W. R. Evans; Deputy Clerk, John Roberts; Chief Constable, Major T. J. Leadbetter; County Surveyor, R. L. Williams.

Derbyshire.—Chairman, Lord Waterpark; Clerk, N. J. Hughes-Hallett, Derby; Chief Constable, Captain H. C. Holland; Surveyor, J. S. Story; County Medical Officer of Health, S. Barwise, M.D. (Lond.), D.P.H.; County Treasurer, J. F. Thirlby, Derby.

Devonshire.—Chairman, Lord Clinton; Clerk, H. Michelmore, Exeter; Chief Constable, F. R. C. Coleridge; Surveyors: (Buildings) E. H. Harbottle; (Roads and Bridges) C. G. S. Acock, S. Ingram.

Dorset.—Chairman, Viscount Portman, Bournemouth, Blandford; Clerk, E. A. Fooks, Sherborne; Chief Constable, Capt. D. Granville, Dorchester; Surveyor, W. J. Fletcher, Wimborne.

Durham.—Chairman, S. Storey, D.L.; Clerk, R. Simey, Durham; Deputy Clerk, G. I. Simey; Chief Constable, Lt.-Col. J. H. Eden; Surveyor, W. Crozier.

Ely (Isle of).—Chairman, J. Martin; Clerk, E. H. Jackson, Wisbech; Deputy Clerk, E. McD. C. Jackson, Wisbech; Chief Constable, Col. W. B. Ferris, Ely; County Surveyors: (Bridges and Buildings), R. R. Rowe, Cambridge; (Northern Roads District), H. F. Simpson, Wisbech; (Southern Roads District), Herbert Leete, Ely; Treasurer, F. M. Bland, Wisbech.

Essex.—Chairman, A. Johnston; Clerk, H. Gibson; Deputy Clerk, H. W. Gibson; County Treasurer, R. Woodhouse; Chief Constable, Capt. E. M. Showers; County Surveyor, H. Stock; Surveyor of Main Roads, P. J. Sheldon; County Accountant, F. H. Owers; Medical Officer of Health, J. C. Thresh.

Flintshire.—Chairman, Thomas Parry; Clerk, T. T. Kelly, Mold; Chief Constable, Maj. R. T. Webber; Surveyor, David Williams.

Glamorgan.—Chairman, J. Bland Jenkins; Clerk, T. Mansel Franklen, Cardiff; Chief Constable, L. Lindsay, Cardiff; Surveyor, T. Ll. Edwards, Bridgend; Medical Officer, W. Williams, M.A., M.D., Penarth. Organising Agent, W. Hogg, Pontypridd.

Gloucestershire.—Chairman, Sir J. E. Dorington, Bart., M.P.; Clerk, E. T. Gardom, Shire Hall, Gloucester; Chief Constable, Adml. H. Christian, Cheltenham; Surveyor, R. Phillips, Shire Hall, Gloucester.

Hampshire (or Southampton).—Chairman, The Earl of Northbrook, G.C.S.I.; Clerk, Henry Barber, LL.B., The Castle, Winchester; Deputy Clerk, G. A. Webb; Chief Constable, Major St. A. B. Warde, Hants Constabulary, Winchester; County Surveyor, W. J. Taylor, C.E.; County Treasurer, G. E. Yonge; Director of Technical Education, D. T. Cowan.

Herefordshire.—Chairman, Col. Prescott-Decie; Clerk, J. F. Symonds, Hereford; Chief Constable, Capt. the Hon. E. S. Stanhope.

Hertfordshire.—Chairman, Earl Cowper, K.G.; Vice-Chairman, Sir John Evans, K.C.B.; Clerk, Charles Elton Longmore, Hertford; Chief Constable, Lt.-Col. Daniell, Hatfield; Surveyor, U. A. Smith, 41, Parliament Street, Westminster, S.W.

Huntingdonshire.—Chairman, Earl of Sandwich; Clerk, J. Percy Maule; Chief Constable, Maj. H. G. Rooper; Surveyor, E. Borissow.

Isle of Wight (Administrative County of).—Chairman, Godfrey Baring; Vice-Chairman, Robey F. Eldridge; Clerk, William H. Wooldridge; Assistant Clerk, Chas. E. Nobbs; Chief Constable, T. O. H. Lees; Surveyor, F. Newman; Organising Secretary for Technical Education, Professor J. D. Custance.

Kent.—Chairman, Sir J. F. Lennard, Bart.; Clerk, W. B. Prosser, Maidstone; Chief Constable, Lt.-Col. H. M. A. Warde; Surveyor, F. W. Ruck.

Lancashire.—Chairman, Rt. Hon. Sir J. T. Hibbert, K.C.B.; Clerk, Harcourt E. Clare, Preston; Deputy Clerks, S. C. H. Sadler and J. P. Muspratt, Preston; Chief Constable, Lt.-Col. H. M. Moorsom, Preston; Medical Officer, E. Sergeant, Preston; County Bridgmaster, W. H. Radford; Surveyor, W. H. Schofield; Treasurer, H. Alison, Preston; Auditor, R. F. Easterby, Preston.

Leicestershire.—Chairman, Hussey Packe, Esq.; Clerk, W. J. Freer, Leicester; Chief Constable, E. Holmes; Surveyor, vacant.

Lincolnshire (Holland Division).—Chairman, W. Upsall, C.C.; Clerk, H. Chaderton Johnson; Chief Constable, Capt. P. B. Bicknell; Surveyors, Lewis Starkie, J. T. Peacock.

Lincolnshire (Kesteven Division).—Chairman, Sir John Henry Thorold, Bart., Syston Park; Vice-Chairman, Sir Hugh Cholmeley, Bart., Easton, Grantham; Clerk, J. Phillips, Stamford; Chief Constable, Capt. Bicknell, Lincoln; Surveyor, W. W. Wright, Grantham; Treasurer, H. Ingoldby, Sleaford.

Lincolnshire (Lindsey Division).—Chairman, William Embleton-Fox, Northorpe Hall, Lincoln; Clerk, C. Scorer, Lincoln; Chief Constable, Capt. P. B. Bicknell; Surveyor, J. Thropp, C.E.; Treasurer, Alexander Samuel Leslie Melville, Lincoln.

London.—See separate article LONDON CITY COUNCIL.

Merionethshire.—Chairman, Evan Parry Jones; Vice-Chairman, Henry Haydn Jones; Clerk, Robert Jones, Portmadoc; County Treasurer, John Richards, Dolgelly; Chief Constable, Major T. W. Best, Barmouth; Surveyor, J. M. Jones, Trawsfynydd.

Middlesex.—Chairman, R. M. Littler, C.B., Q.C.; Deputy-Chairman, Montagu Sharpe, Esq.; Clerk, Sir R. Nicholson; Deputy-Clerk, W. G. Austin, Guildhall, Westminster.

Monmouthshire.—Chairman, Alderman E. Grove, Newport; Clerk, H. Stafford Gustard, Newport; Chief Constable, Victor Bosanquet, Abergavenny; Surveyor, W. Tanner, Newport.

Montgomeryshire.—Chairman, A. C. Humphreys-Owen M.P.; Clerk, G. D. Harrison, Welshpool; Chief Constable, W. J. Holland; Surveyor, G. A. Hutchins.

Norfolk.—Chairman, Lord Cranworth; Clerk, C. Foster, Norwich; Deputy Clerk, G. C. Davies; Chief Constable, P. Pigott, D.L.; Surveyor, T.

H. B. Heslop; Technical Organiser, Edward Pillow.

Northamptonshire.—Chairman, S. G. Stopford Sackville, Esq., Drayton House, Thrapston; Clerk, H. P. Markham, Northampton; Chief Constable, J. D. Kellie MacCallum, County Hall, Northampton; Surveyor, E. Law, Northampton.

Northumberland.—Chairman, His Grace the Duke of Northumberland, K.G., Alnwick Castle; Vice-Chairman, Watson Askew Robertson, Esq., Ladykirk, Northam-on-Tweed; Clerk, S. Sanderson, Newcastle-on-Tyne; Deputy Clerk, C. D. Forster, Newcastle-on-Tyne; Chief Constable, Capt. H. D. Terry, Morpeth; County Surveyor, H. S. Kynnersley, The Moothall, Newcastle; Medical Officer, Dr. J. W. Hemmings, The Moothall, Newcastle; Accountant, W. H. Lloyd, The Moothall, Newcastle; Secretary for Technical Education, Charles Williams, The Moothall, Newcastle; Veterinary Inspector, C. Stephenson, Sandford Villa, Newcastle.

Nottinghamshire.—Chairman, Lord Belper; Clerk, J. Hind, 14, Fletcher Gate, Nottingham; Chief Constable, Capt. W. H. Tomasson; Surveyor, E. P. Hooley.

Oxfordshire.—Chairman, Viscount Valentia, M.P.; Clerk, T. M. Davenport, M.A., Oxford; Chief Constable, Lt.-Col. Hon. E. A. Holmes-A Court; Surveyor, H. J. Tollit.

Pembrokeshire.—Chairman, Judge W. S. Owen; Clerk of the Peace, William Davies George; Chief Constable, T. Ince Webb-Bowen; Surveyor, T. George; Assistant Surveyor, Arthur H. Thomas.

Peterborough (County Soke of), Northants.—Chairman, Col. C. I. Strong; Clerk, Leonard J. Deacon, Peterborough; Deputy Clerk, Walter J. Deacon; Chief Constable, J. D. K. McCallum, County Hall, Northampton; Surveyor, vacant; Treasurer, Henry Pank, Peterborough.

Radnor.—Chairman, C. C. Rogers; Clerk, E. Wood, Rhayader; Deputy Clerk, T. W. Harding; Chief Constable, Captain Fullarton James; Surveyor, R. Wellings Thomas.

Rutlandshire.—Chairman, Earl of Gainsborough; Clerk, B. A. Adam, Oakham; Chief Constable, W. Keep; Surveyor, J. Richardson.

Shropshire.—Chairman, J. Bowen-Jones; Clerk, E. C. Peele, Shrewsbury; Deputy Clerk, R. S. Cleese, Shrewsbury; Chief Constable, Capt. G. Williams-Freeman; Surveyor, A. T. Davis, C.E.; Organising Secretary of Technical Instruction, F. K. Armytage; Medical Officer, W. N. Thurstfield.

Somerset.—Chairman, The Rt. Hon. Sir R. H. Paget, Bart.; Clerk, W. Dunn, Frome; Chief Constable, Capt. C. G. Alison, Glastonbury; Surveyor, W. J. Willcox, 1, Belmont, Bath; Treasurer, W. C. King, Weston-super-Mare.

Staffordshire.—Chairman, Earl of Harrowby; Vice-Chairman, Frank James; Clerk, M. F. Blakiston, Stafford; Chief Constable, Capt. Hon. G. A. Anson; Surveyor, W. H. Cheadle; County Medical Officer, Dr. George Reid; Treasurer, P. H. Harston; Surveyor (Main Roads), J. Moncur, A.M.I.C.E., Stafford; Director of Technical Instruction, T. Turner, Stafford.

Suffolk (East).—Chairman, Lord Rendlesham; Clerk, J. Cherry; Deputy and Acting Clerk, A. Townshend Cobbold; Chief Constable, Capt. Mayne; Surveyor, H. Miller, M.I.C.E.

Suffolk (West).—Chairman, O. D. Johnson; Clerk, J. Cherry; Deputy and Acting Clerk, A. Townshend Cobbold; Chief Constable, Maj. A. F. Poulton; Surveyor, F. Whitmore.

Surrey.—Chairman, E. J. Halsey; Clerk, Sir R. H. Wyatt, D.L., County Hall, Kingston-on-Thames; Deputy Clerk, T. W. Weeding; Chief Constable, Capt. M. L. Sant; Surveyor, F. G. Howell.

Sussex (East).—Chairman, W. V. K. Stenning; Clerk, F. Merrifield, Lewes; Chief Constable, Major H. G. Lang, Lewes; Surveyor, F. J. Wood, Lewes.

Sussex (West).—Chairman, Duke of Richmond and Gordon, K.G.; Clerk, F. Merrifield, Lewes; Chief Constable, Capt. G. R. B. Drummond, Horsham; Surveyor, W. B. Purser, Horsham.

Warwickshire.—Chairman, J. S. Dugdale, Q.C.; Clerk, A. S. Field, Leamington; Chief Constable, Capt. J. T. Brinkley; Surveyor, J. Willmot; Treasurer, S. C. Smith, Lloyds Bank, Ltd., Warwick.

Westmorland.—Chairman, J. Cropper; Clerk, J. Bolton, Kendal; Chief Constable, Sir J. Dunne; Surveyor, J. Bintley; Treasurer, G. E. Cartmel.

Wiltshire.—Chairman, Lord Edmond Fitzmaurice, M.P.; Vice-Chairman, the Hon. Percy Wyndham; Clerk, R. W. Merriman; Treasurer, E. B. Merriman; Accountant, T. A. Dring; Medical Officer of Health, Dr. J. Tubb Thomas; Analyst, Dr. Bernard Dyer; Chief Constable, Capt. Sterne, R.N.; Surveyor, C. S. Adye.

Worcestershire.—Chairman, J. W. Willis-Bund; Clerk, S. Thornely; Worcester; Chief Constable, Lt.-Col. G. L. Carmichael; Treasurer, A. C. Cherry; Medical Officer, G. H. Fosbrooke, D.P.H. (Cantab.); County Surveyor, H. Rowe.

Yorkshire (East Riding).—Chairman, Sir C. Legard, Bart.; Clerk, J. J. Bickersteth, Beverley; Chief Constable, Major W. H. Dunlop; Surveyor, Alfred Beaumont.

Yorkshire (North Riding).—Chairman, John Hutton, M.P.; Clerk, W. C. Trevor, Northallerton; Chief Constable, Major R. L. Bower, C.M.G.; Surveyor, W. Stead.

Yorkshire (West Riding).—Chairman, Alderman Charles G. Milnes Gaskell, Thornes House, Wakefield; Clerk, F. A. Darwin, Wakefield; Deputy Clerk, W. Vibart Dixon; Treasurer, Percy Tew, Heath Hall, Wakefield; Chief Constable, Capt. T. S. Russell, Wakefield; Surveyor, J. Vickers Edwards, Wakefield; Medical Officer, Dr. J. R. Kaye; Accountant, W. Clarke, Wakefield.

County Councils Association. Secretary, J. R. Fitz-Gerald. Office, 9, Palace Chambers, Bridge Street, Westminster, S.W.

County Courts. These are now regulated by the County Courts Act '88, 51 & 52 Vict., c. 43, which amended and consolidated all the former Acts. The whole of England and Wales is divided into districts or circuits, which are presided over by judges, who hold courts in certain towns of each district once a month or so; in London and in some large towns courts are held on several days in each week. The judge, appointed by the Lord Chancellor, must be a barrister of at least seven years' standing; the registrar of each court, appointed by the judge, must be a solicitor of at least five years' standing; the high bailiff, who is responsible for the service of the process of the Court, and for levying executions, etc., is also appointed by the judge. This post is in many cases held by the registrar. Speaking generally, the jurisdiction of the court extends to all actions where the sum claimed does not exceed £50,

though actions for malicious prosecution, libel, slander, seduction, and breach of promise are excluded. The latter may, however, be sent down from the High Court and heard in the County Court. Actions of contract up to £100, and of tort up to any amount may be remitted from the High Court to the County Court. Contract cases are remitted on the application of either party, tort cases on the affidavit of the defendant that in the event of an adverse verdict the plaintiff would be unable to pay the costs of the action. There is jurisdiction in equity, such as administrations of estates, trusts, dissolution of partnerships, foreclosure of mortgages, specific performance, etc., where the amount involved does not exceed £500. Bankruptcy, the Employers' Liability Act, and Tithe, are in the exclusive jurisdiction of the County Court. There is a limited jurisdiction in Admiralty: (1) the claim for salvage, where the property saved does not exceed £1000, or where, irrespective of such value, the amount claimed does not exceed £300; (2) towage, etc., not exceeding £150; (3) damage to cargo by collision, or otherwise, not exceeding £300. Only a few courts held in towns situate on the coast, appointed by an Order in Council, have Admiralty jurisdiction. The procedure is very simple, there are no pleadings, process is usually served by the bailiffs, but may in some cases be served by the parties or their solicitors. On the day fixed for the trial the parties appear, either in person or by solicitor or counsel, and the case is heard and determined by the judge or registrar. Cases of contract where the defendant does not appear are heard by the registrar; who also settles the terms of payment where the debt is admitted; he also has power to try disputed cases by consent of the parties, where the sum claimed does not exceed £2. A jury of five persons may be summoned if the amount involved exceed £5, or if under that amount by leave of the judge. The Court fees payable are 1s. in the £ for each £ claimed on entering the plaint, and 2s. in the £ for the hearing, with a maximum of 21s. and 40s. respectively. The judge has power under the Debtors Act '69 to commit to prison for a term not exceeding six weeks any person who has the means to satisfy the debt and has failed to do so. There is an appeal to the High Court on a question of law, but not of fact, in cases where more than £20 is claimed, but where less than that sum is claimed leave to appeal must be obtained from the judge. See SESSION, sect. 10.

Courtney, Rt. Hon. L. H., M.P. See under COMMONS.

Cowen, Frederic Hymen, one of the most popular of English composers, was b. in Kingston, Jamaica, 1852. From an early age he was a pupil of Sir Julius Benedict and Sir John Goss, and further studied at Leipzig and Berlin. His most esteemed productions are his symphonies, his "Language of Flowers" orchestral suite, and his cantatas "The Rose Maiden," "The Sleeping Beauty" (specially composed for the Birmingham Festival of '85), and "The Water Lily" (first performed at the Norwich Festival, Oct. 6th, '93). Mr. Cowen's other important works include two oratorios, "The Deluge" and "Ruth," and four operas, "Pauline," "Thorgrim," "Signa," first produced at Milan in Nov. '93, and "Harold," produced at Covent Garden in June '95. A sacred cantata, "The Transfiguration," was

composed for the Gloucester Festival in Sept. '95. His later works comprise a *suite de ballet*, "In Fairyland," "Four English Dances," Symphony No. 6 (The Idyllic), a *Concertstück* for piano and orchestra, and the "Ode to the Passions," for chorus and orchestra, composed for the Leeds Festival (Oct. '98). Mr. Cowen has also written over two hundred songs, duets, etc., many of which have become very popular. He was elected conductor of the Philharmonic Society in '88, but resigned in '92. In '95 he succeeded the late Sir Charles Hallé as conductor of the Manchester Subscription Concerts, which post he held for three seasons. He is also conductor of the Liverpool Philharmonic Society, the Bradford Festival Choral Society, and the Bradford Permanent Orchestra. Address: 73, Hamilton Terrace, N.W.

Cozens-Hardy, Sir Herbert Hardy, a Justice of the High Court, is the second son of the late Mr. W. H. Cozens-Hardy, of Letheringsett Hall, Dereham, Norfolk, and was born Nov. 22nd, '38. Educated at Amersham School and Univ. Coll., London, of which he was elected a Fellow, he was called to the Bar at Lincoln's Inn in '62, took silk in '82, and in '85 was elected a Bencher of his Inn. His legal career has been a distinguished one, and till his appointment as a Justice of the High Court in Feb. '99 he was leader of the Chancery Bar and Chairman of the General Council of the Bar. He was elected as Liberal member for North Norfolk in '85, and held the seat till his appointment as Judge. He holds the degrees of B.A. and LL.B. at London University. Address: 50, Ladbroke Grove, W., Letheringsett Hall, Holt, Norfolk.

Craigie, Mrs. (John Oliver Hobbes) is the eldest daughter of Mr. J. Morgan Richards, and was b. at Boston, U.S.A., Nov. 3rd, 1867. She married Reginald Walpole Craigie in '87, and after a separation obtained a divorce and the custody of her child in '95. Her literary career began in '91 with the publication of that clever book, "Some Emotions and a Moral." "The Sinner's Comedy" followed in '92, "A Study in Temptations," in '93; and amongst her subsequent works have been "The Gods, Some Mortals, and Lord Wickenham," in '95, "The School for Saints," in '97, and in '98 a successful play, "The Ambassador," and a one-act drama, "A Repentance." She is a contributor to the *Times*, *Fortnightly Review*, *Anglo-Saxon Review*, etc. She was received into the Roman Catholic Church in '92. Address: 56, Lancaster Gate, W.

Crane, Walter, poet and painter, was b. 1845, and first exhibited at the Royal Academy '62. Has published various illustrated books, and is an authority on decorative art. Mr. Crane was a member of the old Dudley Gallery Committee '66-81, elected a member of the Institute of Painters in Water Colours in '82, resigned later, now belongs to the Old Society of Painters in Water Colours, and is an ardent advocate of the establishment of a really national institution of art, regarding the reform of the Royal Academy as hopeless. He was the first President of the Arts and Crafts Exhibition Society, and since the death of Mr. William Morris, whom he joined in his socialist propaganda, he has again been elected President. He has published "Walter Crane's Toy Books," and many poems illustrated by himself, the principal one being "The Sirens Three." An

interesting exhibition of his work was held in London during '91, which has since made a tour in the United States, Germany, and Austria, and will go to Copenhagen, Norway, Sweden, and Switzerland before returning to England. Among his principal pictures are "The Renaissance of Venus," "The Bridge of Life," "Neptune's Horses," "Freedom," "The Chariots of the Hours," and "The World's Conquerors" ('98). In '92 he published "The Claims of Decorative Art," in '96 "Decorative Illustration of Books," and in '98 "The Basis of Design." He was Art Director to the city of Manchester '93-6, and was appointed Principal of the Royal College of Art in '98. He has illustrated an edition of Spenser's "Faerie Queene" and "The Shepherd's Calendar."

Cremation. The disposal of the human body after death by the process of cremation, which rapidly resolves the body into its component elements, in an absolutely innocuous manner, is now largely practised throughout the civilised world, where formerly burial in the earth only was carried out. This modern movement in its favour commenced about fifteen years ago. Crematoria have been established in this country at Woking, Manchester, Glasgow, and Liverpool, and there is a crematorium in course of erection at Hull. Cremation societies have been instituted in every European country, and many of the states of America possess them also, and cremation in these states has become a regular practice. The cremation of an adult by either of the two processes employed is completed in about an hour and a half, and the ashes, which are perfectly white, weigh about 4 lb. The cost of reduction, were it to become common, would be less than thirty shillings; but at present it is more than treble this sum, owing to the necessity of heating the crematory every time for each cremation. **Hon. Secretary** of Cremation Society, J. C. Swinburne Hanham, 324 Regent Street, London, W.

CRETE.

Crete is an island in the Mediterranean, lying to the south of the Ægean Sea and Archipelago. Area about 3000 sq. m.; pop. 300,000. Chief cities, Candia (pop. 14,000); Canea (pop. 22,000); and Retimo (pop. 10,000). There are about 80,000 Moslems and 220,000 Christians. The island was conquered in 1669, but has never really submitted to the Turks, and has continually risen in insurrection against them. In 1868, after one of these insurrections, the Organic Statute was drawn up, and thus, in form at least, a fair amount of self-government was secured to the island. After another insurrection in '77 England intervened, and the Pact of Halepa was drawn up, inaugurating the Assembly and a parliamentary régime. In '89 Turkey withdrew many of the provisions of the Pact of Halepa, and limited the number of members of the Assembly as well as their powers. The discontent amongst the Christians led the Powers to intervene at the end of '95, and the Constitution of Halepa was restored. The reforms, however, were not carried out. Indeed, the Sultan, by means of his agents, stirred up the Mahomedans to make them unworkable, and in the midst of the fighting and disturbance thus caused, came the intervention by Greece early in '97, and the landing of a Greek force. The Powers, however, disapproved of this action, and ultimately

the Greek troops were withdrawn, the Powers undertaking to set up autonomy under the nominal suzerainty of the Sultan, and to secure the withdrawal of the Turkish forces also. They appointed an Executive Committee nominated by the Assembly to administer the interior of the island, the Admirals themselves administering the coast regions occupied by European troops. A Mahomedan outbreak, in which nearly a hundred British soldiers were killed or wounded, and close upon a thousand Christians massacred, led to the presentation to the Sultan of a Collective Note signed by Great Britain, France, Russia, and Italy (Oct. 5th, '98), demanding the withdrawal of the Turkish troops within one month. The evacuation was completed in Nov. '98, and on the 27th the ambassadors of the Powers at Athens notified the King of the election of Prince George as High Commissioner, and his Majesty formally authorised his son to accept the mandate. Prince George accepted the trust, and there were great popular rejoicings both in Greece and in Crete. The conditions drawn up by the Powers were as follows:—

"(1) The High Commissioner will be invested with a temporary mandate for a term of three years for the pacification of the island and the establishment of a regular Administration. (2) The High Commissioner will recognise the high suzerainty of the Sultan, and will take measures for the protection of the Turkish flag, which, in accordance with the promise given by the four Powers to the Sultan, will float over the island of Suda, at the mouth of Suda harbour. (3) His first care will be—in accord with the National Assembly, in which all Cretan elements will be represented—to substitute a system of autonomous government capable of assuring in equal measure security of life and property and the free exercise of religion. The High Commissioner will proceed immediately to the organisation of a *gendarmérie* or local militia capable of guaranteeing order. In order to facilitate the organisation of the new Administration, and to provide for the personal expenses of his Royal Highness Prince George, each of the four Powers will make—with the consent of the respective Parliaments in the case of constitutional countries—an advance of 1,000,000 fr., which will eventually be repaid by means of a loan which Crete will raise on her revenues." President Sphakianaki issued a manifesto (Dec. 9th, '98) announcing the dissolution of the Executive Committee, and stating that the Christians were disarming in all parts of the island, both parties being anxious to remove all traces of conflict before Prince George's arrival. The Prince arrived at Canea (21st), escorted by an international squadron, and was welcomed with tremendous enthusiasm. A "Te Deum" was sung in the Cathedral, after which his Royal Highness drove to the Konak, where he was formally installed, and held an official reception. A provisional Government was formed consisting of an Administrative Council of six Christians and three Mahomedans, nominated by the High Commissioner, and a Commission of sixteen, representing all parties, was entrusted with the drafting of a Constitution to be submitted to the Assembly. The National Assembly having met, elected M. Sphakianaki as President (Feb. 22nd). The draft of a new Constitution was approved and passed (March 16th), and the Government were

empowered to raise a loan of 9,000,000 drachmæ, on condition that the interest, with the help of the Powers, should not exceed 3 per cent. (April 27th). An Administration consisting of a Council of five members, without counting the Prince's financial adviser, M. de Blonay, was formed (30th), and it was announced (May 2nd), that the Italian Government had lent 6 officers and 86 non-commissioned officers of Carabinieri to organise the Cretan *gendarmérie*. See DIPLOMATIC.

CRICKET, '99.

On Dec. 24th, '98, the English Eleven under Lord Hawke played their first match in South Africa at Capetown. These games caused great excitement amongst cricketers, who now have the pleasure of reading accounts of matches played almost the whole year round. Out of 19 matches played, England won 15 and lost 1, whilst 3 were drawn; but it must be admitted that their opponents, as a rule, were not by any means first-class performers. The last match was played on April 1st, '99. As to the cricket season proper, there has never been so much scoring in any year before. The weather was almost perfect for run getting, and rain, which generally puts a stop to so many matches, was conspicuously absent. As instances of the increase in the numbers of runs made, the following may be cited: In '98, a record year, there were 136 centuries in county matches, in '99 there were 223 instances in first-class cricket where 100 runs were made by individual batsmen. The highest innings of the year was Abel's 357 not out for Surrey against Somerset. Ranjitsinhji put together the enormous amount of 3159 runs during the season, whilst four others reached over 2000, and more than 50 men succeeded in getting over 1000 runs in first-class matches. Major Poore's average of 91 stands far above the rest, and C. M. Wells, who is second, has an average of over 65, as against nearly 61, which was highest in '98. C. L. Townsend has succeeded in performing a feat hitherto only accomplished by W. G. Grace, that of obtaining over 2000 runs and taking over 100 wickets in the season. Trott succeeded in taking more wickets than any one else, the number being 239; Hearne's number in '98 was 222. The visit of the Australian Eleven naturally added much interest to the season's play, and the crowds that gathered wherever they played were enormous. Out of 35 matches played the Australians have won 16, lost 3, and 16 have been drawn. The five test matches were a disappointment, as only one was finished, and in that the Australians won by ten wickets. All the others were drawn.

The Oxford v. Cambridge match was drawn, and so was Eton v. Harrow. Eton beat Winchester, Marlborough beat Rugby, Haileybury beat Cheltenham. The Haileybury v. Uppingham match was drawn. The Gentlemen beat the Players at Lord's, but the Players beat the Gentlemen at the Oval.

A point is reckoned for each win, and a point deducted for each defeat. Unfinished games are left out of the reckoning entirely. The county which obtains the greatest proportionate number of points in *finished matches* becomes the champion.

The position of the counties at the close of the season was as follows:—

County.	Pl.	W.	L.	D.	Pts.
1 Surrey . . .	26	10	2	14	8
2 Middlesex . .	18	11	3	4	8
3 Yorkshire . .	28	14	4	10	10
4 Lancashire . .	25	12	6	7	6
5 Sussex . . .	22	7	5	10	2
6 Essex . . .	20	6	6	8	—
7 Warwickshire .	20	4	5	11	—1
8 Kent . . .	19	6	8	5	—2
9 Gloucestershire.	20	5	8	7	—3
10 Hampshire . .	20	4	8	8	—4
11 Notts . . .	16	2	4	10	—2
12 Worcestershire.	12	2	5	5	—3
13 Somerset . . .	16	2	8	6	—6
14 Leicestershire .	18	2	8	8	—6
15 Derbyshire . .	18	2	9	7	—7

The following were the chief batting and bowling averages for '99:—

BATTING.

Crispi, Francesco, is a native of Ribera, in Sicily, where he was born in 1819. He was educated for the law, and was called to the Neapolitan bar. His early aspirations for the realisation of Italian unity prompted him to take an active part in the revolutionary movement of '48, when the kingdom of the two Sicilies was overthrown. He inspired the resistance of the Sicilians during the insurrection of Palermo, and was compelled to fly to France. He subsequently landed with Garibaldi at Palermo, and distinguished himself by his courage and capacity. In '61 he was elected to the first Italian Parliament as member for Palermo, and was recognised as the leader of the Constitutional party. On the death of Signor Depretis, in '87, Signor Crispi, who had been Minister of the Interior, became President of the Council and Minister for Foreign Affairs. His Ministry was defeated (Jan. '91), and he resigned. In '92 he announced his intention to quit politics, and gave up the leadership of the Opposition. The voice of his country, however, called him to the head of affairs early in '94, when all was chaos and uncertainty. Under his powerful leading the condition of affairs gradually improved, notwithstanding the desperate efforts of his opponents to discredit and overthrow him by slanderous personal attacks upon him. He fell eventually in '96, through the disasters that overtook the Italian arms in Erythrea.

Croatia. See AUSTRIA-HUNGARY.

Crockett, Samuel Rutherford, was b. at Duchrae, New Galloway, where his father was a farmer, in '59. He was ed. at the Free Church Institution, Castle Douglas, and became a pupil-teacher there, obtaining a bursary at Edinburgh University in '76. His literary instincts during this period, and while he was following the profession of tutor after leaving the university, broke out chiefly in verse, which first appeared in the periodical press, and were then collected into a volume published under the title of "Dulce Cor" in '86. His first prose work, "The Stickit Minister," appeared in '93, and has since reached its fourteenth edition. "The Raiders" followed, and also achieved a great success. It is now in its twelfth edition. Since then Mr. Crockett has written, amongst other smaller sketches, "Mad Sir Ughtred of the Hills," besides publishing a larger work, written before he became so well known, "The Lilac Sun-Bonnet," of which about 100,000 copies have

been sold. In Oct. '95 "The Men of the Moss Hags," and later a book of child life, "Sweet-heart Travellers," appeared. "Cleg Kelly, Arab of the City," was published in March, and "The Grey Man" in Sept. '96. The unprecedented edition of 35,000 of this book was subscribed before publication. "Lochinvar" was published in Oct. '97, "The Standard Bearer" and "The Red Axe" in '98. Mr. Crockett's books have been exceedingly popular in America, and have been translated into most European languages.

Croquet. Croquet has regained to a certain extent the place in popular esteem from which Lawn Tennis ousted it; the latter game was indulged in so violently for so many years that the natural reaction followed, with the result that tennis players are now comparatively few. Croquet Tournaments are now the fashion, and the following were amongst the chief results of the season:—The Ladies Championship at Wimbledon in June was won by Miss Gower, who beat Miss L. Way in the final by 7 points. At the Cheltenham Open Championship Meeting C. E. Willis beat Rev. P. Ward. The United All England Croquet Association held their Meeting at the Queen's Club Ground during the week commencing June 26th, when Mr. W. W. Bruce won the Gold Medal, and Miss Chester won the Ladies' Gold Medal, Miss Gower being 2nd. The Championship of the Ranelagh Club and the Sapphire Mallet was won by C. E. Willis, and the Lady's Championship and the Ruby Mallet by Miss Gower. The All Comers' Singles, at the Buxton Tournament, was won by Captain Drummond, and Miss Drummond was the winner of the Ladies' Singles.

CUBA.

Cuba is considerably the largest of the West India Islands, and lies between Florida and the Caribbean Sea. It is divided into six provinces. The capital is **Havana**, a splendid city (pop. 200,000), connected with other towns by 1000 miles of railway. The population is about 1,640,000, of whom about one-half are mulattoes or negroes. The chief products are sugar and tobacco, though both have shown signs of declining in late years. There are also valuable iron, manganese, and copper mines. A serious insurrection, which subsequent events showed had been long prepared for, broke out in the island early in '95. Its object was the absolute freedom of the island from Spanish rule. No less than 200,000 Spanish troops were sent to quell the insurrection, but the rebels, numbering about 40,000, adopted guerilla tactics, and could not be put down. A scheme of reforms was agreed upon by the Spanish Cabinet (Feb. 3rd, '97). These were, however, ridiculed as offering a settlement of the grievances of the rebels or holding out any hope of a termination of the war, and the general situation remained much as before, the rebels holding their own in every province. General Weyler accomplished nothing but the devastation of the country, and in that he succeeded admirably. With the advent of a new Spanish Ministry under Señor Sagasta, it was

announced that political rather than military means would be used to effect the pacification of the island, and that autonomy, under the suzerainty of Spain, would be granted (Oct. 6th, '97). General Weyler was then recalled, and General Blanco appointed Governor. On arriving at Havana he issued a proclamation declaring that the Spanish Government had charged him to grant reforms and give the island self-government under the sovereignty of Spain. The reforms, however, did not make themselves apparent, and the tension between Spain and the United States, which had intervened and demanded that the fighting should cease, was greatly increased by the blowing up of the United States battleship the *Maine*, in Havana harbour. The United States Government sent a formal demand to Spain for the evacuation of the island in April '98, but before it could be delivered the Spanish Government broke off diplomatic relations. In the war that followed the Spanish fleet was destroyed, and Santiago and the eastern part of the island were captured by the American troops. A protocol embodying the terms of peace was signed at Washington (Aug. 12th, '98), and a joint Commission was appointed to arrange the details. This Commission met in Dec. '98, and Spain agreed to relinquish all claim of sovereignty over Cuba, while the United States Government undertook the obligations with respect to the protection of life and property which naturally resulted from its occupation of the island, so long as that occupation should last. **Estimated revenue, '96-7, £6,250,000; expenditure, £25,420,000; imports, '95-6, £14,290,874; exports, £20,387,804.** The public debt, at the end of '97, was estimated by a *Times* correspondent at about £104,000,000, as compared with a debt of £34,000,000 when the rebellion broke out in Feb. '95.

History, '99.—The relations between the Cubans and Americans improved considerably towards the close of the year, and the Cuban Assembly unanimously resolved not to elect any Government until the policy of the United States was definitely made known. The Cuban army, and indeed the populace generally, were in great distress, and many of them on the point of starvation. The Spanish army of occupation was slowly transported to Spain. General Brooke was appointed by President McKinley Military Governor of the island (Dec. 13th, '98), and it was arranged that a subordinate military governor should be put over each of the six provinces. About 10,000 of the Cuban troops were enrolled to form a rural constabulary, the remainder being required for work on the plantations. Large supplies of food were sent from America to relieve the distress, and General Brooke took over the control of the country from Captain-General Castellanos (Jan. 1st, '99). The American army of occupation at this time was estimated at 30,000. Mr. Robert Porter was sent as a Special Commissioner to arrange for the disbanding of the Cuban army, and he arranged with General Gomez that a sum of \$3,000,000 should be paid to assist the Cuban soldiers in returning to their homes. Some disposition was shown to refuse this offer, and it was reported that the Cuban Military Assembly had removed Gomez from his post; but in April a vote for the disbanding of the army and for its own dissolution was passed by the Assembly. By the order of President McKinley, a proclamation

directing a census of the island to be taken was issued (August 30th).

Curacao. An island in the Caribbean Sea, off the coast of Venezuela. It is a Dutch possession, and chief of Holland's West Indian possessions. The colony of Curacao includes the islands of Curacao, Bonaire, Aruba, St. Eustache, and Saba, with part of the island of St. Martin. The total area is 403 sq. m., and the pop. about 50,000. The colony is administered by a Governor with a Council of 4 members all nominated by the sovereign, and a Colonial Council of 12 nominated members. Cattle, sheep, goats, etc., are bred for exportation. See COLONIES, ETC., OF EUROPEAN POWERS.

Curzon, Lord, of Kedleston, appointed Viceroy of India in '98. See under PEERS.

Customs. See FINANCE, NATIONAL.

CYCLING, '99.

The cycling races of '99 were far less numerous than in former years. The performances hitherto got up by companies for trading purposes stopped with the collapse of the cycle boom; hence the reduction in the number of professional riders. In fact, cycle tracks are somewhat deserted now, the rage for racing being practically over. The seventh Annual National Show of Bicycles, etc., was held at the Crystal Palace in Nov. '98 instead of the following January, as was usual, and was a very satisfactory exhibition. The Stanley Show at the Agricultural Hall was held at the same time: a new arrangement, to allow people to visit the two shows with one visit to London. On March 15th C. E. Jenkins at Cardiff rode 100 miles unpaced on the road in 5 h. 58 min., being 17 min. faster than the record. On March 24th the N.C. Union celebrated their 21st anniversary by a dinner in London, at which the Right Hon. A. J. Balfour presided, and spoke on the value of cycling. On April 23rd T. Linton, in Paris, rode 31 miles in 55 min. 30½ sec., a record performance by a minute over ordinary pacing, but on this occasion motors were used by the pacers. On May 7th Taylor won the 100 kilometres race in Paris in 1 h. 58 min. 10½ sec., and a few days afterwards, in the 80 kilos race, he set up records from 20 upwards, covering the whole distance in 1 h. 28 min. 0½ sec., and 50 miles in 1 h. 28 min. 34½ sec., also a record. The 100-hours race was won by Miller of Chicago, who covered in the time 1403 miles. At the Crystal Palace on May 7th C. Jarrott won a 5-mile race for motor tricycles in 3 min. 22½ sec., 25 sec. faster than the paced bicycle record. The N.C.U. have refused to permit motor pacing in amateur events; but in France, where no such rule exists, J. Dupuy, a French amateur, rode 51 kilometres 438 metres (very nearly 32 miles) in an hour, the English record being 29 miles 454 yards. On May 28th and 29th the race from Bordeaux to Paris took place, paced by motors. It was won by C. Huret in the wonderful time of 16 h. 35 min. 47 sec., being an average of over 22 miles an hour for the 369 miles. No Englishman competed. On June 23rd the Grand Prix, over a distance of 2000 metres, was won by an Italian, Tommasalli, in 4 min. 12½ sec. At the Sheen House Club Oxford beat Cambridge by points, though Engleheart of Cambridge won two out of the three races, the mile and the 10 miles. At the same club track the Amateur C. Association held their Cham-

pionship Meeting, when J. M. Bourke won the 10-miles Championship in 25 min. 49½ sec. and the mile in 3 min. 20 sec. The Carwardine Cup was raced for at the Crystal Palace on July 8th, over 100 miles course for amateurs only, and was won by F. G. Cowley in 3 h. 44 min. 45½ sec. The Bol d'Or, a 24-hours' competition, was decided in Paris on July 8th. A. E. Walters, England, won, having covered 634 miles, nearly 1021 kilomètres, a wonderful and record performance. A Frenchman, M. Renaux, rode in Paris on a motor cycle more than 38 miles in one hour on a track. The Second Championship Meeting of the N.C.U. was held in Guernsey on July 20th, when A. S. Ingram won the 5-miles race in 14 min. 41½ sec., and H. W. Payne, the holder, won the 25-miles Championship in 1 h. 11 min. 15½ sec. F. R. Goodwin, paced by a motor tricycle, rode from London to Edinburgh, 395 miles, in 25 h. 26 min.—a record. On Aug. 6th Bauge, in Paris, paced by a motor cycle, rode 50 miles in 1 h. 28 min. 12½ sec., and 100 miles in 3 h. 7 min. 47½ sec. On the same track E. Taylor, a French professional, rode 35 miles 698 yards in an hour, behind a petroleum tandem, beating all records from 6 miles to the finish. Osmond, on a motor cycle in Paris, created a record of 62 kilomètres 841 mètres, or over 39 miles, in an hour. Emil Bonheurs, a Frenchman, won the Century Cup at the Crystal Palace on Aug. 7th. T. Linton rode, in America, 10 miles in 16 min. 29½ sec. J. Green, at the Crystal Palace, rode a mile from a standing start, paced by a motor tandem, in 1 min. 40½ sec.; and J. Platt Betts, from a flying start, did ¼ mile in 21½ sec. and ½ mile in 44½ sec. The International Cyclists' Association held their Championship Meeting at Montreal on Aug. 9th, 10th, and 12th, when the Mile Amateur Championship was won by T. Summersgill, England, in 5 min. 43½ sec., the 100-kilomètres Amateur Championship by J. A. Nelson, U.S.A., in 2 h. 4 min. 13½ sec. The coloured rider, Taylor, won the Professional Mile Championship in 3 min. 3 sec., and the 100-kilomètres Professional Race was won by H. Gibson, U.S.A., in 2 h. 15 min. 11½ sec. On Sept. 7th Baras rode a motor cycle the wonder-

ful distance of 63 kilomètres 622 mètres (a little over 40 miles) in one hour, in Paris. On Sept. 11th E. Taylor rode 36 miles 1144 yards in one hour, a record time, paced by a motor cycle. The Dibble Shield was won at the Crystal Palace on Sept. 9th by E. S. Montgomery, who rode the record distance of 267 miles 400 yards in 12 h. On Sept. 12th J. Platt Betts, at the Crystal Palace, made record times from standing start for 3 miles up to 5 inclusive: 3 miles occupied 5 min. 7½ sec., 4 miles 6 min. 50½ sec., and 5 miles 8 min. 32½ sec. E. S. Montgomery won the Anchor Shield at the Crystal Palace. The 50-miles Amateur Championship of the N.C.U. at Reading resulted, on Sept. 23rd, in a victory by G. F. Payne in 2 h. 3 min. 36½ sec. The 2-miles Tandem Amateur Championship was won by A. S. Ingram and R. Janson in 5 min. 4½ sec. On Oct. 7th, at the Crystal Palace, F. G. Crowley rode 1 mile, paced from a standing start, in the record time of 1 min. 48½ sec. At the same time and place C. B. Lawes, the veteran sculler and athlete, rode 25 miles in 51 min. 15½ sec., making records for that and for many intermediate miles from the 6th onwards.

Cyprus. An island and British colony in the Levant, 60 miles south of Asia Minor, and 40 west of Syria. Area, 3584 sq. m.; pop. 221,343, of which 161,360 are Greek Christians and 47,926 Mohamedans. Divided into six districts. Capital, Nicosia, pop. 12,515, inland. Chief produce, cotton, wine, caroubs, wheat, barley, wool, silk, spirits, sponges, raisins. The island is administered, under the agreement concluded between Great Britain and Turkey in '78, by a High Commissioner, with an Executive Council of 4 and a Legislative Council of 18, of whom 12 are elected. Under the same agreement an annual tribute of £92,800 is payable to the Sultan. An advance of £314,000 was made in '99 by the Imperial Government, under the Colonial Loans Act, '99, for harbour railways and irrigation works. The railway is to connect the harbour to be made at Famagasta with the capital, Nicosia. See **BRITISH EMPIRE** (table) and **DIPLOMATIC**.

Czar of Russia. See **NICHOLAS II.**

D

Dahomey is a French protectorate lying between the Lagos hinterland on the east and Togoland on the west. It was taken by the French in '92, the then sovereign, Behanzin, being defeated and dethroned. It has access to the sea through its port, Whydah, and also through the French Guinea ports. The area of the country is about 14,000 sq. m., and the population about 600,000. The capital is **Abomey**, 70 miles north of Whydah. The chief products of the country are palm oil and palm kernels, while various manufactures are also springing up. The trade passes principally through Kotonou and Whydah. In July '97 an agreement was come to with Germany as to the delimitation of the French and German spheres in Dahomey and Togoland. By the Niger Convention, drawn up by the Anglo-French Commission and signed at Paris June 15th, '98, the boundary line between the French territories

and the Lagos hinterland was drawn thus. Starting from the dividing point between Dahomey and Lagos on the 9th parallel, the line runs north to Boria, and thence curves in a north-east direction, passing to the west of Gbani, Ashigere and Dokala, till it reaches a point on the Niger ten miles north of Ilo. In '99 part of French Soudan, which then ceased to be a separate dependency, was assigned to this colony. The colony was placed under the Governor-General of French West Africa, stationed at St. Louis. See **NIGERIA** (map).

"Daily Chronicle." Morning newspaper. Originally a local paper for the whole of London, it was purchased by Mr. Lloyd ('76), and converted into an Imperial Liberal organ with an independent line of action. Other noticeable features are its attention to Labour and social questions, its illustrations, produced with great care and finish, its literary page,

remarkable for the high quality of its reviews, and its special correspondence. **Editor**, Mr. H. W. Massingham (*q.v.*). **Offices**, Fleet Street, E.C. "**Daily Graphic.**" An illustrated London daily newspaper; was first published on Jan. 4th, '90, and was launched under the direction of Mr. W. L. Thomas. In politics the *Daily Graphic* is neutral, but signed contributions containing free expressions of opinion are a distinctive feature. **Editors**, Mr. T. Heath Joyce and Mr. Hammond Hall. **Office**, Milford Lane, Strand, W.C.

"**Daily Mail.**" A halfpenny London morning paper, which was started in '96, and has attained a reputation for brief and crisp reports of current events, brightly written special articles, and reliable foreign news. Its circulation for the first month of its existence (May '96) was 171,000, and in Sept. '99 it was over 600,000. The founder is Mr. Alfred C. Harmsworth, well known as the principal proprietor of *Answers*, *Harmsworth Magazine*, *Evening News*, and many other publications. The *Daily Mail* is Independent Unionist in politics, but aspires to be rather an Imperialist journal than the organ of any party.

"**Daily News.**" A prominent Liberal daily paper, and generally regarded as the organ of the Liberal party. Established in '46. It made much headway in '70-71, owing to its early and impartial telegrams respecting the Franco-German war; again in '76, when Mr. MacGahan, its special correspondent, first called attention to the Bulgarian Atrocities; and later during the Egyptian campaigns. Charles Dickens was its first editor, and it is at present edited by Mr. E. T. Cook (*q.v.*), and managed by Sir John R. Robinson (*q.v.*). The Jubilee of the paper was celebrated by a special number issued on Jan. 21st, '96, giving a history of the Journal for fifty years. **Office**, Bouverie Street, E.C.

"**Daily Telegraph.**" Morning newspaper; founded in '55. Circulation approximates to a quarter of a million daily. Its politics are Independent, and it has taken a foremost part in the discussion of great social problems. Has special wires from New York, Paris, and Vienna. It employed Mr. Smith on his successful special commission to Assyria, and sent Mr. (now Sir) Henry M. Stanley to Central Africa. A notable feature of the *Daily Telegraph* is the correspondence on important social topics, which at frequent intervals appears in its columns. **Offices**, Fleet Street, E.C.

Damaraland. See GERMAN SOUTH-WEST AFRICA.

Danube Improvements. See ENGINEERING.

Dardanelles, The, or Hellespont, is a narrow strait, about forty miles long, and varying in width from one to four miles, between the European and Asiatic coasts of the Turkish Empire between the Sea of Marmora and the Grecian Archipelago. Its strategical importance is great, inasmuch as it is the key to Constantinople. Both sides of the strait are strongly fortified.

Davy Faraday Research Laboratory of the Royal Institution. Founded by Dr. Ludwig Mond, F.R.S., as a memorial of Davy and Faraday, for the purpose of promoting by original research the development and extension of chemical and physical science. Opened by H.R.H. the Prince of Wales on Dec. 22nd, '96. **Directors**, The Right Hon. Lord Rayleigh, F.R.S., D.C.L., LL.D., F.R.S., and Professor

Dewar, M.A., LL.D., F.R.S. **Superintendent**, Dr. Alexander Scott, M.A., D.Sc., F.R.S.

Day, William R., whose name was so prominent in the United States during the Spanish-American war of '98, is a native of Canton, Ohio, and was born in April 1849. He was educated at the University of Michigan, and at once took up the practice of the law, therein following a family precedent. One of his ancestors was Chief Justice of the Supreme Court of Connecticut, and another a member of the Supreme Court and of Congress, while his father was a lawyer and judge in Northern Ohio. Mr. Day was appointed Judge of the United States District Court for the Northern District of Ohio in '89, but he quickly resigned on account of ill-health, and so was almost new to office when he was called by President McKinley to the high office of Secretary of State in '98 in succession to Senator Sherman. He was afterwards appointed on the Commission entrusted with the settlement of the treaty of peace between Spain and the States. When that was successfully concluded he returned from Paris to America, and was appointed by the President a United States Circuit Court Judge (Feb. 25th, '99).

Deaf Training College for Teachers of the, Castle Bar Hill, Ealing, London, W. This College was founded in 1878 by the "Society for Training Teachers of the Deaf and for the Diffusion of the 'German' System," in consequence of the difficulty of obtaining an English-speaking teacher on the German, or Pure Oral system, for a deaf child. This system teaches the so-called "deaf-and-dumb" to speak, and to read the speech of others from their lips (lip-reading), thus enabling them to communicate with their fellows by word of mouth. It was upon this system that the Royal Commission recommended that every deaf child should be given an opportunity of being educated. The examination for the Society's certificate is held annually in July: 113 persons have obtained this certificate, and have engaged in teaching the deaf in institutions at home, abroad, and in the colonies, in school board classes for these children, and in private families. The Training College is approved by the Education Department as an institution for the special training, as teachers of the deaf, of students transferred from ordinary training colleges. The Society's practising school attached to the Training College is conducted strictly upon the Pure Oral system. It has been certified by the Education Department under the Elementary Education (Blind and Deaf Children) Act, '93, while a house has been provided for deaf girls sent by local authorities under the same Act. The difference between the Society's income from students' and pupils' fees and the cost of maintaining the Training College and School has to be met by subscriptions. The Training College and School are open to the inspection of visitors on Tuesdays during term time from 10 to 4. **Chairman of Committee of Management**, E. Symes Thompson, Esq., M.D., F.R.C.P. The **Lady Superintendent and Secretary** is Mrs. Arthur Kinsey, from whom all information about the College and School, and lip-reading lessons for adults who have become deaf from accident or disease, can be obtained.

Dean and Chapter. See CHURCH OF ENGLAND; and for a list of Deans see the table of BISHOPS.

DEATH DUTIES.

Previous to the passing of the Finance Act, '94, six different death duties were payable—viz., probate duty, account duty, legacy duty, succession duty, additional succession duty, and estate duty. The probate, account, additional succession, and estate duties were abolished by the statute referred to, which came into operation on Aug. 2nd, '94. Under this Act a new estate duty is payable on all property, real or personal, settled or not settled, which passes on the death of any person dying after the Act came into force. The following property is exempted from the estate duty: (1) settled property of every kind in respect of which estate duty has been paid since the date of the settlement, unless the deceased was at the time of his death, or had been at any time during the continuance of the settlement, competent to dispose of the property; (2) property passing under and by virtue of transactions for full money consideration; (3) the property of common seamen, marines, or soldiers who are slain or die in the service of her Majesty; (4) sums of less than £100 which may under the Friendly Societies Act, '75, the Savings Bank Act, '77, and other statutes, be paid to the representatives of the deceased without requiring representation; (5) reversionary interests, the estate duty on which has been commuted; (6) survivorship annuities of less than £25; (7) pictures, prints, books, manuscripts, works of art, and scientific collections given or bequeathed for national or local scientific purposes; (8) pensions and annuities payable by the Indian Government to the widows or children of deceased Indian officers; (9) advowsons or church patronages which would have been free from succession duty under the Succession Duty Act, '53; (10) reversionary interests *bona fide* sold or mortgaged before Aug. 1st, '94; (11) property settled by a husband on a wife, or *vice versa*, before that date, and reverting to the settler. All the property of the deceased is firstly liable to estate duty, and then to legacy and succession duties. Foreign property is to be included only when such property would formerly have been subject to succession or legacy duty; and in the case of property in the colonies any duty payable in the colony for the property is to be allowed as a deduction from the estate duty; and if the Commissioners are satisfied that duty is chargeable in a foreign country in respect of property there, they are to make an allowance of the amount of that duty from the value of the property. The following table notifies the amounts payable under the estate duty of the Finance Act, '94, viz. :—

ESTATE DUTY.

Value of the Estate	Rate per Cent. of Estate Duty
£101 to £500	£1.
£501 " £1,000	£2.
£1,001 " £10,000	£3.
£10,001 " £25,000	£4.
£25,001 " £50,000	£4 10s.
£50,001 " £75,000	£5.
£75,001 " £100,000	£5 10s.
£100,001 " £150,000	£6.
£150,001 " £250,000	£6 10s.
£250,001 " £500,000	£7.
£500,001 " £1,000,000	£7 10s.
£1,000,001 and upwards.	£8.

To ascertain the percentage of duty payable, all the property passing on the death of its owner is to be aggregated so as to form an estate. Legacy duty is payable on legacies and shares of residue under a will or intestacy, and is applicable to personal property, except leaseholds either within the United Kingdom or abroad of a person who died domiciled in the United Kingdom. The rate of this duty is as under: viz., for legacies to children, or father, mother, or lineal ancestors, £1 per cent.; to brothers or sisters or their descendants, £3 per cent.; to brothers and sisters of the father and mother of deceased, or any descendant of such brothers or sisters £5 per cent.; to brothers and sisters of grandfather or grandmother, or any descendants of such brothers or sisters, £6 per cent.; to persons of other degrees of consanguinity, or strangers in blood, £10 per cent. Succession duty is payable on the interest that an individual takes as successor to a deceased person on real or leasehold property in the United Kingdom, or on legacies charged upon the proceeds of sale of real estate of a person who died domiciled in this country, irrespective of the situation of the property; and also on personal property included in a settlement, whether that property was at home or abroad. The duty varies in a similar manner to the legacy duty, and is as follows: £1 per cent. on the value of succession to lineal descendants; £3 per cent. to brothers and sisters and their descendants; £5 per cent. to brothers and sisters of the father or mother of the predecessor, or the descendants of such brothers or sisters; £6 per cent. to brothers and sisters of the grandfathers or grandmothers of the predecessor, or descendants of such brothers or sisters; and £10 per cent. to persons of other degrees of consanguinity or strangers in blood. The value of a succession to real estate is ascertained by tables in the Succession Duty Act of '53. The beneficial interest is considered as an annuity equal to the net yearly value of the property during the lifetime of the successor, or other shorter term to which his interest may extend. By the Finance Act, '94, the principal value of any property liable to the new estate duty is to be estimated on the price which, in the opinion of the Commissioners, the property would realise if sold in the open market at the time of the death of the deceased; but, as regards agricultural property, the value is not to exceed twenty-five years' purchase of the property, as assessed under Schedule A of the Income Tax Acts, after deducting £5 per cent. for expenses of management. Disputes as to valuation of the property may be referred to the High Court, or to the County Court where the amount is less than £10,000. Duty on real property may be paid by eight yearly or sixteen half-yearly instalments. It is provided by the Finance Act, '96, that estate duty on annuities may be paid by four equal annual instalments. A few other minor amendments of the Finance Act of '94 have been made by the one of '96. A power of appeal is granted to the Court of Appeal in respect of disputed valuations of property for the estate duty. See FINANCE, NATIONAL, and LAW, '99 (Estate Duties).

Deceased Wife's Sister, Marriage with. See MARRIAGE WITH DECEASED WIFE'S SISTER.

Delagoa Bay. Situated on the east coast of South Africa, on the twenty-sixth parallel of

S. latitude. It forms the southern extremity of the Portuguese province of **Lorenzo Marques**. See **EAST AFRICA (PORTUGUESE)**. Delagoa Bay is available for vessels of large tonnage. The Transvaal border begins 52 miles inland. In the course of the negotiations between Great Britain and Portugal as to the action of the latter power in East Africa, the claims of the Delagoa Bay Railway Co. for compensation for the seizure of the line by Portugal on June 29th, '89, were brought forward. The names of the arbitrators and some account of the lengthy proceedings are given in the '98 and previous eds. The extension of the line from the Portuguese frontier at Komati (which is 60 miles from the port of Lorenzo Marques) to Pretoria (Transvaal) is the property of the Netherlands South African Railway Company, and places Pretoria by rail 350 miles from the coast, and Johannesburg 400 miles. The distance from the latter city to Cape Town by rail is 1013 miles. In Jan. '96 it was stated that the total cost of the line, including rolling stock (£318,600), was £4,252,477; it is 382 miles long. The interminable arbitration proceedings are still unfinished. There was a rumour during '98, which received strong confirmation from a statement of the German Chancellor, that Great Britain and Germany had come to an understanding as to their interests in Delagoa Bay and South Africa generally. See **SESSION**, sect. 127, and **TRANSVAAL** (map).

Delcassé, Théophile, French Minister for Foreign Affairs, was born at Pamiers, March 1st, 1852, and began his career as a journalist. He was elected to the Chamber in '89, and in '93 he became Under-Secretary for the Colonies under MM. Ribot and Dupuy. It was mainly through his efforts that colonial affairs were entrusted to a distinct department. He became Colonial Minister in the Dupuy Cabinet of May '94, and has always been a consistent advocate of colonial expansion. When M. Brisson formed his ministry, after the fall of the Méline cabinet, in '98, he entrusted Foreign Affairs to M. Delcassé, and it fell to his lot to deal with the difficult position at Fashoda. He accomplished the task with great ability, and retained his portfolio in M. Dupuy's ministry, after the defeat of the Brisson administration. In '99 he negotiated the agreement with Great Britain as to the Nile Valley and Central Africa, and still remained Foreign Minister after M. Dupuy fell, and was succeeded by M. Waldeck-Rousseau.

DENMARK.

A kingdom under Christian IX., of Glücksburg, who succeeded to the throne in 1863. By charter of '49 (modified in '55, '63, '65, and '66) the executive power is vested in King and ministers, the legislative in the Rigsdag or Diet acting jointly with the sovereign. The Rigsdag is composed of the Landsting (or Upper House of 66 members; 12 Crown nominees appointed for life, and 54 indirectly elected by electoral bodies, in which large taxpayers are well represented, for eight years), and the Folkething (or House of Commons of 114 members directly elected by universal suffrage for three years). Members of both houses are paid 6s. 8d. a day while the Rigsdag is sitting, and their travelling expenses. The Rigsdag must meet every October, and all money Bills be submitted to the Folkething. Colonies comprise Iceland, the Faeroe Islands,

Greenland, and three small West Indian islands. The agricultural returns for the past three or four years show that the foreign demand for Danish agricultural produce continues to increase. Cattle breeding is at the same time taking more and more the place of arable farming. Above all, dairy farming is being pursued with unparalleled skill and success. The export of butter and other dairy produce is now the main source of the wealth of Denmark, and this was recognised by the formation of an Agricultural Department under a responsible minister in May '96. The State religion is Lutheran, but all others are tolerated, and there are no disabilities to dissenters. Education compulsory and free, the public schools being maintained by communal rates. **Area**, 14,775 sq. m.; estimated **pop.** 2,299,564. The **total revenue** for '98 was £3,755,550; **expenditure**, £3,744,440; **public debt**, '98, £11,579,335; **imports**, '97, £22,466,879; **exports**, £17,944,387. For army and navy see **FOREIGN ARMIES AND NAVIES**; and for Ministry see **DIPLOMATIC**.

Political Parties. In Denmark parties are broadly divided into supporters and opponents of a parliamentary system like our own. The Conservatives, or **Right**, contend that by the constitutional law of Denmark (promulgated in 1849 and revised in '66) the Folkething has not—like the English House of Commons—the supremacy in matters of taxation and finance, and the power of practically deciding who shall be the ministers. They maintain that the King and Landsting together may overrule the Folkething. The **Left** are parliamentary men attached to the English system. Hence there has arisen an apparently interminable dispute, with the Landsting and the Ministry on one side and the majority of the Folkething on the other. This majority, however, gradually divided into two parties, Radicals and Moderates. After the general election of '92, when the **Right** obtained 30 seats and the **Moderate Left** 43, the **Radical Left** only succeeding in obtaining 28 seats as against 39 at the previous election, an agreement was arrived at that Parliament should confirm the provisional laws that, in spite of the opposition of the Left, the Estrup Cabinet, though in a minority, had enacted, the Cabinet in return promising to make way for a new administration of a Moderate type. This agreement was carried out (Aug. 7th, '94), when M. Estrup's ministry resigned, after nineteen years' tenure of office, Baron de Reedtz-Thott becoming Premier, and selecting Moderate men of the Right for his colleagues. The general election of April '95 scarcely approved this compromise in the way that had been anticipated, for 52 Radicals, 9 Socialists, 28 Moderates, and only 24 Conservatives were returned. The Radicals again won a decisive victory at the elections in April '98, when 15 Conservatives, 23 Moderates, 12 Socialists, and 63 Radicals were returned. The Cabinet, however, retained office, still relying on their supporters in the Landsting, where the Sept. '98 elections resulted in the return of 43 Conservatives and 23 of the Left. A reconstruction of the Cabinet took place in Aug. '99. While its Conservative character was maintained, the change was regarded as an attempt to meet the wishes of the Folkething.

History, '99.—In April 300 joiners in Jutland asked for an advance of wages. At a conference of employers' and workmen's unions

it was agreed that the men should work for a month on a slight increase, to give time for an arrangement. The Jutland unions objected, and the master joiners of Denmark gave notice of a lock-out for May 2nd. The strikers then offered to accept the compromise; but the employers replied that their proposals had been rejected, and unless the men resumed work on the old rate of pay a general lock-out would be declared in all branches of the building trade. The joiners refused these terms, and 30,000 were thrown out of work, and 10,000 more were locked-out by other employers in allied trades (May 24th). The Employers' Union having formulated conditions for the termination of the lock-out, under eight heads, the matter came before the permanent trade court (June 24th). The court decided that the lock-out, though not a breach of law, was inconsistent with the expectations in which the unions were justified in indulging. In August the Employers' Federation extended it to other trades, making it affect 50,000 workmen; but in September a settlement was arrived at, and an agreement was signed by the Danish Employers and Masters Association on the one hand, and the Co-operating Trades Unions on the other. Among the articles of agreement were: that no strike or lock-out be brought about unless approved of by three-fourths of the organisation commencing the action, and after seven days' notice to the opposing organisation; and that, in case of non-settlement of a dispute, each head organisation have the right to bring the matter before the Court of Appeal.

Denmark. King of. See CHRISTIAN IX.

Denominations, The Three, is the abbreviated designation of an association of Presbyterian, Independent, and Baptist ministers resident in or near London. The full title is "The General Body of Protestant Dissenting Ministers of the Three Denominations Resident in and about the Cities of London and Westminster." This association enjoys the privilege of direct access to the throne and the kissing of hands—a privilege of which it availed itself at the Jubilee of Her Majesty's reign, and again at the Diamond Jubilee. As far back as the Revolution each denomination had its own ministerial board in London, and each board by itself approached the Throne as occasion arose. On the accession of Queen Anne the three boards united in an address. In July 1727 the present association was organised. It is not a body which represents the Churches. It is composed solely of ministers, and admission must be through one or another of the three ministerial boards, which are not themselves representative either. The secretary is chosen triennially from each of the three bodies in succession. The present secretary is a Congregationalist (the Rev. Thomas Sissons); Mr. J. Minshall, of the Memorial Hall, is permanent clerk, and the annual meeting is held at the Memorial Hall in March. Every meeting appoints its own chairman, who in turn is chosen from the three boards. The "Three Denominations" is often confounded with another body known as the "Dissenting Deputies." The two are quite distinct from each other. The "Dissenting Deputies" are laymen, and represent Churches—Presbyterian, Independent, or Baptist, in or near London—by whom they are elected. This body came into existence in November 1732, in connection with the Test and Corporation

Acts, and still exists to protect the rights of Dissenters. It has not the privilege of access to the Throne. The present chairman is Mr. William Woodall, M.P., and the secretary Mr. A. J. Shephard.

Devonshire, Duke of. See under PEERAGE.

Dewey, George, Rear-Admiral in the American Navy, was b. on Dec. 26th, 1838, in Vermont. He received his training in the United States Naval Academy in '58, and became lieutenant, '61. He was with Farragut when the American fleet forced an entrance to the Mississippi River and captured New Orleans in April '62. He was on the warship *Mississippi* when she grounded in front of the batteries at Port Hudson, where she was torn to pieces by a shot from the guns of the Confederates, the crew being forced to make their escape in small boats. As a lieutenant Rear-Admiral Dewey took part in the attack on Fort Fisher, on the coast of North Carolina, in Dec. '64 and Jan. '65, and was promoted to lieutenant-commander March 3rd, '65, serving in this capacity on the celebrated warship *Kearsarge*. In '72 he was made commander of the *Narragansett*, and became captain Sept. 24th, '84. He commanded the *Pensacola* from '85-98, and became commodore Feb. 28th, '96. In Jan. '98 he was sent to the Asiatic stations. In the war with Spain he greatly distinguished himself, destroying the Spanish fleet in a brilliant engagement in Manila Bay (May 1st, '98), without losing a single vessel of the fleet he commanded. For this he was promoted to be rear-admiral, and was voted a sword of honour, together with the thanks of Congress and the American people. On Sept. 29th, '99, Admiral Dewey received a great popular ovation on his arrival in New York, where he was presented by the mayor, on behalf of the citizens, with a gold loving-cup and the freedom of the city. There was also a review to honour him, in which 30,000 troops took part. On Oct. 3rd the sword of honour was presented to Admiral Dewey in the Capitol at Washington by Mr. Long, Secretary to the Navy, in the presence of President McKinley, the members of the Cabinet and the judiciary, the highest officers in the Army and Navy, and an immense concourse of people. He was married (Nov. 9th) to Mrs. Hazen, widow of the late General Hazen.

Diaz, General D. Porfirio, President of the Mexican Republic, is a modern instance of the benefits of a benevolent despotism. He is nearly seventy years old, and has governed the country ever since '75, when he assumed office as a military dictator. Since '76 he has been the legally elected President, except for the period '80-84. The original constitution of '57 laid it down that the President should be elected for only four years, so during that period a nominee of his was President; but he was elected again in '84, and in '87 an amendment *ad hoc* provided that the President might be elected for consecutive terms. He is now in his fifth term of office, the term expiring Nov. 30th, 1900. His powers of organisation are shown by the wonderful advance made by the country under his rule, although that rule is decidedly autocratic.

Digby, Sir Kenelm Edward, Permanent Under-Secretary at the Home Office, is the eldest son of the Rev. the Hon. Kenelm H. Digby, of Tittleshall, Norfolk. Born in 1836,

and educated at Harrow and Oxford (formerly fellow of Corpus); entered Lincoln's Inn as a student, and was called to the Bar in '65. He held the position of Vinerian Law Reader at Oxford from '68-74, and public examiner in jurisprudence, '75-6. He is the author of a "History of the Law of Real Property," and a work on "The Sale and Transfer of Shares in Companies." His legal knowledge is not only theoretical but practical, because for some years he was judge of county courts, Circuit No. 19 (Derby and Notts). Sir Kenelm is married to a daughter of Edward, 1st Lord Belper.

Dilke, Sir Charles, M.P. See under COMMONS.

Dillon, John, M.P. See under COMMONS; also POLITICAL PARTIES.

Diocese. See CHURCH OF ENGLAND, CHURCH OF SCOTLAND, and ROMAN CATHOLIC CHURCH.

DIPLOMATIC.

The following list gives the names of the Cabinet, or Executive Council, or principal members of the Government, of each of the leading Foreign States, and of the more important British colonies.

Abyssinia. *British Agent*, Captain J. L. Harrington.

Aden. *Political Resident*, Brigadier-General O'M. Creagh, V.C.

Afghanistan. *Agent to the Governor-General of India at Cabul*, Maulvi Ghafur Khan.

Africa, South. *High Commissioner*, Sir Alfred Milner, G.C.M.G., K.C.B.—*Secretary to the High Commission*, G. V. Fiddes.—*Resident Commissioner for the Bechuanaland Protectorate*, Major H. Goold-Adams, C.B., C.M.G.—*Assistant Commissioners*, W. H. Surmon and J. Ashburnham.—*British Agent at Pretoria*, W. Conyngham Greene, C.B. [left on outbreak of war in Oct. '99]. See also **British South Africa Company**.

Ajmere. *Chief Commissioner*, A. H. T. Martindale.

Algiers. *Governor-General of Algeria*, M. Laferrrière.—*British Consul-General*, F. Hay Newton.—*British Vice-Consul*, F. E. Drummond-Hay.

Argentine Republic. *President*, General Julio A. Roca. *Ministry: Minister of the Interior*, Dr. Felipe Jofre.—*Minister of Foreign Affairs*, Dr. Amancio Alcorta.—*Minister of Finance*, Dr. José Maria Rosa.—*Minister of Justice*, Dr. Osvaldo Magnasco.—*Minister of War*, General Luis Maria Campos.—*Minister of Marine*, Commodore Martin Rivadavia.—*Minister of Agriculture*, Dr. Emilio Frers.—*Minister of Public Works*, Dr. Emilio Civit.—*Ministry in London*, 16, Kensington Palace Gardens, W.—*Secretary of Legation and Chargé d'Affaires*, Florencio Don L. Dominguez.—*Consul-General*, Dr. S. Garcia Uriburu.—*Consul*, Alfredo O. Lumb, 3, Budge Row, Cannon Street, E.C.—*Vice-Consul*, Francisco J. Torromé.—*British Minister at Buenos Ayres*, Hon. W. E. Barrington.

Assam. *Chief Commissioner*, H. J. S. Cotton, C.S.I.—*Secretary to Chief Commissioner*, F. J. Monahan.

Austria-Hungary. *Minister of the Imperial and Royal House and for Foreign Affairs*, Count Agenor Goluchowski.—*Imperial and Royal Minister of Finance*, Benjamin de Kállay.—*Imperial and Royal Minister of War*, General

Edmund von Krieghammer. **Ministerial Council for Austria: Premier and Minister of Agriculture**, Count Manfred Clary.—*National Defence*, Count Zeno Welsersheimb.—*Interior*, Dr. Von Körber.—*Justice*, Dr. Eduard von Kindinger.—*Public Worship and Education*, Dr. Wilhelm von Hartel.—*Commerce*, Dr. Franz Stribl.—*Finance*, Dr. Severin von Kniazio-lucki.—*Railways*, Dr. von Wittek.—*Minister without Portfolio*, Dr. Casimir von Chlen-dowski.—**Ministerial Council for Hungary: President of the Council and Minister for Home Affairs**, K. von Szell.—*Public Worship and Instruction*, Julius de Wlассics.—*Croatia, Slavonia, and Dalmatia*, E. de Csch.—*Justice*, S. Plósz.—*Finance*, L. Lukacs.—*Minister at H. M. Court*, Count Szechenyi.—*Minister of National Defence*, Baron de Fejérváry.—*Commerce*, S. de Hegedüs.—*Agriculture*, J. Darányi.—*Ambassador in London*, Count Deym, 18, Belgrave Square, S.W.—*Councillor and 1st Secretary*, Count Albert Mensdorff.—*Secretary*, Count L. Berchtold.—*Attachés*, Count C. Trant-mansdorff, Count A. Esterhazy, Margrave Pallaviani.—*Military Attaché*, H.S.H. Lieut. Gen. Prince L. Esterhazy.—*Naval Attaché*, Commander L. v. Sztranyavsky.—*Consulate-General in London*, 22 and 23, Laurence-Pount-ney Lane, E.C.—*Hon. Consul-General*, Baron Alfred de Rothschild.—*Acting Consul-General*, F. Stöckinger.—*Vice-Consul*, Baron S. Pitner.—*British Ambassador at Vienna*, The Rt. Hon. Sir Horace Rumbold, Bart., G.C.B., G.C.M.G.—*British Consul-General in Vienna*, Chevalier Paul von Schoeller.—*Consul*, Moriz Feld-scharek.—*British Consul-General at Budapest*, Gerard Lowther, Esq.—*Consul*, Dr. Bruell.

Baden. *President of Ministry*, Dr. W. Nökk.—*British Chargé d'Affaires*, G. W. Buchanan (resides at Darmstadt).—*Consul at Mannheim*, F. Ladenburg.

Bahamas. *Governor and Commander-in-Chief*, Sir Gilbert Carter, K.C.M.G.; *Private Secretary and Clerk to Executive Council*, J. L. Bonhote. **Executive Council: Colonial Secretary**, J. S. Churchill.—*Attorney-General*, W. Rees Davies.—*Receiver-General*, D. Macdonald. R. H. Sawyer; G. T. R. Kemp, M.D.; W. E. Armbrister; Joseph Brown; and J. H. Young.

Baluchistan. *Agent to the Governor-General for India*, H. S. Barnes, C.S.I.

Barbados. *Governor*, Sir J. S. Hay, K.C.M.G. **Executive Council: The Governor.**—*Officer commanding the Troops*, Major-General R. F. Butler.—*Colonial Secretary*, R. C. Williams.—*Attorney-General*, W. H. Greaves, Q.C.—Sir G. C. Pile, M.L.C.

Baroda. *Resident and Agent to Governor-General*, Lt.-Col. N. C. Martelli, I.S.C.

Basutoland. *Resident Commissioner*, Sir Godfrey Y. Lagden, K.C.M.G.

Bavaria. *Ministers: Minister of State and Foreign*, Baron Von Crailsheim.—*Instruction and Worship*, Herr Von Landmann.—*Justice*, Baron Von Leonrod.—*Finance*, Dr. Baron Von Riedel.—*Interior*, Baron Von Feilitzsch.—*Minister of War*, General Baron Von Asch zu Asch.—*British Minister Resident at Munich*, Victor A. W. Drummond, C.B.

Bechuanaland Protectorate. See Africa, South.

Belgium. *Premier and Minister of Finance and Public Works*, M. de Smet de Nayer.—*Foreign Affairs*, M. de Favereau.—*Interior and Public Instruction*, M. de Trooz.—*Justice*, M.

Van der Heuvel.—*Agriculture and Industry*, Baron Van der Bruggen.—*War*, Gen. Alkemade.—*Industry and Labour*, M. Liebaert.—*Envoy Extraordinary and Minister Plenipotentiary in London*, Baron Whettnall.—*Consul-General*, M. F. H. Lenders, 118, Bishopsgate Street Within, E.C.—*British Minister at Brussels*, Hon. Sir Francis Richard Plunkett, G.C.M.G.—*Secretary of Legation*, A. S. Raikes.—*British Consul-General at Antwerp*, G. R. de Courcy-Perry, C.M.G.

Bengal. *Lieutenant-Governor and President of Council*, Sir John Woodburn, K.C.S.I.—*Council of the Lieutenant-Governor*, Sir G. C. Paul, K.C.I.E., Nawab Syud Ameer Hossein, C.I.E., W. B. Oldham, C.I.E., R. B. Buckley, C.W. Bolton, C.S.I., E. N. Baker, M. Finucane, C.S.I., Rai Durga Gati Banerjee Bahadur, C.I.E., J. Pratt, C. E. Buckland, C.I.E., Saligram Singh, Kali Charan Banerjee, Surendranath Banerjee, Jatra Mohan Sen, T. W. Spink, Raja Shashi Shakhadeswar Roy of Tahirpur, Raja Ranajit Sinha Bahadur of Nashipur, Sahibzada Mahomed Bakhtyar Shah, C.I.E., D. F. Mackenzie. *Secretaries to Government*: *Chief Secretary*, C. W. Bolton, C.S.I.—*General Statistical and Revenue*, M. Finucane, C.S.I.—*Financial and Municipal*, H. H. Risley, C.I.E.—*Public Works*, Col. A. D. McArthur, R.E., and R. B. Buckley.

Berbera. See SOMALI COAST.

Bermuda. *Governor*, Lieut.-Gen. G. D. Barker, C.B.—*Executive Council*: The Governor.—*Colonial Secretary*, A. Alison.—*Attorney-General*, S. B. Gray, C.M.G.—*Receiver-General*, F. W. Major.—*Solicitor-General*, R. D. Darrell.—J. H. Trimmingham.

Bolivia. *President*, General José M. Pardo.—*Vice-President*, Colonel Lucio P. Velasco.—*Foreign Affairs*, Señor Guadialla.—*Interior*, Señor Romero.—*Finance*, Señor Calbimonte.—*Justice and Public Instruction*, Señor Oropeza.—*War*, Colonel Montes.—*Envoy Extraordinary and Minister Plenipotentiary in London* (3, Roland Houses, S.W.), Señor Don F. Avelino Aramayo.—*Secretaries of Legation*, Señor J. Gutierrez-Ponce and Señor Adolfo Ballivian.—*Military Attaché*, Colonel Don Pedro Suarez.—*Consul-General*, Señor Adolfo Ballivian.—*Acting Consul-General*, Colonel Don Pedro Suarez, 12, Fenchurch Street, E.C.

Bombay. *Governor*, Lord Sandhurst, G.C.I.E., till Feb. 1900, and thence onwards Sir Henry Stafford Northcote, Bart., C.B.—*Council of the Governor*, J. Nugent, C.S.I.; Sir E. C. K. Ollivant, K.C.I.E.—*Additional Members for making Laws and Regulations*, Basil Lang (Advocate-General); Ranchodlal Chotalal; W. H. Crowe; Daji Abaji Khare; Mir Allah-bakshkhan walad Mir Alibakshkhan Shahvani Talpur; Narayan Ganesh Chandavakar; W. C. Hughes; A. S. Moriarty; Chanchandra Krishna Bhatavadekar; T. R. McLellan; Gokuldas Kahandas Parekh; Meherban Narayanras Govind; Fazulbhai Visram, C.I.E.; Dhondo Shamrao Garud; Pherozeshah M. Mehta, C.I.E.; Vijbhukandas Atmaram; R. H. Macaulay; E. Giles; J. K. Spence.—*Secretary*, C. G. H. Fawcett. *Secretaries to the Government*: *Chief Secretary Revenue, Financial and Separate Departments*, J. Monteath, C.S.I.—*Secretary Political, Special, Judicial, and Separate Departments*, S. W. Edgerley, C.I.E.—*Educational, etc., Departments*, J. de C. Atkins.—*Public Works*, H. M. Thompson, M.Inst.C.E.

Borneo. [Brunei, British North Borneo, and Sarawak were placed under British protection in '88.] *High Commissioner and Consul-General* (Singapore), Sir C. B. H. Mitchell, G.C.M.G.—*Consul at Brunei*, A. L. Keyser. See also **British North Borneo**.

Brazil. *President*, Dr. Manoel de Campos Salles. *Ministry*: *Finance*, Joaquim Murinho.—*Industry and Public Works*, Severino dos Santos Vieira.—*Interior*, Epitacio da Silva Tessoá.—*War*, General de Medeiros Mallet.—*Marine*, Admiral Pinto da Luz.—*Foreign Affairs*, Dr. Maximo de Mayalhaes.—*Minister in London*, Chevalier de Souza Corrêa, 55, Curzon Street, Mayfair, W.—*Delegate of the Brazilian Treasury*, Dr. J. A. de Azevedo Castro, 53, New Broad Street, E.C.—*Consul in London*, Francisco Alvas Vieira, 6, Great Winchester Street, E.C.—*British Minister to Brazil*, E. C. H. Phipps.

Disestablishment. While the State does not concern itself about the affairs of other religious bodies, the Churches of England, of Wales, and of Scotland are national church establishments; and disestablishment means the placing of them on exactly the same footing as those other religious bodies. The Protestant Episcopal Church in Ireland was established at one period, but was disestablished by an Act of Parliament passed in 1869. With regard to disendowment, it should be stated that the advocates of disestablishment propose to respect all existing life interests, and also to leave the disestablished churches in possession of the buildings and endowments which have been the result of the liberality of their own adherents during recent years. The disestablishment and disendowment of the Church of England in Wales, and the disestablishment of the Presbyterian Church in Scotland, are included in the programme of the Liberal Party. A Bill for disestablishing the Church of England in Wales was brought in by Lord Rosebery's Government in '94 (see article on WALES, DISESTABLISHMENT IN, in '96 ed.), and reintroduced in '95. It was read a second time (May 21st, '95) by a majority of 44, 304 members voting for and 260 against it. It was being discussed in Committee, when the defeat of the Government (on another issue) led to their resignation. The Bill, as altered in Committee, provided that the bishops and clergy should retain their incomes, palaces, and parsonages for life, also that the Church should retain the cathedrals and churches and all private benefactions received since 1662. The surplus funds were to be applied partly to Welsh national, and partly to parochial purposes; the latter including hospitals, convalescent homes, institutes and libraries, labourers' dwellings, etc. The Bill was strenuously opposed, not only by Welsh supporters of the Establishment, but by Established Churchmen in England, on the ground that it would dislocate the

Church, and would lead to disestablishment in England also. The organisation which is most closely identified with the disestablishment movement is popularly known as "The Liberation Society," its full title being *The Society for the Liberation of Religion from State Patronage and Control*. In '96, and since, the Society has been very active in insisting upon religious equality in relation to national education; and during the session of '99 it offered strenuous opposition to the Tithe Rent-Charge (Rates) Bill. It issued (1) "A Statement of Facts," for the use of Members of Parliament and the Press; (2) a popular tract; (3) a circular to Liberal Associations, Free Church Councils, the Society's District Committees, and other bodies, urging local action; and (4) a circular embodying the Committee's views on the subject, suggesting action at the coming General Election to prevent its re-enactment in 1902. In the autumn the Society appealed to the Free Church Councils, Nonconformist ministers, and Liberal Associations, enforcing the duty of making Disestablishment a foremost question at the General Election as the only remedy for the evils which afflict and hinder the Episcopal Church. The Society's chief office and depot for publications is 2, Serjeants' Inn, Fleet Street; Secretaries, Mr. John Fisher and Mr. Sydney Robjohns. The Church Committee for Church Defence and Church Instruction (*q.v.*) is the organisation on the other side.

Distinguished Service Order. Her Majesty having taken into consideration that the means of adequately rewarding the distinguished services of officers in the naval and military services who had been honourably mentioned in despatches were limited, instituted and created for the purpose of rewarding individual instances of meritorious and distinguished service in war a new naval and military Order of distinction. The statutes of the Order were issued from the War Office on Nov. 6th, '86. Foreign officers who have been associated in naval and military operations with our forces are eligible to be honorary members; and the Order ranks next to the Order of the Indian Empire. The badge, which consists of a gold cross, enamelled white, edged gold, having on one side thereof in the centre, within a wreath of laurel enamelled green, the Imperial Crown in gold upon a red enamelled ground, and on the reverse, within a similar wreath and on a similar red ground, the Imperial and Royal cypher V.R.I., is to be suspended from the left breast by a red riband edged blue of one inch in width.

District Councils. See LOCAL GOVERNMENT.

Divorce, in English law, is of two kinds: *a vinculo matrimonii*, or dissolution of marriage; and *a mensa et thoro*, now usually known as judicial separation (*q.v.*). Dissolution of marriage is usually in common language, and in the Divorce Court always, meant when divorce is spoken of; the use of the word divorce as meaning the modern judicial separation belongs to the old ecclesiastical courts only. Till 1858 complete dissolution, or divorce, could only be obtained by Act of Parliament (as in Ireland now); separation by suit in the ecclesiastical courts. The Matrimonial Causes Act, 1857 (which came into operation Jan. 1st, '58), established

the Divorce Court, now incorporated in the High Court of Justice (Probate, Divorce, and Admiralty Division), and this court has power to grant a divorce *a vinculo matrimonii* at the suit of the husband on proof of the wife's adultery, and at the suit of the wife on proof of the husband's adultery, coupled with cruelty or desertion for upwards of two years, or after an order for restitution of conjugal rights (*q.v.*), or for certain aggravated forms of adultery, including bigamy and incestuous adultery. Cruelty does not necessarily imply actual physical violence, the House of Lords, in *Russell v. Russell* ('97) having held "cruelty" to include injury or the reasonable apprehension of injury to life, limb, or health, bodily or mental. A charge of cruelty must be supported by evidence other than the petitioner's. Adultery is inferred from circumstantial evidence. A divorce cannot be obtained if the petitioner has connived at or condoned the offence, or the petition is presented in collusion with the other side. The court has a discretion where the petitioner is guilty of cruelty, acts conducing to the misconduct alleged, desertion, adultery, or unreasonable delay. The decree pronounced in the suit is called a decree nisi, and has no legal effect till it is made absolute, six months later; and during this period the Queen's proctor can, and often does, intervene to show cause why the divorce should not be made absolute, on the ground of collusion between the parties, or some fact having been kept back from the knowledge of the Court that pronounced the decree nisi. See also JUDICIAL SEPARATION, RESTITUTION OF CONJUGAL RIGHTS, and LAW, '99.

Dog Laws and Licences. Every person in Great Britain keeping a dog over six months old, with two exceptions, must have a licence, the cost of which is 7s. 6d. The licence can be obtained either of an excise officer or at a post-office, and it is in force from Jan. 1st to Dec. 31st. The exceptions are: a blind person keeping a dog for guidance, and a man who keeps his dog solely for tending sheep and cattle; but certificates of exemption must be obtained from the Commissioners of Inland Revenue. The maximum penalty for breach of the law is £5. In Ireland the licence only costs 2s. 6d.

Dominica. An island in the West Indies forming a presidency of the British colony of the Leeward Islands (*q.v.*). Area, 291 sq. m.; pop. 27,339. Capital, Roseau, pop. about 4500; second town St. Joseph. Cocoa, lime-juice, coffee, fruits, and spices are the chief productions. Two-thirds of the people speak French. A few aborigines (Caribs) still exist. But in spite of all its great possibilities, the trade of the island is declining. As the result of an inquiry made in '93 into the causes of the lack of prosperity and of the discontent prevalent in the island, it was placed for local affairs under an administrator with far greater powers and freedom than those previously possessed by the Commissioner of Dominica. The constitution of the Assembly was altered so as to include three official, seven elective and four members nominated by the Lieut.-Governor in Council, and a loan of £30,000 to pay off the floating debt was sanctioned. In '98, however, application had to be made for Imperial aid, and this was offered on condition that the constitution should be altered so as to give the Crown control of the finances. The offer was refused by the Legislative Assembly by 8 votes

to 6; but after an election the newly elected Assembly passed a measure for its own abrogation, and for the substitution of the Crown Colony system. The new Council consists of 12 members, 6 official and 6 non-official, all nominated by the Governor.

Dover Harbour. See ENGINEERING.

Doyle, Dr. Conan, the grandson of John Doyle, the famous political caricaturist "H. B.," was born at Edinburgh in 1859. His education began at Stonyhurst in Lancashire, and was continued in Germany. At both schools the irrepressible literary leanings of the future novelist broke forth in the shape of school magazines which he edited. In '76 he commenced to study medicine at the Edinburgh University, and remained there for five years. His first essay in literature was "The Mystery of the Sassassa Valley," written at the age of nineteen, and published in *Chambers' Journal*. From '82 till '90 he practised his profession at Southsea, writing all the while various short stories, some of which have been since published under the title of "The Captain of the Polestar." After "A Study in Scarlet," "Micah Clarke," and "The Sign of Four," came "The White Company," which led to the final abandonment of medicine for literature. "The Adventures of Sherlock Holmes," and "The Memoir by Sherlock Holmes," formed a brilliant series of detective stories. In '93 "The Refugees" was published, and in '94 he wrote a short play, "A Story of Waterloo," successfully produced by Sir Henry Irving, and a volume of stories called "The Red Lamp," "The Exploits of Brigadier Gerard," and "Rodney Stone," one of his best stories, followed in '96, "Uncle Bernac" in '97, "The Tragedy of the Korosko" and a volume of poems ("Songs of Action") in '98, and "A Duet" in '99. Address: Undershaw, Hindhead, Surrey.

DRAMA, '99.

Regarded as a whole it was a satisfactory year from the literary standpoint of matters dramatic. The output of noteworthy plays may not have been so great in quantity as in '97 or '98, but the general quality was decidedly superior. Absolute originality, too, was more in fashion among experienced playwrights, and the attention accorded to such efforts by the public was eminently encouraging. For at least half a dozen of the most successful pieces produced during the twelve months there would have been no opening in the Metropolis a decade back. It is difficult to say to what extent this improvement is due to the influence of the Norwegian or advanced German schools, but it is certain that thoughtful audiences both for comedy and serious plays are on the increase, and that character-drawing is now as much studied and discussed as plot. The demand for suburban theatres was unabated. To the long list were added during the autumn the Royal Duchess at Balham and the Terriss at Rotherhithe, and a new theatre was erected at Richmond. Should present intentions be carried out there will be at least half a dozen more houses competing ere long. With few exceptions—prominent among which are the Métropole at Camberwell, the Brixton, and the Grand at Islington, where novelties are occasionally essayed—the outlying theatres rely upon established successes; therefore their contributions to the record of the year are com-

paratively slight. At several houses such excellent business prevailed that no change was necessary for months. Mr. Grundy's *The Musketeers* held Her Majesty's, *The Manœuvres of Jane* prospered at the Haymarket, *The Ambassador* was at the St. James's, *A Greek Slave* at Daly's, *The Adventure of Lady Ursula* at the Duke of York's, *On and Off* at the Vaudeville, and *A Little Ray of Sunshine* at the Royalty. Even more fortunate were *A Runaway Girl* at the Gaiety, and *The Belle of New York*, the latter of which celebrated its 600th performance at the Shaftesbury on Oct. 9th.

Shakespeare was not much in evidence until the autumn, and Ibsen appeared to be at a discount. Madame Sarah Bernhardt's highly original impersonation of *Hamlet* drew crowds to the Adelphi in June, and naturally evoked considerable discussion. The new French version prepared by MM. Eugène Morand and Marcel Schwob, and the deviations from the traditional stage "business," were closely followed and as vigorously commented upon as was the embodiment of the title part. For touring purposes Mrs. Lancaster Wallis (who returned to the stage after a lengthy absence) revived *Measure for Measure*; and at the Princess of Wales's, Kennington, Mr. Murray Carson reproduced *Richard III.* with the original text, thus following the example of Sir Henry Irving at the Lyceum some twenty years before. The most remarkable revival of this description was *King John* at Her Majesty's Theatre on Sept. 20th by Mr. Beerbohm Tree. The utmost pains were taken with the decorative details. Many authorities calculated to throw a light upon the period were consulted, and the spectacular result was as brilliant and effective as it was interesting. Judgment was also evinced in the casting of the play. Mr. Tree's *King* was a striking and convincing performance, altogether free from the conventional, and Mr. Lewis Waller's *Falconbridge*, Mr. Franklyn McLeay's *Hubert*, Master Sefton's *Prince Arthur*, and Miss Bateman's (Mrs. Crowe's) *Queen Elinor* were among the deservedly praised assumptions in an artistic production. In the spring Mr. Tree frequently changed his bill. He withdrew "*The Musketeers*" to make room (April 12th) for *Carnae Sahib*, a drama by Mr. Henry A. Jones dealing with the Indian Mutiny. Subsequently the actor-manager fell back upon some of his old successes, including "*Captain Swift*" and old Dufard in "*The First Night*." The announcement of *Sir Henry Irving's* retirement from the management of the Lyceum was received with universal regret. It could scarcely be otherwise, for to him playgoers owe the most imposing series of Shakespearean revivals the modern stage has known. It was some consolation to learn that he would still be associated with the house for part of the year. The new order of things began on April 15th with *Robespierre*, a play expressly written for Sir Henry by Sardou, and rendered into English by Mr. Laurence Irving. The "*Incorruptible*" was depicted as a sincere patriot confident that drastic measures were essential to the preservation of the freedom the people had won, and the story in which he was the principal figure brought out varying attributes of character, in the illustration of which Sir Henry evinced all his accustomed care and spirit. Miss Ellen Terry had a pathetic part in the piece, which Sardou strove to make a faithful reflex of the

Reign of Terror. It ran until the end of the season, when Sir Henry took his company into the provinces with "*Robespierre*" and other plays. The party embarked on Oct. 15th for a sixth tour in America, to extend over five months. Mr. Wilson Barrett entered into possession of the Lyceum on Sept. 2nd, opening with *The Silver King*, and was warmly welcomed. This revival was merely a stopgap, and, although it was doing well, was superseded on Oct. 7th by an entirely new play called *Man and His Makers*, for the theme of which Messrs. Wilson Barrett and Louis N. Parker turned to account the doctrine of heredity. It was withdrawn after a few performances, and *The Sign of the Cross* was reproduced. Mr. Charles Wyndham's arrangements in relation to the new theatre he had built in Charing Cross Road were canvassed. He decided to name it after himself, and to open it in November with a revival of *David Garrick*. At the Criterion on April 6th a great hit was made with *The Tyranny of Tears*, a clever comedy by Mr. Haddon Chambers. As an appropriate piece for his last night at the Criterion, preparatory to taking up his responsibilities elsewhere, Mr. Wyndham revived *Rosemary*, with nearly all the members of the original cast. The performance, set apart for the benefit of the Prince of Wales's Hospital Fund, realised a large amount. The Criterion was also the scene of the production of the farcical pieces *My Soldier Boy* (by Messrs. Alfred Maltby and Frank Lindo), of *The Wild Rabbit* (Mr. George Arliss), and of *My Daughter-in-Law* (Sept. 27th), an adaptation from "*Ma Bru*." Each of these was submitted under a different management.

Mr. John Hare, who at the Globe had given some Robertsonian revivals, made a bolder bid for favour on April 8th, by presenting Mr. Pinero's new comedy *The Gay Lord Quex*. The issue more than justified expectations. The merits of the singular plot, of the unhackneyed treatment of strange incidents, and of the witty dialogue were immediately recognised, whilst the embodiments by Mr. Hare and Miss Irene Vanbrugh of the middle-aged lord and the sharp-witted manicurist respectively were voted to be of the best comedy order. In the domain of original production this piece was the most pronounced success of the year. At the St. James's, Mr. George Alexander supplemented John Oliver Hobbes' (Mrs. Craigie's) *The Ambassador* with *A Repentance* (Feb. 28th), a short tragedy of the Carlist War, by the same author. An elaborately mounted drama of the Henry VI. period, called *In Days of Old*, written by Mr. Edward Rose, followed on April 26th. At the end of the season Mr. Alexander gave up the house to the builders for important structural alterations, and in the course of a provincial tour produced at Glasgow, on Oct. 5th, *Rupert of Hentzau*, Mr. Anthony Hope's sequel to "*The Prisoner of Zenda*." Of Mr. Forbes Robertson not much was seen in London until Sept. 21st, when, with Mrs. Patrick Campbell, he opened the Prince of Wales's with *The Moonlight Blossom*, a quaint Japanese romance by Mr. Charles Bailey Fernald. To this was appended, on Oct. 9th, *The Sacrament of Judas*, a strongly dramatic little play adapted by Mr. L. N. Parker from the French of Louis Tiercelin. As an actor of intensely emotional characters, Mr. Martin Harvey (long with Sir Henry Irving) came to the front by his performance of the self-

sacrificing Sydney Carton in Mr. Freeman Wills' **The Only Way**, founded on Dickens's "A Tale of Two Cities," for which the Lyceum was taken (Feb. 16th). The piece was so favourably received that to prolong the run Mr. Harvey transferred it to the Prince of Wales's, where it remained through the summer.

The proceedings at the Adelphi were varied. Mr. Norman Forbes began a season on March 11th, with a new version of **The Man in the Iron Mask**. After Madame Bernhardt came M. Coquelin with **Cyrano de Bergerac** and a selection from his Molière and other parts; and on Aug. 19th a picturesque drama, **With Flying Colours**, by Seymour Hicks and F. G. Latham, was produced. Mrs. Langtry made a sensation in the autumn by producing at the Haymarket Mr. Sydney Grundy's **The Degenerates**, a comedy of the most modern stamp, which in October she moved to the Garrick. Messrs. F. Harrison and Cyril Maude returned to the Haymarket on Oct. 28th, when they offered **The Black Tulip**, a picturesque adaptation by Mr. Sydney Grundy from the elder Dumas' romance of the same name, and its reception was extremely favourable. A welcome also awaited **A Royal Family** (Oct. 14th), a romantic comedy by Capt. R. Marshall, at the Court. Two nights later, at the Duke of York's, arrived Mr. Hall Caine's stage version of his much debated novel **The Christian**, the two principal parts being taken by Mr. Herbert Waring and Miss Evelyn Millard. Soon after came **San Toy**; or, **the Emperor's Own**, a Chinese musical piece by Messrs. E. Morton, H. Greenbank, A. Roos, and Sidney Jones, superbly mounted by Mr. George Edwardes at Daly's; **Captain Birchell's Luck**, a revised edition of Mr. L. N. Parker's seven-year-old "Chris.," with which Mr. Scott Buist opened Terry's on Oct. 30th; and **The Wrong Mr. Wright**, by Mr. George H. Broadhurst, at the Strand, Nov. 6th.

With a smart, thoroughly up-to-date piece, **Wheels within Wheels** (May 23rd), Mr. R. C. Carton distinguished himself at the Court. The American comedian, Mr. Nat Goodwin, with Miss Maxine Elliott and company, appeared at the Duke of York's in June, in Clyde Fitch's **The Cowboy and the Lady**, which was imperfectly understood. This was not the case as regarded Mrs. M. L. Ryley's **An American Citizen** (June 19th), a delightful piece delightfully played by Mr. Goodwin and his companions. Other comedies deserving mention were **A Court Scandal**, adapted for the Court by Aubrey Boucicault and Oswald Shillingford from a piece in which Déjazet used to shine; **What Will the World Say?** by G. P. Bancroft, at Terry's, which yielded to a revival of **Sweet Lavender**; Dr. Conan Doyle's **Halves**, at the Garrick; **The Weather Hen**, by Berte Thomas and Granville Barker, at Terry's; **Intruders**, by John T. Day, at Brixton; and **An Interrupted Honeymoon**, by F. Kinsey Peile, at the Avenue.

The Drury Lane autumn drama was **Hearts are Trumps** (Sept. 16th), in which Mr. Cecil Raleigh blended the romantic and the realistic. Mr. H. V. Esmond's **Grierson's Way** (Feb., Haymarket), showed grim power. Another telling piece was Mr. G. Bernard Shaw's **The Devil's Disciple** (Sept. 26th), at the Princess of Wales's. After successful performance by the Irish Literary Society in Dublin, Mr. Edward Martyn's **The Heather Field** was played at Terry's on June 6th. Attention was also given

to Mr. L. N. Parker's **The May Flower**, Métropole; Mrs. Hodgson Burnett's **A Lady of Quality**, Comedy; Parker and Carson's **Change Alley**, at the Garrick; **The Ghetto**, adapted from Herman Heyermann, jun., Comedy; **The Last Chapter**, by Mr. G. H. Broadhurst, at the Strand; **The Rebels**, an Irish play, by Mr. G. B. Fagan, at the Métropole; and Messrs. Dam, Cartwright, and Landeck's **A King of Fools**, Grand, Islington. The bright Gilbert-Sullivan **H.M.S. Pinafore** was again cordially welcomed at the Savoy, where the year opened with **The Royal Star**, music by Ivan Caryll. **A Gaiety Girl** was revived at Daly's; and at the Lyric were **L'Amour Mouillé**, music by Landon Ronald and Paul Rubens, and **El Capitán**, music by John Philip Souza, in the latter of which Mr. De Wolf Hopper and company appeared. The best of the multitude of farcical pieces were Sims and Merrick's **The Elixir of Youth** (Sept. 9th), Vaudeville; **The Prince of Borneo**, and George H. Broadhurst's **Why Smith Left Home**, Strand; **Great Caesar**, Comedy; **The Cuckoo** (from Meilhac's "Décoré"), Avenue; and Burnand's **The Lady of Ostend**, Terry's. **A Trip to Midgettown**, with which the Olympic was reopened, introduced an active Lilliputian troupe. **A Dream of Whitaker's Almanack** (at the Crystal Palace), and **Pot Pourri** (at the Avenue), were brisk revues. Productions not so easy of classification were Swinburne's **Lochrine**, by the Elizabethan Stage Society (Mar. 20th), at St. George's Hall; Edward Fitzgerald's **Such Stuff as Dreams are Made of**, adapted from Calderon (May 15th), St. George's Hall; and the Hindoo poet Kalidāsa's **Sakuntalā** (July 3rd), Botanical Gardens. Miss Nellie Farren returned to the stage (May 2nd) to play in a farcical sketch, **Justice Nell**, for the farewell benefit to Miss Lydia Thompson at the Lyceum, and at the same house one summer afternoon M. Claretie, the director of the Théâtre Français, lectured on "Shakespeare and Molière." Also worthy of mention was the elaborate masque, **Beauty's Awakening**, organised by the members of the Art Workers' Guild, and played by them several nights at the Guildhall, where a stage was specially erected. As a costly and refined spectacle the procession of "Fair Cities" was unrivalled.

Dreyfus Affair. See under FRANCE.

Dublin, The Most Rev. J. F. Peacocke, Archbishop of, is the son of Mr. George Peacocke, M.D., and was born in 1835. He was educated at Trinity College, Dublin, where he graduated B.A. (Senior Moderator in History and English Literature) in '57. He won the Regius Professor of Divinity's first premium, and obtained a first class in the Divinity testimonium examination in '58. He proceeded M.A. in '62, B.D. '77, and D.D. '83, and was ordained deacon '58 and priest '59. After holding several curacies he was appointed canon of St. Patrick's Cathedral, Dublin, in '75. He was incumbent of St. George, Dublin, '73-'88, and rector of Monkstown from '78 to '94. In '94 he was appointed Professor of Pastoral Theology in Trinity College, Dublin, and in the same year he was consecrated Bishop of Meath. He married in '65 the daughter of Major John Irvine, of Killadeas, co. Fermanagh. On the death of Lord Plunket, in '97 he was elected by the Bench of Bishops to succeed him as Archbishop.

Dublin University. The University of Dublin, commonly known as Trinity College

Dublin, was founded in 1591 by Queen Elizabeth, who also established in the same year a college under the style of the Holy and Undivided Trinity, near Dublin. Its constitution has been altered by numerous Royal charters. In the Treaty of Union between Great Britain and Ireland (1800) it is spoken of as the University of Trinity College. The tercentenary festival of the College was celebrated in July '92 with great solemnity and splendour. At the service in St. Patrick's Cathedral, the Dean traced the history of the University back to a period three hundred years before the founding of the present University by Elizabeth. In 1321, he stated, the then Archbishop of Dublin established a University at St. Patrick's with the sanction of the Pope, but it came to an end after an existence of nearly two centuries. The Chancellor of the University is the Earl of Rosse, and the Vice-Chancellor the Right Hon. D. H. Madden, LL.D. The undergraduates exceed 800. Certificates of proficiency are granted to women. Degrees: D.D., B.D., M.A., B.A., M.D., M.B., M.Ch., B.Ch., LL.D., LL.B., Mus.D., Mus.B., M.Engin., B.Engin., D.Sc., D.Litt. The two last-named are new degrees, conferred only for original research and discoveries. The Regius Professors are: Rev. Dr. Gwynn (Divinity), John B. Bury, M.A. (Greek), James Little, M.D. (Physic), Henry Brougham Leech (Law), C. B. Ball, M.Ch. (Surgery); Professor of Latin, Louis C. Purser, D.Litt.; Ancient History, Rev. J. P. Mahaffy, D.D.; Modern History, John B. Bury, M.A.; Mathematics, W. Snow Burnside, D.Sc.; Chemistry, Emerson Reynolds, D.Sc.; Natural Philosophy, Alexander Tarleton, D.Sc.; Experimental Physics, George F. Fitzgerald, D.Sc.; Civil Engineering, Thomas Alexander, M.A., etc. Parliamentary representatives: Rt. Hon. Edward Carson, Q.C., and W. E. H. Lecky, LL.D. Provost, Rev. George Salmon, D.D.; Vice-Provost, James W. Barlow, M.A.; Bursar, Rev. Thomas T. Gray, M.A.; Senior Proctor, Rev. Thomas K. Abbott, D.D.; Senior Lecturer, B. Williamson, D.Sc.; Registrar, Rev. J. P. Mahaffy, D.D.; Librarian, Rev. T. K. Abbott, D.D. Consult *Dublin University Calendar*.

Dufferin, Marquis of. See under PEERAGE.

Dulwich College (Alleyn's "College of God's Gift" at Dulwich) was founded A.D. 1619, by Edward Alleyn, the Actor, under Letters Patent of King James I., by which a licence was granted to Alleyn to establish a College "to endure and remain for ever," and to be called "The College of God's Gift in Dulwich, in the County of Surrey." Reconstituted '58, and removed to new site and new building '70. Present numbers in the school, 645. No boy may enter the school before the age of 10, or remain after the age of 19. Endowment about £4000 per annum. £1000 may be annually allotted among "boys proceeding to a place of higher education," and £1000 also may be paid annually in scholarships to boys either already in the school or about to enter it. Such scholarships are awarded as the result of open examination. Head Master, A. H. Gilkes, M.A.;

School Secretary, Gilbert B. Stretton, M.A.; Motto, *Detur Gloria Soli Deo*.

"Dundee Advertiser." The morning newspaper which is generally regarded as the most prominent organ of the Liberal party in Scotland. Issued from the same office are the *Evening Telegraph*, the *People's Journal*, and the *People's Friend*. The *People's Journal* is the great Radical working-man's weekly newspaper in Scotland, having a circulation approximating to a quarter of a million, and being read all over the country. Editors, Sir John Leng, M.P., for Dundee, and T. Carlaw Martin. Chief Office, 7 to 25, Bank Street, Dundee. London Office, 186, Fleet Street, E.C.

Durham, Bishop of. See under PEERAGE.

Durham University, founded 1832, comprises University College ('37), Bishop Hatfield's Hall ('46), and the Colleges of Medicine and Science located at Newcastle-upon-Tyne. The students number about 200 at Durham, and about 2000 (reckoning matriculated and non-matriculate students) at Newcastle. Unattached students first admitted '71. Affiliated are Coderington College, Barbadoes, and Fourah Bay College, Sierra Leone. Warden, the Dean of Durham, G. W. Kitchin, D.D., F.S.A., who is also President of the College of Science; President of the College of Medicine, G. H. Philipson, M.D., M.A. Degrees: D.D., B.D., M.A., B.A., D.C.L., B.C.L., M.D., M.B., M.S., B.S., Mus.D., Mus.E., D.Litt., B.Litt., D.Sc., M.Sc., B.Sc. Licences in theology, Diplomas in public health, and Certificates of proficiency in general education, also granted. Local University Lectures are also given in connection with this University, and local examinations have been established. Consult *Durham University Calendar*.

Dykes, Rev. J. Oswald, D.D., b. at Port Glasgow 1835, graduated M.A. at Edinburgh '54, studied theology at New College (Edin.), Heidelberg, and Erlangen. Ordained minister of the Free Church, East Kilbride, Lanark, '59; elected colleague of Dr. Candlish in Free St. George's, Edinburgh, '61. Compelled to resign this important charge through feeble health in '64, he visited Australia, where he remained for three years. In '69 he became minister of Regent Square Presbyterian Church, London. He left this charge in '88, when he was appointed Principal of the Theological College, Queen Square, now located at Cambridge and known as Westminster College. Works: "Beatitudes of the Kingdom" ('72), "Laws of the Kingdom" ('73), "Relations of the Kingdom" ('74), "From Jerusalem to Antioch" ('74), "Abraham" ('77), "Daily Prayers" ('81), "Sermons" ('82 and '92), "The Law of the Ten Words" ('84), "The Gospel according to St. Paul" ('88), "Plain Words on Great Themes" ('92). Address: The Lodge, Westminster College, Cambridge.

E

Earl Marshal, The, is one of the great officers of State, and takes precedence next after the Lord High Constable. The latter office ceased to be hereditary in 1521, since which it has been only temporarily revived for successive coronations, and once for a trial by combat, which, however, did not take place. One of the functions of this exalted personage is, in company with the Earl Marshal, to usher the **King's Champion** into Westminster Hall just before the second course of the coronation banquet. The Lord High Constable and the Earl Marshal were formerly judges of the ancient Court of Chivalry; but when the former office ceased to be hereditary, the sole jurisdiction in questions of honour and arms was vested in the Earl Marshal, who is head of the College of Arms (see **GARTER KING OF ARMS**). The office of Earl Marshal is hereditary in the family of the Duke of Norfolk. **Office**, Queen Victoria Street, E.C.

Early Closing Association and Traders' Parliamentary Alliance. Founded for promoting: (1) An abridgment of the hours of labour in all departments of industrial life, wherever unduly prolonged—especially on Saturday nights; (2) the adoption of a Saturday or other weekly half-holiday; (3) the abolition of unnecessary Sunday labour; (4) the early payment of wages; (5) the promotion of a profitable employment of leisure hours; (6) the promotion of the interests of traders and their assistants in matters requiring municipal or legislative control. By subscribing 2s. 6d. half-yearly, assistants are entitled to receive gratuitous medical advice from any of the Society's honorary medical staff. **President**, Sir John Lubbock, Bart., M.P. **Secretary**, James A. Stacey. **Assistant-Secretary**, Albert Larking. **Offices**, 21, New Bridge St., E.C.

East Africa, German. The German possessions in East Africa lie immediately to the south of British East Africa, and have an estimated area of about 400,000 sq. m., with a population of 4,000,000. They are bounded on the north by a line running north-west from the Umbe river to the east shore of the Victoria Nyanza, and continuing west from this lake to the Congo State. Lake Tanganyika forms the western boundary, and thence a line to Lake Nyasa, and the river Rovuma form the south-west and southern boundaries. In September '94 it was agreed that the German-Portuguese frontier should follow the parallel 10° 40' S. lat. from the coast to its intersection with the river Rovuma, leaving Kionga and the mouth of the Rovuma to Germany, and Cape Delgado to Portugal. Several stations have been established by the German East Africa Company, and the chief ports are Dar-es-Salaam, Bagamoyo, Kiloa, and Tanga. Colonel Liebert is the Governor of the colony. The products of the country are coffee, tobacco, cotton, ivory, caoutchouc, and gum. Gold has been found at Usambara. **Imports**, '97-8, £424,270; **exports**, £201,560.—**History**, '99. The Reichstag approved of estimates to enable the Government to take over at a cost of 2,000,000 marks the Usambara Railway, which was complete from Tanga to Muhesa, and to extend it to Karagwe (March 10th). A vote for 630,000 marks, the cost of a floating dock to be con-

structed at Dar-es-Salaam, was also carried. During this month, too, Mr. Rhodes visited the German Emperor, and an agreement was arrived at for the construction of a telegraph line through the country from south to north. The Trans-African Telegraph Company undertook to build the line at its own cost, and to erect a further line connecting Rhodesia and British East Africa, this further line to become the property of and to be maintained by the German Government. Negotiations as to the Cape to Cairo Railway were also entered into, but no definite result was reached.

East Africa, Portuguese, comprises the two districts of Lorenzo Marques and Mozambique, which are separated from one another by the Zambesi, and the other smaller districts of Zambesia, Inhambane, and Gaza. Its coast-line extends southwards from Cape Delgado, the southern extremity of the coast-line of German East Africa, to Kosi Bay, just below Delagoa Bay, at a point separating British from Portuguese territory, as fixed by the Anglo-Portuguese Agreement of '91. The frontier between German and Portuguese East Africa runs along parallel 10° 40' S. lat. from the coast to its intersection with the river Rovuma, leaving the mouth of the Rovuma and Kionga to Germany, and Cape Delgado to Portugal. The eastern boundary is the lake and British Central Africa, or the Nyasa Protectorate down to the junction of the Shiré with the Zambesi; while from that point the British South Africa Company's territory, including Mashonaland and Matabeleland, and the South African Republic, form the boundary. The colony is administered by a Royal Commissioner appointed for three years. The Manica and Sofala region, where gold exists, is placed under the Mozambique Company, which has a royal charter. Other companies are working other parts of the country. The two principal railways of this region are the Delagoa Bay (g.v.), which has a length of 57 miles in the colony, and the Beira Railway, which runs from the river Pungué on the east coast, a point 12 miles from the mouth of the river, to Salisbury, the capital of Rhodesia, a distance of 382 miles. Beira is also connected by telegraph with Salisbury. The principal exports are oilnuts and seeds, caoutchouc and ivory. **Area**, about 300,000 sq. m.; **pop.** about 3,000,000. See TRANSVAAL (map).

East Africa Protectorate. The British possessions in East Africa extend about 400 miles along the coast northwards from Umba, at the mouth of the Umba river. The southern boundary runs from Umba in a north-west direction to the intersection of the Victoria Nyanza with the first parallel of S. lat., skirts the northern shore of the lake, and thence westwards to the boundary of the Congo Free State. The river Jub begins the northern boundary, which from the intersection of the river with the 6th parallel N. lat. runs to the 35th meridian E. long., and follows that to its intersection with the Blue Nile; the Congo Free State and the western watershed of the basin of the Upper Nile forming the western boundary. The total area is about 1,000,000 sq. miles, embracing a great part of Somaliland,

the Equatorial Province, Uganda, Usoga, Unyoro, etc., and the population is estimated at between 2,000,000 and 3,000,000. The Imperial British East Africa Company opened up the country, having in '88 obtained a concession of territory from the Sultan of Zanzibar and a charter from the British Government. An arrangement for buying them out was, however, come to in '95. It was arranged that the Sultan of Zanzibar should pay £150,000 for the surrender of the Company's concession of a ten-mile strip along the coast, and £50,000 for their assets, while the British Government should pay a grant of £50,000 for the surrender of the Company's charter. The majority of the Company's *employees* were re-engaged by the Government. Uganda was made a protectorate; the country between Uganda and the ten-mile strip along the coast was made a protectorate under the authority of the British Consul-General at Zanzibar; Witu and the river Tana region were similarly treated, and finally the ten-mile strip along the coast bought back from the Company by the Sultan was rented by the Government for £11,000 a year, and the territory placed under the administration of the Consul-General at Zanzibar. The Protectorate is divided into four districts: the Coast Province, capital Mombasa; Ukamba, capital Muchakos; Tanaland with Witu, capital Lamu; and Jubaland, capital Kismayu. The chief ports are Mombasa (which is also the capital of the whole Protectorate), Lamu, Vanga, and Kismayu. The construction of a railway of 670 miles, length from Mombasa to Lake Victoria Nyanza was commenced on Dec. 11th, '95. A White Paper ("Africa," No. 5, '99), giving the report of Sir G. Molesworth on the railway, was published on June 26th, '99. This eminent engineer had been sent out to investigate; and stated that, considering the great difficulties, good progress had been made, the work having been done in an efficient manner. The annual report of the Committee ("Africa," No. 6") was issued on July 21st, and stated that 140 miles had been laid during the year ending March, making 279 miles in all, and the expenditure to date (all told) was £1,945,281. It was reported in July that the railhead was at Nairshi, at mile 325. On July 8th the Macupa bridge, across the arm of the sea separating Mombasa from the mainland, was opened, and was named the Salisbury bridge. It is 1383 ft. long, and was built in 22 months. The principal products of the country are cloves, ivory, indiarubber, copra, hides, etc. See DIPLOMATIC.

East Indies, Dutch. The Dutch possessions in the Asiatic Archipelago include Java (*q.v.*), with Madura, and what are called the Outposts, viz., Sumatra, part of Borneo (*q.v.*), Celebes, the Moluccas, part of New Guinea (*q.v.*), and the Sunda and other islands. For the area and population of these islands, etc., see COLONIES, ETC., OF EUROPEAN POWERS. Java is dealt with in a separate article. The Outposts, which have an estimated area of about 650,000 sq. m., and an estimated population of about 9,000,000, are administered by Governors, Residents, etc., according to their status. The administrative and executive authority for the whole of Dutch East India is in the hands of a Governor-General, assisted by a Council of five members. The army, which is purely colonial, numbers about 16,500 Europeans and 24,000 natives. The

cost of the navy is borne partly by the colony and partly by the Government of the Netherlands. There are over 1200 miles of railroad opened for traffic. The chief exports are sugar, coffee, tea, indigo, and tobacco. Estimated revenue, '97, £10,537,000; expenditure, £11,736,000; average imports, £13,000,000; average exports, £16,000,000.

Ecclesiastical Commissioners, The. owe their origin to the Act 6 and 7 Will. IV., c. 77. Incorporated for the purpose of making schemes to carry out the recommendations of certain earlier commissions appointed to inquire into the endowment of bishoprics, the state of cathedral and collegiate churches, the best way of providing for the cure of souls, etc. The Act provided that the two Archbishops, the Bishop of London, the Lord Chancellor, Lord President, and First Lord of the Treasury for the time being, as well as a Secretary of State named by the sovereign, with three others therein named, should be of the commission. A subsequent Act added all the remaining bishops in England and Wales, the Chief Justice, and others. Membership of the Church of England has always been an indispensable condition of holding the office. By an Act of 1856 the Church Building Commissioners had their powers transferred to the Ecclesiastical Commissioners. Generally it may be said that the function of the Ecclesiastical Commissioners is to provide for the adjustment of the endowments to the wants of the Church. The proceedings of the Commissioners are controlled by numerous Acts of Parliament, and various duties have from time to time been imposed upon them—*e.g.*, the formation of new parishes and alteration of boundaries where required, the augmentation and endowment of poor benefices in populous places, the sale and leasing of glebe lands, etc., etc. Since '40, when the common fund was first created, the Commissioners have augmented or endowed upwards of 3800 benefices. The total increase in the incomes of benefices resulting from the operations of the Commissioners exceeds £1,032,330 per annum, and may be taken to represent a capital sum of £31,035,700. The Commissioners determined to appropriate in grants towards the augmentation and endowment of benefices, during '99, the sum of £185,000 of capital. Office, 10, Whitehall Place, S.W. Secretary, A. De Bock Porter, C.B.

Ecclesiastical Courts. These are of three degrees of jurisdiction. First there are the purely spiritual courts, including the Archdeacon's Court, the Bishop's Consistory, and the Archbishop's Court; second, courts of mixed spiritual and secular jurisdiction—*e.g.*, the Court of Arches and the Court of the Official Principal of York; and, third, courts of purely secular constitution—*e.g.*, the Judicial Committee of Privy Council, which is the Court of Final Appeal in ecclesiastical causes. Practically none of these courts now pretends to undisputed authority. The report of the Royal Commission on Ecclesiastical Courts ('83), while vindicating the historical position of them all, bewailed the confusion into which the administration of ecclesiastical law had fallen, and urged the adoption of various reforms. Absolute power, however, meanwhile rests with Sir Arthur Charles, "Judge of the Provincial Courts of Canterbury and York," under the Public Worship Regulation Act, '74, and,

as such, Dean of the Arches and Master of the Faculties. By the issue of writs de *contumace capiendo* clergymen have been, and may be, imprisoned for defying sentences of monition, by inhibition, suspension, or deprivation decreed by this court. The judgments of the Judicial Committee may be upheld and enforced by any of the High Courts of Justice. The *Archdeacon's Court* is a survival, and nothing more. It is a court of first instance, and appeals lie to the bishop, but its aid is seldom invoked.—*Consistory*. Every bishop has his Consistory Court held before his Chancellor or Commissary, in his cathedral church, or other convenient place in his diocese. In this court are granted *faculties* for the alteration, repair, and renovation of churches. Nothing can be added to or taken from the ornaments of the Church except a faculty is obtained for the purpose. The *Archbishop's Court*, distinguished from the *Provincial Court*, is the canonical tribunal for the hearing of spiritual causes. *Sir Arthur Charles's Court*, or the old Court of Arches modified as stated, unites the powers of the *jus canonicum* with new powers conceded by the Church Discipline Act, '41, and the similar statute of '74, exercising authority in both Provinces. Lastly, the Judicial Committee of Privy Council, as representing the Royal Supremacy, is the absolute though not the canonical court of final appeal. The Bishops assembled at Lambeth in January '99 resolved that a *Bill for the Reform of the Ecclesiastical Courts*, drawn on the lines laid down by the Royal Commissioners in '83, should be submitted to the Houses of Convocation. The following is an outline of the recommendations of the Commissioners. Cases of misconduct and neglect of duty by the clergy would be dealt with still under the Benefices Bill. Procedure in cases of heresy and breach of ritual should be as follows: The Bishop to have the right to veto proceedings being taken at all, but to give his reasons in writing for so doing. By consent the Bishop may hear the case; or the complainant may set the case down before the Diocesan Court, consisting of the Bishop with a legal and a theological assessor; or by consent the Bishop may send it for trial to the Provincial Court. From the Diocesan an appeal shall lie to the Provincial Court, consisting of the Archbishop of the Province, who shall pronounce whether he will leave it for the decision of his official principal or hear it himself, assisted by the official principal as assessor, in which case he may appoint theological assessors, not exceeding five, to sit with the Court. An appeal shall lie to the Crown, who shall appoint a permanent body of lay judges for this purpose. The Court to consist of not less than five, to be members of the Church. The Judges may consult the Archbishops and Bishops in the same manner as the House of Lords now consults the Judges on specific questions.

"*Echo, The*. An evening paper, established Dec. 1868. Its principles are Independent Liberal. *The Echo* gives daily, in a condensed form, the chief and latest news of the day, foreign, home, and commercial, of which it treats in an independent manner. Several new features have recently been introduced in the *Echo*, special prominence being given to topics of social interest. *Proprietors*, The Consolidated Newspapers, Ltd. *Office*, 22, Catherine Street, Strand, W.C.

Economics and Political Science, The London School of. The School commenced work in Oct. '95, and is already the largest centre of systematic training in economic and political studies in the United Kingdom. During the third year, '98-9, 422 students joined the School. Work is carried on, by lectures and classes, both in the morning, and in the evening after 5 p.m. A three years' course of training in economics has been established. With the view of encouraging the elementary study of economics and political science, a limited number of scholarships, tenable at the School, are awarded to selected students from University Extension and other classes in economics. Three research studentships, of from £100 to £25 each, were awarded after an examination held in July '99, for the promotion of special investigations into problems of economic and political science. A sum of more than £2000 has been obtained for the purposes of The British Library of Political Science. The Library is intended for the free use of students of the School, persons engaged in public administration, professors, etc., of a recognised University, and others are admitted by the Directors on recommendation by some person of position. Hours: opens daily at 10 a.m. Closes (a) in Term, on Saturdays at 6, other days at 9 p.m.; (b) in Vacation on Mondays, Wednesdays, and Fridays at 9, other days at 6 p.m. Closed entirely on Sundays, January 1st, Good Friday and next five days, Saturday before Whit Monday and next four days, first fourteen days of August, Christmas Day and next six days. Contains a valuable collection of English and foreign municipal reports, minutes, etc., publications of other local government bodies, Government publications, etc. The School is located at 10, Adelphi Terrace, London, W.C. All communications should be sent to the Director.

Ecuador. A republic of equatorial South America, governed by a President elected for four years, with the assistance of a Congress composed of a Senate of 32 members, elected for four years (one-half retiring every two years), representing the provinces, and a Chamber of 42 Deputies, representing the people, which is elected every two years. The electors to both Chambers must be adults able to read and write, and holding the Roman Catholic faith. *Area*, 120,000 sq. m.; *pop.* 1,270,000, of whom nearly 900,000 are Indians. *Capital*, Quito, *pop.* 80,000. The foreign commerce is largely with the United Kingdom, and centres in Guayaquil. The chief products are cocoa, indiarubber, hides, coffee, sugar. Gold and other minerals exist in considerable quantities, but the country badly needs opening up. Army about 3341 officers and men. Between Ecuador, Peru, and Colombia there have been for some time boundary disputes, at present unsettled. *Revenue*, '98, £780,519; *expenditure*, £773,574; *debt*, '97, £750,000; *imports*, '98, £987,080; *exports*, £1,509,415. For Ministry, etc., see DIPLOMATIC.

Edinburgh University, founded 1582, has since become one of the chief medical centres in the world. During '98 the total number of matriculated students was 2813. Of these 817 were enrolled in the Arts Faculty, 1387 in the Faculty of Medicine, 373 in Law, 63 in Divinity, 147 in Science, and 26 in Music. The aggregate value of the University fellowships, bursaries, and prizes now amounts to about £17,790 per annum, most of the bursaries being open to

competition. Chancellor, Rt. Hon. A. J. Balfour; Principal and Vice-Chancellor, Sir Wm. Muir, K.C.S.I., D.C.L., LL.D., etc.; Lord Rector, Lord Dufferin (elected Nov. 7th, '99). Conjointly with St. Andrews it sends a representative to Parliament; present member Sir William Overend Priestley, K.B., M.D., LL.D. Its Degrees are: M.A., B.D., D.D., LL.B., B.L., LL.D., M.B., Ch.B., M.D., Ch.M., B.Sc., D.Sc., D. Litt., D. Phil., Mus. Doc., Mus. Bac. Women have been since '92 admitted to the Arts and Science classes and to Graduation in Arts and Science on the same terms as men. Of the above number of matriculated students, 211 were women, and 32 were also among the non-matriculated students in attendance on the Music Classes. Women who have obtained their medical education in universities, or recognised extra-academical schools, are now admitted to degrees in medicine and surgery in the university. Alumni include Sir William Hamilton, Carlyle, Hume; Nasmyth, the engineer; Sir Walter Scott, Mungo Park, James Mill, Owen, the anatomist; Sir C. Wyville Thomson, scientific chief of the *Challenger* expedition; Dugald Stewart, Lord Brougham, R. Louis Stevenson, and J. M. Barrie. Sec. of Senatus, Prof. Sir L. J. Grant, Bart. Consult *Edinburgh University Calendar*.

EDUCATION IN THE UNITED KINGDOM.

- I. INTRODUCTION.
- II. PRIMARY EDUCATION.
- III. SECONDARY EDUCATION.
- IV. TECHNICAL EDUCATION, ETC.

I. INTRODUCTION.

The educational system of the United Kingdom, as it stands to-day, is a remarkably varied and complex system. First as to primary education. The *Elementary Education Acts* of '70, '76 and '80, required that every school district, whether municipal borough or civil parish, should provide sufficient elementary school accommodation for all the children resident in such district and requiring such accommodation. The *Education Act* of '91 further provided that every parent could claim gratuitous elementary education for his children between the ages of 3 and 15. Education is compulsory for all classes; and elementary education in the primary State-aided schools is free to all classes of children applying for it. Elementary education is imparted under the operation of two great systems, the Voluntary system and the School Board system. The former sprang up early in the century, and was carried on by private effort; but State aid was granted to the schools thus established by a Committee of the Privy Council. The chief educational societies engaged in this work were the National Society of the Church of England, the British and Foreign School Society, the Wesleyan School Society, and the Roman Catholic Poor School Committee. *School Attendance Committees* were established by Lord Sandons' *Education Act* of '76, which prescribed that every district in England and Wales which had not a school board should have such a committee, chosen in boroughs and urban sanitary districts by town councils and urban sanitary authorities, and in all other places by boards of guardians. The chief difference of function between these committees and

School boards is that the attendance committee cannot build or carry on schools; it can only compel attendance in the voluntary schools, and there must be enough voluntary school accommodation for all the children in the district. A large proportion of the rural area is under attendance committees, and there are a few important towns in the same position. During the year ended Dec. 31st, '98, 14 orders were issued creating new school boards in parishes. Of these 7 were formed compulsorily. At that date there were 119 school attendance committees for boroughs, 89 for urban sanitary districts, and 582 for poor-law unions.

The *School Board* system was created by the *Elementary Education Acts* of '70-80. There are 2511 school boards in England and Wales, 189 of which have jurisdiction over municipal boroughs, including London. The total population within the school-board areas is 19,979,924, leaving a balance of 9,022,601 under school-attendance-committee jurisdiction. Wherever there is not enough efficient public elementary school accommodation in a district for all the children a school board must be formed, whose first duty it is to make good the deficiency of accommodation by opening board schools. Districts where there is no deficiency of accommodation may have a school board by passing a vote to that effect by a majority of the town council in boroughs, or of ratepayers in districts which are not boroughs. The boards are elected outside the Metropolis by the burgesses of the borough or the ratepayers of the parish; within the Metropolis by those entitled to vote for common councilmen or vestrymen. *School age* is from 5 to 14, with exemption from compulsory attendance for children over 12 years of age who have passed certain standards of proficiency. Under certain conditions children employed in agriculture may be partially exempted at the age of 11. There must be accommodation also for as many children as present themselves under the age of 5 and over the age of 14, except for such scholars as have passed an examination in the seventh standard. In boroughs with a population of 100,000 and upwards the school board consists of 15 members; from 70,000 to 100,000, 13 members; from 40,000 to 70,000 11 members; from 15,000 to 40,000 9 members; from 5000 to 15,000, 7 members; under 5000, 5 members. Any man or woman twenty-one years of age, without any restriction as to qualification or residence, may be elected a member of a school board. The board may not interfere with the management of voluntary schools, but may demand from those schools returns of the attendance of children. The board may acquire, with the sanction of the Education Department and of Parliament, compulsory possession of a site for a board school. It borrows money for building board schools, paying back the whole amount, interest and principal, in fifty or less years. All other expenses must be met year by year, the deficiency being made up by a school rate. School boards which fail in their duty are declared "in default," and may be superseded by a school board appointed by the Committee of the Privy Council on Education, at the cost of the ratepayers. School boards in Scotland and the Isle of Man are under separate Acts of Parliament, under which the whole area of those countries are under school boards, and such a thing as a school attendance committee is unknown. See LONDON SCHOOL BOARD.

An Act was passed in '97 giving to voluntary schools an aid grant equal to 5s. per scholar in average attendance, available for distribution among necessitous schools; providing for the constitution of associations of voluntary schools, for the distribution of the grant among the associated schools; removing the 17s. 6d. limit, and exempting voluntary schools from rates. As this Act left untouched board schools in necessitous districts where the rates pressed heavily upon the poor, another Bill was brought in providing an additional grant for board schools. This Bill provided that where a 3d. rate would produce less than £20, or less than 7s. 6d. per child in average attendance, there should be an additional grant equal to 4d. per child for every 1d. the Voluntary Schools Act, 75 Associations of by which the school rate exceeded 3d. Under Voluntary Schools have been formed; 10 of them are exclusively Church of England, 36, though mainly Church of England, are open to all voluntary schools, 11 British, 11 Roman Catholic, 6 Wesleyan, and 1 Jewish.

Until April 1st, 1900, the Education Department for England and Wales will be the central authority for primary education. This is a committee of the Privy Council, in which are included the President of the Council (the Duke of Devonshire), and the Vice-President for Education (Sir J. E. Gorst, M.P.), assisted by a large permanent staff. The greater share of ministerial work falls upon the vice-president, who is responsible to the House of Commons. The Department distributes the parliamentary grant, frames the Code, and appoints a staff of inspectors; it sanctions the borrowing of loans by school boards on the security of the rates, and may grant provisional orders for the compulsory acquisition of land for school sites. Council office, Whitehall, S.W. Secretary, Sir G. W. Kekewich, K.C.B.

After April 1st, 1900, education, primary, secondary, and technical, will be under the sole control of the Board of Education, established by the Board of Education Act, '99. This Board will take the place of the Education Department (including the Department of Science and Art); and the Queen in Council may transfer to it any of the educational powers of the Charity Commissioners or of the Board of Agriculture, with the reservation that the Charity Commissioners shall determine whether any endowment ought to be applied to educational purposes. The Board of Education is to consist of a President, the Lord President of the Council, Her Majesty's Principal Secretaries of State, the First Commissioner of Her Majesty's Treasury, and the Chancellor of the Exchequer. The President is to be appointed by Her Majesty, and will hold office during her pleasure. Besides the present powers of the Education Department, the Board of Education, either by their own officers or by any university or other organisation, inspect any secondary school desiring to be inspected. The Act also empowers Her Majesty in Council to establish a Consultative Committee, two-thirds of the members of which shall be qualified to represent the views of universities and other educational bodies. The duties of this Committee will be to frame, with the approval of the Board of Education, regulations for a register of teachers, and to advise the Board on any matter referred to the Committee by the Board. The President of the Board of Educa-

tion is to be eligible to sit in the House of Commons.

There is a separate **Department for Scotland**: **Office**, Dover House, Whitehall; **Secretary**, Sir H. Craik, C.B. The **Department in Ireland** is under the Commissioners of National Education, Dublin. The cost of the administration of the English Department was in '96 £398,910 in England and £28,075 in Wales; of the Scotch Education Department, £49,749. The **Science and Art Department** of the Committee of Council, under the same Lord and Vice-President, is at South Kensington, and has charge of all those subjects which are encouraged by State aid and which do not fall within the curriculum of the ordinary elementary school. See **SCIENCE AND ART DEPARTMENT**.

For **Secondary Education** (except in Scotland, where the "higher-class schools" and "secondary" departments in public schools are under the School Boards) there exists at present no such State organisation as is provided for elementary education, and private adventure still rules supreme, uninspected and uncontrolled, in the supply of education for the middle classes. Some excellent and useful organisations for the provision of secondary education have sprung voluntarily into existence, such as the Boys' Public Day-schools Company and the Girls' Public Day-schools Company; and the Charity Commissioners have done a great work in reorganising the old grammar and foundation schools scattered throughout the country. Furthermore, there are the recent advances made as to Technical Education, which was so remarkably stimulated by the grants of money allocated to it under the Customs and Excise Act, '90. But there is no statutory power existing to enable any department to insist on a sufficient and efficient supply of second-grade schools being established in every district in need of it. By the **Local Taxation Act** of '90 the county councils were empowered to supply certain funds for the promotion of technical and commercial education in their districts. In respect of schools of the highest grade, while there is no such thing as State control, the great schools of Eton, Harrow, Rugby, Winchester (see separate articles under their various headings), and their like, offer a liberal education in the humanities. It should be added that nearly all the great public schools have now established laboratories, libraries and museums.

For a summary of the Education measures introduced into the House of Commons during '99, see **SESSION**, sects. 13, 41, 53 and 54.

II. PRIMARY EDUCATION.

1. England and Wales.—The keystone of the whole system of primary education is the requirement by the Education Department—and, after April 1st, 1900, by the Board of Education—that any head master or head mistress of a school receiving grants shall have passed an examination for a certificate of merit, and proved his or her practical ability as a teacher, by obtaining favourable reports from the inspector. All children are grouped in standards of graduated difficulty, and are required to be present at the annual inspection. The curriculum of the schools, which is determined by the Code annually submitted to Parliament, includes sound instruction in the usual essential elementary subjects. Drawing (for boys) and needlework (for girls) are com-

pulsory. Two "class subjects" are generally taught in addition, selected from English, geography, elementary science, and history. The scholars in the three highest standards (V.—VII.) are allowed also to take two subjects, called "specific subjects," of a more advanced character. Much encouragement is being given now to subjects of a technical character, such as drawing, needlework, cookery, laundry, dairy-work, domestic economy and hygiene, carpentry, agriculture, etc. The grants of the Department are made on precisely the same conditions, whether the school is a voluntary school (*i.e.*, maintained by some denominational body, partly by voluntary subscription), or is under a school board with the assistance of the rates.—**Statistics.** On the date to which the last return is made up, there were in **England and Wales** 20,022 elementary schools inspected, having accommodation for 6,345,906 scholars. The average daily attendance was 4,572,236. The Government grant for day schools amounted to £4,554,932, or about 16s. 3d. per infant scholar and £1 os. 9d. per older scholar in average attendance. This does not include the amount contributed in lieu of school fees, which in '98 amounted to £2,265,319. An idea of the progress that has been made in the provision of elementary education since '70 may be formed from the fact that in that year accommodation was only provided for 8.75 per cent. of the population, whereas in '98 the percentage was 20.11. The cost of education per head has steadily increased since the passing of the first Education Act. In '72 the cost per head was £1 7s. 5d.; in '79, £1 16s. 10½d.; in '85, £1 19s. 1¼d.; and in '98, £2 2s. 4½d. in voluntary schools, and £2 13s. 9½d. in board schools. The amount raised during '98 (latest returns published at date of going to press) for purposes of public elementary education in England and Wales will be seen from the annexed table.

2. Ireland.—The 65th Report of the Commissioners of National Education in Ireland, for '98-9, states that on Sept. 30th, '98, there were 9108 schools on the roll, of which 8651 were in operation. There were on the rolls 808,467 pupils, with an average attendance of 518,799, being a percentage of 64.2 as against 63.9 in the preceding year. Of the pupils on the rolls 75.6 per cent. were Roman Catholics, 11.6 per cent. of the late Established Church, 11 per cent. Presbyterians, 1.1 per cent. Methodists, and 0.7 of other denominations. There were 12,990 teachers, exclusive of the teachers of 273 convent and 3 monastery schools paid by capitation, and 5 training colleges for teachers. £44,023 was paid to 1355 teachers in pensions. The aggregate annual expenditure from all sources, including grant, rates fees, and subscriptions, amounted to £1,216,074, giving an average of £2 7s. 5½d. per child in average daily attendance.

3. Scotland.—Here an excellent system of elementary education was adopted long before the passing of the **Scottish Elementary Education Act** in '72. In 1696 a law was passed establishing a school in every parish of Scotland. The great secession from the Church of Scotland in 43 effected the break-down of the parochial school system. The Free Church schools were set up side by side with the schools of the Establishment, and the division of interests and the means of support were not conducive to

educational efficiency. Hence two years after the adoption of Mr. Forster's Act in England and Wales the **Scotch Education Act** was passed, establishing a school board in every Scottish parish, and giving it the control of all parochial schools, not only elementary schools, but also the academies and high schools, and empowering it to erect and maintain new schools, according to the needs of the population. Grants in aid are given from the Imperial Exchequer to all schools under school boards, except those defined as "high-class public schools." The Scotch Education Act is administered by a committee of the Privy Council, called the **Scotch Education Department**. The **Scotch Code** differs from that of England and Wales in that it provides for the teaching of more advanced subjects, and differently defines the term "training college." Free elementary education has now been generally adopted in Scotland, under the powers of Acts passed in '89 and '90. There were in '98 3067 separate institutions inspected, furnishing accommodation for 847,876 scholars. There were 717,747 names on the registers, of whom 605,776 were in average daily attendance. The parliamentary grant to day inspected schools amounted to £664,835. The cost of "maintenance" per scholar in average attendance was, in public schools, £2 12s. 2½d., in voluntary schools, £2 5s. 1½d. Of evening continuation schools, 1019 were inspected, and 59,954 scholars were present.

III. SECONDARY EDUCATION

In England, though the State has at present exercised no direct control over secondary education, it has instituted several inquiries into its condition, from '61 onwards. In Jan. '93 Mr. A. H. Dyke Acland appointed a **Departmental Committee**, to consider as to the best means of organising secondary education in England and Wales. But the work of this committee was suspended in March '94 owing to the appointment of a **Royal Commission** to inquire into the subject. The terms of the reference were that the Commission should consider what are the best methods of establishing a well-organised system of secondary education in England, taking into account existing deficiencies, and having regard to such local sources of revenue from endowment or otherwise as are available, or may be made available, for this purpose, and make recommendations accordingly. The **Commissioners** were Rt. Hon. J. Bryce, M.P. (Chairman), Rt. Hon. Sir J. T. Hibbert, K.C.B., M.P., Hon. and Rev. E. Lyttelton, Sir Henry E. Roscoe, M.P., Very Rev. Dean Maclure, D.D., Rev. A. M. Fairbairn, D.D., R. C. Jebb, Esq., D.C.L., M.P., Dr. R. Wormell, H. Hobhouse, Esq., M.P., M. E. Sadler, Esq., H. Llewellyn Smith, Esq., G. J. Cockburn, Esq., C. Fenwick, Esq., M.P., J. H. Yoxall, Esq., Lady Frederick Cavendish, Mrs. Bryant, and Mrs. Henry Sidgwick. The Secretary of the Commission was the Hon. W. N. Bruce, of the Endowed Schools Department of the Charity Commission.

The **Report of the Commission** was issued at the end of October '95 in nine volumes, including minutes of the evidence taken, memoranda and answers to the Commissioners' questions, the reports of Assistant Commissioners on selected typical districts, etc. The Report itself was divided into four parts: (1) an historical statement as to previous legislation; (2)

a description of the existing state of things; (3) an analysis and exposition of the evidence, with a discussion of the views and suggestions of certain leading witnesses; and (4) the recommendations of the Commissioners. These recommendations fell into five classes, as follows:—

1. **The Central Authority.**—This ought to consist of a Department of the Executive Government, presided over by a Minister responsible to Parliament. There should be under the Minister a permanent Secretary. An **Educational Council** should be created, with not more than 12 members, 4 appointed by the Crown, 4 by the Universities of Oxford, Cambridge, London, and Victoria, and 4 selected by these 8 from among experienced members of the teaching profession. The work of the Charity Commission, so far as it touched educational endowments, and of the Science and Art Department, so far as it touched secondary education, should be transferred to the new Department. The functions entrusted to the **Central Authority** should include a general oversight of the action of such local authorities as may deal with Secondary Education, with some measure of jurisdiction over those important educational foundations which, being used by the country generally, cannot properly be subjected to local jurisdiction, and the management of a Register of Teachers.

2. **Local Authorities.**—The Commissioners recommended that a local authority should be created in every county and county borough with a population exceeding 50,000, but that adjoining counties and county boroughs should have power to unite. As to London, the area dealt with was made the administrative county of London. The local authority should have power to establish new schools where necessary, to initiate schemes for the better management of educational endowments, to supervise and inquire into the working of all endowed schools, and to a certain extent of all proprietary and private schools, within its area, to make schemes for unendowed public schools, to establish scholarships and exhibitions, to aid schools and institutions not under its direct management, to appoint representatives on governing bodies of public schools within its area, to determine the amount of and issue a precept to the county or borough council for the rate found to be necessary for its work, and to receive, instead of the county and borough council, the money available under the Customs and Excise Act of '90.

3. **Arrangements for the Better Organisation of Schools.**—The Commissioners stated under this head that the duty of providing in each area schools of the type locally required had better be left to the local authority. As to existing secondary schools, **Endowed Schools** were first dealt with, and the Commissioners recommended that the great public schools should not be excluded from the supervision of the Central Authority. As to **Unendowed but Public Schools**, Higher Grade Elementary Schools, Organised Science Schools and Evening Continuation and Technical Schools should all be classed and treated as Secondary Schools, but the transition should be gradual. As to **Proprietary and Private Schools**, the Commissioners desired not to weaken but to stimulate and improve them. In rural districts the Commissioners recommended that the endowed schools in the smaller

towns and villages should be remodelled, and an upper department should be established in a certain number of elementary schools.

4. Financial Arrangements.—The Commissioners pointed out that income can be drawn from (1) endowments, amounting to about £735,000 per annum, at present very unequally distributed; (2) the grant under the Customs and Excise Act, '90, amounting in '93-4 to £748,000, which should all be handed over to the Secondary Education Authorities, although it would still go partly in aid of Technical Education; (3) local rates to the limit of 2d. in the £, which would produce £1,280,000 per annum; (4) fees paid by pupils to be fixed by the governors or managers of all secondary schools with an eye to the kind of education provided by the school, and the class of pupils served by it; (5) Parliamentary grants made by the Science and Art Department and by the Education Department to evening and continuation schools. These grants should be consolidated into a grant to the new local authorities, and made applicable to Secondary Education.

5. Questions Specially affecting Teachers.—The Commissioners recommended that some limit should be placed to the power of the head teacher as to the tenure of office of assistant teachers, the power of dismissal being always subject to the approval of the governing body. The fixing of the salaries should be in the hands of the governing body also. A register of qualified teachers should be established, and provision made for their professional training both in the theory and the practice of education.

Sir J. Gorst's Education Bill (March '95) proposed to create local education authorities which—by clause 12 of the Bill—would be competent to deal with secondary education. The power proposed to be given to these authorities would be only optional. The clause very inadequately represented the recommendations of the Commissioners, and received comparatively little attention. See SESSION, sect. 44, ed. '97. Early in '97 the Duke of Devonshire promised a measure on secondary education, mainly on the lines of the report of the Royal Commission on Education; but the Government did not find time to bring in the measure. In Aug. '98 the Duke of Devonshire brought in a Bill relating to Secondary Education and a Bill relating to the Registration of Teachers. The Bills were read a first time, but were not proceeded with. The Board of Education Act, '99, to come into force April 1st, 1900, will affect secondary education by the power it gives the Board to frame a register of teachers and to inspect any secondary school that desires inspection.

The Committee of Council in '98 issued a **Return of Pupils in English Secondary and other Schools** (not being Public Elementary or Technical Schools), the statistics being obtained in reply to circulars sent to as many of such schools as could be discovered. This was the first attempt to obtain such statistics, which are necessarily imperfect owing to the difficulty of defining the term "secondary school." Some of the schools from which the return was received are practically private elementary schools. The schools are arranged under five categories—Private Enterprise, Subscribers' (including schools supported by religious communities and City companies, which are not carried on for profit

and have no fixed endowment), Companies' (carried on for profit), Endowed, and under Local Authority. The statistics are based on returns from 1958 boys' schools, 3173 girls', 1078 mixed. Mixed schools are those in which the boys and girls are within the same upper and lower age limits; they are not always places of co-education, the boys and girls in many of them being taught separately. In 16 schools entered as Boys' Schools there are a very few girls (the proprietors' daughters, etc.). In some entered as Girls' Schools, there are boys receiving a preparatory education and leaving at a much earlier age than the girls. There were 122,313 boys in Boys' Schools, 21,252 in Mixed Schools, and 14,937 in Girls' Schools: total, 158,502 boys. There were 114,239 girls in Girls' Schools, 18,740 in Mixed Schools, and 63 in Boys' Schools. Of the boys there were 64,339, or 40·6 per cent., under 12; 79,359, or 50 per cent., between 12 and 16; and 14,804, or 9·3 per cent., over 16. Of the girls, there were 63,866, or 45·7 per cent., under 12; 57,040, or 42·9 per cent., between 12 and 16; and 15,136, or 11·3 per cent., over 16. The pupils were thus distributed among the five classes of schools:—**Private Enterprise:** Boys' Schools 1311, or 66·9 per cent. of Private Enterprise Schools, with 46,617 or 38·1 per cent. boys; Girls' Schools 2886, or 91 per cent., with 80,286 or 70·3 per cent. girls; Mixed Schools 970, or 90·1 per cent., with 26,027 or 65·3 per cent. pupils. **Subscribers':** Boys' Schools 70, or 3·6 per cent. of Subscribers' Schools, with 8719 or 7·1 per cent. boys; Girls' Schools 99, or 3·1 per cent., with 6321 girls; Mixed Schools 28, or 2·6 per cent., with 3626 or 9 per cent. pupils. **Companies':** Boys' Schools 48, or 2·5 per cent. of Companies' Schools, with 5188 or 4·2 per cent. boys; Girls' Schools 99, or 3·1 per cent., with 13,238 or 11·6 per cent. girls; Mixed Schools 3, or ·3 per cent., with 308 or ·7 per cent. pupils. **Endowed, etc.:** Boys' Schools 502, or 25·6 per cent. of Endowed Schools, with 59,517 or 48·6 per cent. boys; Girls' Schools 86, or 2·7 per cent., with 14,119 or 12·3 per cent. girls; Mixed Schools 31, or 2·7 per cent., with 3035 or 7·5 per cent. pupils. **Local Authority:** Boys' Schools 27, or 1·4 per cent. of Local Authority Schools, with 2272 or 1·8 per cent. boys; Girls' Schools 3, or ·1 per cent., with 275 or ·2 per cent. girls; Mixed Schools 46, or 4·1 per cent., with 6996 or 17·4 per cent. pupils. It is interesting to note the difference between the five classes as to the leaving age. Of **Private Enterprise Schools** only 13·4 per cent. have pupils over 18 in their boys' schools, 20·3 per cent. in their girls' schools, and merely 3·2 per cent. in their mixed schools. The corresponding figures for the other classes are: **Subscribers':** Boys' Schools 42·8 per cent, Girls' Schools 48·5 per cent., Mixed Schools 3·7 per cent. **Companies':** Boys' Schools 66·2 per cent., Girls' Schools 76·7 per cent., Mixed Schools 33·3 per cent. **Endowed, etc.:** Boys' Schools 39 per cent., Girls' Schools 51·2 per cent., Mixed Schools 16·1 per cent. **Local Authority:** Boys' Schools 25·9 per cent., Girls' Schools 66·7 per cent., Mixed Schools 21·7 per cent. More than half of the total number of schools have less than 31 scholars, and about one-quarter have between 31 and 50 scholars; 151 have between 200 and 500, and 22 have over 500. Most of the Private Enterprise Schools have less than 50, only 7 have over 200, and none of them have over 500. Of the 22 schools with more than

500 pupils, 15 belong to the Endowed category. The percentage of boarders in all the schools is: Boys' Schools 35·7, Girls' Schools 18, Mixed Schools 13 of boys and 9 of girls, most of the boarders being in the Private Enterprise and Endowed Schools. There are no day pupils in 224 Boys' Schools, 101 Girls' Schools, and 18 Mixed Schools. Important items in the Return are those referring to the teaching staff. Omitting the visiting staff, and reckoning only the exclusively attached staff, in Boys' Schools 55·9 per cent. of the men and 11·3 per cent. of the women are graduates; in Girls' Schools 29·2 per cent. of the men and 12·7 per cent. of the women; and in Mixed Schools 25·8 per cent. of the men and 7·8 per cent. of the women. There are 626 (or 32 per cent.) Boys' Schools, 2324 (73·8 per cent.) Girls' Schools, and 876 (81·3 per cent.) Mixed Schools without any graduates at all on the exclusively attached staff. The total number of graduates on the attached staff of the schools included in the Return is 4405 men, 1801 women; of non-graduates 3957 men and 13,179 women. The percentage of graduates on the visiting staff is very much less. The Blue Book contains tables giving details for every administrative county and county borough, but not mentioning the names of the schools. Monmouthshire, being under the Welsh Intermediate Education Act, 1889, is not included in the Return.

IV. TECHNICAL EDUCATION, ETC.

1. Technical Education.—The Technical Instruction Act of '89 defines technical education to mean instruction in—(1) the principles of science and art applicable to industries; (2) the application of special branches of science and art to specific industries or employment; (3) any other form of instruction (including modern languages and commercial subjects) which may be approved by the Science and Art Department, and are stated by the local authority to be required by the "circumstances of the district." The question passed into the practical stage in the year '90, when Mr. Goschen, the then Chancellor of the Exchequer, set apart the proceeds, with a small reduction, of a new tax on spirits, the *Local Taxation (Customs and Excise Duties) Act, '90*, for the benefit of county councils, giving them express permission to use the whole or any part of the sum for the purposes of technical education. Various local authorities also supplement the money thus obtained by grants out of the rates under the provisions of the *Technical Instruction Act, '89*. The National Association for the Promotion of Technical and Secondary Education (Office, 14, Dean's Yard, Westminster) has published numerous valuable pamphlets, and is prepared to advise any local authorities who may apply to it as to the best means of utilising the funds at their disposal.

In the country generally the working of the *Technical Instruction Act* and of the *Local Taxation Act* is entrusted to the county councils, town councils, or urban sanitary authorities. A rate may be levied by either of these authorities under the former Act, but it must not exceed a penny in the pound. Every county council in the country has devoted the proceeds of the *Local Taxation Act*, either wholly or in part, to the purposes of technical instruction; and nearly all the county boroughs have done the same. Exclusive of London, there has been throughout the country,

since '89, a capital expenditure of several millions upon Technical Schools; while many schools and classes are conducted in rented premises, and a number of secondary schools have been utilised as technical institutes during the evening. The progress made in London owes its impulse to the establishment of the *Artisans' Institute* in '74, under the influence of the late Mr. Samuel Morley, M.P., Lord Lyttelton, Rev. H. Solly, and others. In '78 many of its teachers were taken over by the City and Guilds of London Institute. To the patronage of the Livery Companies of London much of the subsequent progress of the movement may fairly be attributed. There are now many Polytechnics in London, all of them doing efficient work as technical institutes. The *London County Council* has delegated its powers in this respect to a Technical Education Board, consisting of 20 representatives of the Council, 5 of the London School Board, 3 of the City and Guilds Institute, 2 of the City Parochial Charities, and 1 each of the Head Masters' Association, the National Union of Teachers, and the London Trades Council. Very much has been done by means of scholarships to enable the children of poor parents to fit themselves for appropriate technical training. The *Board of Education*, which comes into existence in April 1900, will take practical cognisance of technical education, and is expected to have a department for technical as distinguished from both elementary and secondary education.

In Scotland a large proportion of the available residue under the *Local Taxation Act* accruing to Scotland has been devoted to technical education purposes. In applying the fund the local authorities are fortunate in not being limited to the machinery of the *Technical Schools (Scotland) Act, '87*. The passing of the *Technical Instruction Amendment (Scotland) Act, '92*, has simplified the procedure greatly in this country.

In Ireland, as the residue under the *Local Taxation Act* is not available for technical education, the Science and Art Department continued and augmented in that country the grants in aid of such instruction which they had suspended in England and Wales.

2. Commercial Education.—The *Oxford and Cambridge Schools Examination Board*, after conferring with representatives of the Chambers of Commerce, have adopted a scheme under which certificates are granted for proficiency in commercial knowledge preparatory to entering upon a mercantile career. A scheme for junior and higher commercial education has been drafted by the committee of the London Chamber. All information in connection with future examinations, past papers, etc., can now be obtained at the offices of the London Chamber of Commerce, Botolph House, Eastcheap, E.C. At King's College, the City of London School, the Central Foundation Schools (under the control of the Charity Commissioners), the Y.M.C.A. (Aldersgate Street branch), and the Polytechnic Y.M.C.I., among other institutions in London, special provision has been made for a course of education in accordance with the scheme of the London Chamber.

3. Higher Grade Schools.—These schools, springing from a demand for secondary education from the lower social strata, began to be established by school boards in '80, and in '97 there were 60 in existence, 55 of

them being under the control of school boards. In most of them the lower classes are taught as an elementary school, and their higher classes as organised science classes under the Science and Art Department. The scholars get an education extending for at least three years beyond Standard VI., under trained and picked teachers, and without a break in the continuity of study or of social surroundings.

4. Evening Continuation Schools.—

The great municipalities of Birmingham, Leeds, Liverpool, Manchester, and Sheffield, through the instrumentality of their school boards, have set themselves resolutely to work to foster the desire and to provide the means for the continuation and perfection of the instruction in the day-schools. Regulations were submitted to Parliament in '93 establishing a Code of Regulations for Evening Continuation Schools. It provides liberally for the establishment of such schools, and abolishes many of the restrictions of former codes, which militated so largely against the spread of evening schools. In '98 there were 5535 evening continuation schools under inspection, with 435,600 scholars, earning grants to the amount of £188,763. The instruction given in these schools is, like that given in the higher-grade schools, largely secondary in its character. For Board of Education Act, '99, see SESSION, sect. 41.

EGYPT.

A state, nominally dependent on Turkey, under the rule of Abbas Pasha, the seventh of the dynasty founded by Mehemet Ali, his great-grandfather. Abbas is the eldest son of the late Tewfik Pasha. The first four rulers bore the title of Vali or Viceroy, but in '66 Ismail, then ruler, received from the Sultan the title of Khedive or king, and the succession was made direct from father to son, instead of descending, in accordance with the original treaty, to the eldest male of the family of Mehemet Ali. From '79 to '83 the country was under the dual control of France and England, but in the latter year England intervened after Arabi Pasha's rebellion, and since then has practically governed the country. Lord Cromer is H.M. Agent at Cairo. There are, however, provincial boards for local affairs, and a General Assembly and Legislative Council for national affairs, but with limited powers. The General Assembly consists of the Ministry, the Legislative Council, and 46 other elected members, and must be summoned every two years. The Legislative Council consists of 30 members, of whom 14 are nominated, and its powers are chiefly consultative. The judicial system is somewhat complex. The Consular Courts try cases of crime brought against foreigners; the Native Courts, instituted '84-9, are occupied with civil actions between natives, and crimes by natives; and there are also courts of religious law for Mahomedans. The Mixed Tribunal was instituted in '75 as a substitute for the Capitulations, under which each country transacted its legal business in its own Consulate. They deal with civil actions between persons of different nationalities, or between natives and foreigners, and to some extent with criminal offences of foreigners. They were set up for a period of five years, and ever since have been renewed periodically for periods of five years. The Powers agreed to the prolongation of the Tribunals for one year from Feb. 1st, '99, pending the discussion by an

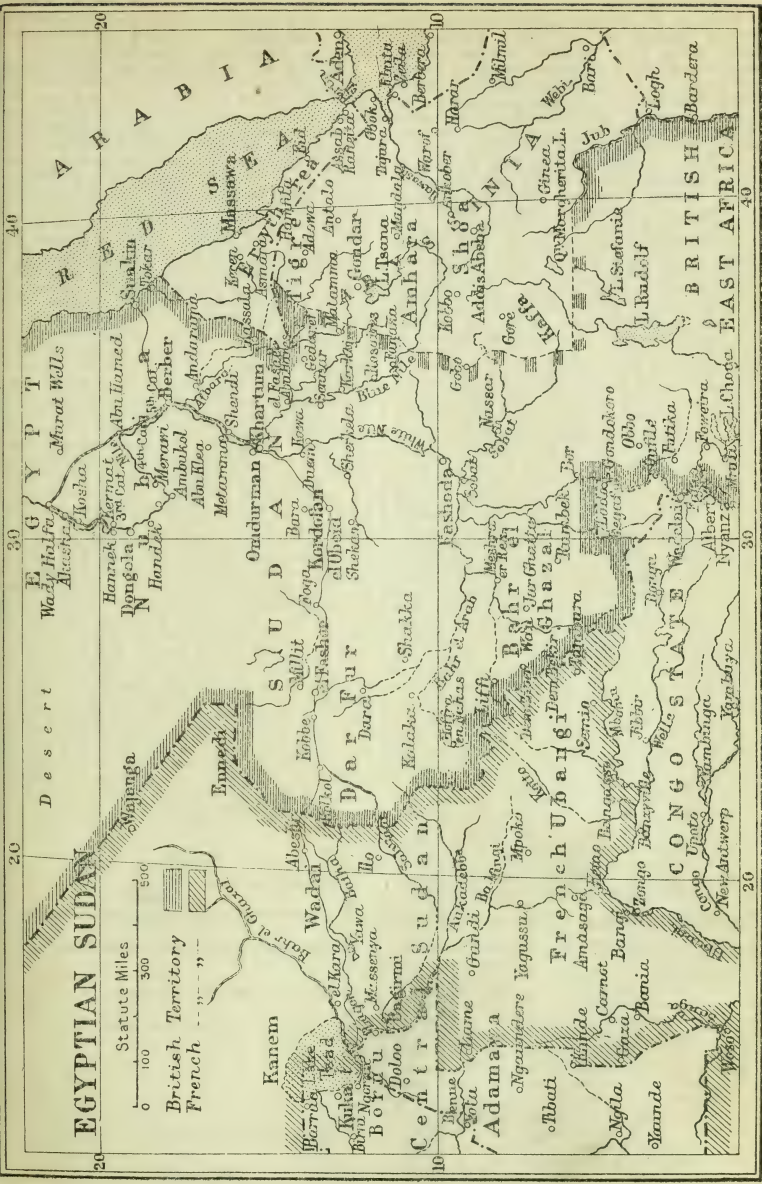

International Commission of various reforms suggested by the Egyptian Government. One of the Government's main points is that the powers of the Mixed Tribunals should be limited so far as the Government's acts are concerned. The chief religion is that of Islam, but there are also many Christians, including the Copts with the Patriarch of Alexandria at their head. There are many Government Coptic and Mahomedan schools. The army contains about 18,000 men. There is also a British force of about 5500 men at Cairo. By the '96, '97 and '98 campaigns the Government has re-established its authority over the provinces in the Soudan, temporarily abandoned in '82 and '83. (See map on p. 217; and History below for the provisions made during '99 as to the administration of the reconquered territory.) Principal products, cotton, sugar, and cereals. Area of Egypt (excluding the provinces reconquered in the Soudan), 394,240 square miles, of which about 12,976 sq. m. are settled. Pop. about 9,750,000. The Soudan territory has an estimated area of between 900,000 and 1,000,000 square miles. The population is not known. Revenue, '98, £11,631,677; expenditure, £10,375,397; exports, '98, £12,100,308; imports, £11,309,049; public debt, '98, £93,851,200. See DIPLOMATIC, SOUDAN, and SESSION, sect. 9.

History, '99.—The '99 Budget estimated the receipts at £10,865,000 and the expenditure at £10,824,000 (Nov. 26th, '98). The cost of the civil administration of the Soudan provinces south of Wady Halfa was estimated at £164,000, including the working expenses of the railway, against £E41,000 revenue. Following on the initiative of Lord Kitchener in establishing an English school at Khartoum under the title of the Gordon College (*q.v.*), it was (Dec. 4th, '98) announced that a group of Frenchmen had undertaken to provide donations to found an Ecole de France at Khartoum, and an Ecole Marchand at Fashoda later on. Major Marchand evacuated Fashoda and started on his journey to the Red Sea coast (10th). Ahmed Fedil, with a force of the Mahdi's followers, was attacked at Roseires, a point on the Nile 426 miles south of Khartoum, by a British force under Colonel Lewis. Over 500 Dervishes were killed and more than 1500 taken prisoners (26th). Lord Cromer and Lord Kitchener received a large number of Soudanese sheiks at Lord Kitchener's house at Omdurman (Jan. 4th), and Lord Cromer told them that the Sirdar would be the sole representative of the British and Egyptian Governments, and they must look to him for justice and good government. His lordship laid the foundation stone of the Gordon College at Khartoum (5th), and said the College would aim at diffusing knowledge of agriculture, engineering, etc. The instruction would be undenominational, and as far as possible in Arabic. The remainder of Ahmed Fedil's force surrendered to the gunboat *Melenmeh* on the Blue Nile (18th), Ahmed Fedil himself escaping to the south. A convention settling the details for the administration of the Soudan was signed by Lord Cromer and the Egyptian Minister for Foreign Affairs (19th). It was agreed that the word "Soudan" in the agreement should mean all the territories south of the 22nd parallel of latitude which had never been evacuated by the Egyptian troops since 1882, or which, having before the rebellion in the Soudan been administered by the Khedive's Government, had

been temporarily lost to Egypt and reconquered by Her Majesty's Government and the Egyptian Government acting in concert, or which may hereafter be reconquered by the two Governments acting in concert. The supreme military and civil command was vested in a Governor-General appointed by the Khedive with the consent of H.M. Government, and only removable by the Khedive with H.M. Government's consent. Until and save so far as it should be otherwise determined by proclamation, the Soudan, with the exception of Suakin, should be and remain under martial law. The importation and exportation of slaves was absolutely prohibited, and it was agreed that special attention should be paid to the enforcement of the Brussels Act of '90 as to the import, sale and manufacture of firearms, and distilled or spirituous liquors. Import duties on entering the Soudan should not be payable on goods coming from Egyptian territory, but such duties might be levied on goods coming from elsewhere than Egyptian territory, in the case of goods entering the Soudan at Suakin or any other port on the Red Sea littoral, not exceeding the corresponding duties for the time being leviable on goods entering Egypt from abroad. A Khedivial decree appointing Lord Kitchener Governor-General was published (21st), and the Soudan was divided into four first-class districts—viz., Omdurman, extending to Abu Harraz on the Blue Nile and Abu Hasa on the White Nile, Sennar, Kassala, and Fashoda; and three second-class districts—viz., Assouan, Wady Halfa, and Suakin. The Duke of Connaught visited Egypt, and laid the foundation stone of the reservoir dam at Assouan (Feb. 12th), afterwards visiting Omdurman and Khartoum (19th). A son and heir to the Khedive was born (20th). An agreement was concluded between Great Britain and France (March 21st), by which the Bahr-el-Ghazal and Darfur were recognised as being reserved to Great Britain, France keeping Wadai, Bagirmi, and Kanem; while from the Nile to Lake Chad, and between the 5th and 15th parallels of latitude, the two Powers mutually conceded equality of commercial treatment, France thus obtaining the right to establish commercial relations on the Nile and its affluents. Sir W. E. Garstin, Under-Secretary for Public Works, returned from a visit to the Soudan, in the course of which he visited the Blue and White Niles. His opinion was that the country had been so long misgoverned and depopulated that for a long time it would constitute a heavy annual drain on the Treasury. The climate of the southern provinces was unhealthy in the extreme, because of malarial fever. He concluded as follows:—"There is reason to hope that, in the course of time, these provinces may be able to pay for the expense of their administration, and even that they may one day repay Egypt the money she has advanced by materially assisting in the expansion of her commerce and her trade. For the present, the crying want is population; to remedy this want the country must be insured peace and quiet, just government, easy taxation, and simple sanitary measures, which will tend to reduce mortality. The process of restoration will take many years, more especially in the southern provinces. During this time the climate will, it is to be feared, levy a heavy toll in the shape of valuable lives. If, however, in a generation, or even two, the water supply of

Egypt can be permanently increased by the removal of the sudd and by the control of the waters of the Upper Nile; if, moreover, the fertile tracts adjoining the Blue Nile can be turned into a large wheat-producing area; these two results alone will fully warrant the expenditure incurred in money and in life, and neither England nor Egypt will have cause to regret the reconquest of the Soudan." The movements of the Khalifa were closely watched during the year, and in the middle of May he was said to be in South Kordofan, not far from Lake Shirkeleh, and about 170 miles from a British post at Duem. Suakin was by agreement brought within the general régime for administration of the Soudan (July 10th). The Sirdar declared the Atbara Bridge open (Aug. 26th), and said that only 75 miles of the railway had to be completed to reach Khartoum. The contract for the bridge was given to an American firm, who offered to deliver the material in 42 days at a cost of £6500, whereas the best English offer was for delivery in 6½ months at a cost of £10,490. An expedition under the Sirdar found the Khalifa at Jebel Gedir, with only 5000 followers, but he incontinently fled, and it was decided not to pursue him. The expedition, therefore, returned to Omdurman (Oct. 25th). Lord Kitchener declared that early in December '99 he would open the Soudan to all comers, and that the railway by that time would have reached Khartoum. The Khedive signed a decree, approved by the Powers, allowing a majority of the members of the Caisse to grant any sum to the Government from the reserve fund, and abrogating the necessity of unanimity, except in the case of extraordinary war credits or expeditions (Nov. 14th). In consequence of a report that the Khalifa had advanced down the White Nile as far as Abbah Island, 150 miles south of Khartoum, Lord Kitchener left Cairo for Khartoum (14th). See SESSION, sect. 14.

Egypt Exploration Fund, The. Founded 1883, for the purpose of historical investigation in Egypt. The work is conducted on the principle of careful examination of all details, and preservation of the objects found in the course of the excavations. The minor antiquities afford valuable evidence as to the history of civilisation by illustrating the influences of Egypt, Assyria, Asia Minor, Syria, Greece, and the peoples of the Mediterranean coasts and islands on one another. After the claims of the National Museum of Egypt have been satisfied, the portable antiquities found are divided between the British Museum and various public collections in Great Britain, America, and the Colonies. The distribution depends mainly on the amount of support contributed by the several districts represented by the museums. Annual illustrated volumes are published, giving the results of each season's work. During the season of '98-9 four parties were at work in Egypt. Prof. W. M. Flinders Petrie excavated the cemetery of Diospolis, where he discovered a long series of prehistoric pottery and other antiquities, of great value for dating the objects found with them. Mr. Carter continued the task of protecting the already excavated temple of Deir el Bahari, and of copying the sculptures there. Messrs. B. P. Grenfell and A. S. Hunt searched for Greek papyri in the Fayoum; and Mr. N. de G. Davies copied the Old-Kingdom tomb of Ptahhotep at Sakkareh. All of these will probably be again

at work in Egypt this coming winter. The XVIIth Memoir of the Egypt Exploration Fund, being Prof. Petrie's account of his excavation of the cemetery of Denderah, is now published. In '97 the Society started a *Græco-Roman Branch*, for the discovery and publication of the remains of classical antiquity and early Christianity in Egypt. During the previous winter, Mr. Grenfell and Mr. Hunt, working on account of the Society, had discovered the largest collection of Greek papyri ever yet found. Among these was the leaf containing the *Logia*, or Sayings of Christ, which was published as a pamphlet. There has since appeared the first volume of the *Oxyrhynchus Papyri*, including a third-century fragment of St. Matthew's Gospel, a poem by Sappho, considerable portions of known and unknown Greek literature, and a long series of official and private documents. A second volume, now ready, contains historical documents of the first century A.D. In addition to its work of exploration, the Society commenced in '90 an *Archæological Survey of Egypt*. The object of this survey is to map, plan, photograph, and copy all the most important sites, sculptures, paintings, and inscriptions in the valley of the Nile between Cairo and Assouan. Up to the present time its work has chiefly been devoted to the celebrated XIth-Dynasty tombs of Beni Hasan and El Bersheh, and the still earlier tombs of Deir-el-Gebrawi and Sheikh Said. Six memoirs—viz., *Beni Hasan I., II., and III., El Bersheh I. and II., and Hieroglyphs*—have been issued to annual subscribers to the Survey from 1890-96; and the next volume will contain photographs, etc., of the tomb of Ptahhotep, from drawings by Mr. Davies. For the last six years the Fund has also published, under the editorship of Mr. F. Ll. Griffith, an annual *Archæological Report on Egypt and Egyptology*, containing not only an account of the progress of Egyptology and reports by the Society's explorers, but also papers by experts on Coptic and Græco-Roman research, and full bibliographies. The Report is illustrated, and contains maps and plans. An *Atlas of Ancient Egypt*, with letterpress, and a sixpenny Guide to the Temple of Deir el Bahari, have also been issued. The Offices of the Fund are at 37, Great Russell Street, W.C. (opposite the British Museum). There is also an office at 59, Temple Street, Boston, Mass., U.S.A., and the Rev. W. C. Winslow is the Vice-President and Hon. Secretary, U.S.A. President, Sir John Evans, K.C.B.; Hon. Secretary, Mr. Jas. S. Cotton.

Egyptian Soudan. See EGYPT and SOUDAN.

Egypt, Khedive of. See ABBAS PASHA.

Eisteddfod. The name of an annual bardic congress in Wales, having for its objects the preservation of the music and the general literature of the Principality, the maintenance of the Welsh language and ancient national customs, and the cultivation of a spirit of patriotism among the people. Its origin is lost in antiquity, but it is certain that three such congresses were held in the reign of Edward III., one of them being under the patronage of Earl Mortimer. For history see ed. '88. A *Gorsedd* (this word means throne, but in an Eisteddfodic sense it signifies the four-and-twenty stones of the Druidic circle, whence a year and a day beforehand the Eisteddfod is proclaimed "in the face of the sun, the eye of light," and where

bardic and musical degrees are conferred), is held at the conclusion of each Eisteddfod, and the place of the next festival is announced.

Election of a Member of Parliament. Under the provisions of the Ballot Act, the returning officer is required, in the case of a county election within two days after the day on which he receives the writ, and in the case of a borough election on the day on which he receives the writ or the following day, to give notice of election. The day of nomination is to be fixed as follows: in the case of an election for a county or district borough, not later than the ninth day after the day on which he receives the writ, with an interval of not less than three clear days between the day on which he gives the notice and the day of nomination; and in the case of an election for any borough other than a district borough, not later than the fourth day after the day on which he receives the writ, with an interval of not less than two clear days between the day on which he gives the notice and the day of nomination. The candidate is nominated in writing, subscribed by two registered electors as proposer and seconder, and by eight other electors, who must also be registered in the same constituency. If at the expiration of one hour after the time appointed for the election not more candidates stand nominated than there are vacancies to be filled up, the returning officer is to forthwith declare the candidate nominated to be elected; but if at the end of one hour more candidates stand nominated than there are seats to be filled up, the returning officer is to adjourn the election and take a poll. The poll is to take place on such day as the returning officer may appoint, not being, in the case of an election for a county or district borough, less than two or more than six clear days, and not being, in the case of an election for a borough other than a district borough, more than three clear days after the day fixed for the nomination. Sundays, Christmas Day, Good Friday, and any day set apart for a public fast or thanksgiving, are not counted. The following calendar, which will probably make the matter quite clear, shows the time for nomination and poll in boroughs and counties, assuming that the writ has been received by the returning officer on the 1st of any given month:—

Day of Month.	County.
1	Receipt of writ.
2	
3	Last possible day for notice of election.
4	
5	First possible day for nomination.
6	
7	
8	First possible day for poll.
9	
10	Last possible day for nomination.
11	
12	
13	
14	
15	
16	
17	Last possible day for poll.
Borough.	
1	Receipt of writ.
2	Last possible day for notice of election.

- 3 First possible day for nomination.
- 4 { Last possible day for nomination.
- 5 { First possible day for poll.
- 6
- 7
- 8
- 9 Last possible day for poll.

In using either table, regard must be had to the intimation given above, that **Sundays, Christmas Day, etc., do not count.** Thus, if an election in a county be fixed for the latest possible day, the poll would, on account of the Sundays, be at least two days later, or on the nineteenth, and in some cases three days later, or on the twentieth day. There is a special allowance of time in the case of the constituency of Orkney and Shetland. Where an equality of votes is found to exist between any candidates at an election for a county or borough, and the addition of a vote would entitle any of such candidates to be declared elected, the returning officer, if a registered elector of such county or borough, may give such additional vote, but shall not in any other case be entitled to vote at an election for which he is returning officer. But the returning officer may, if qualified, decline to give the casting vote; and if he be not qualified, or if he decline to act, the names of the two candidates are endorsed on the writ and a double return made. Neither candidate returned may vote until the right to the seat has been determined. A petition may be presented by a person qualified to vote, a person claiming to have the right to be returned, and by a person alleging himself to have been the candidate; the petition may be presented on various grounds, and it may allege bribery and corruption. Thus, where there has been an equality of votes, and the casting vote has been given by the returning officer, or where a double return has been made, the seat may be claimed on petition. The voting papers would then be scrutinised by the Court, and some deductions would probably be made on the ground of spoiled papers, disqualification of the voter, etc., which would reduce one party's number more than it would the figure of the other. All election petitions are tried by two judges, who determine and report to the Speaker whether the member petitioned against, or what other person, if any, was duly elected, or whether the election was void; and when corrupt practices have been alleged, the judges report also whether any such practices have been committed, and, if so, whether it was with the knowledge or consent of any candidate, and the nature thereof; the names of the persons proved to have been guilty of such corrupt practices; and whether during the election there was an extensive prevalence of corrupt practices. When such a report as the latter is made to the House, it is usual to appoint a **Royal Commission**, on whose report, if it disclose a serious state of things, the writs for a fresh election may be suspended, so that the constituency remains temporarily unrepresented. Any member returned for two or more places in any part of the United Kingdom is to make his selection for which of the places he will serve within one week after it shall appear that there is no question upon the return for that place. See also **COMMONS, HOUSE OF, PARLIAMENT.**

ELECTRICITY, '99.

Reference was made in the '99 edition to the various problems attending the theoretical conceptions of pure electrical science. These continue to occupy earnest study at the hands of investigators like Lord Kelvin, Profs. J. J. Thomson, Lodge, Larmor, and Stokes, a body of men who in this country may certainly be considered the compeers of foreign observers in kindred work. At the Dover meeting of the British Association, Professor Fleming, F.R.S., in a fascinating lecture entitled, "The Centenary of the Electric Current, 1799—1899," remarked that "to devise a theory of the ether, such that from the simplest possible assumptions could be deduced the facts of electricity, magnetism, and optics, might be said to be the aim of physical inquiry at the present time." Electricity has been aptly denominated the "bright child of the nineteenth century" (Sir M. Foster), while, as a mere word in the literature of science, and apart from metaphor, it is writ large in the history of the era. Who can doubt but that the close of the twentieth century will witness the larger growth of the child, with perhaps, the complete understanding of at least two of the centuries' legacies, viz., the Röntgen rays, and space-telegraphy (see separate article on **WIRELESS TELEGRAPHY**), which at present are only followed through their observed effects. An increasing amount of attention was given to phenomena connected with cathode rays, especially in respect of reflection, diffraction, heating effects, and other characteristics. The introduction of the new Wehnelt apparatus, described farther on, has given a great impetus in this department. The applications of the X-rays in surgery are already pretty familiar. In military surgery diagnoses were made during the Soudan campaign, and it is understood that complete provision exists for similar aid in South Africa. Mr. Mackenzie Davidson, M.B., is the author of an apparatus to enable Röntgen ray shadows upon a fluorescent screen to be seen in stereoscopic relief. See *Archives of the Röntgen Rays*; also the following important paper: "On the Luminosity of the Rare Earths when heated *in vacuo* by means of Cathode Rays," by A. Swinton.

The decision of the Post Office to inaugurate a competitive telephone system in London in pursuance of the powers conferred by the Telegraph (Telephonic) Communication Act, '99, is of wide import. State control is further exemplified by the comprehensive schedules of the Electric Lighting (Clauses) Act, '99. The London County Council are considering a municipal telephone system for the Metropolis. The same authority has advanced the question of electric traction to the point that an experimental line of tramways is to be constructed between Westminster Bridge and Lower Tooting, with Professor Kennedy, F.R.S., as engineer. Regarding cost, we are glad to be able to quote Professor Kennedy's opinion that for the underground or conduit system this would be about £15,000 per mile of single line; that of overhead electric traction, about £12,000 per mile—these estimates being inclusive of all reasonable contingencies. The building of light railways, electrically propelled, has, too, come under fruitful discussion. It is to be noted that overhead traction is approved for at least two light railway schemes in suburban London. The system, however, is

dropped in certain others in favour of underground systems, as it is alleged that the Government might otherwise raise considerable objections on account of the probability of electrical disturbances affecting Greenwich Observatory. In connection with this matter of electrical safeguards for Government observatories and laboratories, special attention is here drawn to the fact that the "**Kew clause**," affecting the operations of the London Tramways Company, quoted in the '99 ed., has been superseded by a new clause, the observance of which it rests with the Board of Trade to enforce, upon appeal by the particular Government department interested. Quite a number of metropolitan and urban schemes are involved thereby, but it is hoped that no undue friction will arise in its application. As may be imagined, we have here, though behind the scenes, it is true, a conflict between the necessities of pure electrical science and the commercial demands of private companies or local bodies. On the whole electric traction appears to be making progress, but it would be unwise to indulge in sanguine expectations. Facts and figures are difficult to get at, and the question of municipal ownership in this, as in general lighting and supply, is one that troubles not a few. The question is put forward, whether municipalities can conduct enterprises as economically and efficiently (from a commercial point of view) as can individual traders working on business principles. We are told by Sir J. Wolfe Barry that the Metropolitan and District Railways are experimenting in electrical methods for their traction system, but underground London still remains smoke-laden and foul. Consult the "**Electric Railway Number**" of *Cassier's Magazine*, published in August '99, for many interesting articles, and W. Bond, in *Fortnightly Review*, Oct. '99.

Under the general heading of **Electrical Industries** may be considered a few of the commercial applications of electricity. Electrical haulage systems for dock and other works are receiving attention. A substitute for platinum would be a desideratum, in view of its present high price. Mention has been made by MM. Guillaume and Dumas of an alloy of nickel and steel, which claims to possess the requisite coefficient of expansion. The current progress of **electro-metallurgy** in relation to the industrial arts is very marked. In our workshops it is now applied to galvanising; the removal of mill scale; the manufacture of reflectors, suitable for search lights; in calcium carbide production; for coating iron and steel with brass; for brazing and soldering, and lately in the manufacture of white lead. In such industrial applications as these, electricity has full play, without let or hindrance from the vexatious restrictions so hampering in other enterprises where it is concerned (consult, especially, S. Cowper-Coles's remarks, *Brit. Assoc.*, '99). An electric process for the **removal of wool from sheep**, patented by a Bradford syndicate, seems likely to be extensively adopted on farms and ranches where large numbers of sheep are concerned, as in our colonies and in America. The apparatus consists of a portable hand-worked cautery, electric current being transmitted under cover of the handle of the instrument, and thence through a wire of platinum-iridium alloy. At Messrs. Johnson and Phillips's electrical works,

a model plant for seasoning wood by electricity was shown in operation. According to the *Times* the process comes from France. The timber is immersed in a large tank, in a solution containing 10 per cent. of borax, 5 of rosin, and $\frac{1}{2}$ of carbonate of soda. Suitable arrangements are made for the completion of a circuit, and under the influence of the current the sap is eliminated and the solution takes its place in the pores of the wood, this part of the process requiring some five to eight hours, after which the material is dried. It is stated that some woods, such as the "maritime pine" of the south coast of France, which resist drying, will, after the new treatment, be found useful for practical purposes. Commercial uses for **automobile vehicles** are steadily increasing, and thus advancing the trade. The appearance of a **motor fire engine**, constructed by Messrs. Merryweather & Sons for service in India, is an interesting novelty. A new and valuable, if somewhat over-exploited, electric lamp, the "Nernst," has been invented, and is in extensive demand. The novel feature lies in the use of a rod (the electrolytic conductor) made of highly refractory substances—in this case the rare earths. It is supported between platinum electrodes, and when heated electrically acts as the incandescent light-giving source. The platinum wire is cut out of circuit automatically as soon as the electrolyte conducts. A wide field yet remains for improvements in electric lamps.

It would be impossible here to particularise the home progress in **electric lighting**. In the pages of the technical journals may be found from week to week the doings of the various towns of the United Kingdom in this respect. We repeat, on the authority of the chairman of the Electrical Trades Section of the London Chamber of Commerce, the statement that there is now some £11,000,000 invested in supply companies or in local authorities undertaking the supply. The lighting schemes of the London County Council, it may be mentioned, comprise the early introduction of installations for the Victoria Embankment and Westminster and Waterloo Bridges. Inconvenience to consumers has been met by the adoption of rules and scales of fees with regard to the testing of **electricity meters**. As a whole the electric lighting supply (other than for private use) is making good progress in London. In round numbers it might be safe to say that about 200 miles of streets and roads have received mains. The rules for the **regulation of wiring** were exhaustively discussed at a meeting of the Institution of Electrical Engineers (see *Journal*), when Mr. R. E. Crompton, the well-known engineering authority, initiated and carried the following resolution: "That this meeting is of opinion that the Institution should take such steps as it thinks best to secure uniformity in rules by pressing on supply companies, municipal engineers and fire offices, the advantage of adopting rules to be drawn up by the Institution, based upon the present ones, as a standard, with such modifications only as local conditions may necessitate."

Dr. A. Wehnelt is the inventor of a **contact-breaker or current interrupter**, a most important improvement in connection with induction coils. It can be made to interrupt a current one thousand times per second. The arrange-

ment (described by Swinton at the Physical Society) has wide applications in Röntgen ray work and wireless telegraphy, and is a distinct step towards obtaining, from continuous currents, alternating currents of any desired high frequency. Mr. C. E. S. Phillips read a paper before the British Association which embodied an original observation, subsequently mentioned by Lord Kelvin as a "splendid discovery." The title ran, "On the production, in rarefied gases, of luminous rings in rotation about lines of magnetic force." These rings usually last for many seconds, sometimes for a minute; and they momentarily brighten before disappearing when the electrodes cease to be magnetised. The appearance of the rings is affected by bringing charged bodies up to the outside of the glass bulb used in the experiment (see, in connection, his "Diselectrification produced by Magnetism," *Proc. Roy. Soc.*). The establishment of the scheme for the **National Physical Laboratory** (*q.v.*), the new institution for standardising and verifying instruments, for testing materials, and for research work, carried to a successful issue in the year, marks an era in the progress and development of many departments of applied electrical science.

Electric Lighting Clauses Act, '99. See SESSION, sect. 52.

Elgin, Lord. See under **PEERAGE**.

Ely, Bishop of. See under **PEERAGE**.

Emigrants' Information Office. This office was established by Her Majesty's Government in 1886, for the purpose of supplying intending emigrants with information respecting emigration, chiefly to the British colonies, and is under the direction of the Colonial Office. The classes most required in the colonies are generally farm labourers, and others connected with the land, miners, female domestic servants, farmers with £200 capital, and, to a limited extent, competent mechanics with a little money; but during '99 the demand for labour was small. Hardly any assisted passages are now granted, Western Australia and Queensland giving the most encouragement. The importance of the subject is shown by the fact that the **exodus** from Great Britain has averaged during the last few years nearly 300,000 persons annually (including foreigners), of whom the majority have gone to the United States. There was a decrease in the number of emigrants from British ports in '98, as compared with '97. Printed particulars, which are revised quarterly, are exhibited at every post-office, and at more than 500 public libraries and institutions; and free circulars and penny and other handbooks of all the principal colonies, and some foreign countries, with maps and full details, can be obtained on application by post or personally to the **Chief Clerk**, at 31, Broadway, Westminster, S.W.; the circulars can also be obtained at any of the above libraries and institutions. A professional handbook, price 3d., is issued for barristers, solicitors, medical men, police, etc. A monthly report is also compiled for the *Labour Gazette*, published by the Labour Department of the Board of Trade. See also **SELF-HELP EMIGRATION SOCIETY**.

Emigration. The following statistics were issued during '99 relating to emigration from the United Kingdom during the eight preceding years.

Emigration '91, '92, '93, '94, '95, '96, '97 and '98.

	Total, including Foreigners.	Emigrants of British and Irish Origin only.
No. of emigrants in '98	205,171	140,644
" " '97	213,280	146,460
" " '96	241,952	161,925
" " '95	271,772	185,181
" " '94	226,827	156,030
" " '93	307,633	208,814
" " '92	321,397	210,042
" " '91	334,543	218,507

The decrease in the total emigration, foreigners as well as British and Irish included, for the year ended Dec. 31st, '98, amounts to 8109. The decrease in British and Irish emigrants, for the same year, amounts to 5816.

Employers' Liability. A comprehensive article on this subject appeared in the '96 and '97 eds., giving full details of the law on the subject, of the Act of '80, and of Mr. Asquith's Bill of '93 and the proceedings upon it. In the Session of '97 the **Workmen's Compensation Act** was passed, introducing a new principle and altogether altering the state of affairs. For a summary of this Act, and a discussion of it from the insurance standpoint, see separate article, **WORKMEN'S COMPENSATION ACT**.

ENGINEERING

[Below will be found, arranged in alphabetical order, descriptions of the chief industrial engineering schemes in progress in this country and abroad.]

African Transcontinental Telegraph.

—We have given accounts of the progress of this line in previous editions. On April 21st, '98, a cablegram was received in London stating that through communication had been made between Cape Town and Blantyre (British Central Africa)—an approximate distance of 2000 miles. It was reported in March '99 that Mr. Rhodes, during his visit to Berlin, had come to terms with the German Government for the laying of the line across German East Africa, about 250 miles. The appointment of Col. Frank Rhodes, D.S.O., as managing director of the company was announced in June, by which time the wire had reached Abercorn, whence it was to be pushed on rapidly to Ujiji on Lake Tanganyika. At the moment the management were considering the adoption of an iron telegraph pole made in two sections, and weighing in all 90 lb.; the original poles weighed 180 lb., which was reduced to 121 lb., but the new section pole would save 22 lb. When the Uganda Railway (see **EAST AFRICA PROTECTORATE**) reaches a point sufficiently near Lake Victoria, the material will be sent *via* Mombasa, and construction will go on simultaneously from Uganda and Tanganyika. The Belgian project for a telegraph line from Tanganyika to Stanley Falls (about 600 miles), which was referred to in our last edition, is being carried out. It is part of a great scheme for telegraphic and telephonic communication from Boma, *via* Matadi and Leopoldville, the eastern section being in charge of Mr. Mohun,

an American engineer. A branch line to Rejaf on the Nile has also been sanctioned. A letter dated Abercorn, Sept. 2nd, stated that the wire was only 15 miles from that place, or 29 miles from the south end of Lake Tanganyika. On Nov. 10th, the *Times* (second edition) published the chief provisions of the agreement dated March 15th and Oct. 28th, '99, between the German Government and the African Transcontinental Telegraph Company, by which the latter receives permission to carry through German East Africa the wire to connect Cape Town with Cairo. Among the provisions is the stipulation that the line be completed within five years, and another that a tariff of 10 centimes per word be paid to the German Government, but this may be dropped for a concession of equal value. The agreement was signed after an agreement had been arrived at in reference to a railway to the West Coast (see RHODESIA).

Alexandre III. Bridge, Paris.—This bridge is being constructed across the Seine, specially with a view of its completion in time for the Great Exhibition. The total length will be 180 metres, with a single span of 107½ metres, and a width of 60 metres. At the centre the highest point above water level is 8 metres. It is expected that the work of construction will be finished by the end of '99.

Algeria and Timbuctoo Railway.—An extraordinary railway enterprise, to lay a line of rails from Algeria to the ancient centre Timbuctoo, was made public in the spring of '99. It took the form of an application to the French Treasury for a 4-per-cent. guarantee on a capital of £8,400,000, the object being to open up more rapid communication between northern and north-western French Africa across the Sahara.

Batoum Great Pipe Line.—By the end of '99 or the beginning of 1900, it was expected that the 8-in. pipe line to convey petroleum from Michailovo to Batoum, about 143 miles, would be completed. The oil is brought from the wells in cistern waggons to Michailovo, and discharged into iron troughs leading to two tanks holding 12,000 cubic metres. On the line of route there are three elevating stations, each fitted with pumps of 150 horse-power. The daily duty of the pumps is 90 metric tons of petroleum, or a maximum of 25,000 tons a year. Covered with ballast, the pipe line is fitted with safety valves which automatically isolate short sections in case of need.

Behr Mono-rail Railway.—On Jan. 12th, '99, Mr. F. B. Behr, A.I.C.E., delivered an address on "The proposed lightning express electric mono-rail railway between Liverpool and Manchester, to accomplish the journey in 18 minutes." He propounded a scheme involving a capital of £1,500,000, including construction, cost of land, and all expenses, which would be much reduced if the existing railway companies would allow the erection of the mono-rail on the side widths of their trunk lines. He calculated that his trains would run at the rate of about two miles a minute, and that the traffic between the two great cities would yield ample return. The matter elicited much local interest, and a Committee of Investigation reported favourably upon it. It was reported on Nov. 10th, that a syndicate had been formed, with a capital of £40,000, to obtain parliamentary powers for the construction of the high-speed line between the two cities, and that the Exploration Company of London, who

held the option of acquiring M. Behr's patents, had entered into a preliminary contract with Messrs. Mather & Platt for the power and plant. As we stated in our last edition, Mr. Behr's system was seen at Tervuren Park in connection with the Brussels Exhibition of '97. The carriage was provided with pointed ends to diminish the air resistance, the compartments enclosed in these ends being occupied by the driver and conductor respectively. The vehicle had a sitting capacity for 100 passengers, arranged in four rows, two on each side of the carrying rail. There were two electric motors to each track, making four in all; these were placed in the lower part of the carriage body, below the seats. The bottom of the car extended to within a few inches of the sleepers, and was encased throughout, within this space being a quantity of mechanism including the sets of lateral wheels bearing against the side guiding rails. The two trucks, of four wheels each, running on the main rail, were within the recess formed by the framing of the seats. In running order the carriage weighed about 55 tons. By an arrangement of adjustable louvre plates the inclined faces of the pointed ends could be opened to act as air brakes. A similar railway, that is on the suspension principle over a single rail, has been in use for some years between Listowel and Ballybunion.

Ben Clench Railway.—In the summer of '99 it was announced that arrangements were in progress for the construction of an electric railway to the summit of this, the highest, mountain in the Ochil range, N.B., to be completed for the season of 1900.

Birmingham Water Supply.—At a meeting of the Council on May 16th, '99, the Water Committee, in their report for the year ending March, stated that the amount expended on the Elan valley part of the works during the twelve months was £183,408, bringing up the total to that date of £658,922. The Committee reported satisfactory progress with the works in all parts, the Foel Tunnel in the Elan Valley (7160 ft. long) being cut through on April 7th, and all the contracts being let for the whole line of aqueduct. The areas of land secured were enumerated as follows: freeholds 10,131, common and exclusive rights 22,488, mineral or mining rights 5879, and manorial rights 35,848 acres: total, 73,986 acres. The scheme has been described at some length in our previous editions. It is to bring the waters of the Elan and Claerwen and their tributaries in the counties of Cardigan, Radnor, Brecknock, and Montgomery to Birmingham, a distance of about 80 miles. The cost has been calculated at £6,600,000, and the interest and sinking fund are to be raised by an advance in the water rates of from 15 to 20 per cent., the saving in pumping (the new supply coming by gravitation), and the increased revenue from increased consumption. The lower end of the water-works is at Caban Coch, on the river Elan, some three miles from Rhayader. In this glen a dam, 120 ft. high, will turn some four or five miles of valley into a deep, winding, and timber-fringed lake, of 497 acres surface and 7,540,000,000 gallons capacity; in flood times the flow over the top of the dam will be about 3 ft. deep. About half a mile from Caban Coch is the confluence of the Elan and Claerwen, and the reservoir will extend about a mile up the one and two miles up the other. Higher up the Elan valley is the site of the Pen-y-gareg

dam, forming the lower end of a lake of 424 acres, with storage capacity of 1,320,000,000 gallons, and also that of the Craig-y-Allt-Goch, with an area of 217 acres and a capacity of 2,000,000,000 gallons. The three reservoirs (the lower one including the submerged dam) are estimated to provide in the driest season for 27,000,000 gallons a day for Birmingham, and the necessary compensation water. If more is wanted, it is proposed to erect three reservoirs on the Claerwen, having an aggregate area of 661 acres and a capacity of 6,500,000,000 gallons.

Black Sea and Baltic Ship Canal.—The following contains the leading features of the latest detailed description of the scheme published in this country:—The route proposed is from the Gulf of Riga, along the rivers Duna, Beresina, and Dnieper to Kherson on the Black Sea, the length being 994 miles. The channels of the rivers would be deepened, and new cuttings made where necessary, so as to give a depth of 28 ft. of water, the estimated cost being 20 millions sterling, and the time of construction five years. While the primary object of the canal is to connect the naval dockyards at Libau in the north with those at Nikolaieff in the south, it is thought that the great waterway would be commercially successful, as it would develop a very rich tract of country. There is already communication between the two seas, practicable for rafts and small vessels, by this route, and also to the Black Sea, near Memel, by means of the Dnieper, the Oginsky Canal, and the Niemen. The Duna, which empties into the Gulf of Riga, is generally closed by ice from November to April, and the Dnieper, which discharges through nine months into the Black Sea, is closed from January to March. The upper portion of the latter river passes through marshy forests, and it is here that some of the greatest difficulties in the way of the scheme are expected to arise; while 200 miles from the debouchure are a series of nine rapids, extending over 40 miles, with a total fall of 107 ft. A comprehensive series of articles on Russian Waterways appeared in *Engineering* during the autumn of '99. The *Times* correspondent, writing on Sept. 22nd, '99 (published Sept. 25th), gave currency to a statement of the *Novosti* showing that the Russian Government hoped to make a practical commencement. The most weighty consideration was the finding of means by the Minister of Finance.

Brighton Marine Parade Pier.—This pier runs out from opposite the Aquarium gates, and is a much enlarged successor of the old Chain Pier. It will be 1700 ft. in length, and its total area will be 2½ acres. On May 20th, '99, Mrs. A. J. Hawkes, the Mayoress, screwed the first bolt of the large Moorish Pavilion which is to be at the pier head and accommodate 1200 persons. At the same time the completed portion of the pier—1400 ft. long, and 45 ft. wide—was thrown open to the public. A feature of the whole handsome design is a series of three iron arches in trellis work at eight different points for electric lighting; an electric tramway is to be installed, and the pier head will be used by Continental boats. Mr. John Howard, A.I.C.E., and Mr. St. George Moore, M.Inst. C.E., have the work in hand.

Bristol Port Improvement.—The accounts of the dock estates for the year ending April 30th, '99, proved to be of an encouraging

character, showing an increase of £3642; the tonnage movement of '98-9 was in fact the largest on record. The developments at Avonmouth were continued during the year. In June the Great Western and Midland Railways Joint Committee agreed to erect a temporary shelter pending a decision of the Bristol authorities in regard to dock facilities at Bristol. The new granary at Avonmouth has a storage capacity for 70,000 quarters; the cost of erection was estimated at £65,000. On Sept. 19th the Town Council decided to build a new wharf at the City Docks for Liverpool steamers, and to purchase an acre of land at Avonmouth for sidings. On Oct. 17th the Town Council agreed to enlarge the lock at Portishead to 750 ft. by 80 ft., at a cost of £350,000, with an additional £25,000 to give swinging room for the largest steamer within the dock. At a subsequent meeting of the Council, the chairman of the Dock Committee announced that he withdrew his resolution for a Parliamentary bill for the Portishead Dock scheme, on the ground that a promise that had been received to make Bristol an alternative port in a new mail contract had fallen through. It was further stated that another firm of liners had gone from Avonmouth to Liverpool.

Bruges Ship Canal.—In Aug. '95 the Chamber of Representatives at Brussels voted credits for this enterprise. The canal entrance will be at Heyst, about 14 miles to the north-east of Ostend, and proceed direct to Bruges, about 6 miles, where docks, wharfage, and warehouses will be provided. The canal is to be capable of accommodating large ocean vessels, but a feature of the general plan is the construction of an *avant port* at Heyst, where there is deep water. Here a curved mole or breakwater, with a radius of 4000 to 6000 ft., has been begun, and the harbour will cover an area of 270 acres. The lock for the ship canal, which is approached from the harbour by a channel 26½ ft. deep, is to be 925 ft. long and 65½ ft. wide, while the canal itself will be 6 miles long, 72½ ft. wide at bottom, and 229 ft. at water line, the depth being 26½ ft. Only one swing bridge will cross the canal, and there will be a floating ferry for cart traffic. The contractors are MM. Coiseau & Cousin, the amount being fixed at £1,558,761, and the time for completion seven years, which will expire in 1902. Good progress was made during '99.

Brussels Ship Canal (see previous eds.).

Cairo Electric Tramway.—The Egyptian capital is said to be the first Oriental city in which an electric tramway has been laid down. The system, which was established by the Union Elektricitäts Gesellschaft of Berlin, comprises 10 miles, with a total length of track of 25 kilometers, and was completed in a year. It is on the overhead plan, the gauge being one metre, while the generating station is at the mouth of the Ismaïlia canal. There are separate compartments on the cars for Europeans, natives, and ladies of the harem—the latter being enclosed by window screens.

California (Southern) Transmission Scheme (see last ed.).

Channel Bridge (New Scheme).—At the annual meeting of the Channel Bridge Company held at Paris in April '98, a new scheme was approved. The minutes contained the following statement:—"M. Thévenet le Boul, chief engineer of the Ponts et Chaussées, mem-

ber of the Technical Committee of the company, explained that the new method proposed for crossing the Channel consists in rolling on a bridge, submerged to the depth of 15 mètres below low-water mark, an immense platform emerging above the water. It is to be propelled by electricity, and capable of carrying four railway trains. The rails on the platform join the rails on land at the departure and arrival, so that the trains will simply steam on to the platform, and steam off it when the platform reaches the opposite coast. It is the amplification, on a vast scale, of the little platform which is used to convey foot passengers between St. Malo and St. Servan." It was added that the work could be completed in five years, at an estimated cost not exceeding 350,000,000 fr., and that it had been considered by the Compagnie de Fives-Lille and the Thames Ironworks Co. The platform in question would be 150 mètres long and 15 mètres wide, supported by five iron pillars on each side, which would rest on a submerged platform 30 mètres wide, provided with wheels which would run along the rails fixed on the submerged bridge. Three rolling platforms might be at work during the daytime.

Channel Tunnel and Kentish Coal Working.—At the meeting of the Channel Tunnel Company (Jan. 29th, '99), Baron Emile d'Erlanger, who presided, said the share capital of the company now consisted of 456,757 shares of 4s. each, which completed the revision of their capital account. They held 37,250 shares at £1 each in the Kent Collieries Corporation; he gave an encouraging account of the work of this body at the three shafts near Dover. With regard to mining operations in Kent, it was reported later in the year that another seam of coal had been struck farther inland, and that as regards the coast sinkings a deposit of iron ore had been found.

Chicago Drainage Canal.—Early in '98 it was stated, on the authority of the President of the Chicago Drainage Board, that this canal would be ready, and the water turned on, by the end of '99. Up to that time it was calculated that about 87 per cent. of the great work had been completed, including 97 per cent. of the canal itself. The following interesting comparisons, showing the work and cost of the canal up to the end of '97, were prepared:—

Canals.	Miles.	Years.	Cost.
Chicago ..	40'6	6	£5,057,740
Suez ..	66'0	9	20,000,000
Corinth ..	3'7	12	3,000,000
N. Holland ..	16'0	11	3,200,000
North Sea ..	61'5	8	7,488,000
Manchester ..	35'5	6	15,400,000

A proposed development in connection with the new work was brought forward in the spring of '99. This was the utilisation of the water power available from the canal for an electric lighting station for the city, the supply now being obtained from three municipal steam-power stations. It is estimated that with a flow of 600,000 cubic ft. of water per minute between Lockport and Joliet 60,000 horse-power could be utilised, and that two-thirds of the present cost of power supply would be saved.

Colombo Harbour Works.—This great undertaking, up to the end of '97, had cost 17,875,855 rupees, of which the sum of 5,529,916 rupees had been laid out on the two breakwaters commenced in '94. The completion of the whole scheme is expected by 1902; it com-

prises a graving dock and slip, a coaling dépôt, and three breakwaters, inclosing a harbour of one square mile in area. The sterling debt of the colony on account of the harbour improvements will, it is anticipated, amount to £1,300,000. A report from Colombo (*Times*, June 12th), stated that the operations in the harbour and graving dock were going on in satisfactory fashion.

Congo State Electric Traction.—In the issue of the *Bulletin* of the International Railway Congress for March '99, M. Léon Trouet dealt in an interesting manner with the utilisation of certain tributaries of the Congo for the supply of electric traction instead of steam engines on the Congo Railway. Electrical energy derived from the M'Poso would supply tractive power on the first section of 37 miles, that from the Lufu on the section between 37 and 81 miles, that from the Kwilu on the section between 81 and 124 miles, that from the Inkissi on the double section between 124 and 205 miles, and that from the Lukaya on the section between 205 and 241 miles. The points 81, 162, and 241 miles are at the ends of the sections traversed in one day by goods train.

Damascus-Haifa Railway.—A consular report published in the summer of '99 stated that work had lately been carried on with vigour. The 8 kilometers of line laid down a few years ago were ready for traffic, earthworks and cuttings were in progress, and it was hoped that traffic to the Jordan would be open by the winter of '99-1900. The Thames Ironworks Co. had the task in hand. The Syria Ottoman Railway Co. propose to construct a harbour at Haifa when the line is completed to Damascus. This work, which is in the original concession, is calculated to cost £500,000.

Danube Improvements.—The formal opening of the new passage through the Iron Gates—the most formidable of a series of rocky rapids between Turn Severin and Orsova, took place on Sept. 27th, '96, with imposing ceremonial. The work was commenced by the Hungarian Government (under the Treaty of Berlin) in '90, and we have noted its progress in several editions. A waterway has been opened up in the shape of two canals, one being 1700 mètres long and 150 broad and protected by directing walls; higher up the river is a buoyed channel, under 4 miles in length, leading into the straits of Kasan. The depth throughout is 12 ft. On May 9th, '98, the European Commission of the Danube decided upon a scheme which is of great importance to maritime nations. It was agreed to commence a cutting five miles long, 400 ft. wide, and 20 ft. deep, which, together with former cuttings, will convert the Sulina branch of the river into almost a straight waterway 35 miles in length, extending from the port of Sulina to the Tulcha branch of the main river. The new improvement, it is estimated, will be completed in five years. On May 8th King Charles conferred the Grand Cordon of the Crown of Roumania on Sir Charles Hartley, who has been engineer-in-chief and consulting engineer of the Commission from its creation. In Sept. '99 it was reported that the Black Sea and Danube Steamship Co. had petitioned the Russian Government against the heavy toll demanded from Russian ships, and that a reply had been received stating that the complaint would be considered by the Russian and Austrian Governments.

Davos-Platz (Schatzalp) Funicular Railway.—The completion of this line was announced in Nov. '99. Beginning at the rear of the Kurhaus, it is about 2200 ft. long. It is described as one of the first funicular railways in Switzerland to use electric power, which is generated in the valley by dynamos driven by gas engines.

Dortmund-Ems Canal.—This waterway was formally opened by the German Emperor on Aug. 11th, '99. It passes from the North Sea port of Emden, and whilst using the river Ems for some distance, runs through Münster and terminates for the present at the Westphalian village of Herne. The connection with Dortmund is by a branch 9 miles in length which leaves the main canal at Henrichenburg, where there is an elevator of 49 ft. scope. The length of the canal from Emden to Herne is 150 miles, and vessels of 600 or 700 tons are thus enabled to pass between Dortmund and the North Sea direct, to the great benefit, it is hoped, of the Westphalian iron industries. The total cost, as given in our last edition, was estimated at nearly 3½ millions sterling.

Dover Harbour.—Work on the great National Harbour at Dover was actually commenced at the end of '97 or the beginning of '98 by Messrs. Pearson, the contractors, the cost being about £3,500,000, the whole harbour to be completed by 1908. The plan consists of (1) an extension of the existing Admiralty Pier in an east-south-east direction for a distance of 2000 ft.; (2) the erection of an east arm extending seaward in a south-westerly direction for a length of 3320 ft. from the foot of the headland, at a point situated 200 yards to the eastward of the south-east angle of the convict prison enclosure; (3) the construction of a breakwater 4200 ft. long, which, at a distance of about three-quarters of a mile from the shore, will form on the south the outer sheltering arm of the harbour; and (4) the building of a sea-wall, 3850 ft. in length, extending from the Castle Jetty at the eastern end of East Cliff Terrace to the root of the proposed east arm. The area enclosed will be 610 acres at low water, of which 315 acres will be beyond the 5-fathom line, affording anchorage for twenty battle-ships besides numerous smaller craft. There will be two entrances: one at the extremity of the eastern arm, 600 ft. wide and 42 ft. deep at low water; the other at the end of the Admiralty Pier extension, 800 ft. wide and also 42 ft. deep. In the western corner of the National Harbour is enclosed the **Commercial Harbour**, the memorial stone of which, as stated in our last edition, was laid in July '93. It was originally intended that this harbour should enclose 56 acres, but the area will now be increased to at least 75 acres by carrying the Admiralty Pier extension another 640 ft., and by lengthening the eastern arm. Thus the area of the two harbours taken as a whole will be at least 685 acres; it is not anticipated that the enlarged Commercial Harbour, which is in the hands of Sir John Jackson's firm, will be finished before the end of 1901. The National Harbour works are under the direction of Major Henry Pilkington, C.B., R.E., and of Messrs. Coode, by whom the design was prepared. The first pile of the Admiralty Pier extension was driven on Dec. 21st, '98, and the work generally is making progress, especially at the reclamation wall. In Sept. '99, Messrs. W. Matthews and J. C. Coode contributed a paper,

historical and descriptive, for the meeting of the British Association at Dover. Reference was made in the paper, and in the discussion, to the temporary difficulties of cross-channel traffic during the exceptionally heavy weather in the preceding winter, and in the incomplete condition of the works. Steps had been taken to provide for this state of affairs, and it was hoped that the large number of piles in the temporary staging at the end of the pier would afford some relief.

Egyptian Irrigation.—From Cairo, Feb. 20th, '98, it was announced that the Khedive in Council had approved a contract with Messrs. John Aird & Co. which settles the much debated question of the new Nile Reservoir. The work to be done consists of a dam at Assouan and another at Assiout, to be completed in five years from July 1st, '98, and the contractors agree to accept payment by annual instalments of £160,000, beginning on the completion of the dams and extending over 30 years—about £4,800,000, in deferred payments. The Assouan dam will be built on the granite reefs of the cataract, and consist of granite ashlar; it will be 76 ft. above the river bed, and the head of water being about 46 ft., the Philæ Temple will be safe; the approximate length will be about 6000 ft., and the amount of water to be stored 1,065,000,000, cubic metres. The Assiout dam is intended for raising the level of the river during the summer for the benefit of Middle Egypt and the Fayûm. Both dams will be provided with navigation locks, and the regulation of the supply will be by means of sluices. Sir Benjamin Baker is the chief engineer of the scheme. Operations were begun immediately after the signing of the contract, and according to an official report published in June '99, there were about 14,000 labourers engaged on the undertaking at Assouan and Assiout, the work going on both night and day.

Elbe-Trave and Elbe-Rhine Canals.—These projects are further portions of the great German canalising scheme. The former is expected to be completed in 1900, and has been described in previous editions. At present the river Trave is being dredged to a depth of 28 ft. between Lübeck and the Baltic. As to the latter, the German Emperor on opening the Dortmund-Ems canal (see above) made a strong speech in its favour, but on Aug. 17th, '99, the Lower House of the Prussian Diet threw out the Bill. Shortly stated, the canal was to begin at a junction with the Dortmund-Ems at Beveren, and crossing the Weser near Minden would join the existing canal system at Heinrichsburg on the east, thus providing, with an extension of the Dortmund-Ems to the Rhine, a continuous waterway from this river to Berlin. The engineering features present no great difficulty.

Elgin (Gogra) Bridge.—On Jan. 25th, '99, Sir A. P. MacDonnell opened this structure, which is described as the largest metre-gauge bridge in India. It is 3695 ft. long, there being 17 spans of 200 ft. each, weighing 250 tons apiece. The bridge links up narrow-gauge railway systems, having ramifications for some thousands of miles; it cost £200,000, and is expected to have an annual traffic of over 100,000 tons.

Euphrates Valley Railway.—A marked revival of the idea to connect the Mediterranean with the Persian Gulf by the construction of a

railway took place in '99. In our last edition the project of a Russian, Count Vladimir Kapnist, was described under the heading **Mediterranean-Persian Gulf Railway**, and the subject generally has been dealt with in previous editions. During the year it was announced that Kapnist's proposal had been rejected for two ostensible reasons: viz., because of the heavy terms demanded, and also owing to the objection of the Sultan to the construction of a railway having no connection with existing lines, nor with Constantinople. An **English syndicate** of considerable financial influence then came forward with a scheme to run a line over well-known ground. Beginning at Koniah (the terminus of the Anatolian railway system) and running through Adana to Aleppo, with a branch to Alexandretta on the Mediterranean, the railway would pursue the valley to Hit, cross the Euphrates to Bagdad, and thence through Bussora to a point on the Persian Gulf near Koweit. This project would shorten the journey to India by five or six days, supposing that fast steamers were put on the route from the Persian Gulf to Karachi or Bombay. But suddenly a strong opposition was forthcoming from the **Germans**, who control the Anatolian system including the line to Koniah, and who set up a moral claim for preference in the shape of extensions, although they have not fulfilled their undertaking in regard to carrying their line to Kaisariah. By an agreement the Anatolian Company and the French-owned Smyrna-Kassaba Company became united, and made various overtures to the Porte (see *Times*, Aug. 10th). A Reuter's Constantinople telegram of Sept. 8th stated that Turkish public opinion was strongly in favour of the British syndicate represented by M. Rechnitzer. On Sept. 16th a German expedition left Koniah to survey the route.

Gibraltar Naval Works.—In the House of Commons, on June 13th, '98, Mr. Goschen, First Lord of the Admiralty, in reply to questions, said that the harbour works, as far as the enclosure and defence is concerned, will be practically completed within the period originally contemplated—namely, '99-1900; but the final completion of portions of the upper structures may require some additional time. In the Naval Works Act '95, a provision of £361,000 was made for one dock (or docks), and that dock was to be completed in '99-1900; but in the Act of '96 it was decided to extend the dockyard and to construct three docks at an estimated cost of £2,674,000, in place of one dock. If the date in the schedule was not changed it was by inadvertence. Under the new scheme the three docks will occupy the site of the New Mole Parade and the whole of the site of the present dockyard, which will remain until the new dockyard, now in progress, is sufficiently advanced to allow the existing establishment to be transferred. The date for the completion of the docks could not be given until the works were more advanced. It was not contemplated to place a floating dock at Gibraltar during the completion of the works.—A tunnel under the Rock was completed earlier in the year by the contractors, Messrs. Topham, Jones & Railton, for the purpose of bringing stone from the east side, though it will probably be used for strategic purposes. It is 1100 yards long, 10 ft. wide, and from 8 ft. to 14 ft. in height. At the beginning of '99 the completion and handing

over of the new main sewer was announced. It is 13,300 ft. in length, and varies in size from 6 ft. by 4 ft. 6 in. to 2 ft. 8 in. by 1 ft. 8 in. The work was carried out by Mr. R. Brotherhood, C.E., and makes Gibraltar one of the best drained towns on the Continent.

Glasgow New Bridge.—Opened on May 24th, '99, by Lady Richmond, wife of the Lord Provost; this structure, which spans the Clyde at the foot of Jamaica Street, is 22 ft. wider than Telford's Bridge, being 80 ft. The roadway is 50 ft. wide and the pavements 15 ft. each, the gradients being the same as before. Much of the old material was utilised, but the base, balusters, cope and pediments over the piers are now polished. Messrs. Blyth & Westland of Edinburgh were the engineers, and the contractors Messrs. Morrison & Mason of Glasgow; the work was begun in July '95, and the accepted tender amounted to £81,176, but sundry alterations brought up the cost to about £100,000.

Glasgow Sewage Works.—Lord Provost Sir David Richmond on May 16th, '99, cut the first sod of a further section of the great sewage disposal scheme of this city. The works are intended to complete the scheme of river purification so far as the north side of the city is concerned, and are designed to deal with the drainage of an area of 7570 acres, within whose bounds there is an estimated population of 676,000 persons. Included in the scope of the works begun are upwards of seven miles of the outfall sewer, varying in capacity from 7 ft. in diameter to between 8 ft. and 9 ft., and forming the major portion of the main drains required to collect and deliver the sewage of the northern bank of the river at the precipitation works at Dalmuir.

Greenwich and Millwall Tunnel.—During the session of '97 both Houses of Parliament passed the County Council Bill. The tunnel will begin near Brewhouse Lane, Greenwich, terminating at Millwall, near the western boundary of the Island Gardens, Poplar. The estimated cost, as stated before the Parliamentary Committee, was £70,500, inclusive of lands and property. It was also stated that the roadway of the tunnel would be 3 ft. wide and 9 ft. 4 in. high; the two ends would be approached by circular shafts, the level of the tunnel being 40 ft. deep on one side and 50 ft. on the other. As the dimensions show, the tunnel is only for foot passengers. In Feb. '99, the Bridges Committee recommended the adoption of a tender of £109,500 from Messrs. J. Cochrane & Sons, which was agreed to.

Hastings Harbour.—On June 16th, '97, the Marquis of Duferin and Ava laid the inaugural stone of the new harbour, a work promoted by the Hastings Harbour Commissioners. The area of the harbour in the deep is to be 27 acres, and the two arms will have a total length of 3000 ft. From the first the Commissioners were faced with the difficulty of raising the £200,000 estimated as the cost of the undertaking; but a contract was entered into, although less than £120,000 had been realised. In '98 Sir Douglas Fox reported on the work done, and in regard to the breakwater in particular he recommended the provision of a concrete toe on the sea side and other protective measures. The cost of completion, with the additions he advised, he estimated at £270,000. In the session of '99 the Town Council promoted a bill for authority

to guarantee £3000 a year, in order to enable the Harbour Commissioners to raise a further £100,000 to complete the works. The Bill passed as an unopposed measure.

Irish Channel Tunnel Scheme. (See former eds.). On June 12th, '99, a conference of Members of Parliament in favour of this project was held in one of the Grand Council rooms of the House of Commons. Lord Londonderry, who presided, said "the length of the tunnel by the most favourable route was 25 miles, and the extreme depth of water 85 fathoms." Mr. Arnold Foster, M.P., read letters of general approval from Lord Rosebery, Lord Wolseley, Sir Douglas Fox, Lord Mayo, and Lord C. Beresford. He said the cost was estimated at £10,000,000, with £2,000,000 more for interest during construction. The suggestion was, that when the work was completed, a dividend of 3 per cent. on the subscribed capital should be guaranteed. On the motion of Lord Spencer, it was agreed to ask the First Lord of the Treasury to receive a deputation. An influentially signed memorial having been sent to Mr. Balfour—in which it was stated that, if the suggestion were favourably entertained by the Government, £25,000 would be raised to make soundings and borings—the deputation was received on July 7th. After hearing Lord Londonderry, Mr. Barton, C.E., Sir Douglas Fox, Prof. Hull, and others, Mr. Balfour made a guarded reply, in which, after discussing the engineering and financial sides of the question, he said his colleagues in the Government would give the scheme careful consideration.

Japanese Sea-to-Sea Canal Scheme. (See last ed.)

Jungfrau Railway.—The total length of the line will be 7.7 miles, and the Bill for its construction, as passed by the Federal Council, provided for its completion within six years from '96, but the time limit is likely to be exceeded. Up to the summer of '99 the completed portion was nearly $1\frac{1}{4}$ mile long, attaining an altitude of 2530 metres, 466 metres above the level of the Scheidegg. The gradients are as much as 25 per cent. Briefly, the Jungfrau Railway, which was the scheme of the late M. Guyer-Zeller, runs right up to the Eiger Glacier, penetrates by tunnels into the Eiger, and will proceed round the back of the Eiger to the Mönch and the Jungfrauoch, and finally into the Jungfrau; the last 240 ft. to the top will be by elevator. The motive power is electricity.

Kaiser Wilhelm Canal.—The description and history of this ship canal under the headings "Baltic" or "North Sea" have been given in our previous editions. From the official statistics for the fourth year's working, from April 1st, '98, to March 31st, '99, it appears that both the traffic and the receipts continue to increase. The number of vessels using the canal was 25,816 of 3,117,840 net register tons, against 23,108 vessels and 2,469,795 tons in the previous year. The steamers numbered 11,005 (2,467,839 tons), against 9,396 (1,927,946 tons); and the sailers 14,811 (650,001 tons), against 13,712 (541,849 tons). The number of craft which passed right through the canal and used both terminal locks was 13,758, against 10,849.

Keyham (Devonport) Extension.—Sir John Jackson secured the contract for this dockyard scheme, commenced in '96, which includes a dam a mile and a half in length

and a great development of the dock accommodation. The total cost was estimated at about £2,000,000; but as the work advanced the Lords of the Admiralty found it necessary to increase the sum. It is expected that the extension will be completed in 1903. The first section of the great cofferdam was successfully closed on June 16th, '98, and was found to be practically watertight.

Kushk-Merv Railway.—General Kuropatkin inaugurated the construction of the Kushk-Merv Railway on May 9th, '97. A St. Petersburg telegram of Dec. 24th (N.S.) was to the effect that levelling operations had begun. The line will be known as the Murghab branch of the Trans-Caspian Railway (*q.v.*) with seven stations—Sary-Yasy, Rapterkan, Sultan-Bend, Imam Baba, Tash-Kuppi, Kalo-i-Mor, and Kushk. The cost was estimated at 8,718,981 roubles. The first train from Merv arrived at Kushk on Dec. 16th, '98, the Russian railway system being thus within 95 miles of Herat, and 5 or 6 miles of the nearest Afghan post. The length of the line is given at 220 miles. A St. Petersburg telegram of Jan. 5th, '99, stated that the Ameer has issued a proclamation reassuring his subjects, and stating that the extension was not intended as a menace by Russia.

Lancashire, Derbyshire, and East Coast Railway.—(See last ed.)

Leicester Water Supply (see Midland).

Liverpool Docks Improvement (see Mersey River).—On Oct. 14th, '97, the Works Committee of the Mersey Docks Board submitted a scheme for improvement of the dock accommodation on a very large scale, and during the session of '98 the Board obtained borrowing powers amounting to about five millions. Briefly stated, the scheme includes the construction of five branch docks and three new graving docks, and the enlargement of six of the existing docks, besides the erection of a huge tobacco warehouse at Stanley Dock. In Feb. '99 the Board adopted a recommendation of the Works Committee to proceed with the construction of the two remaining graving docks, one of 1000 ft. long at the north end of the estate and the other of 650 ft. at the south end, and to carry on other works, the aggregate cost being £1,000,000 sterling. The New Canada graving dock was opened on May 2nd. It is 92 ft. long, 94 ft. wide at the entrance, and the depth is 13 ft. 3 in. below the old dock sill.

Llanelli New Dock.—The first sod of this undertaking was cut on March 15th, '98. The dock will be 9 acres in area, 1000 ft. long and 400 ft. wide, with a quayside of 1200 ft. There will be a depth of 17 ft. on the sill, and a width of 50 ft. at the gates. The cost is estimated at about £200,000.

London Electric Lines.—The following are summarised accounts of various electric railways, in working order, in course of construction, or otherwise dealt with, in '99.—**Central London.** In '95 this company was floated, with a capital of £2,850,000 in £10 shares, and with £950,000 borrowing powers, interest at 3 per cent. during construction. It will be about 6 miles long, starting at Shepherd's Bush, and proceeding under Uxbridge Road, Oxford Street, Holborn, and Cheapside, to the Bank. A public subway is being constructed at the Bank Station, which will be a point of junction with other electric lines. There will be 13 stations on the route. The Company has

powers to extend the line to Liverpool Street. The railway will consist of two parallel tunnels, and the engineers were Sir B. Baker, Sir J. Fowler, and Mr. J. H. Greathead (since deceased), the last-named having been succeeded by Mr. Basil Mott. On Aug. 2nd, '99, at the half-yearly meeting, the chairman, Sir Henry Oakley, said the expenditure to date was £2,841,985, and that a Parliamentary Bill for an extension of time for construction had been passed. The whole of the permanent way had been laid, and all other works were approaching completion. At the Bank station there would be five lifts, each capable of carrying 100 passengers. He could not fix the exact date for opening the line.—**City and Brixton.** This is a scheme for an electric railway from Brixton to the City, with stations at Brixton Hill, Lorne Road, Kennington Oval, Kennington Cross, Lambeth, St. George's Circus, and King William Street, which the City and South London Company (*q.v.*), who will have connections at the Oval and King William Street, agreed to work in perpetuity; capital £1,200,000. The Bill was passed by the Commons' Committee in March '99. At the half-yearly meeting of the City and South London Co. on Jan. 31st, '99, the chairman stated that, in order to economise the working, a short tunnel was proposed to connect this line with the South London depot at Stockwell, and a Parliamentary bill had been introduced for the purpose.—**City and South London.** Two per cent. per annum on the ordinary stock was declared for the half-year ending Dec. 31st, '98. The half-yearly report to June 30th, '99, recommended a dividend of $2\frac{1}{4}$ per annum on the ordinary stock. The approaching completion of the Moorgate Street extension was notified; that at Clapham it was hoped would be opened early in 1900. An agreement had been come to with the Brighton Company for the construction and working of a subway communication between Denman Street and London Bridge Station. Speaking at a special general meeting on Oct. 31st, Mr. G. Mott, the chairman, said they hoped to open the Moorgate Street extension in December, and the Clapham Common in March next. The Islington extension was proceeding rapidly.—**District Railway.** Mr. Ritchie, President of the Board of Trade, replying to a question in the House of Commons on Oct. 23rd, '99, said the plant had been laid down for the experiment in electrical traction on the Underground Railway, to be tried in November.—**Great Northern and City.** In June '98 the prospectus of this undertaking was published; the scheme has been referred to in previous eds. It was now proposed to construct a line, 3 miles in length, from Finsbury Park to Moorgate Street, with intermediate stations at Drayton Park, Essex Road, and Old Street. The tunnels differ from the usual electric railway tunnel in that they are to be 16 ft. in diameter, large enough to take the heaviest G.N. suburban trains, consisting of 11 vehicles, with seating capacity for 500 persons. The capital consists of £780,000 Four-per-cent. Preferred Ordinary, and a like amount in Five-per-cent. Deferred Ordinary shares; there are also powers for a debenture issue, and dividends during construction and covering the period that the contractors work the line. In Jan. '99 it was stated that Sir Weetman Pearson, of the well-known firm of contractors, was getting the necessary plant on the ground.

Speaking at the half-yearly meeting of the Company on Aug. 1st, Sir Chas. Scotter, who presided, said that the progress of the works was in every way satisfactory. At Essex Road the houses had been pulled down, and the station site fenced off. Sinking operations would be commenced at once. The plant and material barge loading stage at the Regent's Canal was practically completed. The dynamos for the electric lighting instalment were being fitted together.—**Marble Arch and Cricklewood.** This scheme was referred to with approval as furnishing a feeder to the larger line by the chairman of the Central London on Aug. 2nd, '99 (*q.v.*). As it passed the Commons Committee during the session the Bill makes special provision for workmen's trains, but not to the extent demanded by the London County Council.—**Waterloo and Baker Street.** This scheme, referred to in previous editions, was allowed to hang fire till the London and Globe Finance Corporation took it up in '98. It is to run an electric underground line from a point adjoining Baker Street Station on the Metropolitan, with subways connecting both with it and the Marylebone terminus of the Great Central, to Waterloo. There will be intermediate stations at Oxford Circus, Piccadilly Circus, Charing Cross, and the Embankment end of Northumberland Avenue. Work has commenced from a staging in the river near Charing Cross, to which the "spoil" is brought, and it is expected the line will be completed in about three more years. On the line of route connections will be made with the Central London at Oxford Circus, and the District at the Embankment.—**Waterloo and City.** This scheme consists of a railway, beginning at the Waterloo terminus of the London and South-Western Railway, passing under the Thames, coming out close to the northern approach to Blackfriars Bridge, and continuing to the Mansion House, where it will be connected with the Central and South London Railways (*q.v.*). There are no intervening stations, the sole object of the undertaking being to connect Waterloo Station with the City. The length of the line is given at 1 mile 4 furlongs 6·80 chains. The South-Western Company guarantee a 3-per-cent. dividend. The tunnels are of cast iron, 12 ft. in diameter each where the line is straight and on easy curves, and 9 in. wider on sharp curves. At the half-yearly meeting on Aug. 10th, '99, Mr. Wyndham S. Portal said the total expenditure to date amounted to £566,134. The gross receipts were £13,114, and the sum of £8424 was handed over to the South Western against payment of the dividend.—**Westminster, Bank, and Moorgate Street.** On June 15th, '99, it was resolved by the London County Council to request the Highways Committee to investigate and report on the practicability "of constructing a shallow underground electric tramway from Westminster (*via* Parliament Street, Strand, Fleet Street and Cheapside) to the Bank, thence under Moorgate Street to the terminus of the North Metropolitan Tramways Company at Finsbury Pavement, on a similar principle to those laid under Andrássy Strasse, Budapest, and in Boston, U.S.A."

Manchester Ship Canal (see previous eds.).—This great undertaking, the first of its kind completed in this country, is 35½ miles long, average width 172 ft., and at bottom 120 ft. (but much wider between Barton and Manchester), depth 26 ft. There are four

locks between the entrance at Eastham (opposite Garston, on the Mersey estuary) and the city, the total rise of the four steps being about 60 ft. The canal is tidal up to the first (Latchford) locks, a distance of 21 miles; but the entrance itself is through locks, so that the necessary depth of water is always retained in the whole canal. A channel has been dredged in the Mersey estuary to secure the approach to Eastham. The fixed bridges have a minimum height of 75 ft., and there are a number of swing bridges; a fine feature of these works is the Barton swing aqueduct, carrying the waters of the profitable Bridgewater Canal. After passing the last locks, at Mode Wheel, a vast water area comes to view—the Manchester and Salford Docks, including over 104 acres water space and miles of quay frontages. The governing body consists of a board of directors, some of whom are representatives of the Manchester Corporation, who obtained Parliamentary Bills to lend the company £5,000,000 sterling. The works were commenced at Eastham in Nov. '87, and the waterway was opened to public traffic from Eastham to Manchester on Jan. 1st, '94. The Queen declared it open on May 21st. At the meeting on Feb. 16th, '99, Mr. Bythell, the chairman, said the earnings of the past half-year showed an increase of £19,403, as compared with the corresponding six months, and they were able to offer the Corporation £16,270 on account of interest. For the whole year the net revenue was £102,944, against £60,182 for '97. There had been great saving in the working of dock railways, in labour and dredging. Speaking at the half-yearly meeting on Aug. 10th, the chairman said the net revenue for the six months amounted to £55,795, an increase of £13,126, and they had been able to pay £44,742 interest on the first and second debentures, £1000 interest on a new loan on surplus lands, and £10,053 to the Corporation. He spoke in encouraging terms of the prospects of the undertaking. The increase in receipts (approximate) for the nine months ending Sept. 30th was £22,470. A Bill is to be promoted next session for the acquirement of the Manchester Racecourse, about 100 acres, required for railway-sidings, storage, etc. It is estimated that the arbitration price of Duke's Dock, at Liverpool, to be paid for by the Mersey Dock Board, will more than provide for the purchase of the property.

Mediterranean-Persian Gulf Railway. (See Euphrates Valley.)

Mersey Great Bridge.—This is a revival of a scheme described in a previous edition. At a meeting of the Liverpool Chamber of Commerce on April 5th, '98, Mr. John J. Webster, M.Inst.C.E., gave details of the newest development of the proposal, as prepared by himself in conjunction with Mr. J. T. Wood, M.Inst.C.E.,—namely, to carry a roadway bridge, 62 ft. wide, from Liverpool to Birkenhead. It is to start in St. George's Crescent, Liverpool, passing over the site of the buildings between and at the rear of the James Street and Red Cross Street properties, turning to the left along Strand Street, then crossing the Lock Pit between Wapping Basin and Salthouse Dock at an angle, and on to the riverside south of the Manchester Dock, where the east abutment of the proposed bridge would be erected. From this position the bridge would cross the river and be carried to the

corner of Hamilton Square, Birkenhead. The estimated cost of land and bridge was £2,750,000. On being put to the meeting, a vote in favour of the scheme was carried with only two dissentients.

Midland Water Scheme.—One of the features of the Private Bill legislation of '99. A species of water trust was authorised eventually for Derbyshire, Leicestershire, Nottinghamshire, and Sheffield (including Chesterfield with the last named). Leicester began moving in the matter single-handed, but soon found the necessity to call in allies. Important modifications were made in the various schemes put forward, with the above result. The water which is to be utilised for the purposes of the trust is to be obtained from the Derwent and the valley of the Derwent. The water supply which will be controlled by the new trust will be 28,000,000 gallons per day, or 10,220,000,000 gallons per annum.

Mont Blanc Railways.—(See last ed.). The *Engineer* of Nov. 17th, '99, contains a synopsis of a report of a Commission of representative men who visited the district in '97. The report concludes by stating that it forms only a preface of a more definite investigation.

Murman Coast New Harbour.—The *Times* of July 24th, '99, gave an interesting account of the new port of Alexandrovsk, opened by the Grand Duke Vladimir. The half-forgotten Ekaterinskaja Gavan on this coast was chosen as the site because the last warmth of the Gulf Stream prevents severe ice blocks. "The Moscow-Volgoda-Archangel Railway is now an accomplished fact, and the Perm-Viatka-Archangel line is opened as far as Kotlass on the Dwina, whence regular steamship communication can be kept up with Archangel and Alexandrovsk. As this line opens up direct communication between the new Siberian Railway and Archangel its importance can hardly be overrated for the development of Northern Europe and Asia. Some day direct communication between St. Petersburg and the new port will be established."

Naples Improvements.—The development of this port, according to a British consular report published in the spring of '97, is to be undertaken with vigour. Not the least important item in the programme was that the sewage of the city was to be diverted from the harbour. In the spring of '99 the report of a committee appointed by the Municipality as to the water supply of the city was published. The proposal was that the two old water supplies of Bolla and Carmignano should be collected into tanks, carefully filtered and pumped into higher level cisterns, so that they could at any time be used to supplement the Serino supply and flow into the houses by the same pipes. A British consular report gave the estimated cost at £1,000,000. Later in the year it was reported that the sanitary condition of the city had very much improved under new drainage arrangements, and the laying out of new streets in the old quarters.

Niagara Bridge (New).—In the spring of '99 work was commenced on a new bridge across the Upper Niagara to connect Grand Island with the mainland near Buffalo, to be built by the Niagara River Bridge and Tunnel Co., and completed in two years. The structure will be a two-decker, having double tracks for

steam cars on the lower deck. The total length of the bridge will be nearly 4000 ft., and it will rest on piers, the width being about 50 ft. It will be a drawbridge, and the width of the draw in each span will be 200 ft., making a total swing of 400 ft.; the height above the water will be about 35 ft. The cost will be about £400,000, including the approaches.

Niagara Utilisation.—This great work has been described in our previous editions. The total energy of the Falls is calculated at 16,000,000 horse-power, and the work now in hand is the beginning of "perhaps the most stupendous engineering feat ever undertaken." On April 15th, '95, the first large dynamo was run at full speed, 250 revolutions per minute, and proved quite satisfactory. On July 1st the first electric power transmitted for commercial purposes, 4000 horse-power, was sent to an aluminium factory a mile distant. Various other developments were afterwards reported in rapid succession, especially in the direction of electric railroading, the district between the Falls and the city of Buffalo, a distance of 20 miles, being described as alive with intense activity. On Jan. 17th, '96, the Niagara Falls Power Co. accepted a grant proposed by Mayor Jewett for the transmission of electric power for lighting and power purposes to Buffalo. In Feb. '99 it transpired that the total electric power applied for up to date from the Niagara Falls Companies amounted to 54,300 horse-power. According to news to hand in October, the plant at the Falls is to be doubled in capacity. Estimates had been asked for the excavation of a new wheel-pit, on the opposite side of the canal from the present station. This pit is to be 400 ft. long, 20 ft. wide, and 180 ft. deep, cut out of the solid limestone, accommodating ten of the 5000 horse-power units adopted.

Nicaragua Ship Canal.—In our former editions the history of this proposed enterprise, with the various suggestions of length and route, has been traced, but so far the project is still in the nebulous stage. Various rumours and reports were in circulation during '98, chiefly in relation to the action of the United States Government. In July it was reported that Rear-Admiral Walker, President of the existing Nicaragua Canal Commission, had stated before a committee of the United States Senate that his Commission had not concluded its labours, but he estimated that the canal could be constructed for £25,000,000. On Jan. 21st, '99, the United States Senate passed what was known as the Morgan Bill (Maritime Canal Company), which provided for a subscription of the bulk of the capital of 100,000,000 dollars, and involved a modification of the Clayton-Bulwer Treaty. The Interstate and Foreign Commerce Committee of the House of Representatives, however, threw out the Bill. Other proposals and suggestions were discussed and at length a bill was passed, as part of the River and Harbour Bill, authorising the President to make thorough inquiry into the whole question of a canal connecting the Pacific and Atlantic oceans, and £200,000 was voted for the inquiry. The Walker Commission above referred to, consisting of Rear-Admiral J. G. Walker, Gen. Hains, and Prof. Haupt, presented its report in May. The synopsis of the report sets forth that after mature deliberation the commission has adopted and estimated for the route from Brito to Lake Nicaragua, called the Childs

route, and from the lake to Greytown, called the Lull route. This line, leaving Brito, follows the left bank of the Rio Grande to near Bueno Retiro, and crosses the western divide to the valley of the Lajas, which it follows to Lake Nicaragua. Crossing the lake to the head of the San Juan River, it follows the upper river to near Boca San Carlos, thence, in excavation, by the left bank of the river to the San Juanillo and across the low country to Greytown, passing to the northward of Lake Silico. This route requires but a single dam, with regulating works at both ends of the summit level. The surveys have in general revealed better physical conditions than were hitherto supposed to exist. The commission believes that a canal can be built across the isthmus on this route for a sum not exceeding \$118,113,790. Colonel Hains concurs generally with the views of the other members of the commission, but his estimate of the cost is \$134,818,308. The new Commission is composed of the following members:—Rear-Admiral Walker, General Peter C. Hains, Lieut.-Col. Oswald H. Ernst, Alfred Noble, George S. Morison, Prof. William H. Burr, Prof. Emory R. Johnson, Lewis M. Haupt, and Samuel Pasco. The *Times* of Nov. 15th published a telegram (dated Kingston, Jamaica, Nov. 14th) stating that a United States Survey party had called there. The party were about to investigate a route for a canal from Caledonian Bay to San Miguel. The country is unexplored, and the distance across is 37 miles, with good harbours at each end.

Nilgiri Rack Railway.—This, the first rack railway in India, starts from Mettupalaiyam, a station on the Madras Railway, and runs to Ootacamund; it is 28½ miles long, of which 12 miles is a continuous rack on a rise of 1 in 12½, with curves of a minimum radius of about 328 ft.; on the adhesion sections the ruling grade is 1 in 40. In all, the line rises 6148 ft., and reaches an elevation above sea level of 7220 ft. There are a large number of bridges and tunnels *en route*, and nine intermediate stations placed conveniently for the tea plantations.

Ostend Harbour Improvement.—To be completed in four years from the end of '97, at an estimated cost of £500,000. The scheme includes a new outer port, to occupy the position of the present inner port, the military sluice being done away with; and the landing stage of the Dover and Ostend mail steamers to be on its eastern bank. There will be a dry dock, the *bassin de marine* will be enlarged, and there will be a considerable extension of the quays, while there is to be a permanent enlargement of the channel approach. The King of the Belgians laid the first stone on June 19th, '98.

Panama Canal (for previous history see former eds.).—At the annual meeting held at Paris on Dec. 28th, '98, M. Bonnardel presiding, the report was adopted. The document stated that, according to the estimate, about 2,900,000 cubic metres of excavation had been done during the year, and the average number of men employed numbered 3400. The Technical Commission had reported in favour of a canal with four locks on each side, also with a rise of nine metres each, the bed in the highest section of the Canal being at an altitude of 20½ metres. This the Board had adopted, and had forwarded the proposal to the International

Commission as stipulated in the Articles of Association. The Technical Commission reported that the waters of the Chagres River would be utilised in the scheme, and that the problem of cutting through the Culebra might now be regarded as solved. The *Engineer* of March 3rd, '99, gave an interesting summary of various comparative calculations made by the *Scientific American* as to the Nicaragua Canal (*q.v.*) and the Panama enterprise. It stated that two-fifths of the latter work had been completed: "15 out of the total 46 miles are dredged to the original width and to a depth of from 16 ft. to 29½ ft. Work has been opened up for the whole length of the canal. At Panama it would appear that the extent of the difficulties to be met with is known and has been provided for."

Paris Metropolitan Railways.—Early in '98 it was announced that the Government and the Paris Municipal Council had agreed to a normal gauge system to be worked by electricity. The first six lines were sanctioned as follows:—Vincennes to Porte Dauphine; a circular line following the outer boulevards; Porte Maillot to Ménilmontant; Clignancourt to Porte d'Orléans; Boulevard de Strasbourg to Pont d'Austerlitz; and Cours de Vincennes to Place d'Italie. Besides these the Council reserves the right to put into execution three other sections—namely, Place Valhubert to the Quai de Conti, Palais Royal to the Place du Danube, and from Auteuil to the Opéra. The total length of the first six sections, which are chiefly underground, will be 64·679 kilom. All the underground work will be done by the Council, and the Compagnie Générale de Traction, which has secured the concession, will carry out the superstructure, viaducts, and stations. The Council must deliver up to the Company the first three sections within eight years, and the remainder within a period of a further five years; if the additional three lines are authorised they are to be handed over in another period of five years. Certain portions are to be ready for the Exhibition of 1900. The fares will be 25 c. first-class and 15 c. second-class any distance, and the advertisements are to be passed by the Prefect of Police; the names of the stations to be in a distinctive colour. The Chamber passed the Metropolitan Railway Bill on March 7th, and various sections of the work have been in progress since, especially in view of accommodation for the Exhibition of 1900.

Paris Sewage Scheme.—On July 8th, '99, the new sewage works, which had been in operation since '94, were completed. The great collector at Clichy was closed, and the half-million cubic metres of sewage which had been discharged into the Seine daily found an outlet at Achères, Méry, and Gennevilliers, for farming purposes over 3500 hectares of land. The whole enterprise of thus cleansing Paris is said to have extended over 30 years, and to have cost £4,000,000 sterling.

Persian Roads and Railways.—(See former eds.). In regard to the road-making enterprise of a Russian company from Enzeli, on the Caspian, through Resht to Kazvin, whence one branch was to run to Teheran and the other to Hamadan—some details were given by our Consul at Resht in his report published in the autumn of '98. The company began the road from Resht to Kazvin in '95. Later on the concession was extended, so that

now it includes a road from Enzeli to Teheran, with a branch from Kazvin to Hamadan, as well as a narrow-gauge railway on the low lands lying between Enzeli and the foot of the hills—a distance of 40 to 50 miles. In the autumn of '99 it was reported that the road from Enzeli to Teheran had been completed. Various statements in relation to foreign railway schemes in Persia were circulated during the year. In March, attention was called to the fact that Russian railways were rapidly approaching the Persian frontier; the Tiflis-Alexandropol line was nearly completed, and it had been decided to construct a branch from the latter place to Erivan, which is only 209 miles from Tabriz. In April came the statement that the Russian Minister of Finance had authorised a syndicate to construct a line from Alexandropol to Chactan, in Persian territory. The line can be continued later on *via* Tabriz, Teheran, and Ispahan to the Persian Gulf. The construction of the first section from Alexandropol to Djulfa will involve an outlay of £2,000,000. Should the contemplated extension *via* Tabriz be proceeded with, the Russian Government will assist it with a subsidy. The *Daily Chronicle* of May 3rd published a statement from the Persian Minister at Berlin to the effect that the concession just referred to was thirty years old, and had passed through various hands. He also denied a statement, which had caused some sensation, to the effect that a lease of the harbour of Bandar Abbas had been granted to Russia (see *Euphrates Valley Railway*). According to a report from St. Petersburg in November, the superintendent of the State Railway in Persia, who is a Russian, had formed a body of engineers to make surveys in order to carry out the concessions obtained from the Shah some years previously for new railways. At the time the report was circulated, the engineers were at Baku and Tiflis awaiting orders.

Plymouth New Reservoir.—On Sept. 21st, '98, the completion of a large storage reservoir on Dartmoor, in connection with the water supply of Plymouth, was celebrated. It has been made by the construction of a masonry dam across the Meavy, a mile below the head weir, where the river ran through the Burrator Gorge. The dam is 145 ft. high from the foundation and 77 ft. from the river bed; it measures 470 ft. along the parapet or 361 ft. at the water line, and its maximum thickness is 80 ft. A secondary dam is situated near the village of Sheepstor. The length of the reservoir is 1½ miles, by ½ mile at its greatest width, and 77 ft. its greatest depth; when full it will contain 650,000,000 gallons. After being partially filled and emptied several times, in order to clear away any impurities, the filling was completed by the end of Jan. '99. The design was by Mr. E. Sandeman, Corporation engineer, and Mr. James Mansergh, consulting engineer, and it has been carried out by the Corporation, the estimated cost being £150,000.

Port Talbot Railway and Docks.—A railway, 17 miles in length, was opened on Aug. 31st, '97. Before a party of engineers, who visited the works on Sept. 17th, Mr. A. H. Case, C.E., read a descriptive paper. He said the new dock will have a water-level area of 24 acres, in addition to an area of 150 acres of backwater in "The Float." The depth on the sill of the outer gate will be 28 ft. 6 in. at high-water ordinary neap tide, and there will be a

constant depth over the inner sill of the dock of 27 ft. The company's main line of railway taps the Duffryn, Llynfi, and Garw valleys, while two mineral lines tap the Avon and Ogmere valleys respectively. For the half-year ending June 30th, '99, no dividend was recommended, but £5,966 was carried forward. On Sept. 5th, '98, Mrs. Mordey, of Cardiff, opened the new graving dock. It is about 435 ft. long, 110 ft. wide, and of 60 ft. entrance. The engineers were Messrs. P. W. & C. S. Meik, London, and the contractors Messrs. Topham, Jones, & Railton, also of London. The graving dock is the first and only dry dock in the port, and is situated within the floating dock, so that vessels may be docked and undocked irrespective of tides. It is capable of allowing two large vessels side by side into the dock at the same time, and land has been taken so that it may be lengthened to 800 ft.

Rotherhithe-Shadwell Tunnel.—On April 25th, '99, the London County Council decided to adopt a recommendation of the Bridges Commissioners to construct a tunnel under the Thames between Rotherhithe and Shadwell, and to move for a Bill next session. The northern approach to the tunnel, at the point where it is connected with Commercial Road East will be situated about midway in the distance measured in a straight line between the Tower Bridge and the Blackwall Tunnel. The total length of the proposed tunnel and approaches, from Union Road on the south to Commercial Road East on the north will be 6825 ft., or about $1\frac{1}{4}$ mile. The width of the thoroughfares proposed in the Rotherhithe Tunnel are 17 ft. for the carriage-way and 4 ft. 2 in. for each footway. The approximate estimate of the total cost of the scheme is £2,198,250. Of this, £798,250 is for the acquisition of the necessary property, but this sum also includes the cost of acquiring sites for re-housing.

St. Lawrence (Massena) Power Scheme.—In July '97 the prospectus of a company formed to carry out this project was published in this country. The enterprise, briefly described, is to construct a canal $3\frac{1}{2}$ miles long from the St. Lawrence river to a point on the Grass river close to the town of Massena (N.Y. State), which is about 60 miles above Montreal and about 25 miles below Ogdensburg. The canal is to be used for the production of electrical and water power for industrial purposes, the calculation being that 150,000 horse power will be obtained from the works already contracted for, which may be increased to 400,000 or 500,000. The consulting engineers are Messrs. Kincaid, Waller, & Co., of Westminster, and Mr. John Bogart, of New York; the latter was concerned in the Niagara development (q.v.).

St. Lawrence (Soulanges) Navigation.—The Soulanges Canal, the last link of the 14-ft. navigation-way of the St. Lawrence River, was opened on Oct. 11th, '99. It has cost \$5,250,000, and there is now uninterrupted inland navigation at this depth from Quebec to the head of Lake Superior, 1430 miles.

San Bernardino Power Transmission.—This is described as the largest scheme of the kind in the world, and its completion was reported in the spring of '99. It supplies Los Angeles with electricity developed at the head of the Santa Ana, 80 miles away, the wires entering the city through underground

conduits. At the generating station at San Bernardino there is an ample water supply, with an available head of 700 ft. Pelton wheels are used capable of developing 4000 horse-power, and it is proposed to increase this to 6000 horse-power. The electric arrangements comprise three-phase generators and step-up transformers at the generating station. The former generate the current at 750 volts, which is then transformed by the latter to 3300 volts for transmission over the line to Los Angeles. The conductors consist of six No. 1 copper wires, arranged into two three-wire circuits, and supported on poles. At Los Angeles, step-down transformers reduce the potential to 2200 volts, at which the current is distributed to a sub-station in the heart of the city.

Sheffield Ship Canal. This project is to open up an improved waterway from Goole to Sheffield, about 57 miles, and has been described in our earlier editions. The tenth ordinary meeting of the company was held on April 10th, '99, at Sheffield, when dividends of $4\frac{1}{2}$ per cent. per annum on the preference and $\frac{1}{4}$ per cent. on the ordinary shares were declared. Various works were carried on by the Company, and the Aire and Calder Navigation Co., during the year, in view of the completion of the ship canal, which is to effect a junction between the two waterways—the Aire and Calder and the Sheffield Navigation. In October it was stated that the work has not been let to contractors, but is being carried out by the staff of the Aire and Calder Navigation Co., Mr. Beckett acting as resident engineer. The cost is to be defrayed by the two companies jointly. The Act for the construction of this canal was obtained in '91. It is $5\frac{1}{2}$ miles in length. The land through which it passes is level, the difference between the two systems being only $4\frac{1}{2}$ ft., which will be overcome by a single lock. Seven roads have to be crossed, for which swing bridges will be provided. These are preferred in such a flat country to overhead bridges, which involve steeper gradients than the people in the district are accustomed to. The canal will be 75 ft. wide at bottom, and 10 ft. deep. The distance from Sheffield to Goole by the new route will be 38 $\frac{1}{2}$ miles, and to Hull 68 $\frac{1}{2}$ miles.

Simplon Tunnel (see former eds.).—There will be two parallel tunnels, each about 66,000 ft. long, the distance between them being 57 ft., and connections will be made every 670 ft. One tunnel will be completed for railway traffic first; the other, which will be used for ventilation purposes, may be developed afterwards. By this means 1800 cubic ft. of air can be passed into the underground passages every second, bringing the temperature down to 77° Fahr. It was calculated that the Simplon Tunnel can be completed in the course of 5 $\frac{1}{2}$ years, or in three years' less time than the St. Gothard Tunnel, although the latter is some 15,000 ft. shorter than the former, the Mont Cenis Tunnel being again some 6000 ft. shorter than the St. Gothard. The fact that the new tunnel will be at a level lower than the two others is also a point in its favour; and, although the first cost will be heavy, the working expenses are expected to be considerably less. While the altitude above the sea of the Mont Cenis is 4247 ft., and that of the St. Gothard 3789 ft., that of the Simplon is only 2312 ft. One terminus will be at Brieg, in the Rhone Valley, on the same level as the existing sidings

of Brieg station. The Italian end will be at Iselle. On Dec. 21st, '96, the Federal Assembly at Berne and the Senate at Rome approved of the tunnel convention. It was estimated that the total cost will be £2,800,000; £2,000,000 is to be borne by the (Swiss) Jura-Simplon Company; £600,000 by the Swiss Government, raised by contributions from the different cantons; and £200,000 by Italy, divided as follows—Italian Government, £40,000; province of Milan, £80,000; province of Genoa, £20,000; municipality of Genoa, £60,000. Operations were commenced near Iselle on Aug. 15th, '98, and they are now going on from both ends. The contractors are Messrs. Brandt, Brandau & Co., of Hamburg, with whom is associated Col. Locher, of Zurich; the cost, exclusive of land and other items, is given, as above, at about £2,800,000, and the time for completion is fixed at 5½ years. Excellent arrangements have been made for the care of the workmen, and the most modern drilling and other appliances will be used. The *Engineer* of Nov. 10th, '99, stated that the average daily advance of the Simplon Tunnel was about 30 ft.; but the contractors would have to average 42 ft. to 46 ft. per day in order to meet their engagements. About 2600 men were at work, and twelve drills.

South Staffordshire Mines Drainage (see previous eds.).—At the meeting of the Commissioners on July 5th, '99, it was reported that Parliamentary sanction had been obtained to borrow £20,000. The committee appointed to deal with the Tipton district recommended the expenditure of £5000 for gravity works now in progress, and that an experimental electric plant be laid down at a cost of £500. At the meeting of Nov. 1st the chairman, in referring to the Tipton district, said that the New Moat large pumping engine was now only required to work at half-power, and the Old Moat engine had been stopped. Nearly 200 acres of mines had been unwatered, and it was very much hoped that mine-owners would now reopen collieries that had long been waterlogged.

Staines New Reservoirs.—On May 1st, '98, Mr. E. Boulnois, M.P., turned the first sod of this undertaking, which is being carried out by the New River, West Middlesex, and Grand Junction Waterworks Companies jointly. The reservoirs are situated to the east of Staines, are estimated to contain 3,300,000,000 gallons, and are to form a lake 1½ miles long by ½ mile in width at the northern end, and nearly 1 mile at the southern, with embankments from 21 ft. to 35 ft. in height. Messrs. Hunter & Middleton are the engineers, and Messrs. John Aird & Sons the contractors. In view of a visit by the Institution of Civil Engineers, the *Engineer* of June 2nd, '99, published a lengthy illustrated description of the works, in which it was stated that the total contract time was 4½ years. In this connection it was reported in October that the West Middlesex Company had announced to the Richmond Town Council their intention to construct a tunnel 14 ft. in diameter beneath the Thames to convey their new main.

Transandine Railway.—In the '91 edition an account was given of this scheme, which represents the first attempt to construct a line across the South American continent. The eleventh annual meeting of the Buenos Ayres and Valparaíso Transandine Railway Company took place in London on Dec. 16th, '98, Mr. E. M. Underdown, Q.C., presiding. The report

stated that the receipts of the line as so far opened to traffic amounted to £11,882, as against £12,076 in '97; and the expenses to £25,900, as against £25,612 in '97. The chairman said that there remained to be constructed the gap in the line between the Argentine section on the one side and the Chilian railroads on the other. Although the distance was only 27 kilometers, yet the work of tunnelling the Andes was one of importance, and would occasion expense. Under these circumstances it was inevitable that the expenses exceeded the revenue. Negotiations with the Argentine Government as to the sum to be paid under the agreement with the company were proceeding, and the directors were advised that to continue the construction of the railway was impossible till an arrangement was come to.

Transcaspien Railways.—A new line from Krasnovodsk on the eastern shore of the Caspian Sea was opened to commerce in Oct. '96. It is 48 miles long, joins the main line to Samarcand, and superseded the original branch from Uzan-ada. The *Novosti*, according to a telegram of Sept. 28th, '98, announced that certain Russian engineers and a Danish company had proposed a scheme for a railway to Khiva, no guarantee being asked. The starting-point of the new railway is to be at or near Krasnovodsk, whence it will run through the great Ust-Urt desert to the town of New Urgenj, on the Lower Amu Daria. With regard to the numerous railway developments discussed or undertaken during the year in Central Asia, it was announced in October that a leading engineer had been ordered to make a preliminary survey of a line from Orenburg in a south-easterly direction to Tashkend. The length would probably be about 1200 miles.

Tyne New Bridge.—On Sept. 6th, '99, the Newcastle Town Council adopted a recommendation of a special committee for a new high-level bridge to be built by Newcastle and Gateshead at a cost of £560,000. The Gateshead Council remitted the question to a committee of the whole Council. The design is that of Messrs. Sandeman & Moncrieff, of Newcastle, and it is of the cantilever type. Its main feature is that there will be one central span carried on piers situated on either bank of the Tyne, so that in no way will navigation in the river be impeded. This span will be 500 ft. in length, and its underside will be 82 ft. 6 in. above high-water level of ordinary spring tides, which is the same height as the existing high-level bridge of the North-Eastern Railway Company. On either side of this central span will come a span of 190 ft.; then, on the Newcastle side, there are to be two further spans of 167 ft. and 120 ft. respectively, and on the Gateshead side one span of 120 ft. The spans in each case are given from the centres of the piers. The bridge is intended for pedestrians, horse traffic, and tram lines, of which there will be two—probably electrically worked. The roadway will have a clear width of 33 ft.

Vauxhall New Bridge.—In Feb. '98 it was announced that the London County Council had approved of the design of a granite bridge, backed with concrete, submitted by their engineer, Sir Alexander Binnie. The bridge will have five arches, supported by four piers and suitable abutments. The central span will be 149 ft. 9 in., two intermediate spans 144 ft. 6½ in., and the two land spans 130 ft. 6½ in. each in

length. The structure will be 760 ft. in length, and only 28 ft. in height above Trinity high-water mark. The Parliamentary estimate of the cost was £380,000. It is interesting to note that the old bridge, which passed into the hands of the contractors for demolition during the year, cost £300,000, the first stone being laid by Prince Charles of Brunswick in 1813. During '99 considerable public interest was shown in the temporary aerial cableway thrown across the Thames for the removal of the material of the old bridge. Mr. J. M. Henderson, of Aberdeen, put up the structure in six weeks. As finished, the line crossed the river in one span of about 932 ft. between the towers, which were about 80 ft. high, and consisted of two Oregon pine sticks, each 22 in. by 11 in. in cross section, strongly braced together with backstays of steel-wire rope. There were carrying and hauling cables, the dip of the former when not loaded being 35 ft. The maximum load was fixed at four tons. On Aug. 1st, the Bridges Committee of the Council obtained sanction to expend £40,000, beyond the estimate of £74,000, for the acquisition of property.

Vesuvius Railway.—The surveys for the railway up Mount Vesuvius, it was reported in the spring of '99, were being pushed forward under the direction of Mr. Fell, a son of the contractor of the original railway over Mont Cenis.

Zuyder Zee Reclamation.—(See last ed.).

English Church Union (38,500 communicants). Formed in 1859, after the Protestant riots at St. George's-in-the-East, for the purpose of uniting clergy and laity "in defence of the doctrine and discipline of the Church of England, and of the rights and liberties of her faithful children." Viscount Halifax is the President, and the Vice-presidents include many distinguished Churchmen. It comprises 33 bishops, 4367 other clergy, and 34,133 laity. Its main objects are to defend and maintain unimpaired the doctrine, discipline, and ritual the Church of England against Erastianism, Rationalism, and Puritanism, and to repel all attacks on the Church's Marriage Law, and on religious education in Church schools. The Union contends for the recognition of the Church's right to settle disputes concerning Spiritual questions in Courts of her own appointment, and refuses to acknowledge the Judicial Committee of the Privy Council, or any other court or judge appointed by Parliament alone, as possessing any authority in Spiritual matters. It also advocates reforms in various Church matters, especially Convocation, Patronage, and Parish Vestries, and works for the Unity of Christendom, and the furtherance of Home and Foreign Missions. See CHURCH OF ENGLAND. **Organ, The Church Union Gazette.** **Offices,** 35, Wellington St., Strand. **Secretary,** Col. John Brathwaite Hardy, late R.A.

Envoys and Plenipotentiaries. See DIPLOMATIC.

Erythrea. The Italian possessions on the Red Sea were combined under this name by various decrees from '90 to '94. The colony has the control of its own administration and

the management of its own finance, a civil Governor appointed by the King of Italy representing the Imperial Government. The colony extends from Cape Kasar about 670 miles along the coast of the Red Sea to a point on the Strait of Bab-el-Mandeb. The heavy reverses inflicted upon the Italian forces during '96 by Menelik's army led to a decision to limit the Italian possessions to the Mareb and the Belesa, to abandon the province of Tigre, which had been incorporated as a part of the colony, and to give up the idea of a protectorate over Abyssinia. A treaty of peace was concluded in Nov. '96, by which the treaty of Ucciali, making Abyssinia a virtual protectorate, was abrogated, the absolute independence of King Menelik was recognised, and a commission was appointed to fix the frontiers. The area of the colony is about 88,500 sq. m., and the population, which is nomadic, numbers about 450,000. Massowah is the capital of the colony. It was an Egyptian possession till '86, when it was taken by Italy. Kassala, which was taken from the Dervishes in July '94, was held till Dec. '97, and then handed over to Great Britain, and the boundary between Egyptian and Erythrean territory was delimited in Dec. '98. The Governor of the colony is Signor Ferdinando Martini. See EGYPT (map).

Erzerum. An important Turkish town in Armenia. It is about 100 miles south-west of Trebizond, on the great commercial highway leading from that town over the plateau to the Persian frontier, and is a chief halting-place for pilgrim caravans from Teheran to Mecca. The population is variously estimated at from 30,000 to 60,000, and as the administrative capital of a Turkish vilayet, covering 20,000 sq. miles, with a population of 600,000, it attracts a fair amount of trade. It has a Catholic bishop of the Armenian religion. See ARMENIA.

Established Church. See CHURCH OF ENGLAND.

Ethical Societies. Associations for promoting ethical culture. Their principles are: (1) the good life has a claim upon us in virtue of its supreme worth to humanity; (2) it therefore rests for justification on no external authority, and on no system of supernatural rewards and punishments, but on the nature of man as a rational and social being; (3) in practice it is to be realised by accepting and acting in the spirit of such common obligations as are enjoined by the relationships of family and society, in so far as these are a means to a fuller human development. The ethical movement in America was initiated by Dr. Felix Adler of New York, and has spread to Philadelphia, Chicago, and St. Louis; also to Germany, Switzerland, Austria, and Italy. An International Committee exists, which will hold a Congress in London in 1900. The following Societies are established in London: **South Place Ethical Society,** Finsbury, E.C., **Secretary,** Mrs. C. F. Smith, 38, Manor Road, Stamford Hill; **West London Ethical Society,** which meets at Kensington Town Hall, **Lecturer,** Stanton Coit, Ph.D.; **East London Ethical Society,** 78, Libra Road, E., **Secretary,** Miss Vallance; **South London Ethical Society,** Surrey Masonic Hall, S.E., **Hon. Secretary,** Miss Law, 7, Victoria Road, Peckham; **North London Ethical Society,** Leighton Hall, Kentish Town, N.W., **Secretary,** Mr. G. A. Smith, Dartmouth Park Lodge, N.W.; **Battersea Ethical Society,** Central Hall, Lavender Hill, S.W.,

Secretary, Mr. J. Oakesmith, M.A. There are also Societies at Bristol, Bradford, and Belfast. The Belfast Society meets at York Street Lecture Hall, Belfast. The North, South, East, and West London, with the Battersea and Belfast Societies, have federated into a Union of Ethical Societies: **Chairman of Council, Dr. Stanton Coit; Secretary, Miss Vallance, the Deanery, Stratford, E.**

Ethics and Social Philosophy, London School of, was founded in Oct. '97, and aims at supplying students of philosophy in London with some of the teaching which the philosophic faculty of a teaching university might be expected to provide. Courses of lectures are given on weekday afternoons and evenings in Bloomsbury, Kensington, and South London from time to time on psychology, logic, ethics, æsthetic and metaphysic; and single lectures are given at Essex Hall, Essex Street, Strand. Examinations are held at the end of each of the three terms of the session, and prizes are offered for the best essays by students of the School on the subjects of the year. Fees for afternoon courses of ten lectures, 10s. 6d.; evening courses, 5s. **President, Mr. Bernard Bosanquet, LL.D. Vice-Presidents, The Master of Balliol, Sir Frederick Pollock, Bart., Prof. Henry Sidgwick, and Mr. Leslie Stephen. Secretary, Mrs. Gilliland Husband, 8, Marlboro' Road, St. John's Wood, N.W.**

Eton College. Founded 1440. Endowment exceeds £20,000 per annum. **Pupils** consist of **King's scholars** or "**Collegers**" (of whom there are 70, and who enter college between twelve and fourteen years of age), and of **Oppidians**, who enter between ten and fourteen years of age. **Exhibitions and scholarships** to both Universities, ranging from £50 for four years downwards. **Motto, Floreat Etona.** Among its **alumni** occur the names of Horace Walpole; Bolingbroke; Porson; Hallam; Gray, the poet; Shelley; Wellington; Pitt; Canning; Fox; Lord North; Lord Camden; Dean Milman; W. E. Gladstone; Dr. Pusey; Lord Idlesleigh; Sir John Lubbock; Goldwin Smith; Lord Salisbury; Lord Rosebery; Lord Coleridge; Lord Justice Cotton; Justices Chitty, Kekewich, Kennedy; Bishops Chichester, Bath and Wells; Field-Marshal Lord Roberts, V.C.; General Sir Redvers Buller, V.C. **Head Master, Rev. Edmond Warre, D.D.** A mission is supported by past and present Etonians at Hackney Wick. Consult the *College Calendar*.

Evangelical Alliance, The. Founded 1845-6, to enable Evangelical Christians of different denominations, and of all countries, to manifest their true unity in the essential doctrines of the Gospel, for the defence of religious liberty and upholding of the Evangelical faith. **International meetings** of the Alliance have been held in London, Paris, Berlin, Amsterdam, New York, Geneva, Basle, Florence, and Copenhagen, besides **Annual Conferences** in various towns in the United Kingdom, and great national Conferences in other countries where there are branches of the Alliance. A **Week of Universal Prayer** is observed in the early part of January each year throughout the whole world. **President, Lord Polwarth; Treasurer, Donald Matheson, Esq. General Secretary, E. P. Field, Esq. Office, 7, Adam Street, Strand, W.C.**

Evangelical Continental Society.—Was founded in 1845, as a branch of the London

Missionary Society, but has long been a separate organisation. Its object is to aid existing native Evangelical Churches and Missions on the European Continent. Its spheres are in France, Belgium, Italy, Spain, Bohemia, and the city of Vienna; and it is the only Congregational Society at work on the Continent. **Offices: Memorial Hall, Farringdon Street, E.C. Chairman and Treasurer: John C. Bumstead, Esq. Secretary: Rev. George H. Giddins.**

"Evening News." A daily halfpenny paper of Conservative principles. It is an amalgamation (May '89) of the *Evening News* and the *Evening Post*. It gives the latest political, general, and financial intelligence of the hour, and pays special attention to cable-news. Cricket, football, and sporting news are prominent features. During '96 it became the property of a limited company with a capital of £250,000 (Chairman, Mr. Alfred C. Harmsworth). **Offices, 12, Whitefriars Street, E.C.**

Excise. See FINANCE, NATIONAL.

Executors. See WILLS.

Exeter, Bishop of. See under PEERAGE.

Exeter Hall, Strand, London. (Headquarters of the Central Y.M.C.A.) Erected in 1830-31 by Deering, for the holding of religious and philanthropic meetings. Celebrated as the scene of the religious meetings held annually in the month of May. Now the property of the Central Young Men's Christian Association, having been purchased and presented to that body by friends of the Institution at a total cost of £61,000. **General Secretary, John H. Putterill; Financial Secretary, Clarence Hooper.** See YOUNG MEN'S CHRISTIAN ASSOCIATION.

Exports. See BRITISH EMPIRE (table), and TRADE, '99.

Extradition. Extradition is the surrender of a prisoner accused of a crime by the Government in whose territories he has taken refuge to the Government of which he is a subject, so that he may be punished or dealt with according to its laws for an offence committed within its jurisdiction. In the absence of treaty stipulations there is no obligation according to international law for the asylum state to surrender and deliver to the demanding state persons who have committed crimes within the dominion of the latter country; yet, as a matter of courtesy and comity between nations, fugitives from justice have sometimes been surrendered to friendly nations without treaty. The crimes for which extradition may be granted are stated in a schedule to the Extradition Act of '70, and comprise murder, and attempt and conspiracy to murder, manslaughter; counterfeiting or altering money, and uttering; forgery, counterfeiting and altering what is forged or counterfeited or altered; embezzlement and larceny; obtaining money and goods by false pretences; crimes by bankrupts against bankruptcy law; fraud by a bailee, banker, agent, factor, trustee or director, or member or public officer of any company made criminal by any Act for the time being in force; rape; abduction; child stealing; burglary and house breaking; arson; robbery with violence; threats by letter or otherwise with intent to extort; piracy by law of nations; sinking or destroying a vessel at sea or attempting or conspiring to do so; assault on a ship on the high seas with intent to destroy life, or to do grievous bodily harm;

revolt or conspiracy to revolt by two or more persons on board a ship on the high seas against the authority of the master. The Extradition Act of '73 adds to this list the further crimes of kidnapping and false imprisonment; perjury and subornation of perjury; indictable offences not previously named under the Larceny and other Criminal Acts of '61 (24 & 25 Vict. cc. 96-100); and any indictable offence under the laws for the time being in force relating to bankruptcy not included in the before-mentioned schedule of the '70 Act. Under these two statutes treaties have been concluded with most civilised states. In the event of a fugitive criminal escaping from this country evidence is taken on oath before a magistrate to prove the facts alleged. Such testimony is firstly authenticated by the magistrate before whom it was taken, and afterwards by the Home Secretary, the Foreign Secretary, and the diplomatic representative in London of the nation upon which the demand for extradition is to be made. The documents so verified as accurate are sent through the British representative in the state referred to; and if the criminal is arrested therein they are offered in evidence before a court of competent jurisdiction. If this foreign tribunal decides that a *prima-facie* case has been made out against the fugitive,

he is surrendered and brought home to take his trial in England. If the evidence as to identity or other points against him is considered insufficient, the prisoner is remanded to obtain further proof, if this can be given, or he is immediately released. A demand by a foreign state having an extradition treaty with this country for the surrender of a fugitive criminal of that state who is suspected of being in the United Kingdom, is to be made to a Secretary of State by a diplomatic representative of that state. Unless the former thinks the offence is one of a political character, he may inform a police magistrate of this demand, and require his warrant for the apprehension of the criminal. If the criminal is brought before him he is to admit any testimony that tends to show that the offence is political or is not an extradition crime. If the evidence is such as would justify a committal for trial in England, or would show that the prisoner has been convicted, the magistrate is to send him to gaol, and after an interval of fifteen days or if a *habeas corpus* is issued after the decision of the court, the Secretary of State may by warrant deliver him over to the representatives of the foreign country. If, however, the prisoner is not removed within two months he is to be discharged. The '70 Act applies with certain modifications to all British possessions.

F

Fabian Society. Founded in 1883, chiefly among the middle classes, for the purposes of carrying on a Socialist propaganda. According to its manifesto, the Society "aims at the re-organisation of society by the emancipation of land and industrial capital from individual and class ownership and the vesting of them in the community for the general benefit." The parent Society has 861 members, of whom about 150 are lecturers, and lectures are given gratuitously by members in London and all parts of England. Local Fabian societies have been established in the United States, and in a great many towns in the United Kingdom; but most of those in England have since become merged in branches of the Independent Labour Party. There are also University Fabian Societies at Oxford, Cambridge, Glasgow, Edinburgh, and Aberystwith. The Society has published "Fabian Essays in Socialism," which has had a large sale, and "Fabian Tracts," dealing with the theory and the application of Socialism, especially in relation to current national and local politics. The Society has fortnightly lectures in London, followed by discussions, which are usually open to the public. Secretary, E. R. Pease, 276, Strand, W.C.

Factory and Workshop Legislation. The Factory Amendment Act passed into law in the second session of '95 was the last of a long series of measures, many of them of a complex kind, dating from 1802, when Sir Robert Peel the elder carried a Bill for the protection of pauper children in cotton and woollen mills. In '33 Lord Althorp appointed three factory inspectors, and from that year the administration of the law may be said to date. Mr. Asquith's Act greatly

strengthened the protective and sanitary regulations of the statute, reduced overtime for women and abolished it for young persons, brought laundries and dock labour (in respect to accidents) for the first time under the law, besides adding in a variety of ways to the efficiency of the measure. The Act was read a second time unanimously by the House of Commons; it was fully discussed in the Grand Committee on Trade, and it was read a third time in the Commons and passed through all its stages in the Lords (without alteration) after the resignation of the Liberal Government. A full summary of the existing law on the subject appeared in the '96 and '97 eds., the reforms introduced by the '95 Act being indicated in italics. In '99 a report on the work of the Factory Department of the Home Office for the year '98 was issued. The total number of accidents reported to the certifying surgeons in '98 was 19,227, as against 15,985 in '97. The number of minor accidents notified to H.M.'s Inspectors was 38,335 in '98, as against 24,489 in '97. The total, therefore, of all reported accidents was 57,562 in '98 as against 40,474 in '97. The increase, however, was held to be due to better observance of the requirements of the Acts, rather than to an actual increase in the number of casualties. The report referred to the prevention of many more accidents effected by the constant advance in fencing of dangerous machinery and appliances. So far as fatal accidents were concerned the increase was practically limited to adult males. The number of prosecutions instituted in '98 was 3654, an increase upon the number for the previous year, 3518. Of the 3654, 3501 ended in con-

viction, 47 were withdrawn, and 106 were dismissed. The bulk of the cases were prosecutions for employing women and young children at illegal hours. The number of matters referred to the sanitary authorities was 3962, as compared with 5245 in '97. As to poisoning by lead, phosphorus, and arsenic, the returns showed 1278 cases of lead poisoning in '98 as against 1214 in '97, 21 cases of phosphorus poisoning, as against 2 in '97 and 2 in '96. There were 28 cases of anthrax notified, an increase of 5 over the figures of '97. Of lead poisoning cases, earthenware and white lead works accounted for the largest number. The registered factories under inspection number 87,855, and the registered workshops 129,602, employing over 4,500,000 persons, and in these figures a number of places are not included which nevertheless come under the supervision of the Department. The Chief Inspector is Mr. B. A. Whitelegge, Home Office; the Medical Inspector, Mr. T. M. Legge, Home Office; and the Principal Lady Inspector, Miss A. M. Anderson, Home Office.

Factory Bill, '99. See SESSION, sect. 56.

Faeroe Islands ("Sheep Islands"). A group in the North Atlantic, treated as part of Denmark. Capital, *Thorshavn*, on *Stromoe* Island. The islands (22 in number, 17 inhabited) are represented in the legislature of Denmark by a deputy, named by the King. Area, 514 sq. m.; pop. 12,955. See DENMARK.

Fairbairn, Rev. A. M., M.A. (Oxon.), D.D. (Edin. and Yale), LL.D. (Aberdeen), Principal of Mansfield College, Oxford, was b. 1838, near Edinburgh, and was ed. at the universities of Edinburgh and Berlin. Commenced ministry ('60) at Bathgate, Linlithgowshire, removing in '72 to Aberdeen. In '77 he became Principal of Airedale Coll., Bradford. For five years he lectured at his *alma mater*, Edinburgh University, on "The Comparative History of Religions," and in '92-4 was Gifford Lecturer at Aberdeen University. In '83 he was elected Chairman of the Congregational Union of England and Wales. The great work of his life, however, commenced with his removal in '86 to Oxford, and his appointment to the principalship of Mansfield College. He has visited and lectured in America at Yale University, at the University of Chicago (the Haskell lectures on Comparative Religion in India for '98-9), and at Union Seminary, New York. Edited the Hibbert Lectures, '88, of the late Dr. Hatch. He is a frequent contributor to the *Contemporary Review*, and has also written many books, including "Studies in the Philosophy of Religion and History," "Studies in the Life of Christ," "Religion in History and in Modern Life," "Christ in Modern Theology," "Christ in the Centuries," "Catholicism, Roman and Anglican," and "The Person of Christ and the Philosophy of Religion" ('99).

Falkland Islands. A British Crown colony situated in the South Atlantic, about 300 miles east of Magellan's Straits. Capital and port, Stanley, on East Falkland, which island contains 3000 sq. m.; West Falkland has an area of 2300 sq. m., and the lesser islands of the group cover about 1200 sq. m.; pop. 2050. South Georgia, an island 1000 miles E.S.E., has been annexed to the colony. Its area is 1000 sq. m., but it is snow-covered, sterile, and uninhabited. The Falklands consist of low, hilly

grass and moorland. The flora and fauna are Patagonian. Frozen mutton and wool are exported to England. The Governor is assisted by an Executive and a Legislative Council. For statistics see BRITISH EMPIRE (table).

Farrar, Frederick William, D.D., F.R.S., Dean of Canterbury, was b. at Bombay 1831. Ed. at King's College, London, and at Cambridge, where he graduated with first-class classical honours, and became a Fellow of Trinity College. He obtained the Chancellor's prize for English verse and the Hulsean and Le Bas University prizes. He has been Hulsean Lecturer at Cambridge ("The Witness of History to Christ"), and Bampton Lecturer at Oxford ("The History of Interpretation"). Ordained '57. Subsequently assistant master at Harrow, and Head Master of Marlborough School. Chaplain in Ordinary to the Queen, '73; Deputy Clerk of the Closet to the Queen '94; Canon of Westminster and rector of St. Margaret's ('76); Archdeacon of Westminster and Rural Dean, '83; Dean of Canterbury, '95. Canon Farrar is an eloquent preacher and writer, his chief works being "Life of Christ" ('74), "Life of St. Paul," "The Early Days of Christianity," "Every-day Christian Life; or, Sermons by the Way" ('87), "Lives of the Fathers" ('88), "Sketches of Church History" ('89), "Darkness and Dawn" ('91), "The Voice from Sinai" ('92), "The Life of Christ as represented in Art" ('94), a book on "Daniel" ('95), "Gathering Clouds," a tale of the days of Chrysostom ('96), and "The Bible: its Meaning and Supremacy." He is an ardent temperance reformer, and associated himself with the movement for the institution of an Anglican Brotherhood with modern aims. Chaplain to the Speaker of the House of Commons, '90-95.

Fashoda. See EGYPT (map) and SOUDAN

Federation, Australian. See AUSTRALIA.

Federation, Imperial. See IMPERIAL FEDERATION.

Female Suffrage. See WOMEN'S SUFFRAGE.

Ferdinand, Prince of Bulgaria, was b. in Vienna, 1861, and is the youngest son of Prince Augustus of Saxe-Coburg and Princess Clementine of Bourbon-Orleans, a daughter of Louis Philippe. He has served as an officer in the Austrian army, and possesses large estates in Hungary. After the deposition of Prince Alexander, Prince Ferdinand received a deputation from the Sobranje in '87, offering him the vacant throne. He accepted the offer, and on Aug. 14th took the oath to the Bulgarian constitution at Tirnova. His sovereignty was not formally recognised by the Porte and the Powers until February '96. He married (April 20th, '93) Princess Marie Louise of Parma, daughter of the Duke of Parma; and has two sons, of whom the eldest, Prince Boris, was in '96 admitted to the Orthodox Greek Church. A daughter was born Jan. 31st, '99, and the next day Princess Marie Louise died. The Prince sacrificed a portion of his Civil List during the year, in view of the financial situation.

Ferghana. A Mussulman khanate in Central Asia, annexed by the Russians in '75. It was formerly called Kokand, and its capital still bears that name. The city of Kokand (pop. 54,000) ranks next in commercial importance

and size to Tashkend and Bokhara. Other principal towns are Marghilan and Samarkand.

Fergusson, Sir James, M.P. See under COMMONS.

Fernando Po. A volcanic island in the Gulf of Guinea. Discovered in 1471 by a Portuguese sailor of same name, and ceded by Portugal to Spain in 1778. Capital, **Clarence Cove**, originally an English settlement, established in 1827. The natives, Aniyo or "Boobies," stupid and repulsive in appearance. Exports: indiarubber and palm oil. Now used as a place of exile for political offenders. See COLONIES, ETC., OF EUROPEAN POWERS.

Fiji. An island group and British Crown colony in the South Pacific. Fiji is a corruption of Viti, the native name. Consists of two considerable islands: **Viti Levu**, 4,112 sq. m.; **Vanu Levu**, 2432 sq. m.; and 225 smaller. Total area, 7435 sq. m.; total pop. 121,738. Capital, **Suva**, in Viti Levu; second town, **Levuka**, in Ovalau. Island of **Rotumah** (pop. 2409), to the north, annexed to Fiji in '31. The islands are mountainous, well wooded, with luxuriant vegetation and fertile soil, tropical, the larger being of volcanic origin, the smaller of coral formation. Forests contain valuable timber. Climate tropical, but healthy and favourable to Europeans. Natives Polynesian with Papuan intermixture; are peaceable, orderly, becoming Christianised and civilised. Europeans number 3927, and there are over 12,000 Indian and Polynesian labourers. In '74 the "king" and chiefs voluntarily ceded the group to England. Boundaries determined in '80. Fiji is administered by the Governor, who is also Her Majesty's High Commissioner and Consul-General for the Western Pacific. The Legislative Council consists of six official and six unofficial members, appointed by the Governor. The colony is represented in the Federal Council of Australasia. Of the natives about 100,000 are returned as Wesleyans, and 10,000 as Roman Catholics. Two State-aided public schools, and many schools carried on by the Wesleyan Mission. The chief exports are sugar, copra, and fruit. See BRITISH EMPIRE (table) and DIPLOMATIC.

Finance Act, The, '94. A detailed study and explanation of this Act appeared in the '95 ed. The Death Duties are set out under the heading DEATH DUTIES.

Finance Act, '99. See SESSION, sect. 57.

FINANCE, NATIONAL.

- I. THE REVENUE.
- II. GRANTS IN AID OF LOCAL TAXATION.
- III. PUBLIC EXPENDITURE.
- IV. THE NATIONAL DEBT.
- V. THE BUDGET.

The public revenue is now derived from customs and excise duties, estate and legacy, etc., duties, stamps, land tax, house duty, property and income tax, the post office, the telegraph service, the hereditary revenues of the Crown from woods, forests, and land, and a number of miscellaneous sources, including fee and patent stamps. Little more than half a century ago, scarcely a necessary of life, not to mention luxuries, escaped

taxation; and an idea of the extent to which the system was carried may be gained from the statement that whereas the total number of articles and subdivisions of articles in the English Tariff of Import Duties was 53 in '75, in '59 it was 307, and in '40 no less than 1046. Of the aggregate revenue raised by the State, the bulk is paid into the Exchequer, but a large sum goes, as explained lower down, to the Local Taxation Accounts. The public expenditure, which is met by issues from the Exchequer, may be classed under two heads: (1) Consolidated Fund Services, or sums the payment of which from the Consolidated Fund has been already authorised by Acts of Parliament, and which are issued at the proper time without the annual intervention of Parliament; and (2) Supply Services, which are the numerous items brought forward every year in Committee of Supply. Under the first head are included the charges for interest and management of the National Debt, the Civil List and Annuities to the Royal Family, and many salaries and pensions which are set forth in some detail below, and which in the national balance sheet are included under "Other Consolidated Fund Services." The total expenditure for Consolidated Fund Services in '98-9 was £27,044,000, and for Supply Services £81,106,000. The financial year ends on March 31st, and generally after but sometimes before that day the Chancellor of the Exchequer makes the financial statement of income, expenditure, and national indebtedness, known as the Budget. There is a standing committee of the House of Commons for the examination of the accounts, showing the appropriation of the sums granted by Parliament to meet the public expenditure; and the Comptroller and Auditor-General reports to this committee whether or not the expenditure has been in accordance with the purpose for which it was granted.

I. THE REVENUE.

As explained above, the revenue of the State collected by Imperial officers is paid part into the Exchequer and part to the Local Taxation Accounts. The aggregate revenue so raised amounted in '97-8 to £116,016,000, and in '98-9 to £117,857,000, and in the latter year £108,336,000 was paid into the Exchequer (see TABLE C), and £9,521,000 (in round figures) into the Local Taxation Accounts (see TABLE A). Here are the figures for the two years:—

	1897-8.	1898-9.
Aggregate Revenue raised by State .	£116,016,000	£117,857,000
(a) For the Exchequer	106,614,000	108,336,000
(b) For the Local Taxation Accounts .	9,402,000	9,521,000

The figures given below under the headings of Customs, Excise, etc., show the net receipts under the heads of duties, the total net produce, and the amount paid into the Exchequer, and in the case of Customs, Excise, and Estate Duties into the Local Taxation Accounts also. There is frequently a little variation between the total receipts and the total payments, a little being sometimes left in hand which may go to augment the payments in the next year.

Customs.

We subjoin figures showing the net produce from the principal articles contributing to Customs:—

Beer, Mum, Spruce, etc.	£17,552
Chicory	52,158
Cocoa	138,710
Cocoa Husks and Chocolate	55,135
Coffee	173,693
Currants	120,695
Figs	25,700
Plums (Dried or Preserved)	31,494
Prunes	7,127
Raisins	196,980
Spirits (Colonial and Foreign):	
Rum	2,227,537
Brandy	1,415,332
Geneva	184,128
Other Sorts	614,055
Tea	4,030,259
Tobacco and Snuff	11,012,927
Wine	1,401,413
All other articles	9,599
Charges on deliveries from Bonded Warehouses	34,177
Moneys deposited and not appropriated to Goods	43,424
Isle of Man: Duties, etc., collected in the island exclusive of Tea, Tobacco and Wine	53,331
Total	£21,845,436

Of the total customs receipts £20,850,000 was paid into the Exchequer; £204,011 to the Local Taxation Accounts; and £82,299 on account of the Isle of Man.

Excise.

The following is the net produce under different heads of Excise duties:—

Beer	£12,085,823
Spirits	17,967,143
Railway Duty	308,975
Charges on delivery from Bonded Warehouses, etc.	4,442
Chicory	1,427
Coffee Mixture Labels	1,704
Licence Duties, viz.:	
Auctioneers, Appraisers, etc.	88,791

Beer and Cider, and Beer and Wine	£187,430
Brewers	10,625
Dog	532,275
Establishment, viz.:	
Armorial Bearings	75,347
Carriages	511,017
Male Servants	153,999
Game	202,095
Gold and Silver Plate (Dealers')	59,871
Gun	102,722
Hawkers and Pedlars	25,178
Medicine (Patent) Vendors	8,499
Pawnbrokers	37,791
Refreshment House	9,486
Spirits:	
Distillers and Rectifiers	13,161
Dealers	150,996
Publicans, including Grocers in Scotland and Ireland	1,688,925
Tobacco Manufacturers	6,557
Tobacco Dealers	87,528
Wine and Sweets	78,205
Other than the foregoing	2,505
Local Taxation Penalties	6,963
Total	£34,415,481

Of the total net produce of Excise £29,200,000 was paid to the Exchequer, and £5,084,549 to the Local Taxation Accounts.

Estate, etc., Duties.

Estate Duty payable on property of persons dying after Aug. 1st, '94	£11,908,086
Probate and Account Duty payable on Personal Property of persons dying before Aug. 2nd, '94	115,234
Temporary Estate Duty payable in like manner on:	
Personality	11,692
Realty	31,816
Legacy Duty	2,873,091
Succession Duty	751,227
Corporation Duty	41,432

Total net produce **£15,732,578**

Of which £11,400,000 was paid into the Exchequer, and £4,232,600 to the Local Taxation Accounts.

PAYMENTS TO LOCAL TAXATION ACCOUNTS '98-9. Table A.

	England.		Scotland.		Ireland.		Total Payments.

Total . . .	£7,704,920

There was paid into the Exchequer £7,630,000.

Land Tax, House Duty, Income Tax, Miscellaneous.

The items Land Tax and House Duty speak for themselves. In regard to the **Property and Income Tax**, which was at the rate of *8d.* in the *£*, an approximate appropriation of the net produce under the different schedules, if based on the statistics of assessments for '98-9, would be: **Schedule A**, Lands, Tenements, etc., £4,979,000; **Schedule B**, Occupation of Lands, Tenements, etc., £150,000; **Schedule C**, Annuities, Dividends, etc., £1,171,000; **Schedule D**, Professions, Trades, etc., £10,396,311; **Schedule E**, Public Offices, Annuities from Public Revenues, etc., £1,346,000. The gross **Post Office receipts** were composed of postage collected in cash (£301,081), postage stamps sold (£13,207,228), postage from foreign and colonial offices (£378,649), commission on money orders (£128,408), commission on postal orders (£323,130), and other items. The payments made out of receipts include £544,760 to Inland Revenue department, £720,111 to railway companies on account of Parcel Post, and £343,900 postage collected for credit of foreign and colonial offices, the total of these payments being £1,623,550. The sum which appears against the heading of **Crown Lands** is the produce of the Woods, Forests, and Land Revenues of the Crown, which was paid into the exchequer and consolidated with the rest of the public revenue in return for the Royal Civil List. The interest and dividend received in the year on 173,001 ordinary Suez Canal Shares amounted to £668,505, and there was also received £10,351 dividend for the same period on 3,601 "actions de jouissance." Up to March 31st, '98, 3601 ordinary shares had been drawn and paid off, and 175 were drawn and paid off in '98-9. There was also received in respect of loans (Sardinian, Transvaal, Greek, Fiji, and St. Helena), £34,698. "**Miscellaneous**" contains numerous features of interest. Small branches of the Hereditary Revenue, under which is included £455 for "Rents and Royalties of Guano, etc., Islands,"

brought in £19,342; and in other Receipts are included £612,895 seignorage on silver purchased for coinage, and £101,429 profit on bronze coinage. A great item under the head of Miscellaneous is £925,256 Fee and Patent Stamps. Among the sums in this last total are Companies' Registration, £75,497; County Courts, Ireland, £26,279; District Audit, £48,465; Judicature, England, £357,459; Judicature, Ireland, £35,470; Patents for Inventions, £212,863; Newspaper Registration, £355; *Edinburgh Gazette*, £3524; *London Gazette*, £23,679.

II. GRANTS IN AID OF LOCAL TAXATION

The portion of the Revenue paid into the Local Taxation Accounts for local services consists of Licence Duties, a share of the Estate Duty, the additional beer duty of threepence, the extra spirit duty of sixpence, and a further share of the Estate Duty for the Agricultural Rating, etc., grants. In this particular financial year ('98-9) the sums paid to the Local Taxation Accounts of England, Scotland, and Ireland, were £1,497,194 18s., being the produce of the additional beer duty and spirit duty; £3,791,364 19s. 4d. on account of Licences; and £4,232,600 9s. 9d. (including £1,591,803 4s. 10d. Agricultural Rating, etc., grants), share of Estate Duty, etc.: total, £9,521,160 7s. 1d. **Table A** shows the figures in more detail. The sum of £9,521,160 therein given does not, however, represent the total amount of the subventions or aids from state revenues to local taxation. There still remain upon the Civil Service estimates, which are of course met by issues from the Exchequer, many charges transferred from local to Imperial funds, and certain other expenditure of a local character amounting to a considerable aggregate. Details of these grants in '98-9 and the estimates for '99-1900 will be found in **Table B**. Taking the sums of the two tables together, therefore, the total relief to local burdens from State funds amounted in '98-9 to £12,867,043. It should be added that the following payments to Local Taxation Accounts, not included in the above, were made from the Exchequer during the year:—Exchequer contribution to Ireland under the Land Purchase Ireland Act, '91, £40,000; Agricultural Grant under sect. 48 of the Local Government (Ireland) Act, £363,827; Increased Agricultural Grant under the Local Taxation Account (Scotland) Act, '98, £48,535. Total, £452,382. The grand total was accordingly £13,319,425. See details as to Local Taxation under **LOCAL GOVERNMENT**.

Pensions.

Turning to the Expenditure for National and Imperial purposes for '98-9, some references to National Debt Charges and to the capital of the Debt will be found in Part IV. Analysing the item "Other Consolidated Fund Services," there is first the sum of £408,773 issued on account of the Civil List, which is made up of £60,000 for Her Majesty's Privy Purse; £131,260 for salaries of Her Majesty's household and retired allowances; £172,500 expenses of Her Majesty's household; £13,200 for Royal Bounty, Alms, and Special Services; £8040 unappropriated; and £23,773 for pensions on the Civil List limited to £1200 per annum (see CIVIL LIST PENSIONS). Next comes a charge of £168,000, being the amount of the annuities to the Royal Family (see ROYAL FAMILY). In addition there is a list of pensions for naval and military services, the amount and duration of the grants ('98-9) being: Lord Rodney (and all and every the heirs male to whom the title shall descend), £2000; Earl Nelson (and to whom the title shall descend), £5000; Duke of Wellington (for life of present duke), £4000; the late Viscount Combermere, £355, being at the rate of £2000; Lord Seaton (for life of present baron), £2000; Lord Keane (for life of present baron), £2000; Viscount Hardinge (present viscount), £3000; Viscount Gough (to present viscount), £2000; Lord Raglan (for life), £2000; Lord Napier of Magdala (to the present baron), £2000; and the heirs of the Duke of Schomberg, £720; total, £24,975. Pensions for political and civil services amounted during the year to £9303, and the recipients included the late Countess of Elgin and the Countess of Mayo, widows of Governors-General of India; the late Mr. S. H. Walpole, £758, being at the rate of £2000; Viscount Cross (who receives no salary in respect of the office of Lord Privy Seal), £2000; the late Mr. C. P. Villiers, M.P., £36, being at the rate of £1200; Viscount Peel, late Speaker of the House of Commons, £4000. The names of Lord G. Hamilton, M.P., and Sir M. Hicks-Beach, M.P. are not included in the above list, as their pensions are suspended, as is customary, during their tenure of office. (For a return of the names of all pensioners under the Political Offices Pension Act, '69, with amounts paid to March '98, see '99 edition, p. 245.)

Pensions for judicial services (England) amounted to £34,720; among the recipients being the late Lord Herschell, as ex-Lord Chancellor, £5000; the late Lord Esher, ex-Master of the Rolls, £3750 from the date of his retirement; Lord Penzance, Lord Field, Sir Edward Fry, Lord Ludlow, and Sir Arthur Charles, retired judges, each at the rate of £3500 from the date of their retirement, and several retired county court judges—who as a rule received £1000 each. A large sum is paid by way of compensation, some amounts being still issued to persons formerly attached to the old Courts of Requests, the Marshalsea, and the Ecclesiastical and Prerogative Courts. Other sums were paid as judicial pensions to retired judges in Scotland and Ireland.

Salaries, Allowances, etc.

The salaries and allowances comprise the sums of £5000 paid to the Speaker of the House

of Commons, £20,000 to the Lord-Lieutenant of Ireland; the salaries of the judges, the Lords of Appeal in Ordinary receiving £6000 per annum each, the judges of the Court of Appeal, of the Chancery Division, and of the Queen's Bench Division receiving £5000 each, with the exceptions of the Master of the Rolls (£6000), and the Lord Chief Justice (£8000); the salaries of the county court judges £1500; the salaries of the Metropolitan police magistrates, one at £1800 and twenty-four at £1500 per annum; the salaries of the Scotch judges, sheriffs and sheriffs' substitutes, and of the Irish judges. **Miscellaneous services** charged on the Consolidated Fund include £16,216 paid to the Receiver-General of the Duchy of Cornwall, compensation for loss of duties on the coinage of tin; £9513 being the amount of annuities for ten years payable to the National Debt Commissioners, created to redeem perpetual annuities and pensions; and £215,000 annuity under the Indian Army Pension Deficiency Act, '85. The cost of the **Army and Navy** will be found under those headings.

Civil Service Votes.

The **Civil Service Votes** granted in the session of '98, with the net estimates for '99-1900, are subjoined. The net total of the original estimates for Civil Services, '98-9, was £21,792,646; and the net total of the parliamentary grants in the session of '98 was £21,918,064. The net total of the original estimates for '99-1900 was £22,179,665, showing an increase over the original estimates of '98, allowing for a small transfer to Revenue Departments, of £387,819.

CLASS IV. (Education, Science & Art.)			In addition to the above grants in the Session of '98 there were granted in the Session of '99 various Supplementary Esti- mates in respect of the financial year '98-9, amounting in all to £1,860,115, of which £624,914 was for the Civil Service and Revenue De- partments. Among the items going to make up this latter sum are £256,000 for Uganda, Central and East Africa Protectorates, Uganda Railway; and £139,425 for Colonial Services, including certain grants in aid. See East and Central Africa (SESSION, sect. 12), and West Africa (SESSION, sect. 37). The latter of the two votes just referred to includes £1775, a contribution towards the initial cost of institu- ting a school for giving instruction in tropical medicine to doctors selected for the service of certain colonies and the protectorates under the control of the Foreign Office; and grants of

£40,000 and £25,000 to Barbados and St. Vincent respectively, towards the heavy expenditure entailed on the Governments of those colonies by the disastrous hurricane in Sept. '98. Here are a few details of the Civil Service Estimates for 1899—1900. Certain changes are made in the year's finance in respect of the Mercantile Marine Fund and the Local Government (Ireland) Act, including in the latter case a charge of £282,000 now thrown on the Consolidated Fund. The net effect of the Irish Act has been to reduce the voted charge by £243,313, while the net effect of the Mercantile Marine Fund Act '98 has been to add £59,528 to the Civil Estimates. Consequently, for purposes of comparison, the net increase for 1899—1900 should really be taken at £387,819 *plus* £183,785, or £571,604 in all; though this figure is reduced if allowance be made for the supplementary grants of the session of '98. The estimate for Art and Science Buildings contains an item of £1000 for constructing a gallery and preparing accommodation for the Waddesdon Bequest at the British Museum. As regards the estimate for Public Buildings, the provision for Hertford House is less by £14,500, and that for the Record Office by £16,000. In the Local Government Board Estimate there is an increase of £1840 for staff and expenses of the National Vaccine Establishment. Stationery and printing shows a net increase of £9044, £4000 of which is attributable to diminished receipts, while £3590 arises in connection with the Houses of Parliament. The net total of the estimates for Education, Science and Art stands for 1899—1900 at £12,207,860, an increase of £243,179 over last Session's Grants. Of this increase £200,617 (net) occurs under the three Education Votes, and £29,698 under the Science and Art Department. In the English and Scotch Education Votes certain items are included as a preliminary provision for allowances under the Elementary School Teachers' (Superannuation) Act, '98. In view of the supplementary grant of £11,800 in February '99 for purchasing two portraits by Rembrandt, the usual item of £5000 for purchase of pictures is not inserted under the National Gallery Estimate. The increase of £6073 in respect of the Wallace Collection is due to special expenditure to enable Hertford House to be opened to the public on January 1st, 1900. The Scientific Investigation Estimate includes grants of £2000 for administration expenses, and of £5000 towards building expenses, in connection with a new National Physical Laboratory, to be managed by the Royal Society. With regard to Class V., the growth in the requirements of Foreign and Colonial Services still continues, but at a less rapid rate. The net total for this class, which rose from £819,229 in '97-'8 to £1,263,264 in '98-'99, now stands at £1,458,840, or £195,576 in excess of the grants of last Session. Only £13,000 is expected to be required to meet the deficiency of Cyprus Revenues, as against £33,000 for '98-'9, the decrease of £20,000 being due partly to the improved financial position of the island and partly to the fact that last year's Grant proved more than sufficient for the requirements of the year, leaving a balance of £6842 available towards meeting the anticipated deficiency in '99—1900. The increase of £195,576 in the total of this class arises almost entirely under the two estimates for British Protectorates in

Uganda, etc., and for Colonial Services. Of these, the former shows an increase of 50 per cent. upon the previous year, Uganda itself accounting for £108,000 out of a total increase of £137,000; while the latter, which now stands at £472,801 as against £395,181 for '98-'99, has been augmented principally on account of the increased requirements of the West Indies and the Gold Coast. Out of an increase of £45,000 proposed under the latter head, the sum of £25,000 is for the extension of the telegraph to Gambaga, and is to be treated as a loan to be repaid by the colony. Of the remaining estimates in Class V., that for Diplomatic and Consular Services shows an increase of £5915. £2000 of this amount is in respect of Commercial Intelligence in connection with the Board of Trade Estimate in Class II.; and the increase in the Consular Service in China has involved additional expenditure. A decrease of £3859 under Subsidies to Telegraph Companies is accounted for by the fact that the period of twenty years from '79, for which the annual subsidy of £35,000 is payable to the Eastern and South African Telegraph Company in respect of the Aden-Zanzibar-Durban cable expires in December '99, only £8750 per annum being payable after that date. In spite of the fact that the Customs and Inland Revenue Estimates show decreases, there is a net increase of no less than £757,064 under Revenue Departments as a whole. The rapid increase in the total of the Post Office Estimate observable in '97-'8 and last year is still maintained. The net total now stands at £8,552,885, or £550,035 in excess of the provision made in the Session of '98. The increase is, as before, principally for staff, chief offices, and provincial establishments, and is accounted for partly by increase of business, but still more by the improvements in pay and position accorded to postal servants in recent years. Post Office Telegraphs show an increase of £273,555, due partly to the same causes as the increase under Post Office and partly to increased charges for maintenance.—Some additions were as usual made during the Session of '99 to the original estimates for '99—1900, amounting in the case of the Civil Services to £278,676, and thus bringing up the total voted in the Session for '99—1900 to £22,458,341. Among the items were £65,000 for Public Buildings, being the additional provision required for the purchase of the buildings now occupied by the Imperial Institute and for their adaptation in part for use by the London University. The purchase price was £55,000, £7000 was set down for structural alterations, £1000 for maintenance and repairs, £600 for fuel, lighting, etc., and £1400 for furniture. The arrangements made would enable the Government to offer to the London University accommodation in the building, which provides much more space than the present building in Burlington Gardens, and the University would occupy its new quarters under conditions substantially the same as those under which it now occupies the building in Burlington Gardens. As regards accommodation for the practical examinations of the University in Physics and Chemistry, it was agreed that this should be provided in the new buildings about to be erected for the Royal College of Science, subject to arrangement between the two bodies as to dates of user. The Science and Art Department will take charge of, and keep in order, the instruments and appliances for the

examinations. The formal concurrence of the University and of the Institute (to whose use an agreed portion of the buildings was to be assigned free of rent, but with responsibility for internal maintenance and repairs of that portion), subject to settlement of details, had been obtained. Other items included are: £3750, special grant towards the purchase (for £6166 13s.) of certain gems at the sale of the Marlborough Collection; £75,000 grant, in aid of the Niger Territories local revenues, to meet expenses of administration, to pay interest on the public debt pending its redemption, and to provide for new buildings and new vessels and equipments required in addition to those to be purchased from the Company (see *Royal Niger Company Act*, (SESSION, sect. 100); £60,000, further grant in aid of the expenses of the Royal Commission for the British section at the Paris Exhibition; and £30,000 for Lord Kitchener of Khartoum (see SESSION, sect. 14).

IV. THE NATIONAL DEBT.

It is usual to ascribe the origin of the National Debt to the year 1694, but in reality the earliest portion of it dates back to the reign of Charles II. In 1667 an Act was passed to encourage the advance of money to the Crown on the credit of the Exchequer, and London bankers lent very considerable sums on that security; but in 1672 the King closed the Exchequer, appropriating the funds to the extent of £1,328,526, on which, however, interest was paid until 1682, at the rate of 6 per cent. After the Revolution prolonged litigation took place; and finally, by an Act of 1699, the Bankers' Debt was reinstated among the other national liabilities as from 1705, but at only half its capital value—viz., £664,263—and with the forfeiture of all arrears of interest, entailing a loss of about £2,750,000 upon the unfortunate creditors. The first regular loan of William III., obtained in 1694, consisted of £1,200,000. Since that time other advances have been made by the Bank, and also by the Bank of Ireland, and enormous loans have been negotiated for the Government. Thus, at the accession of Anne the debt had grown to nearly thirteen millions; when George III. ascended the throne it amounted to more than a hundred millions; at the conclusion of the American War, in 1784, it stood at £249,851,000, and though there was a small decrease during the period of peace, 1784-93, additions amounting to £601,500,000 were made during the French War, and after the battle of Waterloo the debt reached the startling figure of £885,000,000. Since that year it has been considerably reduced, and at the end of the last financial year (March 31st, '99) it stood at £627,562,585, as compared with £634,435,704 twelve months previously. The National Debt is made up of (1) Funded Debt, (2) Terminable Annuities, (3) Unfunded Debt (see TABLE D).

(1) This consists of the various stocks, and of the debts to the Banks of England and Ireland. On March 31st, '99, the Funded Debt was made up as follows:—

2½ per cent. Consols	£ 520,154,149
2½ per cents. (1905)	4,635,992
2½ per cents.	31,750,295

£556,540,436

The debts to the Banks of England and Ireland

—£26,645,869—added to the above sum, will be seen to produce a total of £583,186,305.

(2) These are annuities in which the payment is made for lives or terms of years, after which it ceases altogether, the return made being increased as the period of time is shortened; in other words, a portion of the principal is repaid with the interest in each year while the arrangement continues. In estimating the amount of the Debt, these annuities are capitalised. Here is the Chancellor of the Exchequer's explanation of the process:—"The manner in which the Debt is reduced at the present time is mainly through the action of terminable annuities. A large block—perhaps £10,000,000, perhaps £30,000,000—of Consols is cancelled: for example, a block standing to the credit of the National Debt Commissioners on behalf of savings bank depositors; and in place of the Consols so cancelled a terminable annuity is set up of such an annual amount and running for such a time as may suffice to pay annually the interest on the Consols cancelled, and also by the end of the time to replace the capital amount of the Consols cancelled. When the end of the terminable annuity arrives the redemption of the amount of debt is effected, and the annual amount of the terminable annuity is, of course, available for other purposes. It may be used by Parliament to set up a fresh terminable annuity in order to cancel more Consols, or it may fall naturally into the New Sinking Fund, and through that Fund, which is the unappropriated balance of the fixed Debt charge not appropriated either for the interest or the management of the Debt, or for the service of the terminable annuities, be devoted to the redemption of Debt."

(3) This now consists solely of Treasury Bills. To the total Debt of £627,562,585 there are to be added certain other capital liabilities, which increased the gross liabilities of the State on March 31st, '99, to £635,004,965, as compared with £638,266,482 a year previously; on the other hand there were assets, including the estimated market value of the Suez Canal shares. (See TABLE D.) The total charge for the service of the Debt was, in '16, £32,457,000; in '66-7, £26,074,871; '73-4, £26,706,726; '76-7, £27,992,834; '79-80, £28,762,874; '85-6, £23,449,678; '86-7, £27,958,023; '86-9, £26,224,594; '89-90, £25,226,760; '91-4, £25,200,000; '94-5 and since, £25,000,000, until the current year, '99-1900, when it was lowered to £23,000,000. Mr. Goschen, in his '87-8 Budget, reduced the fixed charge from £28,037,000 to £26,000,000. This left £5,000,000 a year applicable to the redemption of Debt, which he then said would redeem at par £600,000,000 in about fifty-two years, and £700,000,000 (practically the whole Debt) in about fifty-seven years. His National Debt (Conversion) Act, '88, provided for a reduction of interest from 3 per cent. to 2½, and ultimately to 2½. The saving to the country by the operation was estimated at about £1,400,000 a year from 1889 to 1903, and from 1903 about £2,800,000 per annum. The Conversion Scheme, by reducing the interest on the Debt, placed about £1,500,000 at the disposal of the Chancellor of the Exchequer; and of this sum he in '90 appropriated £1,000,000, reducing the fixed charge for the Debt from £26,000,000 to £25,000,000. Table D gives full particulars as to the Debt at two periods, and as to other capital liabilities and estimated assets. The "other capital liabilities

ties" there mentioned involve no payment within the fixed charge for the Debt, most of them being charges on the annual estimates, with a capital liability on the Consolidated Fund.

V. THE BUDGET.

Sir M. Hicks-Beach introduced his fourth Budget in the present administration on April 31th, '99. A year ago, he said, he had framed his estimates of revenue in circumstances of doubt and difficulty. He had on the one side to consider wars and the rumours of wars, on the other he was face to face with the results of three very prosperous years. He felt himself justified in being sanguine in his estimates for the year just closed, and although at the time, and ever since up to the last few weeks, all the

pundits insisted that his estimates were over-sanguine, and that there was certain to be a deficit, it turned out that he was right and all his critics were wrong. The total revenue raised by the State in the year was £117,857,000, as against £116,016,000 in '97-8. Of that sum £9,521,000 went to the Local Taxation Accounts, and the Exchequer received £108,336,000 (see Part I.). His estimated revenue of £107,110,000 was exceeded by £1,226,000. In discussing some of the details of the revenue, he mentioned that coffee and cocoa showed an increase, that the price of tea had risen, and that the receipts from tobacco since the reduction of duty had been rather disappointing. The Death Duties yielded very satisfactory results, though the year just

* In addition to the liabilities given here, there are sundry contingent or nominal liabilities in respect of liability to suitors in the Supreme Court, liability to bankrupts' estates, liability for unclaimed dividends, etc., which the State is not likely to be called upon, to any material extent, to discharge.

closed was not so fortunate with regard to the yield of large estates as the previous year. There were during the year 64 estates each over £250,000 value, which paid duty, as compared with 73 in the previous year. Out of the 64, eight were over a million each, making a total value of £11,600,000, whereas in the previous year nine were over a million each, making a total of £15,750,000; but what was lost from the large estates was gained from the smaller ones. Turning to the expenditure of the past year, he had provided for £106,829,000 in his Budget, and there were supplementary estimates of £1,986,000, but savings of £665,000, so that the net expenditure was £108,150,000. This, deducted from the revenue of £108,336,000, showed a realised surplus last year of £186,000. Having given a number of figures with regard to the National Debt, he next turned to the Estimates for the year '99-1900, which, he said, worked out (so far as the estimated payments from the Exchequer were concerned, and apart from those for the Local Taxation Accounts) at £112,927,000, being an increase of £6,098,000 over the Budget estimate of the previous year. (His estimated revenue on the basis of existing taxation was £110,287,000.) The main causes of that increase were an increase of £742,000 in the Consolidated Fund Services, being almost wholly due to the arrangements made under the Irish Local Government Act of '98, though as a partial set-off there was a reduction on the Civil Service Estimates; an increase in the cost of postal services, and large increases in the Estimates for the Army and Navy (see articles headed ARMY and NAVY). This total increase of £6,000,000, he pointed out, followed an increase of more than £5,000,000 in '98; the total increase in our estimated expenditure, including the Local Taxation Accounts, being for the last four years no less than £19,076,000. It was impossible, however great the prosperity of the country might be, for such increases to be met by a mere automatic increase of our existing taxation, nor could they be met for long by any increase of existing taxes. If this rate of increase were to continue, Parliament and the country must make up their minds not only to large increases in existing taxes, but also to the discovery of new and productive sources of revenue. He hoped that this rate of increase might not continue. They knew it was mainly due to increased armaments. They hoped a good deal from the approaching Conference, and he believed a desire for peace was more prevalent throughout the world than it had been for some time past. He hoped the Conference might be able to devise some means for checking the terrible competition in armaments. If he was asked whether he looked upon the estimated expenditure of this year as a mere temporary matter, capable of being reduced next year, or the year after, or the year after that, to something like the estimates of some four or five years ago, he could not honestly hold out any such expectation. After showing that during the time that our naval and military estimates had gone up by £10,500,000, they had devoted no less than £29,296,000 to paying off the old Debt which they had not incurred themselves, but had inherited from the past, he explained the manner in which the interest of our Debt and its gradual repayment is provided (see Part IV. *supra*), showing that Parliament had set aside £25,000,000 a year as a fixed debt

charge. Out of that has to be paid the interest, the cost of the management of the Debt, and the cost of terminable annuities. The balance goes under the name of the New Sinking Fund to the further redemption of the Debt. For this year ('99-1900) the cost of interest and management of the Debt would be £17,264,000, and therefore out of the £25,000,000, £7,736,000 would be available for the reduction of the Debt. That was the largest amount that had ever been set aside for that purpose out of the fixed Debt charge. In the year '84-5, which was looked back upon as the most flourishing period of the Sinking Fund, the sum of £6,852,000 was so set aside. In '87-8 it was only £4,963,000. From that time it gradually rose, until in '94 it was £6,552,000. In that year—five years ago—it was less than in the present year by nearly £1,200,000.

Now we were approaching a very remarkable period in the history of the terminable annuities and of the New Sinking Fund. In February 1902, what was known as the Savings Bank annuity, of £2,200,000 a year, would come to an end, and between that date and July 1904 the converted annuity of £684,600 a year and the Chancery annuity of £2,943,000 would also come to an end; and further, the interest on Consols would be reduced by $\frac{1}{4}$ per cent., giving an annual amount of something like £1,300,000; so that between the spring of 1902 and 1904 the sum of no less than £7,000,000 a year would fall into the New Sinking Fund. And if Parliament made no fresh arrangements the New Sinking Fund would be increased by this and other causes, until in 1905-6 it would amount to no less than £9,214,000 a year.

It was not in the interest of the steady reduction of Debt that the New Sinking Fund should be allowed to increase to such an extent as this. The New Sinking Fund was never intended to be anything more than a small unappropriated balance of the fixed Debt charge, because the great bulk of the fixed Debt charge was always intended to be devoted either to the payment of the interest of the Debt or to the service of terminable annuities. If the New Sinking Fund could be allowed to be increased to such an amount as he had named, the infallible result would be that there would be a temptation that no Parliament could possibly resist to devote a very large portion if not the whole of these windfalls to some wholesale remission of taxation, just as a similar great windfall was devoted by Mr. Gladstone to the remission of taxation in '60. He wished to take precautions against that: to follow the precedent set by Mr. Gladstone and Mr. Childers in '81 to '83, in prolonging a great block of terminable annuities about to expire, with the effect that the annual charge for those annuities was reduced, the amount so gained by reducing the annual charge being used to cancel other consols, and other terminable annuities being set up in their place. He now proposed to prolong the savings bank annuity of £2,200,000 from March 1902 to 1911. That would reduce the annual charge for that annuity to £591,000, and with the saving he proposed to cancel the book debt of £13,000,000 to the Savings Banks, which was established by Mr. Goschen in '92, and also to cancel £15,000,000 of Consols now held for the Savings Banks by the National Debt Commissioners. In place of the book debt and the Consols so cancelled, he proposed to set up two termi-

nable annuities respectively of the amounts of £746,000 and £870,000, expiring in 1923, when Consols would be redeemable at par. He had chosen that year because the nearer that time approached the more Consols must approximate to par, and the stock to be replaced through the terminable annuities would therefore be obtained more cheaply at the time when the greater part of it would be required. He thought the taxpayers had a clear claim to a reduction of the fixed charge for the Debt from £25,000,000 to £23,000,000, and in regard to the use of the Sinking Fund for the extinction of the Funded Debt, urged that the narrowness of the market then as compared with past years had had an appreciable effect in raising the price of Consols, and that by our own increased purchases in that market we were practically raising the price of what we desired to buy against ourselves. His proposed reduction of the fixed Debt charge would still leave that year a sum of £5,816,000, annually increasing in future years, for the reduction of Debt, a sum greater in proportion to the total amount of the Debt, and much greater in proportion to the purchasable amount of the Debt, than was considered sufficient in past years. Having reduced his expenditure to the extent of £2,000,000 by his proposal in regard to the Debt charge, he had still to make up a sum of nearly £900,000 in order to balance the account and give him a margin for contingencies. To meet the deficit he looked to both direct and indirect taxation. He proposed to require a stamp duty of 5s. per £100 on the nominal value of all documents representing foreign or colonial bonds, stocks, or shares, which were not at present liable to any duty under the Stamp Act, to be paid on the first occasion when any such document was negotiated here, in order to make it a good delivery in the United Kingdom. Once stamped, it would not require to be again stamped during its lifetime. If withdrawn, and another exactly similar substituted, the new document would have to be stamped at a reduced rate of charge. The second proposal was to impose the ordinary mortgage duty of 2s. 6d. per £100 on loan capital and debenture stock created by any corporation or company under statute. If it were created not under statute, it would have to be secured by trustees now, and then be liable to the 2s. 6d. mortgage duty. Further, he proposed two increases of the existing stamp duties. Companies' capital duty was now 2s. per £100; he proposed to raise that to 5s. per £100.

He also made a proposal that letters of allotment and renunciation, on which at present there was a penny stamp, should bear a sixpenny stamp. The total he expected for this year from these increased stamp duties would be £450,000. Turning to the consideration of the wine duties, he explained that the present duty was 1s. per gallon on wine not exceeding 30° of proof; 2s. 6d. per gallon on wine between 31° and 42°; and a surtax of 2s. per gallon on sparkling wines. He proposed to increase it to 1s. 6d. per gallon on wine not exceeding 30°, to 3s. per gallon on wine between 31° and 42°, and to increase the surtax on sparkling wines to 2s. 6d., and further to impose a duty of 3s. per gallon on still wine imported in bottle, the same duty as on wine between 31° and 42°. He anticipated from the proposed increase on the

wine duties an increased yield in the present year of £420,000. Therefore the total increased taxation he proposed would be £870,000. The following shows the figures as to revenue and expenditure in the two years of the above proposals:—

Budget Estimate, '98-9.

Revenue	£107,110,000
Expenditure	106,829,000

Leaving for Local Taxation grant for Scotland, for grant for West Indies, and for small margin	281,000
--	---------

Actual Figures, '98-9.

Revenue	108,336,000
Expenditure	108,150,000

Realised Surplus	186,000
----------------------------	---------

First Budget Estimate, '99-1900.

Expenditure	112,927,000
Revenue	110,287,000

Deficit	2,640,000
-------------------	-----------

Revenue as above	£110,287,000
Add	

From Wine Duty proposals	420,000
From Stamp Duty proposals	450,000
	111,157,000

Expenditure as above	112,927,000
Deduct	

Diminution of National Debt Services from £25,000,000 to £23,000,000	2,000,000
	110,927,000

Balance for contingencies	£230,000
-------------------------------------	----------

For discussion on the Budget proposals and the modifications made in them, see FINANCE ACT, SESSION, sect. 57. See also Table C for heads of estimates, and actual receipts and expenditure.

War Expenditure.

At the autumn sittings (see SESSION, sects. 123-9), the Chancellor of the Exchequer found it necessary to make what may be termed interim financial proposals, in order to cover the military expenditure in connection with the South African campaign. The Commons had just granted a supplementary Army estimate of £10,000,000, and Sir M. Hicks-Beach, Oct. 23rd, explained how the money was to be found. His brief statement simply came to this: Since he balanced his Budget the House had sanctioned supplementary estimates, in July, of £278,000, and of course there was the large unforeseen expenditure of £10,000,000 for South Africa, making a total estimated expenditure of £121,205,000. As regards the first six months of the current financial year, the increase of revenue had greatly exceeded his expectations, and he thought they might fairly reckon on a surplus for the whole year of £3,000,000, to be applied to the purposes of the unforeseen expenditure in South Africa. He proposed to provide the balance by a temporary addition to the floating debt, and to raise for this purpose

a sum not exceeding £8,000,000 by Treasury bills, which would give him a margin of a million, which he did not think, however, he should need. This borrowing was to be a purely temporary matter, and provision would have to be made by Parliament to repay the sum borrowed as soon as possible. Whatever might be the cost of the war, it was at any rate not certain that the whole cost of it, or what amount of the cost of it, would fall on this country. Our colonies had been invaded, and it would be consistent with all the laws of war if, when it was brought to a successful termination, the Transvaal taxpayers should have to bear something, at any rate, of the cost. The Government thought that the consideration of the precise manner of repayment of the sum now to be borrowed should be postponed until the introduction of the Budget in April 1900. His intention was that this debt should be by no means of long duration. It ought to be provided for, if necessary, by an addition to taxation, and he hoped it might be paid off in the year following next year, if not sooner.

Budget Estimate of Expenditure	£	110,927,000

Finland. The Grand Duchy of Finland, now a Russian province, was ceded to Russia in 1809, and has a Diet or national Parliament, consisting of four estates, nobles, clergy, burghers, and peasants. The Czar is the Grand Duke, but the assent of all four estates is necessary to any changes in the Constitution or for making new taxes. There is a Senate nominated by the Crown, presided over by the Governor-General, which sits at Helsingfors, and is the chief administrative body. A State Council, also nominated by the Crown, sits at St. Petersburg. Provincial affairs are principally managed by the Senate, military and foreign affairs by the Imperial officials. The chief products are timber, farm produce, etc. **Area,** 144,255 sq. miles; **pop.** about 2,500,000. (See RUSSIA.)—**History,** '99. An extraordinary session of the Diet was opened (Jan. 24th) at Helsingfors to consider the Imperial ukase issued in the previous year with the object of bringing the Finnish law of military service into conformity with that of the rest of the Empire, and abolishing the privilege by which Finnish regiments were only required to perform active service within the bounds of the Duchy. While it was sitting an Imperial decree was published (29th) making a knowledge of Russian obligatory for senators, governors, and higher officials; and this was followed, to the consternation of the Finns, by an Imperial manifesto (Feb. 15th) ordering that in future all new laws affecting Finland should be submitted to the Diet for their opinion as to the best way

of adapting them to the conditions prevailing in the Duchy, and should then be sent up to the Imperial State Council for settlement and promulgation. This, of course, had the effect of removing from the Finnish Parliament the exclusive right of discussing measures affecting both Finland and the Empire, and involved—indeed was intended to effect, the Russianising of the country. The Diet and the Senate opposed the strongest objections to the manifesto. A great deputation proceeded to St. Petersburg in March to pray for a declaration of their constitutional rights, and took with them a petition signed by 563,000 Finns; but they got no audience, and the Czar refused to receive the petition, which urged that "the time-honoured right of the Finnish people to partake, through their representatives the Estates, in the legislation was confirmed, and confirmed for ever, by the Emperor Alexander I., whose memory we bless. This right has during the reigns of the late Emperors, Alexander II. and Alexander III., of blessed memory, been extended and regulated. But, according to the fundamental statutes issued together with the manifesto, the Estates would, in those questions which are declared to have a bearing also on the interests of the Empire, be no longer allowed to take part in legislation with such power of decision as according to the fundamental laws of Finland is guaranteed to them. The manifesto has dislodged the foundation stone of our social structure." The Diet declared (May 27th) that the manifesto did not possess the force of law in Finland, and that a law relating to military service could not be legally enacted except in conformity with the Diet's decision. It was also declared that the militia could not be employed outside Finland, except for the defence of St. Petersburg; but that other Finnish troops, when not required for the defence of Finland itself, could be used in war time for the defence of other parts of the Empire. An Imperial rescript was issued (July 4th) stating that the manifesto of Feb. 15th was "unshakeable," and that the opinions of the Diet would be taken into consideration in finally drafting the military law. M. von Plehwe, member of the Russian Imperial Council, was appointed acting Secretary of State for Finland in September. Mr. Eugene Wolff, British Vice-Consul at Wiborg, was dismissed (16th) by H.M. Consul-General in St. Petersburg, on the ground that the Russian Government had complained that he had interfered in the political affairs of the country. Upon this most of the British Vice-Consuls in the country resigned.

Fletcher, A. E., was b. at Long Sutton in 1841, and was ed. at Owens College, Manchester, and Edinburgh University. After a short scholastic career he gave up teaching for journalism, and contributed to various periodicals till '72, when he became editor of the *Barrow-in-Furness Vulcan*. In '76 he accepted the post of London correspondent of the *Barrow Times*, wrote for the *Educational Times* and *Weekly*

Dispatch, and acted as subeditor of the *Pictorial World*. He became connected with the *Daily Chronicle* in '78, and succeeded to the editorship in '89. Under his direction the *Chronicle* advanced and improved greatly, but in '95 Mr. Fletcher resigned. He has since lectured in many parts of the country. His editorship of the *Cyclopædia of Education* must also be noted. Address: Great Holland, Colchester.

Food and Drugs (Adulteration of) Act, '99.
See SESSION, sect. 101.

FOOTBALL, '99.

1. Association.—These matches continue to excite great interest every year, and the popularity of the game seems to increase, but each season it becomes more apparent that professionalism is in the ascendant. The **International Matches** resulted as follows:—England beat Wales. England has now won 17, Wales 2, drawn 2. England beat Scotland. England has now won 10, Scotland 13, drawn 6. England beat Ireland. England has now won 16, Ireland 1, drawn 1. Scotland beat Ireland. Scotland has now won 15, Ireland 0, drawn 1. Scotland beat Wales. Scotland has now won 21, Wales 0, drawn 3. Ireland beat Wales. Ireland has now won 6, Wales 9, drawn 3. Cambridge University beat Oxford University. The London Charity Cup was won by Clapton. The London Senior Cup was won by Old Carthusians. The Inter-Hospital Cup was won by the London Hospital. The Amateur Cup was won by Stockton. The Army Association Cup was won by the South Lancashire Regiment. The Association Cup was won by Sheffield United. The appended table shows the position and points obtained by the competing clubs in the 1st Division in the League Matches, '99:—

	Plyd.	W.	D.	L.	Pts.
Aston Villa	34	19	7	8	45
Liverpool	34	19	5	10	43
Burnley	34	15	9	10	39
Notts County	34	12	13	9	37
Everton	34	15	8	11	38
Blackburn Rovers	34	14	8	12	36
Sunderland	34	15	6	13	36
Wolverhampton Wanderers	34	14	7	13	35
Bury	34	14	7	13	35
Derby County	34	12	11	11	35
Stoke	34	13	7	14	33
Notts Forest	34	11	11	12	33
West Bromwich Albion	34	12	6	16	30
Newcastle United	34	11	8	15	30
Preston North End	34	10	9	15	29
Sheffield United	34	9	11	14	29
Bolton Wanderers	34	9	7	18	25
Sheffield Wednesday	34	8	8	18	24

2. Rugby.—The **International Games** resulted as follows:—Scotland beat England. England has now won 9, Scotland 9, drawn 9. Scotland beat Wales. Scotland has now won 10, Wales 4, drawn 1. Ireland beat England. Ireland has now won 6, England 16, drawn 1. Ireland beat Scotland. Ireland has now won 3, Scotland 17, drawn 2. Ireland beat Wales. Ireland has now won 6, Wales 7, drawn 1. Wales beat England. Wales has now won 5, England 11, drawn 1. Cambridge University beat Oxford University. Cambridge has now won 9, Oxford 11. South beat North. Guy's Hospital won the Inter-Hospital Cup. The County Championship was won by Devonshire.

FOREIGN ARMIES.

The latest particulars relating to the military power of the countries of Europe, Abyssinia, Egypt, China, Japan, Mexico, the United States, and some other countries, will be found below.

Abyssinia.—The organisation is feudal in character, and the constitution is by provinces, each governor or Ras having a standing force as garrison and at call in case of war, and a considerable number of retainers not embodied. The garrison forces united constitute the new army of Menelik, and are estimated at 70,000 men. The central control is weak, and there is no organised division into the three arms, as in Europe; but the forces are readily grouped, the mounted men forming an irregular cavalry, and have great mobility. Practically every man has a sword and a rifle, but the firearms are extraordinarily varied, and the mounted troops also carry a javelin or spear. They do not exceed 5000 altogether. The guns are mostly adapted for mountain work, there being about 50 modern and 30 old ones. Marksmanship is a weak point in the Abyssinian army. The unembodied retainers, who may be likened to a militia, number about 140,000 men.

Austria-Hungary.—The forces consist of the Army proper, common to both branches of the monarchy, with the **Ersatz** (or supplementary Reserve), the **Austrian Landwehr** and **Landsturm**, and the **Hungarian** (or **Cisleithan**) **Landwehr** and **Landsturm** (composing the Honved), and the local forces of **Bosnia and Herzegovina**. The Regular Army requires an annual contingent of 101,000. Service is for three years with the colours and seven in the Active Reserve; ten years for those enrolled direct in the Ersatz (or supplementary) Reserve. Service in the Landwehr is for two years for those who have served their ten years in the senior service, and for twelve years for those who have been sent straight into the Landwehr for various reasons. The men who pass before the selecting boards number about 800,000, and the final contingent selected for the various branches of the service is 144,000. The Landwehr is called out for training in time of peace, and in war both Active Army and Landwehr men are drafted from the Ersatz Reserve. After the Landwehr service, the soldier is sent for five years to the 1st Landsturm, and for a further period of five years to the 2nd Landsturm. For all who do not serve in the first or second line forces, service with the Landsturm is obligatory from the nineteenth to the end of the forty-second year. The Mannlicher is the Infantry arm. There are 15 Army Corps, comprising in all 31 Infantry divisions of the Active Army; and it is the intention to increase their strength on mobilisation by allotting a Landwehr division to each. Normally there are 462 battalions (102 regiments of the line, 4 of Tyrolese Rifles and 4 Bosnian, and 26 battalions regular Rifles), 252 squadrons (15 regiments of Dragoons, 11 of Uhlans, and 16 of Hussars), and 251 batteries, exclusive of 13 battalions of Fortress Artillery and 15 of Pioneers. The Field Artillery is formed in 14 brigades, and the reorganisation gives the force 14 corps and 42 divisional regiments, with a mountain battery division, and increases the field guns to 1792, and the Horse Artillery guns to 96, while the mountain guns will number 120, with 16 smaller pieces; 60 Ersatz batteries will also be organised.

Several new batteries have been formed. The Austrian and Hungarian cavalry have won the admiration of European soldiers, and the empire unquestionably possesses a thoroughly practical mounted arm fit for service at a moment's notice. The total strength of the **Austro-Hungarian Army**, on a peace footing, is 18,300 officers and 330,800 men, including the artillery, engineer train, etc., and on a war footing 36,300 officers and 2,339,000 men; but on embodying the Landsturm it is believed the dual monarchy could put 3,000,000 men in the field. The infantry number 187,000, the cavalry 47,000, and the field and fortress artillery 37,000. The **Honved** (national Hungarian army) is subject in war time only to the Commander-in-Chief, and in peace time only to the Royal Hungarian Jurisdiction. The Cisleithan Landwehr is being increased to a strength of 8 divisions (16 brigades, 116 battalions). In Oct. '99 there were 31 regiments (102 battalions). Training, command, and equipment are as in the Regular Army. The Honved has also in peace time 10 Hussar regiments, having each a regimental staff, 2 divisions (*en cadre*) and 1 Ersatz Reserve. The officers are trained in the Ludovica Academy at Buda-Pesth.

Belgium.—The long-deferred reorganisation has not yet been accepted. The army is maintained by the embodiment of 13,300 men yearly (substitution being allowed), and the period of liability is thirteen years (two with the colours), but of these at least two-thirds are as a rule allowed. The composition is as follows: **Cavalry**—2 regiments of Chasseurs, 2 of Guides, and 4 of Lancers. Each regiment consists of 4 squadrons Active and 1 Reserve. To the above have to be added the Gendarmerie (over 1700 men). **Artillery**—4 field and 4 fortress regiments (in all 204 guns). **Engineers**—1 regiment of 3 battalions. **Infantry**—14 regiments of the line, of 4 battalions of 4 companies each, 3 Active and 1 Reserve battalion; 1 regiment of Grenadiers, similarly organised; 1 regiment of Carabineers of 6 battalions (4 active and 2 reserve), and 3 regiments of *chasseurs-à-pied*. The peace strength is 28,050 infantry, 5760 cavalry, 8214 artillery, 455 train, 1703 engineers, and 602 staff, etc., with 3360 officers, and the war strength is estimated to be 145,000. The forts of the Meuse are completed. The great objection raised against them by nearly all military men is that the present army organisation of Belgium cannot furnish the men necessary for their defence. They say the mobilisation would produce only a little above 100,000 men, and that, therefore, sufficient garrisons for Antwerp and the Meuse forts could not be provided. They estimate the number of men necessary for an efficient defence of Belgium at 185,000 men; and urge that steps shall be taken to make this force available. On mobilisation 4 army divisions are to be formed, each of 4 regiments, and a carabineer battalion, with 2 squadrons, 8 field batteries, 1 company of engineers, with train and auxiliary services. In '99 the creation of a cyclist company in each battalion of carabineers was authorised.

Brazil.—Gradual progress is being made in the reorganisation of the army, but much remains yet to be done. The strength and organisation given in the official *Revista Militar* (March '99) is as follows: staff, 28; engineer corps, 66; general staff corps, 124; medical staff, 163; artillery staff, 62; six regiments of

artillery, 2562; six battalions of artillery, 2100; two battalions of engineers, 862; fourteen cavalry regiments, 6,020; one transport corps, 292; forty infantry battalions, 17,840; total, 30,119. The troops are divided into seven military districts, the most important being Rio Grande do Sul (11,226 men).

Bulgaria.—On Dec. 16th, '97, the Sobranje voted a law regulating the progressive development of the army, which has very nearly reached its proposed establishment. There now exist 24 regiments of infantry (each of 2 battalions of 4 companies, and 1 company of non-combatants). These regiments are grouped in 12 brigades and 6 divisions. This composition is final. The law of '97 ordered the formation of a certain number of infantry battalions for garrison fortresses. There already exist six companies of fortress infantry at Silistria. The following is the composition of the corps for frontier defence: 1 battalion of 3 companies in the district of the 1st and 2nd divisions; 1 battalion of 2 companies in the 6th district, and 1 detached company in each of the 3rd, 4th, and 5th districts. The cavalry actually consists of 2 regiments, each of 5 squadrons and 1 squadron of non-combatants, and 3 regiments of 4 squadrons and 1 squadron of non-combatants, and 1 squadron of the guard. There remains to form a 6th regiment, for which purposes the 2 extra squadrons from the 1st and 2nd regiments may be utilised. The 6 regiments of field artillery now form 3 groups of 3 batteries each, and there are 3 groups of 3 mountain batteries. The garrison artillery includes 3 battalions of 5 companies; 5 Howitzer batteries have still to be formed, 1 for the 1st battalion, and 2 to each of the two others. There are 3 battalions of pioneers of 4 companies, with 1 section of non-combatants, and 1 technical battalion of 3 companies (1 railway, 1 telegraph, and 1 pontoon company). The establishment of the auxiliary troops is complete, and consists of 6 military train companies, attached to the 6 field artillery regiments, 6 divisional hospitals, 2 artillery depot workshops, and 2 remount depots.

Chili.—The army does not exceed 6000 men, in accordance with the law of Feb. 2nd, '92, and the formations are: 7 regiments of infantry, 4 of cavalry, 3 of artillery, and a corps of engineers. The National Guard numbers over 50,000 men.

China.—According to the most credible accounts very little improvement has been made in the Chinese army since the war with Japan, which revealed its worthless character. Major Baron von Reitzingen, of the German army, with the rank of general in the Chinese service, has for some time been engaged in reorganising a portion of the army. It was never easy to ascertain facts concerning the Chinese forces. The *élite* of the army was composed of the Shen-Che-Ying or Black Flag troops, and the Pa-Ki or Eight Banner men. The former were said to number 50,000 men with the colours. These men more nearly approach our European standard in drill and arms than any other troops in the Imperial service. The nucleus of the Black Flags was constituted of the veterans of Gordon's army which suppressed the Taiping rebellion, and the troops had been trained largely by European officers, who had spoken highly of their steadiness and efficiency in drill. Next in importance to the Black Flags come

the Banner men of the army of Manchuria, composed of soldier-like troops, but some of them still armed with bow-and-arrows, or with the old gingall. The Banner men are estimated at something like 300,000. They consist largely of Manchus, Mongols and Chinese or Han-chun. Service with the Manchus is hereditary, and the Banner men are still the chief support of the T'at-sing dynasty. The army of Manchuria, in the war with Japan, was raised from the Banner men of Fengtien, Kirin, and Hei-lung-chiang. These were all fighting men, perhaps 180,000 in all; but fully 100,000 had received no European training. Outside the ranks of the Black Flags and Banner men and other Manchurian forces, of whom perhaps 175,000 possess various modern arms, and are drilled somewhat upon the European plan, is the vast array of the Luh-ying or Green Flags, with a paper strength of 500,000 men, scattered through the empire, under the control of the local viceroys and governors. This heterogeneous force possesses little military value, and as now organised can be of no real service. But the reverses of the Chinese are not unlikely to give something of new character to their military defences, and the army will probably yet be stripped of some of its archaic character; though nothing can avail if the corruption and nepotism of the official classes be allowed to prevail. It is quite the rule for the generals and local governors to maintain only a small proportion of the established force, and to draw pay for the whole. Wages paid to soldiers are insufficient, and the deficiency is made good by pillage or fraud. In one province men are exercised with antiquated lances, halberds, and pikes, in another with Martini rifles, and in another with the German 1888 model, and Krupp and Armstrong guns are alternately ordered with Nordenfelts, and are left to rust and become useless. During his visit to China Lord Charles Beresford saw all the armies, arsenals, dockyards, forts, ships, and schools, and found them in a deplorable state. He was of opinion that an army of 200,000 men might be maintained with the same Budget as at present if waste were avoided. The Viceroys whom he saw approved his suggestions for reorganisation. A statement has been made (Nov. '99) that the Emperor has ordered the formation of a sort of national guard.

Denmark.—Service is obligatory on all able-bodied men who have reached the age of 22. Terms of service, eight years with the colours and eight in the extra reserve. A reorganisation of the Danish army was introduced in '94, and the late War Minister, General Bahnson, calculated that the contingent brought under training 7947 men yearly. The service in the various branches of the army is 16 years, but, reckoning 14 years only, and allowing for waste, the General concludes that by the year 1910 Denmark will be able to mobilise 83,000 men, of whom 58,500 will be infantry, 5000 cavalry, 6800 field artillery, and 8600 fortress artillery. The really effective force would be about 70,000. At present the peace strength (31 battalions, 16 squadrons, and 12 field batteries, with fortress artillery and engineers) is 13,750, increased on mobilisation to 50,000.

Egypt.—In the operations in the Soudan the Egyptian forces have displayed most admirable soldier-like qualities under British officers. They are a fine example of what our officers

can make out of the soldiery of native races. After Tel-el-Kebir and the victories of the Mahdi practically no army remained; but now the Egyptian army in physique, training, and soldierly qualities, compares well even with the armies of Europe. Under strong leadership, and the command of British officers, it has lately shown what it is made of in the victories of the Atbara and Omdurman. Until the last campaign, when the proportion was higher, the normal number of white officers has been three to an Egyptian and four to a Soudanese battalion. When first raised, in '83, after the campaign of the previous year, the army consisted of about 6000 men, but was gradually increased until the existing establishment was reached. All the inhabitants are liable for service—six years in the army, five in the police, and four in the reserve, and there are always about 150,000 young men on the rolls for conscription; but the burden is very light, and the men are all selected. The army now consists of 18 battalions of infantry, 10 squadrons of cavalry, 1 horse and 4 field batteries (each with a British officer in command), and Maxims, a camel corps of 8 companies, and non-combatant services. The cavalry are recruited from the fellaheen of the Delta, and the training was uphill work. The infantry battalions are drawn mostly from the fellaheen, but 6 are Soudanese blacks. The first are filled by conscription, and have about 800 men each, mostly fellaheen, in 6 companies. The interior economy and drill of the recruits is excellent, and the musketry good. The arm is the Martini-Henry. In the Soudanese battalions the service is voluntary, the pay higher, and the service practically for life. This force was raised largely from the Khalifa's Bazingers or black riflemen, but men from Lower Egypt have been enlisted. The surrender of many of the Soudanese tribesmen has opened fields for recruiting this force which have long been closed. The artillery is the force that shows the impress most markedly of the European training. The Egyptian is an excellent gunner, and takes to the work with enthusiasm. The horse battery has Syrian horses and light Krupp guns. The field batteries have Krupp mountain guns carried by mules, with a second line of camels. There is also a battalion of garrison artillery, organised as in our service. The effective strength of the Egyptian forces is about 18,000. More than 140 British officers were employed in the Egyptian army during the last campaign. The command is vested in Lord Kitchener of Khartoum with the title of Sirdar.

France.—The gradual reorganisation and increase of the French army at the present time going forward in virtue of the law of March '97 is steadily continued, though the contingent arising from the class of '98 having fallen below the estimate to the extent of 23,000 men, some delay may occur. There are 18 regional infantry regiments, and in each subdivisional infantry regiment a fourth battalion is being formed, making 145 new battalions in all; but these are organised progressively, as the means become available. In the autumn of '97 12 battalions were added in the 6th and 15th corps, and 40 others were provided for by the estimates of '98, while 24 remained to be added under the estimates of '99-1900. When the measure has been fully carried out the French infantry will have an increased peace establishment of 50,000

men. The estimated strength for '99 is 28,862 officers and 561,319 men of the Active Army, 742 officers and 25,169 men of the gendarmerie, and 142,333 horses. A considerable increase of officers is due to the new formations, to the creation of a 20th battalion of engineers and of certain field batteries, and a large addition to the medical branch. In 1900 there is to be an increase (estimated) of 315 officers, 4287 men, 35 gendarmes and 702 horses, and an addition of 4 battalions of Zouaves, 8 of Algerian rifles, 2 of the foreign legion, 21 companies for the fourth battalions, 2 battalions of foot artillery, and the staff of 2 battalions. The Army in '99 is constituted as follows: 652 battalions of Infantry, 30 battalions of Chasseurs, 10 Foreign, 20 Zouaves, 22 Algerian Tirailleurs, and 5 African Light Infantry. The Cavalry form 31 regiments of Dragoons, 21 of Chasseurs, 14 of Hussars, 13 of Cuirassiers, 6 of Chasseurs d'Afrique (all of 5 squadrons), and 4 of Spahis, variously constituted, numbering in all 446 squadrons. The organisation of the Artillery is as follows: Field batteries, 434; Horse batteries, 52; Mountain batteries, 22; Foot (or Fortress) batteries, 112: in all, 620. The Engineers (including Railway troops) number 5 regiments (12 battalions and 3 Train companies); and the Military Train has 20 squadrons (comprising 72 companies). The conditions of service have been modified three times during about twenty years. The law of July 15th, '89, practically abolished all exemptions, and extended the period of service to twenty-five years, thus adding five years; but reduced the time to be served with the colours to three years. The law of '92 added three years to the time to be spent in the Active Reserve, and correspondingly reduced the period to be passed in the Territorial Reserve. In future, every Frenchman should serve three years in the Active Army, ten years in the Reserve of the Active Army, six years in the Territorial Army, and six years in the Reserve of the Territorial Army. A *loi d'encadrement*, having for its purpose to provide for the embodiment of the Reserve Forces upon mobilisation, has not fully answered expectations. There is now constituted in every infantry regiment a *cadre complémentaire*, the purpose being to consolidate the Reserves, and the officers of this *cadre* are partly sufficing for the new fourth battalions. For administration, training, and mobilisation, the units of the Territorial Army, as well as the Active Reserve, are attached to the corresponding units of the Active Army. The Reserve Troops are: 145 Infantry regiments, 30 Chasseur battalions, 38 Cavalry regiments formed with the Line and Light Cavalry regiments of the Corps Cavalry Brigades, 41 other squadrons formed with the Divisional Cavalry regiments, and 216 batteries of Field Artillery, 12 to each Artillery brigade. All these are attached to the Active Forces, charged with their administration, mobilisation and command. The Territorial Forces are 145 battalions of Infantry, 7 of Rifles, 10 of Zouaves, 40 battery groups of Field Artillery and 16 of Foot Artillery, 21 battalions of Engineers, and 19 squadrons of Train. There are special dispositions in regard to some army corps, and a large number of battalions and independent companies are employed in the Customs and Forest service. In regard to the localisation of the troops, it should be noted that a large

force is quartered in the region of the 6th corps on the German frontier. The 6th corps has now been divided into two, and a new corps thus created. It is in this region that the new battalions are to be formed by constituting the *cadres* in great part from the regiments themselves. The Reserve of the Active Army includes about 1,320,000 men, and the Territorial Army and its Reserve about 2,270,000. It has been estimated that the French Army, with its various Reserve and Territorial Forces, includes 4,160,000 trained men on a war footing, and that 4,000,000 untrained might be embodied. In '98, 230,783 young men were embodied in the army, of whom 154,124 for two or three years, and the remainder for one year.

Germany.—A further increase of the German army was brought about by a reorganising Act which came into force on Oct. 1st, '99. The reorganisation which was to take effect from April 1st, '97, had been completed as planned. By the Army Act of '93, a two years' colour service was introduced, and the enrolled peace establishment from Oct. 1st, '93, until March 31st, '99, was fixed at 479,229 men. The main effect of the Act was to enable 70,000 men more than formerly to be called to the colours every year, and in this manner to increase the reserves of trained men. The fourth half-battalions, 173 in number, which had been formed, were intended to act as auxiliary and training depôts for the senior battalions; but the system was cumbersome, and resulted in over 15,000 men being passed into the reserve yearly, imperfectly trained according to the German standard. Accordingly, by the further reorganisation, these skeleton formations were linked and strengthened, thus creating full battalions, united as regiments, the purpose being to add a brigade to each army corps. The effect of the new disposition was to furnish the army with 625 battalions of infantry, instead of 538 as prescribed in '93. The number of regiments has risen from 173 to 215—33 Prussian, 2 Würtemberg, 3 Saxon, and 2 Bavarian regiments being formed out of the late fourth half-battalions. Under the new military law of '99 there will be, at the end of the financial year 1902, 625 battalions of Infantry, 482 squadrons of Cavalry, 754 batteries of Field Artillery, 38 battalions of Foot Artillery, 25 battalions of Pioneers, 11 battalions of Army Service Troops, and 23 battalions of Train, with a peace strength rising in 1903 to 495,500 men, exclusive of one-year volunteers. On Oct. 1st, '99, the reorganisation of the artillery was completed, the corps artillery being suppressed and the batteries being distributed among the divisions. At the present time there are 94 Field Artillery regiments with 574 batteries. The service in the standing army is of six years, two of these with the colours in the infantry and three in the cavalry and horse artillery, and the rest in the reserve. After quitting the reserve of the Active Army the soldier passes five years in the Landwehr and seven in its reserve. The recruiting service of the Guard, consisting of the tallest and finest-looking men, is carried out by a commission consisting of officers specially nominated for the purpose. Under the system of recruiting there are always more men than are necessary to keep up the army strength, the surplus constituting the Ersatz Reserve. The peace strength of the army,

under the estimates of '99, is 23,730 officers (an increase of 554), 79,873 non-commissioned officers (increase 1666), 491,826 men (increase 12,597), and 4952 paymasters, veterinary officers, armourers, and saddlers, with about 125,000 horses. The strength upon mobilisation is estimated at nearly 4,000,000 trained men. The general staff by which the work of the Army is prepared for in peace and moulded in war is at once a close and yet flexible organisation, which permeates the whole structure of the army, consisting for Prussia of about 200 officers. Nearly 100 of these are detached on service with the staffs of corps or divisions, while the remainder constitute the great general staff in Berlin. There is constant interchange between regimental work and staff work, and between the latter locally and with the headquarters' staff in Berlin. Scarcely any regimental officer rises high in his corps without having been called to staff service, so that the ideas of the staff are based upon practical experience, and react upon the whole army, to which they come as a kind of tradition of duty and policy, sharpening and directing the life and work of the army. Recently the inspection of the cavalry and artillery has been improved. A quick-firing field gun has been provided for the artillery, concerning which the *Times* correspondent, who was present during the manœuvres of '99, says that the death-dealing capacity of the army has been thereby enormously increased. The gun is said to be three times more formidable, owing to the rapidity with which it can be loaded and laid, than the powerful cannon it superseded. The ammunition is fixed like that of an ordinary rifle, cartridge and shell, whether shrapnel or high explosive, being combined in the same case. He believed the German gunners calculate on being able to fire at least five aimed rounds a minute, as against two—at most—of their former weapons.

Greece.—During the war with Turkey the Greek army gave proof of the ineptitude of its officers, the want of discipline in its men, and the extreme weakness of its organisation. Service is for 2 years with the colours and 8 in the reserve, 8 in the National Guard and 10 in its reserve; the cavalry, however, spending 10 years in the National Guard and 8 in its reserve. The **Standing Army** consists of ten Infantry regiments, eight battalions of light infantry and rifles, three Cavalry regiments, and three regiments of Field Artillery. Two battalions go to a regiment with a *cadre* battalion, and four companies to a battalion. The Cavalry regiments are in four squadrons. The Artillery is divided into eleven Field and nine Mountain batteries, with 120 guns. The Engineer corps consists of a double battalion regiment, exclusive of the Survey, Sanitary, and Intendance companies. The *Gendarmerie* consists of sixteen divisions, and the men are borne upon the strength of the line. The peace strength of the army is 1880 officers and 23,453 men, with 3294 horses and mules. As a matter of fact these numbers are never attained under ordinary circumstances, the number with the colours varying from 16,000 to 18,000. There are three general commands. The total war strength is 82,000 men, and 114 guns. Including the territorial army, and its reserve, there are said to be some 200,000 men available, but the organisation is very defec-

tive. The Evzonoi highlanders are by far the best troops.

Italy.—The gradual reorganisation of the Italian army is still progressing. The organisation of '94 was modified by a law passed in June '97, laying down the principle to be followed, the details being left to be determined by decrees having the force of law (see the *ANNUAL* for '98 and '99 for some details). The troops are divided among 12 army corps, each of 2 infantry divisions. The Infantry have therefore 48 line brigades, including 96 regiments, each of three battalions, and a *dépôt*; 12 regiments of Bersaglieri similarly constituted; 7 Alpine regiments (75 companies and *dépôts*). These troops are assigned to 88 military districts, with disciplinary companies, etc. In the Cavalry the 24 regiments (each 6 squadrons) are in 9 brigades, with 4 remount *dépôts*. The Artillery is formed in 24 regiments, and comprises 146 batteries and 36 companies of train, in addition to a horse regiment of 6 batteries, a mountain regiment of 15 batteries, and 21 fortress brigades. The Engineers have 5 regiments of sappers and 10 companies of train, with a Railway Brigade of 6 companies. The mobilisation and training service of the army have also been modified. Liability to service, which is universal, commences at the completion of the twentieth year, and continues up to the completion of the thirty-ninth. The men are enrolled by lot in three classes. Those of the first class, if drafted to the Carabineers, serve five years with the colours and four with "unlimited leave"; if to the Cavalry, four years and five years respectively; and all ten years in the Territorial Militia with "unlimited leave." If drafted to other corps, the service is two or three years with the colours and six with "unlimited leave," four or three years in the Mobile Militia, and seven years in the Territorial Militia. The men of the second class are enrolled for eight years in the Standing Army with "unlimited leave," and four and seven years in the Militias; those of the third category serve their nineteen years wholly in the Territorial Militia. On June 30th, '97, the men on the list were 3,263,297, of whom 237,660 were with the colours (about 78 per 1000), and 3,025,637 on "unlimited leave," of which last class 556,984 belonged to the permanent army. In June '98 the conditions had improved, for though the list had fallen to 3,221,726, there were 310,602 with the colours (being 97 per 1000). The men on "unlimited leave" were 503,875 of the permanent army, 465,349 of the Mobile Militia, and 1,941,918 of the Territorial Militia. The following are particulars of the distribution by arms of the men with the colours: infantry, 195,815; cavalry, 24,760; artillery, 38,703; engineers, 13,953; carabineers, 26,594. Thus 98.17 of the total are accounted for, the rest being divided among the veterinary, hospital, educational, remount, and disciplinary services. These particulars are from the returns of '99.

Japan.—Events in the Far East direct new attention to the Japanese army. It is composed of excellent material, and is organised, armed, and drilled wholly upon the European system, under officers who have received their training in Germany and other European countries. In all respects the highest degree of mechanical efficiency has been maintained. The men are armed with the newest weapons of precision, turned out at a smaller Japanese

Woolwich. Conscription on the European model was introduced in '74. At the close of the war the army consisted of six divisions, and the Imperial Guard, with a peace footing of 70,000 in round numbers, and a war footing of 268,000 (exclusive of gendarmerie and Yesso Militia). By the end of '99 the army will have been organised in twelve divisions, apportioned among four chief commands, exclusive of the Guards, so that the peace footing should be 145,000, and the war footing 520,000. It is estimated that such a force can be maintained at an outlay of 26,167,043 yen, or £2,800,000 approximately. To meet the outlay upon the Army and Navy the Chinese indemnity has been largely depended upon; but difficulties have arisen, and the Government has resorted to a Public Undertakings Loan of 135,000,000 yen, spread over seven years. The existing military regulations were laid down by edict of '83. Every male inhabitant is subject to military service between 17 and 40 years of age in (a) the Standing Army, three years; (b) the Standing Army Reserve, four years; (c) the Territorial Army, five years; while the "National Army" (which corresponds to the European Landsturm) embodies all eligible men between 17 and 40 who have not been enrolled, or have completed their service, in the other branches of the service. The thirteen divisions of the army, including the division of the Guard, will consist of 26 Infantry brigades, each of 2 three-battalion regiments; 13 regiments of Cavalry, each formed in 5 squadrons; 13 regiments of Artillery, with 79 field and mountain batteries (to be increased in 1900 to 117 batteries, constituted in 39 groups of 3 batteries each); 13 battalions of Pioneers, comprising 28 companies (to be increased to 39 companies); 13 battalions of Train of 2 companies each; and 1 Railway and 1 Telegraph battalion, each of 3 companies. In addition to the thirteen divisions are 3 regiments of Coast and 2 battalions of Foot Artillery, as well as the Yesso Brigade, comprising 4 battalions of Infantry, besides Cavalry, Artillery, and Pioneers. The Army of the Second Line (garrisons and reserves) consists of 36 battalions of Infantry, besides Cavalry, Pioneers, and Depot Troops. The Military College and Academy train accomplished officers of great intelligence. They were pronounced by General Grant to be amongst the foremost of the kind in the world. The barracks and gymnasia are of the best type, and every care is paid to the physical development of the men.

Mexico.—A reorganisation of the Mexican army began in '97, and provides for the following standing army: 28 infantry battalions of 4 companies, 12 cadre battalions of 2 companies, 2 regional infantry battalions of 2 companies, 7 regional infantry companies, 1 battalion of pioneers of 4 companies, 1 battalion of invalids, 14 cavalry regiments of 4 squadrons, 8 cavalry cadre regiments of 2 squadrons, 4 four-battery battalions of field artillery, 1 machine-gun battalion, and some auxiliary formations. The peace strength is 2432 officers, 6547 non-commissioned officers, and 25,090 men, with 13,059 horses and mules, and the war strength 3600 officers and 144,500 of other ranks. The Infantry is armed with the Remington rifle. Guns are being manufactured at the New National Gun Foundry. The horses ridden by the Cavalry are small, but exceedingly hardy. Mules are mostly employed for draught pur-

poses. Recruiting is chiefly among full-blooded Indians, who are very brave and easily amenable to discipline. As soldiers they are excellent marchers, and are second to no other troops in the world on this score, and in frugality and contentment. The Military Academy is at Chapultepec, near the city of Mexico.

Netherlands.—Holland has at present no "Standing Army," but a cadre of officers and non-commissioned officers (establishment about 2200) for the training of an annual contingent of some 11,000 Schüttere or Militia. There is a force of **Volunteers**, with an establishment of about 10,000, which is rarely complete. The service is from six to eight years. All able-bodied males are liable to be drawn for the **Militia**, but about 11,000 only are embodied, the greater part of the force being on indefinite furlough. The combined establishment of Volunteers and Militia is about 14,000 men. The **combatant establishment** of the field army is 726 officers, 34,897 men, 3258 horses and 120 guns; and of the garrison troops, 362 officers and 16,744 men. The **Army of the Dutch East Indies** numbers about 35,000 officers and men. Proposals are made ('99) for a complete reorganisation of the regular forces, to comprise the Landwehr and the Landsturm, with a peace strength of about 20,000, and a volunteer establishment in time of war. The Militia is proposed to be increased to 12,300, to be permanently embodied, with 5200 more to be called up for short periods.

Norway.—Under the law of '66 the troops of the line were to number 12,000 men during peace, but with a war footing of 18,000 men. In '85 the strength of the troops of the line was still further increased by more than 3000 men. The force now available for service beyond the frontier numbers, with officers and men, 25,109. There is, however, the defect that there is no reserve of the line to fill up the gaps which might arise during a war, without taking men from the Militia (Landvaern). Besides the troops of the line there exists the Militia or Landvaern for the defence of Norway, in case the troops of the line should be taken over to Sweden.

Portugal.—The army has been reorganised ('99). The peace footing is now 30,000, including 19,912 Infantry, 4020 Cavalry, and 4419 Artillery (with 144 guns). In addition are 1570 officers. The war footing is 3114 officers and 145,639 rank and file, including 64,243 of the reserve forces. A new law was introduced in Sept. '95, by which the service is three years with the colours, five years with the first reserve and four with the second. There is in addition a colonial army of 9000. The rules of exemption are most liberal, a sum of money paid to the Government being accepted as an equivalent. There are 4 military districts—Lisbon, Vizeu, Oporto, and Evora, with garrisons at the Azores and Madeira.

Roumania.—Four army corps, the independent division in the Dobrudscha, and an independent cavalry division, together with Dorobanzen (infantry) and 8866 Kalaraschen (territorial cavalry) not permanently embodied. An independent cavalry division composed of 6 permanent regiments (Roschieri) has been formed. A new cavalry regiment (2 permanent and 2 half-permanent squadrons) has been attached to the Dobrudscha forces, and the remainder (10) of the Kalaraschi regiments are assigned to the 4 army corps. There has been a reorganisation, and the purpose is

to get rid gradually of the semi-permanent squadrons forming part of the Kalaraschi. The peace strength is 3089 officers, 44,400 non-commissioned officers and men, 366 field guns and 9000 horses, with 68,000 men and 9100 horses of the territorial class. The total war strength is 3940 officers, 167,316 men, 52,604 horses and 384 guns, or a fighting strength of over 140,000 men.

Russia.—We had to note, as the work of '08, a very important change in the creation of two new army corps, the 20th and 21st, in the military districts of Wilna and Kiev; and the work of local organisation has since proceeded, some of the reserve formations being brought up to the first line. A third independent cavalry brigade formed of 2 new regiments has also been added, and the artillery has been increased by the addition of about 70 batteries. The vast organisation of the Russian army is not easy to describe. The peace strength is given thus:

	Europe and the Caucasus.	Elsewhere.
Infantry . .	497,000 men.	66,000 men.
Cavalry . .	109,000 "	10,000 "
Artillery . .	107,000 "	8,000 "
Engineers . .	21,000 "	3,000 "
Administration	34,000 "	5,000 "
Total . .	768,000 "	92,000 "

Vast bodies of troops are massed on the western frontier, facing Germany and Austria; there is a great army in the Caucasus; two army corps are in Turkestan and Transcaspia; and the strengthening of the troops in the district of the Amur goes on progressively. The Russian field force in Eastern Siberia, upon a war footing, consists of: Cavalry, 38 squadrons; Artillery, 17 batteries; Infantry, 37 battalions. There are in addition 5 battalions of Garrison Infantry, and 7 companies of Garrison Artillery, together with Engineers and a Submarine Mining Corps, for the local defence of Vladivostok. Exclusive of an Infantry battalion and a company of garrison Artillery quartered at Nikolaviesk at the mouth of the Amur, the Russian forces are distributed in two main groups east and west of the Manchurian frontier. In the neighbourhood of Vladivostok, on the adjacent frontier, and at Grafskaya, Iman, and Khabarovka on the railway, there are about: Cavalry, 10 squadrons; Artillery, 13 batteries (including 2 6-in. mortar batteries); Infantry, 18 battalions. At Verkhni Udinsk in the extreme west, and echeloned along the Shilka river, there are: Cavalry, 18 squadrons; Artillery, 2 batteries; Infantry, 17 battalions. Along the northern frontier, at the important port of Blagovestchensk, on the Amur, and at Ekaterino-Nikolskaya there are 2 battalions, 6 squadrons, and 3 squadrons respectively. The headquarters of the Commander-in-chief of the Ussuri force are at Nikolski on the railway, a short distance to the north of Vladivostok. The law of compulsory service dates from '74. For Finland compulsory service came into force on Jan. 1st, '81. The incorporation of the Finnish army with the Russian forces has caused violent opposition among the Finnish people. The period of liability to personal service lasts from the twenty-first to the forty-third year of age in Russia. Those who join the Standing Army spend five years with the

colours (four in the Infantry), thirteen in the Reserve, and the remainder in the Opoltschenie, or Militia. In some instances, however, the War Minister has power to retain men for a longer period with the colours; whilst, on the other hand, this period is shortened by one, two, three, or four years for those possessing a superior education. The Opoltschenie, which has been developed from a simple militia into a first reserve formation, now embraces two different classes: (1) Men between twenty-one and forty-three years of age, who have never served; (2) men who have completed five years' service with the colours and thirteen years in the Reserve. The ages of the men vary between thirty-nine and forty-three years. The organisation of the Cossacks is on a different footing. Every Cossack becomes liable to serve as soon as he has completed his eighteenth year. For the first three years, which are looked on as "preparatory," his service is, however, purely local; but for the next twelve years he is considered as belonging to the "front" category. This category consists of three bans, the first of which is formed of men actually serving, and the two others of men who have been granted unlimited leave. The last five years are spent in the Reserve category. There is, however, a still further category, for which no limit of age is fixed: this comprises all able-bodied Cossacks not otherwise classified. The Cossacks have to supply and maintain their own horses, besides providing their own clothing and equipment. In the Russian Empire some 950,000 men annually attain the age for joining the Army, and of these approximately 265,000 are entered, in addition to some 2500 Caucasians. Seventy per cent. of the men so entered are illiterates. About 5000 enlist annually as volunteers, and 16,000 join the Cossacks. The war strength of the Russian forces consists of about 2,500,000 men. These form the Active Army of all classes. To these figures must be added the available Reserve, estimated at 1,064,000; Frontier battalions, 41,000; Cossacks, 142,000. There are besides these the Territorial Reserve, some 2,000,000 men, and the National Militia, 1,200,000, which could be employed in case of emergency. It is expected that under new organisation the Opoltschenie, or Militia, in time of war will form 40 Infantry divisions, 640 battalions; 20 regiments of Cavalry, 80 squadrons; 80 batteries of Artillery, and 20 battalions of Sappers; but owing to the vast distances to be covered, and the want of railway accommodation, the mobilisation of this great force would be neither easy nor rapid. In regard to the embodiment of the reserve force in the event of war great advances have been made by the establishment of brigade commands and the organisation of reserve brigades.

Servia.—The Servian army has undergone many changes in '99, the effect of which has been to reduce its effective, and diminish the period of obligatory service. The obligation now begins at the completion of the 21st year, and the man serves 10 years in the active army (of which 2 are with the colours), and 7 years each in the first and second bans of the national army. The strength of the active army remains as before, 128,000 men; but the first ban has been reduced from 106,000 to 76,000, and the second from 89,000 to 64,000. The effective

upon mobilisation has thus been diminished from 323,000 to 268,000.

Spain.—Before the war with the United States Spain maintained a force of 125,000 in the Peninsula, 184,000 in Cuba, 40,000 in the Philippines, and 6000 in Porto Rico; but through motives of economy and the loss of the colonies, the Peninsular Army has been reduced to 80,000, and the total force, under the decrees of '99—including the administrative services, etc., and troops in the Canaries, Balearic Islands, and Africa—is 99,938, with 7642 officers, and 16,525 horses and mules. There are in all about 23,000 officers, provided for the old establishment, but the supernumeraries are on half pay, and their places are not being filled. There are eight captain-generals, but the eight army corps are replaced by divisions. The headquarters are respectively: 1st, Madrid; 2nd, Seville; 3rd, Valentia; 4th, Barcelona; 5th, Saragossa; 6th, Burgos; 7th, Valladolid; 8th, Corunna. The following is the constitution, by units, of the army: Infantry, 56 regiments, 20 battalions of Chasseurs, 4 African regiments, 1 disciplinary battalion at Melilla (500 men), 2 regiments in the Balearic Isles, various formations in the Canaries, recruiting *cadres*, etc. The Cavalry, 28 regiments. Artillery, 13 Field, 1 Siege and 3 Mountain regiments (all with four 6-gun batteries), 10 Fortress battalions, 1 Central Gunnery School, 1 Central Remount Committee, 4 companies of Artificers, and 8 Reserve Depôts. The Engineer Corps consists of 4 regiments of Sappers and Miners, 1 Pontoon regiment, 1 Telegraph battalion, 1 Railway battalion, 1 Topographical brigade, 1 division of Artificers, and 7 Reserve Depôts, with a separate company of Sappers and Miners for the Balearic Islands. Each of the regiments consists of two battalions, one of which, however, is only organised as a *cadre* in peace time. For recruiting purposes the Peninsula has 116 districts, the Canaries and Balearics have 2, and Ceuta and Melilla have 2.

Sweden.—The army has 104 battalions of Infantry, 24 squadrons of Cavalry, 12 companies of Guides, and 50 batteries of Artillery. The obligation of service is twenty years—eight in the first line, four in the second, and eight in the Landsturm, which is not yet organised. The permanent establishment consists of skeleton forces, and the men called out for service are embodied for training periods each year, 90 days continuously in the Cavalry and Artillery, and in the other arms 68 days in the first year and 22 in the second. The peace strength is 1905 officers, 36,265 men, and 6742 horses, largely increased at training times. This estimate includes the Gothland forces, which have a separate establishment. The war strength is 52,300 men, but the embodying of all the classes would give 100,000. A large sum of money is proposed to be spent upon the defences of Stockholm, Carlskrona, Upper Norrland, and Gothenburg. The war budget of 1900 amounts to 27,457,956 crowns. The Parliament declined to vote money for a complete mobilisation of one division of the army.

Switzerland.—The Swiss army is a federal organisation, composed of excellent material, and maintained in a state of efficiency. The principle is that of a militia, the liability to serve being twelve years in the Active Army, or Elite, twelve in the Landwehr, and six in

the Landsturm. During the twelve years in the Elite the aggregate service is 141 days in the Infantry, 146 in the Engineers, 160 in the Cavalry, and 163 in the Artillery. The unification of the army has been agitated since '48, and the movement to bring this about took firmer character after the war of '70. In June '95 a large project, tending to practical unification, was approved by the Federal Council, but afterwards rejected by the referendum, the Swiss people thus pronouncing against further centralisation. The effective of the forces is: Elite, 144,822, being 3468 more than in '97; Landwehr, 70,000; Landsturm, about 300,000, of whom about 60,000 are trained. The recruits number 18,680, being a considerable increase upon previous levies. A fundamental law forbids the maintenance of a standing army.

Transvaal.—Burghers are liable for service between the ages of 16 and 60, and in practice the first levy is from 18 to 34, and the second from 34 to 50. Each man ordinarily provides himself with rifle, ammunition, saddlery, clothing, etc. The levies are made by the field cornets of the districts, and the system is that of the "commando." The only permanently embodied force is the State Artillery. In '80-'81 the Boer force under arms never reached a total of 5000 men. The Dutch population of the Transvaal has since increased, and now probably numbers at least 70,000. The material military resources have augmented in greater proportion, and the total military expenditure in '96-'97 was about £943,000. Large numbers of foreign mercenaries are in the pay of the Boers, and it is difficult to approximate the force the Transvaal and the Orange Free State have in the field (Nov. '99), but the Boers themselves probably number 55,000.

Turkey.—The Turkish military forces are organised on the territorial system, the whole empire being divided into seven territorial districts. By the recruiting law all Mussulmans are liable to military service. Christians and certain sects pay an exemption tax. The nomad Arabs, although liable to service by law, furnish no recruits, and many Kurds evade service. The conscription therefore falls somewhat heavily on the Osmanlis, or Turks proper. The men liable to service are divided into—(1) Nizam, or regular army, and its reserve; (2) Redif, corresponding to Landwehr; and (3) Mustahfur, or Landsturm. Liability to service commences at twenty years of age, and lasts for twenty years—*i.e.*, with colours of Active Army, four years; in the Reserve of Active Army, two years; in Landwehr, four years in first class, and four years in second class; and in Landsturm, six years. The Cavalry are set down at 55,300; the Artillery (174 field and 22 mountain batteries) at 54,720—1356 guns; the Engineers at 7400; Infantry, 583,200. The officers number in all 23,931, of whom 19,612 are on the active list. An irregular "Hamidieh" Cavalry has been raised among the Kurds, and has been responsible for much outrage. The Ottoman Army has been trained and reorganised largely by German officers, and is composed of the best fighting material, as the recent war with Greece proved. A new force ('99), known as the Ilave battalions, is being created as a skeleton formation for the embodiment of men on mobilisation. There are nominally 170 of these battalions, but the

formation is not complete, and the organisation will be progressive.

United States.—In April, '98, before the outbreak of the war, the strength of the regular army was 2143 officers and 26,040 men, increased during the war (Aug '98) to 2323 officers and 56,365 men. At the same period the volunteer army numbered 8785 officers and 207,244 men. Within a month of the President's call for volunteers, nearly 125,000 had been embodied. The troops actually engaged in the operations abroad were approximately 52,000 men. The term of service is 5 years, with power to re-engage. By orders of March '99, in pursuance of Act of Congress, the regular army was re-organised as follows: Cavalry, 10 regiments, 12,340 men; Artillery, 12 heavy batteries and 2 field batteries, 11,970 men; Infantry, 25 regiments, 34,450 men; Engineers, 1 battalion, 752 men: total, 59,512. The staff departments, hospital corps, ordnance, and some other departments complete a total force of 64,572, exclusive of officers.

. In consequence of the constant changes in the armies of Foreign Powers, the figures given are liable to variation.

FOREIGN NAVIES.

Subjoined are the latest (Nov. '99) details of the progress made in naval affairs by the chief maritime Powers. It should be noted by those who consult these or other lists of navies that, although the larger vessels referred to therein are classified as either battleships or armoured vessels, and cruisers or protected vessels, such classification, by whomsoever used, is quite relative. There are many so-called "protected cruisers" which are quite capable of holding their own with certain of the so-called "armoured battleships"; but because this is the case, it must not be hastily assumed that all cruisers can adequately fulfil the duties of a battleship. If, in any circumstances, a cruiser takes her place in the line of battle, then she becomes a battleship; and it is obvious that where the navies of two belligerent Powers are principally composed of vessels which in Europe would be classed as cruisers and perform cruiser work, these must take their places in the line of battle. Vessels which are classified as "armoured" have protection given to them in patches by iron, composite, or steel armour, vertically placed on the hull or gun positions, nearly always in conjunction with armoured decks. "Protected" vessels, on the other hand, have their chief defence in sloping armoured decks and shields around the gun positions. Coal is used as a secondary defence in both classes of vessels, and all the larger ships in both categories have armoured conning towers for the protection of the captain, helmsmen, and officers directing the movements of the vessel and the use of her armament.

Argentine Republic.—The Argentine navy has latterly been greatly strengthened by the purchase of vessels abroad, and there is activity in all the naval departments, the new naval port of Belgrano at Bahia Blanca absorbing large sums. The Italian Government sanctioned the sale of the *Garibaldi*, *San Martin*, *Belgrano*, and *Pueyrredon* to the Republic. These vessels are sisters, approximating 6882 tons in displacement, with some differences in their armament. The new vessels are very

fine armoured cruisers of great speed and range, with 6-in. armour and other good protection. The Florio Company has sold to the Argentine Republic the steamships *Arno*, *Regina Margherita*, and *Sempione*, to be converted into cruisers. An account of the new vessels of the torpedo flotilla will be found in the ANNUAL of '98. The small armoured *Almirante Brown* has received, instead of her eight 8-in. breechloaders, a new armament of ten 5.9-in. Canet quick-firers, two fore, two aft, and six in the battery, in a French yard. The following is a list of the principal ships of the fleet:—

Armoured.

Ships.	Tons.	I.H.P.	Principal Ordnance.
Garibaldi . .	6,840	13,000	2 10" B., 10 6" q.f.
San Martin . .	6,882	13,000	4 8" q.f., 10 6"
Belgrano . .	6,882	13,000	2 10" B., 14 6" q.f.
Pueyrredon . .	6,882	13,000	2 10" B., 10 6" q.f.
Almirante Brown.	4,200	5,380	10 5.9" q.f., 4 4.7"

Gun-vessels.

Argentina . .	820	850	1 6" B.
Parana . .	550	475	2 6" B., 2 4.5" B.
Uruguay . .	550	475	2 6" B., 2 4.5" B.

Torpedo Gun-vessels.

Patria . .	1,225	4,500	2 4.7" q.f., 4 8-pr. q.f.
Espora . .	515	3,250	2 14-pr. q.f., 1 9-pr. q.f.
Aurora . .	500	2,300	2 20-pr. q.f., 4 3-pr. q.f.

Torpedo-boats: The armoured destroyers *Santa Fé*, *Corrientes*, *Misiones*, and *Entre Rios* (190 ft., 280 tons); *Commodore Py* and *Murature*, 150 ft. long, 110 tons, 25 knots speed; *Bathurst*, *Buchardo*, *Jorge*, *King*, *Thorne*, and *Pinedo*, 130 ft. long, 82 tons, 23-24 knots speed; *Alerta*, *Centella*, *Ferre* and *Py*, 100 ft. long, 52 tons, 20 knots speed; *Nos.* 1 to 8, 60 ft. long, 16 tons, 17 knots speed; *Nos.* 9 and 10, 60 ft. 6 in. long, 17 knots speed; and four vedette boats.

Austria-Hungary.—No great progress has yet been made towards the expansion of the Austrian fleet, to which allusion was made in the ANNUAL last year. Many of the older vessels are quite obsolete, and it is intended to replace these by modern vessels, on the basis of creating a fleet of 15 armoured clads of from 6000 to 9000 tons, 7 cruisers of from 4000 to 7000 tons, and 7 others between 1500 and 2500 tons, with 15 torpedo gunboats and 90 torpedo-boats. The estimated expenditure is 55,000,000 fl., and would be spread over a period of ten years. The so-called coast-defence vessels—really small and powerful battleships—*Monarch*, *Wien*, and *Budapest*, are completed. The last-named was described in the ANNUAL of '97. The new armoured cruiser *Kaiser Karl VI.* has a displacement of 6250 tons, and her length is 367 ft. 6 in. In addition to the belt and the armoured citadel, the ship has a cellular bottom and numerous water-tight compartments. The armoured turrets will be worked by electricity, and there will be eight 5.9-in. quick-firers and other light guns in an armoured redoubt. Two other small battle-

ships of 8330 tons are in hand, as well as a couple of torpedo gunboats, to replace the *Helgoland* and *Fasana*. The new battleships will have water-tube boilers of 11,000 horsepower, and an armament of 3 9.4-in. guns and 12 5.9-in. and 24 smaller quick-firers. The following are the more important vessels of the fleet:—

Armoured.

Ships.	Tons.	I.H.P.	Principal Ordnance.
Rudolf . .	6,940	7,500	3 12" B., 6 4.7" B.
Stephanie . .	5,150	8,300	2 12" B., 6 5.9" B.
Custoza . .	7,060	4,400	8 10.2" B.
Karl VI. . .	6,250	12,300	2 9.4" B., 8 5.9" q.f.
Monarch . .	5,550	8,500	4 9.4" B., 6 5.9" q.f.
Wien . .	5,550	"	"
Budapest . .	5,550	"	"
Tegetthoff . .	7,390	8,800	6 9.4" B., 5 5.9" q.f.

Protected Cruisers.

Franz Josef I. .	4,030	9,000	2 9.4" B., 6 5.9" B.
Elizabeth . .	4,064	9,000	2 9.4" B., 6 5.9" B.
Maria Theresia .	5,274	10,000	2 9.4" B., 10 5.9" q.f.

Torpedo Gun-vessels.

Zenta . .	2,250	7,210	8 4.7" q.f. 10 3 pr.
Panther . .	1,528	6,000	2 4.7" B.
Leopard . .	1,528	6,000	2 4.7" B.
Tiger . .	1,684	5,260	4 4.7" B.
Lussin . .	1,011	1,830	2 5.9" B.
Sebenico . .	900	1,380	light guns.
Spalato . .	850	1,200	"
Zara . .	850	1,200	"
Meteor . .	380	3,500	"
Blitz . .	360	2,900	"
Komet . .	360	2,900	"
Planet . .	500	3,500	"
Satellit . .	540	4,000	"
Trabant . .	530	3,500	"

Austria also possesses two new armoured river monitors, *Körös* and *Szamos* (448 tons), and two older like vessels *Leitha* and *Maros* for the Danube. She has thirty first-class torpedo boats. The *Cobra*, *Boa*, *Kityvo*, and *Pythou* (152 ft. 6 in., 24 knots) were launched ('98) at Poplar. The *Adler* and *Falke* are of 135 ft. length and 22.4 knots speed, and the remainder, which are all named, of 128 ft. length and 17.5 knots to 21.5 knots speed.

Brazil.—The following is a list of the principal vessels:—

Armoured.

Ships.	Tons.	I.H.P.	Principal Ordnance.
24 de Maio . .	5,000	6,200	4 9.4" B., 4 5.5" B.
Riachuelo . .	5,700	6,000	4 9.2" B., 6 5.5" B.
Marshal Deodoro	3,162	3,400	2 9.4" B., 2 5.9"
Marshal Floriano	"	"	"
Bahia . .	930	1,600	2 7" M.
Alagoas . .	340	180	1 7" M.
Alaihu . .	340	180	1 7" M.
Rio Grande . .	340	180	1 7" M.

Protected Cruisers.

Tamandare . .	4,735	7,500	10 6" q.f., 2 4.7" q.f.
Barroso . .	3,450	7,500	6 6" q.f., 4 4.7" q.f.
5 de Novembro .	1,300	3,300	6 4.7" q.f., 4 6-pr. q.f.
Benj. Constant .	2,750	2,800	4 6" q.f., 8 4.7" q.f.

Cruisers.

Guanabara . .	1,910	3,000	9 6" M.
Tupy . .	1,030	6,000	2 4" q.f., 6 2.2" q.f.
Tiradentes . .	800	1,200	4 4.7" q.f., 3 6-pr. q.f.
Parnaahyba . .	740	900	1 6" M., 6 32-pr. B.
Primeiro di Março	730	750	7 4.7" B.
Aurora . .	480	2,300	2 20-pr. q.f., 4 3" q.f.
Niterheroy . .	1,790	800	14 70-pr. B.

Torpedo Gunboats.

Tamoyo . .	1,080	6,500	2 3'9" q.f., 6 2'2" q.f.
Caramuru . .	1,030	6,000	24", 2'2" q.f.
Tupy . .	"	"	"
Timbra . .	"	"	"

Seven screw gunboats of about 9 knots; two paddle gunboats of about 7 knots. **Torpedo-boats:** five (Nos. 1 to 5), of 52 tons and 29 knots; three (*Araguary*, *Iguatemi*, and *Marcelino Diaz*), of 150 tons and 25 knots; three Elbing boats of 130 tons and 26 knots; *Piratinny* (130 ft.), *Poty* (126 ft.), and others added during the revolt; besides six second-class boats and some smaller. The protected steel cruiser *Amazonas*, sister of the *Barroso*, described in the ANNUAL '97, launched at Elswick, as well as her sister, the *Abreu*, was sold to the United States at the outbreak of the war with Spain. The small armourclads, *Marshal Deodoro* and *Marshal Floriano* (3162 tons), are being completed at La Seyne.

Chili.—The Chilean navy, though small and not rapidly expanding, except in the matter of torpedo craft, is, next after the Argentine, the most efficient and important in South America. The following are the fighting-vessels:—

Armoured.

Ships.	Tons.	I.H.P.	Principal Ordnance.
O'Higgins . .	8,500	16,500	4 8" q.f. 10 6" q.f.
Esmeralda . .	7,000	18,000	2 8", 10 6" q.f.
Capitan Prat .	6,900	12,000	6 9'4" B., 8 4'7" q.f.
Alm. Cochrane .	3,500	2,920	6 8" B., 4 6-pr. q.f.
Huascar . .	1,760	1,050	2 8" B., 2 4'7" q.f.

Deck-Protected Cruisers.

Blanco Encalada	4,500	14,000	2 8" B., 10 6" q.f.
Ministro Zenteno	3,450	4,000	8 6" q.f.
Pres. Errazuriz	2,080	5,400	4 5'9" q.f.
Pres. Pinto . .	2,080	5,400	2 4'7" q.f.

Torpedo Gunboats.

Alm. Molinas . .	1,200	6,000	4 4'7" q.f.
Alm. Simpson . .	812	4,500	2 4'7" q.f.
Alm. Condell . .	750	4,500	3 14-pr. q.f.,
Alm. Lynch . .	750	4,500	4 3-pr. q.f.

The *General Baquedano*, a training cruiser of 2330 tons, carrying a quick-firing armament of four 4'7-in., two 12-pounders, and several smaller guns, was launched at Elswick in '98. Also four destroyers of 300 tons, launched at Birkenhead in '96, two others of the same class launched at Balcachuano in '98, seventeen first-class and four second-class torpedo-boats, two old corvettes, and eight small gunboats and transports. Four of the first-class torpedo-boats (*Viper* type) are newly built by Messrs. Laird at Birkenhead. Of these the trial speeds of the *Ingeniero Hyatt* and *Cirujano Videla* were 27'2 and 26'8 knots respectively. Of the finest vessels in the navy, the *Capitan Prat* was described in ed. '93, and the *Blanco Encalada* in ed. '94, the *Esmeralda*, steel built, sheathed and coppered, in ed. '97, and the *O'Higgins* in ed. '98. Until recently the Chilean destroyers have been built in England, but, upon the pattern of those supplied, two—the *Capitan Thompson*, and the *Teniente Rodriguez*—have lately been put into the water at Balcachuano, as well as a couple of first-class torpedo-boats.

China.—A few vessels have been added to the navy since the war with Japan. The *Kang-Chi* and the *Chen-Hai* were all that remained to her of the Pei-Yang squadron, and the southern squadron contains no ships of real value. The most important new vessels are

the sister cruisers *Hai-Chi* and *Hai-Tien*, of 4300 tons, launched at Elswick in '97 and '98. They are well protected, have engines of 17,000 horse-power, 24 knots speed, and carry an armament of two 8-in., ten 4'7-in., and twelve 3-pounder quick-firers. A torpedo cruiser of 850 tons, the *Fei-Ying*, has been added to the Pei-Yang force; and in '97 the protected cruisers *Hai-Yung*, *Hai-Shen*, and *Hai-Shew* for the same squadron, were launched at the Vulkan yard, Stettin. They displace 2950 tons, and are 315 ft. long, with 41 ft. beam and 16 ft. draught. They carry three 5'9-in., eight 4'7-in., and six 1'4-in. quick-firers, six Maxims, a light gun, and will have three torpedo tubes. Engines of 7500 I.H.P. are to give a speed of 19'5 knots. Several sea-going torpedo-boats, ordered before the war, have been added to the fleet.

Denmark.—The following are the principal modern vessels of the fleet:—

Armoured.

Name.	Tons.	I.H.P.	Principal Armament.
Iver Hvitfeldt .	3,260	5,100	2 10'2" 4 4'7".
Fordenskjold .	2,400	2,600	1 14" 4 4'7".
Skjold	2,150	2,200	1 9'4" 3 4'7".

Protected.

Valkyrien . .	2,900	5,300	2 8'2" 6 5'9".
Fyen	2,596	2,700	18 5'9".
Geiser	1,280	3,000	2 4'7" 4 3'4".
Heimdal . . .			
Hekla			

A coast-defence ship of the *Lindormen* type (1500 tons), and two first-class torpedo-boats, have been laid down. The armoured coast-defence ship *Herluf Trolle* (3470 tons) has been launched at Copenhagen, and another ship of the same class has been laid down. The principal armament consists of two 9'4-in. guns.

France.—Owing to the appointment of M. de Lanessan as Minister of Marine, in succession to M. Lockroy, further changes seem to be coming over the French Navy. French naval policy has undergone many modifications, and programme has succeeded programme as the estimates have been presented. In previous volumes of the ANNUAL the curious in such matters will find many facts recorded. The "decennial programme" laid down at the close of '91, and since modified, is almost forgotten. It was then determined that 82 obsolescent vessels should be replaced by the year 1901 by 82 new ones, thus giving the French fleet the tactical composition established by the Superior Council of the Navy. Eight vessels were to have been laid down in each year, exclusive of torpedo boats. In practice a considerably smaller number has been laid down. Instead of repeating here an account of the various programmes which have been elaborated and modified, the reader will gain a much clearer idea of what is going forward if a list is given of the ships now actually in hand. Of the battleships it will suffice to say that the *Gaulois*, *Charlemagne*, and *St. Louis*, which mark the adoption of the British plan of coupling the big guns in turrets (instead of disposing the four at the angles of a lozenge, as it were, with one on each beam) are practically ready, while the *Iéna*, which is of the same class, and a sister ship, the *Suffren*, are completing afloat. The smaller battleship, *Henri Quatre*, has been launched at Cherbourg. During late years great attention has been devoted to the building of armoured cruisers. The following are

in hand: the *Dupetit-Thouars*, *Gueydon*, and *Montcalm*, of 9517 tons; the *Condé*, *Sully*, and *Gloire*, of 10,000 tons; and the *Desaix*, *Dupleix*, and *Kleber*, of 7700 tons. The *Marseillaise* and *Amiral Aube* of 10,014 tons, have also been begun. The armoured cruiser *Jeanne d'Arc* is completing. Of the new unarmoured vessels, the principal are the *Châteaurenault* and *Guichen* (practically ready), being "commerce destroyers" of 8000 tons; the *D'Entrecasteaux*, which is now the flagship in China; the first-class cruiser *Jurien de la Gravière*; the second-class cruiser *Protet*; and the third-class cruiser *Infernet*. A number of the older battleships are receiving new armament and boilers. In the following table are grouped some of the latest vessels, some completed and others approaching completion:—

Armoured.

Name.	Tons.	I.H.P.	Principal Armament.
Iéna . . .	12,052	15,500	4 12" B., 8 6'4" q.f.
Suffren . . .	12,728	16,200	4 12" B., 10 6'4" q.f.
Chas. Martel . . .	11,882	13,500	2 12" B., 2 10'6" B.
Jauréguiberry . . .	11,824	14,200	2 12" B., 2 10'6" B.
Carnot . . .	11,988	15,000	2 12" B., 2 10'6" B.
Charlemagne . . .	11,275	14,500	4 12" B., 10 5'5" q.f.
Bouvet . . .	12,200	14,000	2 12" B., 2 10'6" B.
Masséna . . .	11,924	13,500	2 12" B., 2 10'6" B.
Brennus . . .	11,395	14,000	3 13'4" B., 10 6'2" q.f.
Hoche . . .	10,997	11,300	2 13'4" B., 2 10'8."
Henri Quatre . . .	8,948	11,500	2 10'6" B., 7 5'3" q.f.
Jeanne d'Arc . . .	11,270	28,000	2 7'4" B., 8 5'5" q.f.
Bouvines . . .	6,610	8,000	2 12" B., 8 3'9" q.f.
Tréhouart . . .	6,610	8,000	
Bruix . . .	4,650	8,000	2 7'4" B., 6 5'5" q.f.
Latouche-Tréville . . .	4,756	8,300	2 7'6" B., 6 5'5" q.f.
Pothuau . . .	5,345	10,000	2 7'4" B., 10 5'5" q.f.

The *St. Louis* and *Gaulois* are sisters of the *Charlemagne*, and the *Valmy* and *Jemmapes* of the *Bouvines* modified. The *Magenta*, *Marceau*, and *Neptune* are of the *Masséna* type, but earlier.

Protected.

Bugeaud . . .	3,722	9,000	6 6'2" q.f., 4 8'9" q.f.

Fleurus . . .	1,310	4,000	5 3'9" q.f., 2 2'5" q.f.

The French fleet also includes a number of smaller modern cruisers, torpedo gunboats, 10 destroyers (of which some are still in hand), 42 sea-going torpedo-boats, and large numbers

of the fast and smaller classes, besides about 16 submarine boats built and building.

Events and Launches.—At the time of writing (Nov. '99) the shipbuilding programme of 1900 has just been presented. It includes two battleships of 14,865 tons, an armoured cruiser of 12,416 tons, ten torpedo destroyers, and ten first-class torpedo-boats; but there is great doubt whether the battleships will be begun during the year. The list presented includes twenty-two vessels of the programme as completed, sixty-seven as in hand and twenty-three of the new programme. Much attention was paid by the late Minister, which is being continued by his successor, to the subject of submarine navigation, and great hopes are held of the *Narval*, lately launched at Cherbourg (see below). Nine of the class are intended, and four of a different type have been designed. All differ considerably from the three earlier boats. The manoeuvres of '99 were of an uneventful character, and really took the form of exercises for the training of the reserve men. Considerable attention has lately been directed to the cruise of the *Mediterranean Squadron* in the Levant. The ships on the China station now constitute only a division. **Launches.**—The most important launch of the year has been that of the battleship *Suffren*, at Brest. She is a sister of the *Iéna*, and was a very short time on the stocks, but was launched at a comparatively light weight. She is somewhat larger than the *Gaulois*, described in the ANNUAL of '97, displacing 12,728 tons, with a length of 400 ft. 9 in., beam 68 ft. 2 in., and draught 27 ft. 6 in. The armament also differs from that of the sister ships, and consists of four 12-in. guns coupled in turrets, eight 6'4-in. guns in a central battery, and eight 3'9-in. guns on the superstructure, besides lighter pieces and four torpedo tubes. Engines of 15,500 horsepower are to give a speed of 18 knots, and the range will be 5200 miles with 820 tons of coal. The other armoured ships launched during '99 are the *Henri Quatre* and the *Gueydon*. The former is a smaller battleship of 8948 tons, which had been long in hand at Cherbourg, and the latter is the first of the new series of armoured cruisers to take the water. She belongs to the medium type (9517 tons), and is well protected by Harvey steel, with a maximum thickness of 6 in. on the sides and 8 in. on the turrets. She will carry two 7'6-in. guns in turrets, and eight 6'4-in., four 3'9-in., and twenty-two smaller quick-firers, besides having two submerged torpedo tubes. Niclausse water-tube boilers and engines of 20,200 I.H.P. are to give a speed of 21 knots. There have also been launched the unarmoured cruisers *Jurien de la Gravière* and *Infernet*, the gunvessels *Décidée* and *Zélee*, and among the torpedo craft, the *Narval*. This last is a submersible boat, propelled on the surface by an oil motor, and below water by electricity, and the engine can be used during ordinary flotation for the charging of the electric accumulators.

Germany.—The year '98 was a very important one in the history of the German navy, as marking the beginning of a definite shipbuilding policy and programme. The ANNUAL, during recent years, has recorded the extraordinary efforts made by the Emperor and the Government to win credits for shipbuilding from an unwilling Reichstag. At length, after

many refusals, a programme was definitely approved, and a beginning was made with the work. It was stated to be the adopted policy that Germany should possess twenty-four battleships (with an extreme age of 25 years), thirty-two various cruisers (20 and 15 years, according to class), eleven despatch vessels, four gunboats, and 113 torpedo-boats. In order that this strength might be reached, it was necessary to lay down twelve battleships, ten cruisers, five despatch vessels, two gunboats, and twenty-two torpedo-boats. The plan was that, as the vessels reached their limit of age, they should take their position in the reserve, while others were built to replace them. The measure took the form of a sexennate, seven battleships to be begun in the first three years, and five in the second. Progress has not been very rapid, and on the occasion of the launch of the *Kaiser Karl der Grosse*, in Oct. '99, the Emperor made a speech at Hamburg, which led to the belief that the Government contemplated a further programme, which was foreshadowed by the semi-official press. It is said that the rate of building three battleships yearly right through the sexennate is contemplated. The following are the types of the modern armour-clad vessels.

Battleships.

Name.	Tons.	I.H.P.	Principal Armament.
Brandenburg	10,100	9,640	6 11" B., 6 4" r" q.f.
Kaiser Friedrich III.	11,180	13,000	4 9" B., 18 6" q.f.
Baden	7,441	6,200	6 10" B., 8 3" q.f.
Beowulf	3,500	4,800	3 0" B., 8 3" q.f.

The *Friedrich Wilhelm*, *Weissenburg*, and *Wörth* are of the *Brandenburg* class; the *Wilhelm II.*, *Wilhelm der Grosse*, *Karl der Grosse* (the last two launched in '99), and another battleship building of the *Friedrich III.* class; the *Bayern*, *Sachsen*, and *Württemberg* of the *Baden* class; and seven other coast-defence vessels of the *Beowulf* class.

In the new battleships great defensive and offensive power have been worked upon the displacement of 11,180 tons. The armour deck protects the boiler and engine-rooms, magazine and torpedo chamber, and steam steering apparatus, and is thickened to 3 in. at the stern, to which the armour-belt does not extend. The side armour, which is of Krupp steel, and 30 per cent. stronger than the nickel steel of the *Brandenburg* class, is 6 ft. 6 in. high, and from 12 in. to 6 in. thick. The great turrets have 10-in. and the casemates 6-in. plating. The artillery includes four of the new long Krupp 9.4-in. 40-calibre guns coupled in the turrets, and many quick-firers. The machinery consists of three triple-expansion vertical engines, together of 13,000 indicated horse-power, each driving a screw, to give a speed of 18 knots. The armoured cruisers are the *Fürst Bismarck*, and *Ersatz Prinz Adalbert*, while the new protected cruisers are the *Freya* (5650 tons) and *Hertha*, *Victoria Luise*, *Hansa*, and *Vineta*, of the same class, and the *Gazelle*, of 2650 tons, and there are a number of gunboats. The armoured cruiser to replace the *Prinz Adalbert* is like the *Fürst Bismarck*. She will displace 10,650 tons, and was described in the ANNUAL of '99. The new armoured cruisers will be smaller, displacing 8868 tons.

Italy.—The following are the tabulated characteristics of the most interesting modern Italian vessels:—

Armoured.

Name.	Tons.	I.H.P.	Principal Armament.
Re Umberto	13,251	19,500	4 13 3" B., 8 5 9" q.f., 16 4 7 q.f.
Sardagna	13,251	22,800	
Sicilia	13,298	19,500	
Regina Margherita	12,765	18,000	4 12" B., 4 8" q.f.
Benedetto Brin	12,765	18,000	
Saint Bon	9,800	13,500	4 10" B., 8 5 9" q.f., 8 4 7" q.f.
E. Filiberto	9,800	13,500	
Francesco Ferruccio	7,393	13,500	1 10" B., 2 8" q.f.
Varese	7,398	13,500	
Garibaldi	7,398	13,500	6 5 9" q.f., 10 4 7" q.f.
Marco Polo	4,580	10,000	
Carlo Alberto	6,500	13,000	12 5 9" q.f., 6 4 7" q.f.
Vettor Pisani	6,500	13,000	

Protected.

Elba	2,730	7,471	45 9" q.f., 6 4 7" q.f.
Puglia	2,552	7,900	4 6" q.f., 6 4 7" q.f.
Liguria	2,280	7,677	45 9" q.f., 6 4 7" q.f.
Calabria	2,380	6,500	4 5 9" q.f., 6 4 7" q.f.
Agordat	1,320	8,000	12 3" q.f.
Coatit	1,320	8,000	12 3" q.f.
Partenope	840	4,200	1 4 7" q.f., 6 2 2" q.f.
Caprera	853	4,800	1 4 7" q.f., 6 2 2" q.f.

The launches to chronicle in '99 are those of the armoured cruiser *Varese*, the protected cruiser *Coatit*, and some smaller craft.

Japan.—The following is a list of the most effective vessels of the fleet:—

Name.	Tons.	I.H.P.	Principal Armament.
Shikishima	14,850	14,500	4 12" 14 6" q.f.
Fuji	12,320	14,000	4 12" B., 10 6" q.f.
Yashima	12,500	14,000	
Asahi	15,200	12,000	4 12" B., 14 6" q.f.
Hatsuse	15,200	19,000	
Asama	9,750	19,000	4 8" q.f., 14 6" q.f.
Azuma	9,750	17,000	
Yakumo	9,750	16,000	
Idzumo	9,750	14,000	
Iwate	9,750	14,500	10 4 7" q.f., 14 1 8" q.f.
Tokiwa	9,750	18,000	
Chiyoda	2,450	5,600	2 10 2" B., 6 5 9" q.f.
Naniwa	3,650	7,235	
Takachiho	3,650	7,500	2 8" 10 4 7" q.f.
Chitose			
Kasagi	4,760	15,500	1 12 5" B., 11 4 7" q.f.
Takasago			
Itsukushima	4,277	5,430	1 12 3" B., 12 4 7" q.f.
Hashidate	4,277	5,400	
Matsumura	4,277	5,400	4 6" q.f., 8 4 7" q.f.
Akitsuishima	3,150	8,400	
Yoshino	4,150	15,000	2 8" q.f., 10 4 7" q.f.
Takasago	4,150	15,500	
Idzumi	3,000	6,500	2 10" B., 6 6" q.f.

Under the shipbuilding programme £12,000,000 will be spent, and nineteen various vessels and a hundred torpedo-craft built. This comprises four battleships, six cruisers of 9750 tons, three second-class cruisers of 4760 tons, two third-class cruisers of 3200 tons, three torpedo gunboats of 1200 tons, one torpedo depot ship of 6750 tons, eleven destroyers, and eighty-nine other torpedo-boats. The four battleships are building or completing in this country (see below), as well as four of the first-class cruisers, while two others are in hand abroad. The second-class cruisers are enlarged *Yoshinos*, of 4760 tons and 22½ knots, with a large quick-firing armament. The two

battleships *Yashima* and *Fuji*, respectively built at Elswick and Blackwall, have been completed. The *Yashima* attained a mean speed of 19.4 knots at her trials. These vessels are of the *Majestic* type; and a sister ship, though of greater displacement, the *Shikishima*, has been completed at the Thames Ironworks. The following are her chief characteristics:—400 ft. long, with a breadth of 75 ft. 6 in. and mean draught of 27 ft. 3 in., normal displacement 14,850 tons. Armament, four 12-in. 49-ton guns placed in pairs in two barbettes situated forward and aft, fourteen quick-firing 6-in. guns carried on the broadside, and twenty 12-pounder quick-firing guns. There are four submerged torpedo discharges, and one above-water discharge in the bow. The Harveyed armour-belt is 226 ft. long by 8 ft. deep, the thickness of armour being 9 in. On the barbettes the armour is 14 in. thick above the main deck and 9 in. below in front. The ship is propelled by twin screws, the engines being of 14,500 indicated horse-power, supplied by Belleville boilers, and the contract speed is 18.5 knots. The coal capacity at normal draught will be 700 tons, but the bunkers will hold 1200 tons. Complement, 741 officers and men. The *Hatsuse*, sister ship of the *Shikishima*, is in hand at Elswick; another, the *Asahi*, at Clydebank, and still another of the same class at Barrow. The following armoured cruisers are also building in England:—the *Asama* (9750 tons, 4 8' and 14 6' quick-firers, 21.5 knots), and the *Tokiwa*, *Idsumo*, and *Iwate*, all at Elswick. Two other cruisers of the same class are in hand severally at St. Nazaire and Stettin. The *Kasagi* and *Chitose* are approaching completion at Philadelphia and San Francisco. Of torpedo craft, 20 destroyers are built and building, including 4 at Havre and 4 at Elbing.

Netherlands.—With the budget of '97 a ship-building programme was introduced which, within the following thirteen years, will involve an expenditure of £4,937,000. The programme includes six armoured vessels, twelve protected cruisers, six monitors, fifteen gun-boats, and thirty-two torpedo-boats. The three protected cruisers *Holland*, *Zeeland* and *Friesland* (see ed. '96), have been launched. The Minister declares that, with the exception of the *Reinier Claesen*, *Evertsen*, *Kortenaar*, *Piet-Hein*, *Koningin Wilhelmina*, *Sumatra*, and some torpedo-boats, all the other vessels are too old for much service. In the oldest the hulls are decayed, and the boilers and engines in a useless condition. A complete reconstitution of the fleet is therefore called for. The three new cruisers named above are to take the place of the *Van Galen*, *Koning der Nederlanden* and *Johan Willem Friso*. The *Evertsen*, *Kortenaar* and *Piet-Hein*, small coast-defence ships, will replace the *Buffel*, *Guinea* and *Tiger*, and three new coast-defence vessels will displace the *Skorpion*, *Stier* and *Panther*. The reconstitution is to be brought about gradually. Three cruisers are to be completed in 1900, and of the six projected coast-defence vessels, the first three will be ready in 1902, and three others in 1905. The *Koningin Regentes*, building at Amsterdam, displaces 4950 tons.

Portugal.—The new vessels are the *Admiral*, which Messrs. Orlando have built at Leghorn, and the cruiser *Reinha Amelia* (1660 tons) launched at Lisbon. Two 15-knot cruisers of 1800 tons and 2650 I.H.P. are in hand at

Havre—the *Sao Gabriel* (launched '98), and the *Sao Rafael*. The *Dom Carlos I.*, of 4100 tons and 20 knots, has been completed at Elswick.

Russia.—The general basis of the naval budget for the seven years '98—1904 was confirmed by the Czar, the total outlay for the period being about £51,000,000. The total estimate for '99 was 34,000,000 roubles (£3,400,000). The principle underlying the naval expenditure and construction appears to be that on the appearance of every new British war-ship a Russian one of equal power shall be laid down. None of the ships of the extraordinary programme have been ordered in this country. The *Peresviet* and *Oslabya* are completing at St. Petersburg. A coast-defence ship of the *Apraxine* type is in hand at St. Petersburg, and the battleship *Kniaz Potemkine Tavrichesky* at Nicolaieff, the *Retvisan* at Philadelphia, the *Pobieda*, *Orel*, *Alexander III.*, and *Borodino* at St. Petersburg, and the *Tsarevitch* at La Seyne. These are battleships of about 13,000 tons; armament, four 12-in. b.l., and twelve 6-in., twenty 18-in., and six 14-in. q.f.; engines of 16,300 horse-power; speed 18 knots. The cruiser *Gromoboi* (12,336) has been launched at St. Petersburg. Three first-class cruisers, *Diana*, *Pallada*, and *Aurora* (6500 tons and 11,000 indicated horse-power), are completing on the Neva, where twelve torpedo-boats of the *Sokol* type are to be built. Schichau is building a cruiser of 17,000 horse-power at Elbing, and eight vessels have been ordered in France. The armoured cruiser *Bayan*, building at La Seyne, will have the following characteristics:—Displacement, 7800 tons; length, 442 ft. 11 in.; beam, 57 ft.; draught, 21 ft. 11 in.; armament, two 8 in. b.l., and eight 6-in., twenty 2.9-in., and seven 18-in. q.f.; engines of 16,500 horse-power; speed, 21 knots. The cruiser *Boyarin* has been begun at Copenhagen. A protected cruiser of the *Sviellana* class is to be built at Havre, and M. Normand, of the same port, has received an order to construct three destroyers of the French *Durandal* type—300 tons and 26 knots. The following are the other more important Russian warships recently constructed or launched. Those named in italics are in the Black Sea.

Armoured.

Name.	Tons.	I.H.P.	Principal Armament.
<i>Oslabya</i> . . .	12,674	14,500	4 10" B., 11 6" q.f.

Spain.—In the war with the United States the Spanish Navy suffered terrible disaster, of which many particulars were given in the ANNUAL of '99.

The following is a list of the most important

recent vessels of the fleet that remain, and of some now in course of construction:—

Armoured.			Principal Armament.
Name.	Tons.	I.H.P.	
Carlos V. . .	9,235	15,000	2 11" B., 10 5 1/2" B.
Pelayo . . .	9,900	6,800	2 12 1/2" B., 2 11" B.
Numancia. . .	7,305	3,708	8 10", 6 6 1/2" q.f.
Cataluña . .	7,000	15,000	2 11" B., 10 5 1/2" B.
Cisneros . .	7,000	15,000	8 2 1/2" q.f., 8 1 1/4" q.f.
P.de Asturias	7,000	15,000	

Deck-Protected and Partially-Protected.			
Alfonso XII. .	5,000	11,000	4 7 3/8", 6 4 7/8".
Alfonso XIII. .	4,800	12,000	4 7 3/8" B., 6 4 7 q.f.
Lepanto . . .	4,800	12,000	6 6-pr., 4 3-pr. q.f.
Ensenada . .	1,060	2,700	4 4 1/2" B., 5 q.f.

Other cruisers building are the *Isabel la Católica* and *Reina Regente*. The *Rio de la Plata* (1800 tons) was launched at Havre.

Sweden and Norway.—Fourteen years ago a committee discussed the necessities of national defence, and recommended that, within a period of thirty years, fourteen *Sveas*, ten armoured gunboats, four cruisers, and eighty large and small torpedo-boats should be built, the annual cost being estimated at 1,900,000 crowns. Progress has been slower than was intended, for up to the present time there are built or building of this programme four armourclads, three torpedo gunboats, fifteen torpedo boats, and one mining vessel. The considerable sums voted seem to indicate a more vigorous policy. The *Odin* (3300 tons), an improved *Svea*, was launched in '96, and the *Njord* and *Thor*, of the same class, have been completed. The *Dristigheten*, a further improvement, has been begun. Other vessels of the class are to be built, probably in England. The Norwegian *Harald Haarfagre*, built on the Tyne, where a sister, the *Tordenskjold*, is in hand, is an armourclad of 3556 tons, well protected and heavily armed for her displacement.

United States.—The war with Spain brought deservedly high honour to the fleet, and the effect of the victory will be to bring about a considerable naval expansion. The principal vessels of the United States Navy are given in the subjoined table, the *Albany* and *New Orleans* being the two protected cruisers bought from Brazil:—

Armoured.			Principal Armament.
Name.	Tons.	I.H.P.	
Wisconsin . .	11,525	10,000	4 13" 14 6" q.f.

Montgomery .	2,000	5,400	
Marblehead . .	2,000	5,400	q.f.

The battleships of the *Illinois* class were very fully described in our '98 edition. The following are their principal dimensions and characteristics:—Length, 368 ft.; extreme breadth, 72 ft.; displacement, 11,525 tons; indicated horse-power, 10,000, with a speed of 16 knots on trial for four consecutive hours, and a mean draught with 800 tons of coal of 25 ft. The armament of each ship consists of four 13-in., fourteen 6-in. quick-firers, seventeen 6-pounder and four 1-pounder quick-firers. The *Kearsarge* and *Kentucky*, superposed-turret battleships, were launched in '98. The *Alabama*, *Illinois*, and *Wisconsin* were also launched in '98. Three other battleships are being built of the same class improved—the *Maine*, *Missouri*, and *Ohio*. Four monitors are also in hand, the *Connecticut*, *Wyoming*, *Arkansas*, and *Florida*, carrying 2 12-in. guns in single turrets. In addition to battleships and monitors, a plan has been prepared for the building of three armoured cruisers of 12,000 tons, three protected cruisers of 6000 tons, and three of 5000 tons, and six other cruisers of 2500 tons. Some of these are in hand. There are now 38 torpedo destroyers, built and building, and 8 sea-going boats. Three small cruisers and some gunboats captured from Spain during the war, or purchased since, have been added to the fleet. The cruiser *Charleston* (3730 tons) ran upon an uncharted reef near the Island of Luzon (Nov. '99), and is in danger of being lost.

Foresters, Ancient Order of. The origin of the Ancient Order of Foresters dates back more than a century. The earliest notice of Forestry may be said to be a list of members made in "Court No. 1" of the "Ancient Royal Order of Foresters" in the parish of Leeds. The date of this list is 1790. Slow progress marked the early years of the movement, but in 1813 "Court No. 2" was commenced at Knaresborough. General laws for the rule of Forestry were sanctioned on June 3rd, '16, but the life of this "Royal Order" was practically cut short in '34. In the first twenty-one years of its existence no fewer than 358 Courts had been opened. The "Ancient Order" soon eclipsed the "Royal Order," and within three months of the momentous meeting ('34) at Rochdale, at which the disruption in the ranks of the "Royal Order" was made apparent, 294 courts of the latter were incorporated in the Ancient Order of Foresters. Mr. G. F. Mandley became its first High Chief Ranger. Salford was the meeting-place of the first High Court ('35), when three days were occupied in discussion of the business of the Order. It was notified that 16,510 members had received certificates. In '32 Forestry was

introduced into the United States, and there, as well as in Canada and Australasia, it has thriven. In '40 the first **Juvenile Foresters' Society** was formed, in Hull. It provided for funeral benefits only. The official magazine is *The Foresters' Miscellany*, published monthly. Reports are also published quarterly by the Executive Council, and an annual report is issued under the title of *The Foresters' Directory*, containing about 750 pages. During '98 it appears that in the numbers of male and female adult benefit members and juvenile members of the Order there was an increase of 4287. During '98, in the United Kingdom only, the Order paid for 8,226,329 days' sickness, or an average of 12.60 days per member, being an increase of 0.29 days when compared with the average sickness per member in '97. On an average 26,000 members are daily in receipt of sickness benefit, and the amount spent per annum in sick, death, and other benefits is close upon £900,000. The funds of the Order amount to £6,339,277, the gain in funds in '98 being £222,205. The total membership is 900,056, comprising 726,330 male adult benefit members, 7055 female members, 20,060 contributing widows, 21,289 honorary members, and 125,322 juvenile members. In the year ending September '99 the Order had opened over 200 Female Courts. The meeting-place for 1900 is Plymouth. The High Chief Ranger for '99-1900 is Mr. J. G. Jackson. The Permanent Secretary is Mr. J. Lister Stead, 6, Carlisle Terrace, Plymouth.

Forestier-Walker, Major-General Sir Frederick W. E., K.C.B., C.M.G., was in August '99 appointed to succeed Major-General Sir W. F. Butler as Lieut.-General in South Africa. He was born in 1844, being the eldest son of the late General Sir E. W. Forestier-Walker, K.C.B., and was ed. at Sandhurst, afterwards entering the Scots Guards in '62. He served as Assistant Military Secretary in the Kaffir War '77-8, was Military Secretary to Sir Bartle Frere during the Zulu War of '79, and was Assistant Adjutant and Quarter-master-General in the Bechuanaland Expedition '84-5. He was the General Commanding in Egypt '89-95, and from '95 till August '99 commanded the Western District.

Forestry. See AFFORESTATION.

Formosa. This island, which came into prominence during the Chino-Japanese war and was one of the spoils taken from the vanquished nation in '95, lies off the Chinese coast, and is about 200 miles in length. Its area is about 13,500 sq. m., and the pop. is estimated at about 2,000,000. It is very mountainous, and the almost inaccessible inland parts are held by a primitive race of the Malay type. The chief towns are Tamsui at the north and Tainanfu and Auping at the south end. The chief products are tea, sugar, rice, and camphor, and these make the island a desirable acquisition for Japan, leaving out of account its proximity to the Chinese mainland. Considerable energy has been shown by the conquerors in developing internal communications, and good roads have been also made in all directions. The administration of the island, which at first was very faulty, was, during '97, largely reorganised, benevolence in the treatment of natives being specially enjoined upon the Japanese officials. See CHINA (map).

Forrest, Sir John, K.C.M.G., the Premier of Western Australia, was b. in 1847. After serving in the Survey Department, and commanding various expeditions into the interior, he was appointed Surveyor-General. He was elected a member of the Legislative Council of Western Australia '83, and has been a member ever since, and Premier since '90, when the first Ministry was formed. He has succeeded admirably in coping with the situation created by the gold discoveries in the colony, and was made a K.C.M.G. in '91. In '97 he was President of the Federal Council of Australasia, came to England to attend the Jubilee festivities, and was made a member of the Privy Council. He has published "Exploration in Australia" and "Notes on Western Australia."

FRANCE.

France is a republic governed by a President and two chambers under the constitution of 1871, revised in '75, '84, '85, and '89. The legislative power resides in the Assembly, sitting in two houses: viz., the Senate of 300 members, of whom 225 are indirectly elected for 9 years (one-third retiring every 3 years) by delegates chosen by the municipal councils and the Senators, Deputies, Councillors-General, and District Councillors of the Departments, there being also 75 Senators originally elected for life by the two Chambers (though as these die the vacancies are filled up by the election of Senators for a period of 9 years only), and the Chamber of Deputies of 584 members, elected for 4 years by universal suffrage. The method of election is by *scrutin d'arrondissement*. Each Department is divided into *arrondissements* returning one Deputy, though where the population of the *arrondissement* exceeds 100,000, it is divided into two or more constituencies. Each elector votes for one Deputy only. Candidates are compelled to declare for which constituency they will stand. Voters are required to be over 21 and to have a 6-months' residential qualification. Both Houses can initiate and frame laws, except in the case of financial laws, which must first be presented to and voted by the Chamber of Deputies. Deputies and Senators are both paid at the rate of 9000 fr. a year. The President is elected for seven years, and receives 600,000 fr. a year, and a further allowance of 600,000 fr. for expenses. The executive power is confided to the President, elected by the two Houses united in National Assembly. War can be declared by the President only with consent of the two Houses. As to local government, the unit is the commune, governed by a municipal council and a mayor. The communes are combined into cantons, containing on an average 12 communes, and also, for electoral purposes, into *arrondissements*, these *arrondissements* again forming the Departments, of which there are 86. Prefects, with large and somewhat vague powers, control the Departments. All religions are on a legal equality, every sect being entitled to a grant from the State if its numbers exceed 100,000. But the Roman Catholics form the large majority of the population. Primary education is free and obligatory, and admirably organised. Secondary education is given in over 400 schools specially organised for that purpose, with about 100,000 pupils, and there are also numerous technical schools, besides 15 universities.

The colonies are looked upon as being politically part of France, and are represented in the Senate and Chamber. At the end of '96 there were 23,500 miles of first-class railways being worked, and 2500 miles of second-class. The chief exports are textiles, wine, raw silk, wool, etc., leather, and small ware. Agricultural operations include not only the growing of cereals, wheat principally, but roots, cattle, sugar, silk, wine, vegetables, and poultry and eggs. Area, 204,092 sq. m.; pop., '96, 38,518,975. The pop. of Paris is over 2,500,000. Estimated revenue, '99, £136,944,378; expenditure, £136,182,520; public debt, estimated at £1,200,333,250; imports, '98, £178,900,000; exports, £140,436,000. Imports from the United Kingdom, '98, £20,225,200; Exports to the United Kingdom, £40,961,600. See COLONIES, ETC., OF EUROPEAN POWERS, DIPLOMATIC, FOREIGN ARMIES, FOREIGN NAVIES, FRENCH GUINEA, FRENCH WEST AFRICA, GREAT BRITAIN AND HER FOREIGN TRADE, etc.

Political Parties.—A few years ago the two main groups in politics might have been roughly, but accurately defined, as Republicans and Reactionaries, the latter including the Royalists or followers of the Duc d'Orléans, and Imperialists, followers of Prince Victor. Recently, however, and more especially since '93, when so many supporters of the Monarchy and the Empire, under the advice of the Pope, stood as the "Rallied" or independent Republican party, this grouping of parties has disappeared; and at the present time the only division that can be made is into the Government Republicans and the Opposition, an Opposition embracing the most diverse elements. After the '93 election referred to above there were in the Chamber about 292 Government or Moderate Republicans; 187 Radicals; 35 "Rallied" or independent Republicans; and about 58 Reactionaries, including both Royalists and Imperialists. The Radicals, however, contained a very strong Socialist element, and as time went on the Socialists separated themselves and became a distinct party. In '95 a Radical administration was formed under M. Bourgeois, but the influence of the Socialists, upon whom M. Bourgeois had to depend for a majority in the Chamber, brought about its downfall; and a strong Moderate Republican administration under M. Méline succeeded in April '96, and held office till June '98, when it fell and was replaced by a Radical Ministry with M. Brisson as President. The General Election in May '98 showed a notable increase in the numbers of the Radicals and Socialists elected, and the Moderate Republicans were no longer able to stand against the combined forces that the Opposition could bring against them. The strength of parties was as follows: Moderates 254; Rallied 40; Radicals 178; Socialist Radicals 57; Reactionaries 44; Anti-Semites, 10. M. Brisson in turn succumbed in October '98, and was succeeded by a Ministry of "Republican Concentration" under M. Dupuy. To M. Dupuy in June '99 there succeeded a Cabinet under M. Waldeck-Rousseau, including representatives of almost all parties.

The Dreyfus Case.—For the sake of clearness the events of the year in respect of the Dreyfus affair are here separated from the record of political and general events. It will be remembered that the Criminal Chamber of the Court of Cassation, after the dramatic

arrest and suicide of Colonel Henry, had decided in October '98 that there was reason for further judicial inquiry, and that it would itself conduct a supplementary investigation. General Zurlinden, Military Governor of Paris, signed a decree late in November '98, ordering Colonel Picquart to be tried by court-martial on charges of forgery, making use of a forged document, and having communicated documents affecting the defence of the territory or the security of the State. An interpellation in the Chamber followed, when M. Poincaré, a member of the '94 Cabinet, declared that he and several of his colleagues only learned of the arrest of Dreyfus several days after it had taken place, and then through a newspaper. They had never heard of any other charges except those contained in the *bordereau*, nor of any confessions of Dreyfus. The Prime Minister during the debate on the interpellation declared that the Government would not cancel the verdict of the court-martial, but practically invited the Court of Cassation to do so by virtue of its rights under clause 443 of the Code. The Court decided (Dec. 8th, '98) that all the documents in the case of Colonel Picquart should be communicated to it, and that meanwhile the civil and military proceedings against him should be suspended. The secret *dossier* in the Dreyfus case was communicated to the Court (27th) under conditions guaranteeing the security of the State. A new development of the affair then arose. The reporter of the Criminal Chamber, M. Bard, was said to have entered the office of M. Quesnay de Beaurepaire, president of one of the Chambers of the Court, and to have exclaimed, apparently thinking he was addressing Colonel Picquart, "Well, my dear Picquart, we have now caught Gonse." So much was made of this that the Minister of Justice issued an official note declaring the story to be false. M. de Beaurepaire, however, resigned his presidency (Jan. 8th, '99), and followed this up by newspaper "revelations" intended to throw doubt on the impartiality of the Court. The net result of his frivolous charges was that the Government decided that the Criminal Chamber should complete its investigations, but that all the Chambers of the Court should then unite to pronounce the decision whether the condemnation of Dreyfus should be upheld or not (29th). This was done by introducing a Bill to bring all cases for revision before the whole Court of Cassation after a preliminary inquiry by the Criminal Section. The Bill was carried (Feb. 10th). The Criminal Chamber delivered judgment in the Picquart case (March 3rd). They decided that he should first be tried by the civil jurisdiction on the charge of forging the *petit bleu*, uttering the forgery and disclosing the Dreyfus and Esterhazy *dossiers*; and that then the military authorities should deal with the charges against him of disclosing the carrier pigeon and Boulou *dossiers*. The Court of Cassation then proceeded to the examination of the secret Dreyfus *dossier* (21st). The *Figaro*, which throughout the year was easily first among the French journals both in enterprise and in its passion for truth and justice, began the publication of the proceedings in the inquiry made by the Criminal Chamber (31st), and the revelations contained in it occasioned great excitement, which increased when it became known (May 28th) that M. Ballot Beaupré, who had been appointed reporter by the Court,

had given his report in favour of the revision of the '94 trial by ordering a new court-martial to try Dreyfus. The reasons given were the communication to the judges of documents not communicated to the defence, the contradiction between the experts of '94 and those of the Esterhazy trial as to the authorship of the *bordereau*, and the proof that Esterhazy used paper identical with that of the *bordereau*. He held that Dreyfus had never confessed, and stated that there was but one question under discussion from the strictly legal standpoint. That was the *bordereau*, and he was convinced that it was written, not by Dreyfus, but by Esterhazy. M. Manau, Procureur-General, followed, and declared that there was nothing in the secret *dossier* to incriminate Dreyfus. Colonel du Paty de Clam was arrested (June 1st) in consequence of the charges made against him in the proceedings before the Court of Cassation. He was charged with forging telegrams, disclosing documents in the secret *dossier*, and with improper conduct in the Esterhazy trial. The judgment of the Court was pronounced (3rd). The Court quashed and annulled the judgment of condemnation pronounced on Dec. 22nd, '94, against Alfred Dreyfus by the First Court-martial of the Military Government of Paris, and remitted the accused to the Court-martial of Rennes, named by special deliberation in council chamber, to be tried on the following question:—"Is Dreyfus guilty of having in '94 instigated machinations or held dealings with a foreign Power or one of its agents in order to incite it to commit hostilities or undertake war against France by furnishing it with the notes and documents enumerated in the *bordereau*?" The Court also ordered its judgment to be printed and transcribed on the registers of the First Court-martial of the Military Government of Paris in the margin of the decision annulled. The release of Colonel Picquart was at last ordered, and the civil charges against him were struck out. He had been in prison since July 13th, '98. On the same day Captain Dreyfus embarked on the *Sfax*, which left Cayenne for France (10th). He was landed at Port Haliguen (July 1st), and was taken to Rennes. Meanwhile the Dupuy Cabinet had been succeeded by that of M. Waldeck Rousseau, and General de Gallifet, who assumed control of the War Office, superseded General Zurlinden as Military Governor of Paris (7th), and took other disciplinary measures in regard to officers who had expressed themselves too freely about the Dreyfus affair. M. Decrais, the Colonial Minister, also superseded M. Deniel, commandant of the Isles du Salut, following on terrible reports of the sufferings which Dreyfus was forced to undergo during his imprisonment. Colonel du Paty de Clam was released (31st), and it was thus inferred that his explanation—that he had acted under the instructions of Generals Gonse and de Boisdeffre—had been accepted. The Court-martial held its first sitting in the hall of the Lycée at Rennes (Aug. 7th). Maitres Demange and Labori were counsel for Dreyfus, and Major Carrière acted as Commissary for the Government. Colonel Jouaust presided over the Court, the other members being Lieut.-Col. Brougniart, Major Proffillet, Major Merle, Major de Bréon, Captain Parlaît and Captain Beauvais, all artillery officers. After the preliminary proceedings and the interrogation of the prisoner by Colonel

Jouaust, the Court adjourned to consider the secret *dossiers* with closed doors. At this juncture the *Times* announced authoritatively that Esterhazy and Henry between them had furnished, besides the documents named in the *bordereau*, more than a hundred and sixty documents of considerable importance to Colonel Schwarzkoppen, the German Military Attaché. The open sittings of the Court were resumed (12th), when M. Casimir-Perier and General Mercier gave evidence. General Mercier declared that he still believed Dreyfus to be guilty, and justified the communication of secret documents to the first Court-martial on the ground that the country was within two finger-breadths of war, and the documents could not be communicated openly. As M. Labori was on his way to the court (14th), he was shot by an unknown miscreant, who made good his escape. The wound, though severe, was not mortal. M. Casimir-Perier rebutted General Mercier's evidence as to the imminence of war, and also as to the alleged confession to Captain Lebrun-Renaud. General Billot, M. Cavaignac, General Zurlinden, General Chanoine and M. Hanotaux were the day's witnesses, but no new facts appeared in their evidence. On the 16th M. Lebon, ex-Minister of the Colonies, Mme Henry and General Roget gave evidence. On the 17th and 18th M. Bertulus and Colonel Picquart testified in favour of Dreyfus. Major Cuignet, General de Boisdeffre, and General Gonse reiterated their belief in the guilt of Dreyfus (19th), and their conviction that Esterhazy was not the author of the *bordereau*. Minor witnesses followed, but there was no striking incident till M. Labori, having recovered from his wound, returned to the court (22nd). Then Colonel Maurel, who presided over the '94 Court-martial, admitted (24th) that a parcel of documents had been secretly communicated to him and his colleagues, but declared that only one of them was examined. Captain Freystätter, one of the '94 judges, flatly contradicted this (27th), averring that four documents were submitted to the Court. Colonel Maurel, confronted with this witness, declared that he had not said that only one of the documents was read, but that he had only read one document. He now added that after he had read the first document he passed the *dossier* to the judges. Captain Freystätter replied that Colonel Maurel made a commentary on each document as he passed it to the judges, but this the Colonel energetically denied. The evidence of experts and others followed, and Captain Lebrun-Renaud repeated his assertion that Dreyfus had said, while protesting his innocence, "The Minister [of War] knows that if I had handed documents to Germany it was in exchange for more important ones." This Dreyfus denied (31st), and Major Forzinetti, governor of the Cherche-Midi prison while Dreyfus was there, declared that Dreyfus always maintained his innocence, and that Captain Lebrun-Renaud had told him in '97 that Dreyfus had never made a confession. An Austro-Hungarian refugee, named Cernuschi, was called by the prosecution (Sept. 4th), and alleged that Dreyfus had given to a certain foreign military officer important maps and papers. This gave the defence an opportunity of which they promptly availed themselves. M. Labori asked that the Government should apply to the foreign Power or Powers concerned through the usual diplomatic

channels for the production of the documents named in the *bordereau*, and telegraphed to the German Emperor asking him to allow Colonel von Schwarzkoppen to give evidence (5th). The evidence of Du Paty de Clam taken on commission was read to the Court (6th), but contained no new fact. M. Labori announced that he had been informed that Colonel von Schwarzkoppen and Colonel Panizzardi could not come to Rennes, but would give their testimony to a commission sent by the Court. The President, however, refused to appoint such a commission, and the taking of evidence was completed (7th). Major Carrière then delivered his speech for the prosecution, and declared that the trial had convinced him of the guilt of Dreyfus. Consequently he asked for the application of article 76 of the Penal Code, which punished with death such dealings with foreign Powers. M. Demange followed with a moving and eloquent speech for the defence. He laid it down that it was for the prosecution to prove the prisoner's guilt, but this it had failed to do. Five Ministers of War had given evidence, but they had adduced only their own beliefs, bolstered by probabilities and presumptions. After examining the secret *dossiers*, the *bordereau*, and other alleged proofs of guilt, he argued that they did not apply to Dreyfus but to Esterhazy. M. Labori did not address the Court. The prisoner once more affirmed his innocence, and then the Court by five votes to two found him guilty "of having in '94 provoked machinations or carried on dealings with a foreign Power or one of its agents in order to induce it to commence hostilities or undertake war against France, or for the purpose of procuring it the means thereof by furnishing it with notes and documents enumerated in the *bordereau*." By a majority it was found that there were extenuating circumstances. By five votes to two the Court condemned the prisoner to ten years' imprisonment (10th). An appeal was at once lodged. In France public opinion was on the whole in favour of the verdict, but throughout the civilised world outside France it was received with indignation and horror. Suggestions were made in this and other countries that the Paris Exhibition of 1900 should be boycotted, but these soon died down, and of course no official action was taken. A recommendation to mercy was signed by the members of the Court-martial (11th), with the object of preventing the ceremony of degradation involved in their sentence from being carried out. After consultation with the Cabinet, and the reception of a report from General de Galliffet, in which it was urged that, on the grounds of the prisoner's health, which was seriously affected by all he had gone through, of the extenuating circumstances admitted by the Court-martial, and of the desire of the country for a measure of pacification, a pardon ought to be granted, the President signed a decree pardoning Dreyfus (19th), and he was released (20th). He at once issued the following declaration:—"The Government of the Republic restores me my liberty. It is nothing to me without honour. From this day forth I shall continue to seek the reparation of the judicial error of which I am still the victim. I wish that France as a whole should know by a final judgment that I am innocent. My heart will not be at rest until there is no longer a Frenchman who imputes to me the abominable crime which another has committed."

History, '99.—President Faure was taken with an apopleptic seizure and died (Feb. 16th). The Republican groups in the Senate thereupon asked M. Loubet, President of the Senate, to accept the candidature, and he agreed to do so. Congress was convened at Versailles (18th), and M. Loubet was elected, receiving 483 votes, as against 279 recorded for M. Méline, 23 for M. Cavaignac, 10 for M. Deschanel, 8 for M. Dupuy, 4 for Colonel Monteil, 2 for M. Rochefort, 1 for M. Baduel, 1 for M. de Mun, and 1 for M. Tillaye. Some riotous demonstrations were made both at Versailles and in Paris on the return thither of the new President, but they were soon put down, and what might have been a serious crisis was thus safely passed. The funeral of M. Faure took place with impressive ceremonial (23rd). On the return of the troops taking part, M. Déroulède seized the bridle of General Rogét's horse and summoned him to lead his soldiers to the Elysée. He and another Deputy were at once arrested, and prosecuted by order of the Chamber. M. Déroulède was at the head of an association called the League of Patriots, which had for some time been carrying on a strong anti-Dreyfus agitation. Other leagues existed on both sides of the controversy, and the Government took steps to suppress them all, declaring their existence to be illegal. Some excitement was occasioned by the fact that in February a British man-of-war compelled the Sultan of Oman under penalty of bombardment to annul a concession made to France for a coal depot on the Muscat shore. Eventually, according to a statement made by M. Delcassé in the Chamber (March 6th), the British Government acknowledged that France and England were entitled to a coal depot on the same conditions, and expressed regret for the form of their intervention. On the British side it was stated that the concession was of a harbour and naval port, and not of a mere coaling station, and that the intervention had been taken under the instructions of the Imperial Government. M. de Fallières succeeded M. Loubet as President of the Senate (7th). As the result of negotiations between France and Great Britain following on the Fashoda affair, an agreement was signed (21st) delimiting the French and British positions in Central Africa, which, it was understood, gave the Bahr-el-Ghazal and Darfur to Great Britain, and Wadai, Bagirmi and Kanem, with the territory to the east and north of Lake Chad, to France. From the Nile to Lake Chad and between the 5th and 15th parallels of latitude the Powers mutually conceded equality of commercial treatment, and France thus obtained the right to set up commercial establishments on the Nile and its affluents. M. Delcassé submitted Bills to the Chamber ratifying the Anglo-French conventions of June 14th, '98, and the agreement of March 21st, '99 (27th). The Bills were duly carried. M. de Freycinet resigned his portfolio as War Minister (May 6th), and was succeeded by M. Krantz. It transpired afterwards that there had been some friction between M. de Freycinet and M. Delcassé. M. Déroulède was brought to trial (29th) for his seditious attempt to overthrow the Republic on the day of M. Faure's funeral. The jury acquitted him and M. Habert, his companion Deputy. Major Marchand and his officers arrived at Toulon (30th), having safely conducted the expedition from Fashoda to the

shores of the Red Sea and thence returned to France. He had a great reception, and was made Commander of the Legion of Honour. On arriving in Paris (June 1st) he received an even more enthusiastic welcome. On the day when the judgment of the Court of Cassation in the Dreyfus case was made, known (3rd), President Loubet attended the Auteuil races, and was made the victim of a violent demonstration, in which he narrowly escaped personal violence. M. Dupuy's Ministry was defeated during a debate on the precautions which, in view of the occurrence at Auteuil, had been taken to maintain order on the occasion of the President's visit to the races at Longchamp (12th). M. Dupuy and his colleagues resigned, and after a fruitless attempt by M. Poincaré, and a first attempt of his own which also failed, M. Waldeck-Rousseau succeeded in forming a Ministry (22nd). General de Gallifet became Minister of War, and M. Delcassé retained office as Minister of Foreign Affairs. The new Government was fiercely attacked, but its opening declarations were approved in the Chamber by a majority of 26. General de Gallifet distinguished himself by his vigorous action in regard to those officers who had manifested an insubordinate spirit over the Dreyfus affair, superseding several of them. For instance, General de Négrier, who had threatened that the Supreme Council of War would act if the Government refused to punish those who attacked the army, was deprived of his seat on the Supreme Council (July 26th). M. Déroulède, together with M. de Monicourt, described as "Secretary of Commands" to the Duke of Orleans, M. Jules Guérin, of the Anti-Semitic League, M. Thiébaud, M. André Buffet, M. Marcel Habert and others, were ordered to be arrested on the charge of conspiring to overturn the Government (Aug. 10th), and the arrests were mostly effected, except in the case of M. Guérin. He shut himself up in the offices of the Anti-Semitic League, refusing to surrender, and did not capitulate until Sept. 20th. Anarchist riots broke out in Paris (20th), resulting in serious injuries to some hundreds of the rioters and over sixty police officers. The Senate were convoked by Presidential decree, and sat (Sept. 18th) as a High Court for the trial of the conspirators whose arrest is recorded above. The Procureur-General said that Déroulède and other members of the League of Patriots, Guérin and other members of the Anti-Semitic League, and various Royalists, had undoubtedly conspired to overthrow the Government, the Duke of Orleans finding the necessary funds, advantage being taken of every time of crisis, such as the resignation of General Chanoine, in Oct. '98, and the funeral of President Faure in Feb. '99, when M. Déroulède was arrested. The Commission of the Senate decided (Oct. 30th) that M. Déroulède having been acquitted previously of the charge of inciting the army to mutiny, could not be again tried for that offence, but that he and MM. Guérin, Barrillier, and Ballière should be tried for conspiracy. The charges against MM. Thiébaud and Greixon were dismissed, and those against other fugitive offenders were suspended. The High Court's first sitting was held (Nov. 6th), and on the 11th, dealing with questions of procedure raised by the defendants, it formally resolved that it had full jurisdiction in the case. The Chamber met (14th), and after a fierce attack

on the Cabinet, and particularly the War Minister, who replied with fearless frankness, accorded the Ministry a majority of 125 in the first important division. M. Déroulède, during his inter-rogation by the High Court, insulted President Loubet, and was sentenced to three months' imprisonment (18th).

France, President of. See LOUBET.

Franchise. See REGISTRATION, PARLIAMENTARY, for a full account of the qualifications for the franchise.

Francis Ferdinand of Austria, Archduke, son of the late Archduke Charles Louis, by his second marriage with the Princess Maria Annunciata, daughter of Ferdinand II., King of the two Sicilies, was b. at Gratz, in 1863, and is a major in the 4th Dragoon Regiment. A few years ago he inherited the large fortune of his relative, the Grand Duke of Modena, and in so doing took the name of Este. On Feb. 1st, '89, he renounced the fortune and name in favour of his brother, Archduke Otho. Archduke Francis is unmarried, and has never made any great figure in Austrian society. By the death of the Crown Prince Rudolph and the abdication of his father, who died in '96, he became the heir apparent to the Austrian throne.

Francis Joseph I., Emperor of Austria, King of Hungary and Bohemia, was b. 1830. His father was the late Archduke Francis Charles. Succeeded his uncle, Ferdinand, on the throne when he abdicated ('49). The beginning of his reign was marked by important events. Hungary was in a state of rebellion, which was quelled by the help of Russia. His Italian dominions were saved by the genius of General Radetzky. The Emperor made strenuous efforts to prevent the Crimean war, and refused to join France and England. After the Austro-French war ('59), he was compelled to sign the treaty of peace of Villafranca, by which Lombardy was ceded to Italy. In '66 he lost the duchy of Holstein, obtained by the convention of Gastein, and in the same year, as the result of the war with Prussia, Venetia also. That year was fatal to the supremacy of Austria in Germany, the contest being decided in favour of Prussia by the treaties of Nikolsburg and Prague respectively. The Turkish provinces of Bosnia and Herzegovina were, by decision of the Berlin Congress ('78), placed under the administration of Austria-Hungary. In '54 the Emperor Francis Joseph married the Princess Elizabeth Amalie Eugénie, (daughter of the Duke Maximilian Joseph of Bavaria), who was murdered by an Italian anarchist at Geneva in '98. The death of the Crown Prince Rudolph made the Archduke Francis Ferdinand (*g.v.*), a nephew of the Emperor's, the heir to the throne.

Frederick William Louis, Grand Duke of Baden, was b. 1826. Succeeded his father, the Grand Duke Leopold, '52. By right of succession the government of the duchy belonged to his brother Louis, who was older than himself; but Duke William had to assume the government, his brother being mentally incapacitated. As a ruler he has proved himself a firm ally of Prussia, and in the war of '70-71 against France he fought side by side with Prussia, and took a prominent part in the struggle. In home politics he declared himself a stern opponent of the Jesuits, and in '55 he put an end to their existence as an organised ecclesiastical community, by banishing them from the duchy.

His wife is a daughter of the late Emperor William of Germany.

Free Church of England. A Protestant episcopal organisation, originated in 1844 (enrolled in Chancery 1863) as a counteracting movement to the Oxford Tractarianism. Being free from State control, the Free Church claims the liberty to enter a parish where ritualistic practices prevail, and establish a liturgical service on the basis of the Evangelical party in the National Church, with which section it is in ritual practically identical. It is governed by Convocation and bishops, consecrated in the line of the Canterbury succession by the Rt. Rev. Bishop Cummins, of the American Protestant Episcopal Church, whose bishops were consecrated at Lambeth Palace 1787. The churches, although not numerous, are widely spread. Convocation held yearly (June). **Bishop Primus**, Rev. S. J. C. Dicksee, Crowborough. **Missionary Bishop**, Rev. H. O. Meyers, Hounslow. **Treasurer**, A. H. Wilson, Esq., 5, Westminster Chambers, S.W. **Hon. Secretaries**, Rev. E. T. Boon, Worcester; Rev. A. F. G. Jullion, New Malden. **Registrar**, Rev. G. H. Jones, Cliftonville, Margate. **Offices**, 5, Westminster Chambers, S.W.

FREEMASONRY.

The Masonry of the present day—especially British Masonry—is famous for two things: conviviality and charity. The latter was recognised 170 years since by the formation of a committee of charity in connection with the Grand Lodge in 1725. This committee from time to time underwent various alterations in its title, and it is now called **The Board of Benevolence**, its province being to administer the **Fund of Benevolence**. To this Fund every one initiated in a lodge under the English constitution contributes; as long as he is a subscriber to a lodge in London 4s. a year is paid by his lodge for him to this fund, and 2s. if he subscribe to a country lodge, another 2s. going to the fund of his province (though this sum varies in different provinces). In 1788 Chevalier Ruspini, surgeon-dentist to George III., established the Freemasons' Girls' School, now known as **The Royal Masonic Institution for Girls**, and ten years later the **Boys' School** was started. **The Institution for the Aged** is the youngest of the three, the **Institution for the Men** not having been established till 1842, and for the **Widows** not till '49. The **Girls' School** boards, clothes and educates 263 girls, and the **Boys' School** 268 boys; while the **Benevolent Institution** grants annuities to 475 persons—£40 a year to men and £32 a year to widows; there being now 208 men and 275 widows on the Funds. It is also paying about £560 a year to widows of deceased annuitants. The total receipts of these three institutions in '98 were: **Benevolent Institution**, £24,240; **Boys' School**, £122,373 os. 9d.; **Girls' School**, £16,478 14s. 10d. The roll of the Grand Lodge to September '99 showed a total of 2784 warrants for lodges under the English constitution; but this does not represent the actual number of lodges now subject to Grand Lodge, as out of

this total some 446 lodges have ceased to exist since '63, while some have merged in other lodges or gone under the jurisdiction of Colonial Grand Lodges.

The United Grand Lodge of England acknowledges only two species of Freemasonry—the **Craft** and the **Royal Arch**, both of which are exceedingly powerful. Scotch, Irish, American and Continental jurisdictions acknowledge other degrees; but these, with the exception of the **Mark Degree**, are not universal—that is, they are Christian degrees, and the Jew, the Turk, the Mohammedan and the Parsee will not join them. Strong endeavours were made forty years since to induce the Grand Lodge to recognise the **Mark Degree**, but the attempts were unsuccessful, and the **Mark Masons** established a Grand Lodge of their own in 1856. It has already 518 lodges in England and Wales and the colonies, with 38,669 registered **Mark Masons** subject to its authority; has a large **Benevolent Fund**, an **Educational Fund**, and out of the interest of its annuity funds grants £26 a year to each of seven decayed **Mark Masons** and £21 a year to each of eight widows. The charitable work of English Freemasonry does not end here, because there are several provincial organisations which grant annuities to local brethren and widows, and pay the expense of educating Masons' children.

The Prince of Wales was elected on March 1st, '99, for the twenty-fifth year as Grand Master, and his reinstallation took place on April 26th. At Grand Lodge on June 1st, '98, the brethren received a message from the Grand Master, and in consequence thereof withdrew recognition of the Grand Lodge of Peru and its subordinate lodges for excluding the Volume of the Sacred Law, and omitting all mention of it from their meetings. Grand Lodge thus followed its action towards the Grand Orient of France on March 6th, '78; but at the meeting on March 1st, '99, Grand Lodge resolved to rescind this decision, on receiving an assurance from the Grand Lodge of Peru that the Volume of the Sacred Law had been restored to its place in the Lodge.

Grand Lodge possesses many archaeological curiosities in a library and museum, to which valuable additions are constantly being presented; but it is only of late years that Masonic brethren seem to have become aware of the importance of collecting and preserving authentic traditions of the craft. In connection with Freemasonry there exists a lodge, the **Quatuor Coronati** (founded 1884), whose membership is restricted to persons possessing either literary or artistic qualifications (Sec. G. W. Speth, Bromley, Kent). Of a similar nature is the **Savage Club Lodge**, which is restricted to members of the Club. The **Eccentric Lodge**, consecrated Oct. 20th, '93, is of the same class. There are other lodges established expressly for the convenience of members of different professions and callings, such as barristers, gas engineers, physicians and surgeons, and chemists; and there is also the **Gallery Lodge**, 1928, which was consecrated in Aug. '81, and is composed solely of newspaper reporters and writers. Several volunteer corps also have lodges, the membership of which is restricted to members of the respective corps. There are other class lodges in connection with the public schools, and the professions of the law and physic. Consult Mackay's "Lexicon of Freemasonry"; Kenning's "Cyclopædia of

Freemasonry": Gould's "History of Freemasonry" (6 vols.). English Freemasonry has two London weekly newspapers devoted to its interests—the *Freemason* and the *Freemason's Chronicle*. The former has been established thirty-one years, and the latter twenty-five. The *Craftsman*, published at Cardiff, was started in Jan. '94 as a monthly illustrated paper devoted to Welsh and general Masonic matters. In America Masonic papers are numerous, and they are also known in India, Australia, New Zealand, and other colonies.

Fremantle, The Hon. and Very Rev. W. H., D.D., Dean of Ripon, was born in 1831, and is the second son of the first Baron Cottesloe. He was educated at Eton and Balliol College, Oxford, taking a first class in classics and holding a Fellowship of All Souls '54-64. Ordained in '55, he became curate at Middle Claydon, vicar of Lewknor, resident chaplain to Bishop of London (Tait) '61-6, rector of St. Mary's, Bryanston Square '65, Fellow and Tutor of Balliol, '82-96, and Canon Residentiary of Canterbury Cathedral '82. In April '95 he was appointed to the Deanery of Ripon. He was Select Preacher at Oxford '78-80, and Bampton Lecturer for '83, and has written several theological works.

French Colonies, The. See FRANCE, and COLONIES, ETC., OF EUROPEAN POWERS; also under their various headings.

French Congo and Gaboon. A French colony in Western Africa, bounded on the north-west by the Cameroons, on the north by Wadai, one of the Central Soudan States, recognised in '99 as being in the French sphere, on the east by the Egyptian Soudan, on the south-east by the Congo Free State, and on the west by the Atlantic. The Gaboon is strictly only a great estuary by which several minor streams discharge their waters. The *Ogowé* is a large river, which reaches the Atlantic by several mouths, forming a great delta, not far south of the Gaboon estuary. France has possessed the Gaboon estuary and district since 1843, and in '94 she extended her rule over the inland part of the colony by an agreement made with Germany in March '94 settling the boundary between the French and German spheres from the southern boundary of the Cameroons to Lake Chad. A line of communication between French Congo and the French possessions in the Soudan was thus assured. Efforts were afterwards made to push the French sphere farther eastwards, so as to secure a footing on the Nile, and an expedition led by Major Marchand made its way from the Congo and along the Upper Ubangi through the Bahr-el-Ghazal province to Fashoda, on the Nile, where it was discovered by the Sirdar, commanding the Egyptian army, after the defeat of the Khalifa and the fall of Omdurman, in Sept. '98. Posts had been established along the Ubangi, Mbomu, and Sueh. In deference to the attitude of Great Britain, however, the French Government ordered Major Marchand to retire from Fashoda, and an agreement was made in '99, which recognised Wadai, Bagirmi, and Kanem as belonging to France, and the Bahr-el-Ghazal and Darfur to Great Britain. Equality of commercial treatment was mutually conceded from the Nile to Lake Chad, and between parallels 5 and 15 N. lat. Germany had previously in '96 recognised French claims to Bagirmi (area 65,000 sq. m.; pop. about

1,000,000), at the capital of which, Massenia, a French resident is stationed. The area of the colony is 496,920 sq. m., and the population 8,950,000. The colony is under the control of a Commissioner-General, and a number of stations have been established throughout the territory. The exports are ivory, ebony and other woods, caoutchouc, and palm oil. See COLONIES, ETC., OF EUROPEAN POWERS, EGYPT (maps), FRANCE, and SOUDAN.

French Guiana. A colony in South America, on the Atlantic coast, bounded by Dutch Guiana on the west and by Brazil on the south. The area is about 46,850 sq. m., and the population about 22,710. The capital is Cayenne. The colony is used as a penal settlement, and is under a Governor with a Council-General. It is represented at Paris by a deputy. Off the coast of the colony lies the Ile du Diable, where Captain Dreyfus was imprisoned.

French Guinea. This colony was detached from that of Senegal in 1890, and now contains three districts geographically distinct from one another, and since March '93 administered by separate governors. The three possessions are (1) French Guinea proper, capital Conakry; (2) the Ivory Coast (formerly called Gold Coast) settlements, capital Grand Bassam; and (3) the Benin settlements, capital Porto Novo, comprising the districts of Porto Novo, Grand Popo, Agoué, and Kotonou. The colony has complete administrative autonomy, and each district has its own governor. A convention with the Republic of Liberia settled the boundaries of the French possessions on this side in Aug. '94. France gave up all rights over the coast west of the Cavally river, and Liberia gave up similarly her rights over the coast to the east of the river, which was thrown open for navigation and traffic to French subjects, with the right for France to construct works on the banks. As to the interior, by this convention and the agreement with Great Britain made in '95, France secured the control of the hinterland of Liberia and Sierra Leone, and so joined her possessions in French Guinea and the French Soudan. The Anglo-French Commission settled (June 15th, '98) the boundary line between the French territory and the Gold Coast hinterland. From the intersection of the river Volta with the 9th parallel of N. lat. the line follows the river northwards to its intersection with the 11th parallel, and then turns east along that parallel till the hinterland of Togoland is reached, deflecting so as to give the kingdom of Bawku to the Gold Coast. France thus gained Bona and Dokta and the kingdom of Mossi north of the 11th parallel, but had to give up Wa and other points to the east of the Volta, occupied by them. A decree signed Oct. 17th, '99, assigned part of the French Soudan, which then ceased to be a separate dependency, to this colony, and the whole colony was placed under the Governor-General of West Africa at St. Louis. The chief products of the whole region are indiarubber, palm oil, sesame, gum. The coast is generally low and sandy, and the climate is unhealthy. See COLONIES, ETC., OF EUROPEAN POWERS, and NIGERIA (map).

French Somaliland is a wedge of territory on the coast of the Gulf of Aden, which includes the two ports of Obok and Jibutli, and the town of Tajura on the bay of the same name. The colony lies between the British Somali Coast Protectorate on the east and the Italian colony of Erythrea on the north-west. From

Jibuti a railway is being built to Harar, in order to open up trade with Ethiopia. Coffee, gold, ivory, musk, and skins are the chief exports. An Administrator was appointed in Aug. '98, with a Council of Administration. The area is about 8500 sq. m., and the population about 30,000. See EGYPT (maps).

French Soudan. See SOUDAN.

French West Africa. The French colonies in West Africa include Senegal, the Soudan (which however does not now exist as a separate dependency, but has been divided between Dahomey, French Guinea, the Ivory Coast, and Senegal), French Guinea, and the French possessions in the Bight of Benin, as well as Dahomey. Accounts of these will be found in the articles on the Colonies under their various headings. The whole coast-line from Cape Blanco in the north to Togoland is French, with the exception only of the British colonies, Gambia, Sierra Leone, and the Gold Coast, of Portuguese Guinea, and of Liberia. French territory also stretches inland from the coast to the Upper and Middle Niger, thence eastwards to Barraua, on Lake Chad, and north to Tunis and Algeria. The French Sahara territory embraces about 1,000,000 sq. m. An Anglo-French Commission to settle the boundaries of the respective territories of the two nations in West Africa met at Paris in November '97, and drew up a convention in which the settlement was embodied (June 15th, '98). Another agreement made in '99

between Great Britain and France gave the latter Bagirmi, Wadai and Kanem, to the east and north of Lake Chad, and thus indisputably joined French Congo with the vast hinterland of Tunis and Algeria and with the French Sahara. There is a Governor-General of French West Africa stationed at St. Louis. See SOUDAN.

Friendly Societies. The Friendly Societies Act, '96, and the Collecting Societies and Industrial Assurance Companies' Act, '96, consolidate all the law upon the subject. The last annual report of the Chief Registrar of Friendly Societies is for the year ending Dec. '98. The societies include Friendly Societies proper, with their branches, Benevolent Societies, Cattle Insurance Societies, Working Men's Clubs, and specially authorised societies for various purposes, and in addition to these the Registrar has to deal with Workmen's Compensation schemes, Industrial and Provident (co-operative) Societies, Building Societies, Trade Unions (*q.v.*), certified Loan Societies, Trustee Savings Banks, Railway Savings Banks, and certain Scientific and Literary Societies certified for exemption from rates. The Registrar has exclusive jurisdiction in the settlement of disputes with the Post Office Savings Bank and Trustee Savings Banks. The following figures give an interesting summary of the latest information available as to the various classes of societies making returns to the Registrars of Friendly Societies in the United Kingdom:—

	Number of Returns.	Number of Members.	Amount of Funds.
Friendly Societies (not collecting) and Branches	28,189	5,107,724	£29,934,850
Collecting Societies	43	5,288,853	4,492,307
Other Societies under the Friendly Societies' Acts.	1,149	537,567	1,309,093
Industrial and Provident Societies	2,001	1,581,060	30,080,400
Building Societies	2,373	560,605	57,278,807
Trade Unions	604	1,210,195	2,382,936
Loan Societies	307	35,366	259,834
Railway Savings Banks	16	40,397	3,431,087
Total	34,682	14,361,767	£129,169,314

Central Office, 28, Abingdon Street, S.W. Chief Registrar, E. W. Brabrook, C.B. (salary £1500); Assistant Registrar, J. Duncan Stuart Sim (£800); Chief Clerk, G. Brown (£415).

Friends. The Society of Friends, commonly called Quakers, was founded in the middle of the 17th century by George Fox. "Friends" are distinguished from other Christian bodies by the special stress they lay on the immediate teaching and guidance of the Holy Spirit, and their belief that no one should be paid or appointed by human authority for the exercise of the gift of the ministry. In obedience to this belief they hold their meetings without any prearranged service or sermon, and sometimes in total silence. The Friends believe that the sacraments of Baptism and the Lord's Supper are to be taken spiritually, and not in an outward form. Their protests against the use of oaths and against the exaction of tithes and church rates cost them much suffering and frequent imprisonment during the first fifty years of their existence.

The simplified dress which Friends adopted from conviction two hundred years ago became stereotyped into a uniform. This dress has generally been given up, as have the "testimony" against music and singing in its rigid application, and the peculiarities of speech, such as the use of "thee" and "thou" instead of "you" (though many Friends still retain this custom amongst themselves), and the avoidance of all titles of courtesy. Of late years there has been a very decided evangelical movement among Friends, under the influence of which the old quietism is dying out. As a result of this change the influence of the Society beyond its own borders, through home and foreign missions and adult First Day (Sunday) Schools, has developed to a remarkable extent. In this country Friends have recently been increasing in numbers. The latest statistics of the Society are as follows: members in Great Britain, 17,031; in Ireland, 2586. Total membership, 19,617. Attenders of meetings in Great Britain and Ireland not in membership, 8475; First-Day scholars—Adults, 28,807; Juniors, 16,734. There

are probably about 94,000 in the United States and Canada, besides small numbers in other countries. There is also in America a numerous body of Friends called "**Hicksites**" (from their founder, Elias Hicks), who about sixty years ago separated from the orthodox community, and hold latitudinarian views. The Wilburite section are conspicuous in Pennsylvania by their adherence to the livery and the "plain

language." Large numbers of persons who do not appear in the statistical returns attend the Mission meetings of the Society of Friends, and very large numbers come under their influence in the foreign mission field, where 82 missionaries are at work. **Headquarters** in Great Britain: Devonshire House, 12, Bishopsgate Without, London, E.C.; in Ireland, 6, Eustace St., Dublin.

G

Gallifet, General the Marquis de, who was appointed French Minister of War in '99, was b. in 1830, and entered the army in '48. He served in the Crimean war, and afterwards in Mexico and Algeria. In the Franco-German war he distinguished himself in the fighting on the Rhine in '70, was taken prisoner at Sedan, and after the peace was entrusted with the task of putting down the Commune, a task which he performed with vigour, and some say with severity. Although he openly expressed his adherence to the Republic, and became a friend of Gambetta, he has been credited with Monarchical sympathies; but the Duke of Orleans vainly tried to enlist his support in '99. As to the Dreyfus case, he was known at the time of his appointment to be a believer in the innocence of Captain Dreyfus, but to advocate a policy of conciliation. At the same time he showed himself sternly resolved to suppress anything like military insubordination. He retired some years ago from active service.

Gambia. A British colony on Gambia river, the most northerly and the oldest of the British settlements on the coast of West Africa. Capital, **Bathurst**, pop. 6138. Consists of St. Mary's Island, with Combo on south, Albreda, Barra, and The Ceded Mile on north bank. Up the river are several stations, of which McCarthy's Island, 187 miles from the mouth, is the highest. The area of the colony proper is about 69 sq. miles, but a Protectorate exists in the interior, and the area of the whole colony is about 2700 sq. miles, and the population 50,000. Produces ground-nuts, hides, beeswax, rice, cotton, maize, grain, indiarubber, etc. Ruled by Administrator, a Legislative Council of seven members, two non-official, and an Executive Council. See **BRITISH EMPIRE** (table).

Game Laws. Animals *feræ naturæ* (wild animals) are not in English law subjects of property, and therefore are not protected by the law of larceny. Special statutes, accordingly, have been enacted for the preservation of game, and these are known as the game laws. Game, as a legal term, comprises hares, pheasants, partridges, grouse, heath or moor game, black game and bustards (1 and 2 Will. IV., c. 32, s. 2). By the Ground Game Act, '80, it is provided that the occupier of land (the tenancy of which has been created since Sept. 7th, '80) shall have the right to kill ground game (hares and rabbits) thereon equally with the landlord, and shall be unable to alienate this right; but he may authorise certain others to kill his game. See ed. '87.

Gaming. See **LAW**, '99.

Gardiner, S. R., D.C.L., LL.D., the distinguished historian, was b. in 1829 at Ropley, Hants. He was ed. at Winchester and Christ Church, Oxford, and is a Fellow of Merton. His chief historical works include a "History of England, 1603-1642," and a "History of the Great Civil War," published in four volumes in '93. Two volumes of a "History of the Commonwealth and Protectorate" appeared '94-7, and "Oliver Cromwell" in '99. Dr. Gardiner was for some time Professor of Modern History at King's College, London. In '82 a Civil List pension was granted to him. Address: 7, South Park, Sevenoaks.

Garter King of Arms. The holder of this office of dignity and historic interest is, within the College of Arms, above all other officers. His powers include the adjustment of arms in England and Wales, and the power of granting arms under the authority of the Earl Marshal in conjunction with the provincial Kings of Arms, according to their several jurisdictions, to persons qualified to bear them, and the creation of arms, crests, cognisances, and devices, as well as the power and authority to grant armorial bearings. He has, under the Earl Marshal, the regulation of the proceedings at State ceremonies, and the guidance of coronations; and he controls and manages all matters concerning the Order of the Garter. At the commencement of every Session he lays on the table of the House of Lords the roll of the lords temporal, and he assists at the introduction of all newly created peers (see **PEERAGE**). The present holder of the office, Sir Albert Woods, K.C.B., K.C.M.G., F.S.A., is son of the late Sir William Woods, Garter King of Arms, and entered the College of Arms (Queen Victoria Street, E.C.) as Pursuivant 1838, was appointed Lancaster Herald '41, and assumed his present office '69.

Garter, The Most Noble Order of the. Was originally established by King Edward III. in 1349. As reconstituted in 1831 it is limited to the Sovereign, the Prince of Wales, and such descendants of George I. as may be elected to be members of it, and to twenty-five Knight Companions; but sovereigns and princes of other realms, and other foreigners of distinction, may be admitted by special statutes. Its abbreviation is K.G., and it is the highest order of knighthood. Its insignia and habit are most elaborate and imposing, and include the **George**,—a gold medallion of St. George and the Dragon, suspended from a blue ribbon; the **Garter**, which is worn below the knee of the left leg, and is made of dark blue velvet, edged with gold, its motto being "*Honi soit qui mal*

y pense" ("Evil be to him who evil thinks"); a mantle of blue velvet lined with taffeta, with the star of the order embroidered on the left breast; a hood and surcoat of crimson velvet, and a hat of black velvet; a collar of gold weighing thirty ounces, and the star with the cross of St. George in the centre, encircled by the Garter. There are at present fifty K.G.'s in all, including the Sovereign, and the following is a full list of them, the date of creation being prefixed in each case:—

THE SOVEREIGN.

- 1835. Cambridge, H.R.H. the Duke of.
- 1867. Connaught, H.R.H. the Duke of.
- 1878. Cumberland, H.R.H. the Duke of.
- 1863. Saxe Coburg Gotha, H.R.H. The Reigning Duke of (Edinburgh, the Duke of).
- 1841. Wales, H.R.H. the Prince of.
- 1884. York, H.R.H. the Duke of.

- 1867. Austria, the Emperor of.
- 1866. Belgians, the King of the.
- 1865. Denmark, the King of.
- 1896. Denmark, the Crown Prince of.
- 1877. German Emperor, the.
- 1873. Hellenes, the King of the.
- 1892. Hesse, the Grand Duke of.
- 1866. Schleswig-Holstein, H.R.H. Prince Christian of.
- 1878. Italy, the King of.
- 1862. Mecklenburg-Strelitz, the Grand Duke of.
- 1891. Naples, H.R.H. the Prince of.
- 1895. Portugal, the King of.
- 1889. Prussia, Prince Henry of.
- 1892. Roumania, King of.
- 1893. Russia, H.I.H. the Czar of.
- 1882. Saxony, the King of.
- 1882. Sweden and Norway, the King of.

THE KNIGHT COMPANIONS.

- 1892. Abercorn, Duke of.
- 1886. Abergavenny, Marquess of.
- 1883. Argyll, Duke of.
- 1894. Breadalbane, Marquis of.
- 1897. Buccleuch, Duke of.
- 1891. Cadogan, Earl.
- 1865. Cowper, Earl.
- 1897. Derby, Earl of.
- 1892. Devonshire, Duke of.
- 1899. Elgin, Earl of.
- 1862. Fitzwilliam, Earl.
- 1883. Grafton, Duke of.
- 1885. Kimberley, Earl of.
- 1895. Lansdowne, Marquess of.
- 1873. Leicester, Earl of.
- 1888. Londonderry, Marquess of.
- 1886. Norfolk, Duke of.
- 1899. Northumberland, Duke of.
- 1867. Richmond and Gordon, Duke of.
- 1869. Ripon, Marquis of.
- 1892. Rosebery, Earl of.
- 1891. Rutland, Duke of.
- 1878. Salisbury, Marquess of.
- 1864. Spencer, Earl.
- 1870. Westminster, Duke of.

The Bishop of Winchester is Prelate, the Bishop of Oxford Chancellor, and the Dean of Windsor Registrar of the Order. Sir Albert W. Woods, K.C.B., K.C.M.G., F.S.A., is Garter Principal King of Arms. General Sir Michael Biddulph is Gentleman Usher of the Black Rod.

Gas Companies, Metropolitan. See SECTION, sect. 120.

Geikie, Sir Archibald, F.R.S., was b. at Edinburgh 1835. Ed. at the High School and the University. Appointed to the Geological

Survey in '55. On the extension of the Survey in '67 he was appointed director of the Survey of Scotland, and in Dec. '70 was nominated by Sir Roderick Murchison as first occupant of the chair of Mineralogy and Geology, founded in the University of Edinburgh by Sir Roderick and the Crown. In '81 he was appointed **Director-General of the Geological Survey of the United Kingdom**, and Director of the Museum of Practical Geology, London. Sir Archibald has been Foreign Secretary of the Royal Society, President of the Geological Society, and President of the British Association. He has written numerous works on geology. The honour of **knighthood** was conferred upon him on the Queen's Birthday, '91. He has received the hon. degree of D.Sc. from the Universities of Cambridge and Dublin, that of LL.D. from those of Edinburgh and St. Andrews, and that of D.C.L. from the University of Oxford. He is a Correspondent of the Institute of France, and Foreign Member of the Academy of the Lincei at Rome and of the Royal Academies of Berlin, Vienna, Stockholm, Brussels, Göttingen, Munich, &c. Official address: Geological Survey, 28, Jermyn Street, London, S.W. Town address: 10, Chester Terrace, Regent's Park, N.W., and Athenæum Club.

General Assembly. See CHURCH OF SCOTLAND, PRESBYTERIAN.

Gentlemen-at-Arms. A bodyguard to the sovereign instituted in 1509 by Henry VIII., and the oldest corps in H.M. service except the Yeomen of the Guard. Its members were "chosen of Gentlemen that be comen and extracte of Noble Blood." Towards the close of last century it fell into great degeneration, and the posts were systematically bought and sold. But the corps is now of a far higher social standard. It contains over forty members, all of them ex-commissioned officers of distinction. It is only mustered for duty on such occasions as drawing-rooms, levées, and great state ceremonies. The captain of the corps changes with the Ministry (*q.v.*).

GEOGRAPHICAL PROGRESS, '99.

Looking first at **Africa**, the important work done in connection with Colonel Macdonald's administration in British East Africa must be noted. An expedition led by Colonel Macdonald explored the Karamajo country, between Lake Rudolf and the Nile. The region consists mainly of plateau 4000 to 5000 ft. high, forming a northward extension of the Guash Naishu. It is, in many parts covered with rich grass, and inhabited by the Wakaramajo, a people of remarkably fine physique. A subsidiary expedition, under Captain Austen, subsequently visited Lake Rudolf, the western shores of which were mapped. Numerous lagoons were observed here, and evidence of the encroachment of the lake was afforded by partially submerged trees, a line of palms, in one instance, extending for two or three miles into the lake. Captain Austen believes that the Omo is the only permanent feeder of the lake. A very interesting journey was accomplished by Captain Welby in the country north of Lake Rudolf, the southern parts of Abyssinia, and the upper valley of the Sobat. The country traversed was mapped, and numerous observations were taken. The Turkana, a fine race, wear the hair long and matted, forming in it little receptacles for tobacco and other trifles.

In one district visited by Captain Welby demoniacal possession was reputed to be endemic, and although little disposed to give credence to the statement, he found that, whatever their nature, certain remarkable psychical conditions did certainly prevail. Captain Bethé, in the course of a journey to the volcanic region north of Lake Kivu, discovered in the Bugira country a small lake, named Kifuha. The volcano of Kirunga-ya-Ufumbiro (estimated height 13,000 to 16,000 ft.) was ascended. It is believed to be distinct from Kirunga-cha-gongo (11,300 ft.), discovered by Von Götzen. The expedition subsequently passed through a district inhabited by dwarfs. The mountain giants of Africa, Kilimanjaro and Kenia, have both been ascended; the former by Captain Johannes, who reached the Kibo crater, about 19,000 ft., and the latter by Mr. Mackinder, who led an expedition partly subsidised by the Royal Geographical Society. In West Africa the Béhaghe expedition to Lake Chad has done useful work, including the survey of the Gribingi river to its source, that of the Shari to 10° N., and the partial exploration of the Bamingi and other streams. Tidings reached this country in November of the massacre of M. Béhaghe and some of his party, but the persistent rumours of disaster to the Foureaux-Lamy mission, which has been working its way across the Sahara, appear, happily, to be unfounded. News has been received of it up to the middle of August, when it had reached Air. An earlier report mentioned the crossing of the Tassili plateau by the Igharghar channel.

As to Asia, Dr. Futterer, travelling in Eastern Asia, explored several of the tributaries in the upper basin of the Hwang-ho and some mountain ranges. A pass 13,000 ft. high was crossed. A Russian expedition to Tungaria and Chinese Turkestan has added to the knowledge of parts of the Altai and the Western Gobi. The ruins of many ancient cities were discovered, and about 130 Buddhist cave temples. Captain Deasy continues to collect much valuable geographical material in Central Asia. He reports that the Khotan-daria, the source of which he discovered last year, and the Keriadaria, rise on opposite sides of the same snow-clad range, the former flowing north, the latter south. He had also journeyed into Northern Tibet and Aksai Chin. Dr. Sven Hedin, who has already done so much towards elucidating the geographical problems of Central Asia, has again returned thither to prosecute his researches. A disastrous attempt to reach Lhasa was made by a Dutch missionary and his wife settled at Tankar, near the Kuko-nor. They had succeeded in crossing the Ta-tsang Pass, but at Tachu were forced to turn. M. Rijnhart is supposed to have fallen into the hands of the Tibetans, though his actual fate is unknown. His wife, after a terrible journey, succeeded in reaching Chinese territory.

In North America, as the result of the careful investigations made by Professor Norman Collie, it would appear that between 51°30' and 52°16' is a region covered with great ice-fields, amongst and around which rise several lofty peaks, including Mounts Bryce and Alberta, each 13,000 to 14,000 ft., and Mount Columbia, probably the crowning summit, about 14,000 ft. Further, Dr. Collie has been enabled to identify Mounts Brown and Hooker, the "guardians of the Athabasca Pass," with two mountains previously ascended respectively by his brother

and Professor Coleman, and according to whom Mount Brown has an altitude of only 9000 ft., while that of Mount Hooker is somewhat less. These mountains are consequently deprived of 6000 or 7000 of the feet formerly attributed to them, while Mount Murchison is reduced to 12,000 ft. The highest peak yet actually measured in the Canadian Rockies is Mount Robson, discovered in '98 by Mr. J. McEvoy of the Canadian Geological Survey, near the Yellow Head Pass. Mr. Eldridge, who last year led an expedition into Alaska up the east branch of the Sushitna river, claims monarchical honours for another mountain—Belushai, the height of which he estimates at 19,500 ft., and therefore the highest mountain in the United States. If this estimate be correct, it would make Belushai the rival of Mount Logan, as the highest summit in North America. The exploration of Alaska is being continued this year under the auspices of the Government: two parties have been sent out, one led by Messrs. Peters and Brooks to follow the base of the St. Elias range to the sources of the Copper river and Tanana, the other led by Messrs. Schrader and Gardine to explore the streams north of the Yukon.

Patagonia has in recent years offered the greatest attraction to explorers in South America, and three distinguished workers have made it their special field, while another, Sir Martin Conway, has been engaged more particularly in the higher mountains. He has done good service by his triangulation of the western side of the Cordillera Real, between Sorato and Illimani, and he has also described the mountainous region around La Paz. An attempt was made to ascend Mount Sarmiento, in Tierra del Fuego. Other points which may be mentioned in passing are the settlement of the Venezuelan boundary, and of the Argentine-Chilian boundary south of 26° 52' 45", and the proposal to re-measure the meridian arc at Quito, for which purpose a preliminary expedition has been sent out by the French Government.

In North Borneo, the famous mountain Kinabalu, "the Chinese widow," about which several legends hang, was ascended to a height of 11,643 ft. by Mr. H. T. Burls, while some of his servants reached the summit, which he estimates at 12,043 ft. Thence they brought back specimens of quartz crystals, the existence of which he supposes may have given origin to the legend that a great diamond guarded by a dragon was to be found there. In British New Guinea Mr. Levesey ascended the Tauri and Lakekamu rivers, which enter the Gulf of Papua, and explored some of the unknown and uninhabited districts about their upper courses. Arrangements have been made by the United States Commission of Fisheries for a scientific expedition to the Mid-Pacific, under the charge of Professor Alex. Agassiz, in the *Albatross*. It is proposed to visit various groups of islands, and to take a series of deep-sea dredgings. The expedition is expected to return in April 1900. A word must be said of the German Deep Sea expedition, which has done excellent scientific work in the Southern Ocean. After leaving Bouvet Island, great depths were met with, eleven out of seventeen soundings showing depths between 2700 and 3300 fathoms.

Geographical Societies. See ROYAL GEOGRAPHICAL SOCIETY and ROYAL SCOTTISH GEOGRAPHICAL SOCIETY.

Geological Survey. This organisation was founded by Sir H. T. De la Beche, who commenced work single-handed in the south-west of England about 1830. The Geological Survey was officially recognised as a branch of the Ordnance Survey in '34. In '45 it was placed under the Office of Woods and Forests, and in '54 under the Department of Science and Art. A detailed summary of the progress of the survey is now issued annually. The entire geological survey of England on the **one-inch ordnance maps** (scale 1 : 63,360) has been completed, with the exception of the drifts; the **six-inch scale** (1 : 10,560) has been used for coal-fields and other important districts. The Geological Survey of the South Wales, Leicestershire, and North Staffordshire coal-fields on the six-inch scale is in progress, and the re-survey of Cornwall has been commenced. The drifts were formerly neglected; but for many years past these have been mapped, and hence many sheets are issued in two editions—one showing the solid geology, while the other, or drift-map, shows the superficial deposits. An index map (scale 4 miles to 1 inch) has been issued, and is now printed in chromolithography, all the maps of the Survey issued up to '96 having been hand-coloured. The large survey maps are illustrated by horizontal and vertical sections, and by explanatory memoirs. The geological survey of Scotland was commenced in '54, and that of Ireland in '45. The geological map of Ireland on the one-inch scale having been completed, the Irish survey was broken up in '90; but a small staff is retained at the Dublin office to revise the maps of certain districts as occasion may require. The Scotch survey is engaged principally on complicated work in the Highlands. The survey of each country was formerly placed under a director, and all united under a director-general. The successive directors-general have been Sir H. T. De la Beche ('45-55), Sir Roderick I. Murchison ('55-72), Sir A. C. Ramsay ('72-81), and Sir A. Geikie ('81).

GEOLOGY, '99.

Hutton's classical "Theory of the Earth," published more than a century ago, and usually recognised as the work which laid the foundation of modern geological philosophy, was never completed, only two parts out of four having been published. A manuscript of part of the third volume came, upwards of forty years ago, into the possession of the Geological Society of London; and the council has recently published this work under the editorship of Sir A. Geikie. The volume is one of great interest in the history of British geology, and contains, among other things, an account of Hutton's famous visit to Glen Tilt, where he confirmed his suspicion as to the igneous origin of granite. It has been said that Hutton was greater as a philosopher in his study than as a geologist in the field, but the present work bears testimony to his accuracy of observation as a practical geologist. Sir A. Geikie, in his presidential address to the Geological Section of the British Association at the Dover Meeting, discussed the question of Geological Time. Whilst criticising those physical conclusions which would lead to a contracted view of the age of the earth, he called attention to the want of some exact register whereby the rate of geological time may be recorded. Practically nothing has been done in the instrumental

measurement of geological phenomena, and he now suggests that an international committee should be appointed for the purpose of obtaining accurate numerical data to assist in the discussion of geological problems. Until these shall have been obtained it seems hopeless to attempt the formation of even a rough estimate of the earth's age. The borings which are being carried on in quest of coal in the south-east of England are being watched in the interest of geologists by Mr. R. Etheridge, Prof. Boyd Dawkins, and Mr. Lamplugh. Coal has been found at Ropersole, eight miles north of Dover, on the road to Canterbury; and Prof. Dawkins states that borings are now being made at Ottinge, six miles N.W. of Ropersole, and elsewhere. Mr. Gibson, an officer of the Geological Survey, working in North Staffordshire, has argued in favour of a considerable extension of the great Midland coal-fields at moderate depth beneath the overlying red rocks. The attention of the British Association at Dover was appropriately called by Prof. Boyd Dawkins to the geological feasibility of constructing a submarine tunnel between Dover and France. The tunnel could safely be pierced through the clayey part of the lower grey chalk, which is impervious, and is traversed by only such small faults as could be readily rendered water-tight. A party of Belgian geologists visited this country in the autumn for the purpose of acquiring familiarity with the structure of the south-east of England, and comparing it with that of parts of Belgium. Their geological excursions were led by Mr. Whitaker, the President of the Geological Society of London. The anniversary address delivered to the Society last February, by Mr. Whitaker, was devoted chiefly to an exposition of the practical value of geology in relation to questions of water supply, a subject on which the President is our highest authority. The address delivered to the Geologists' Association by its President, Mr. Teall, dealt with the natural history of cordierite and its allies. In the course of his study of the cordierite rocks of the neighbourhood of Ben Cruchan, in the Eastern Highlands of Scotland, Mr. Teall has found crystals of corundum. Mr. J. B. Hill has contributed to our knowledge of rock-metamorphism in the Scottish Highlands by describing to the Geological Society the changes which certain sedimentary strata in the region of Loch Awe undergo as they approach the Central Highlands. The paper is the result of much work in the district during the progress of the Geological Survey. Dr. A. W. Rowe, of Margate, has published the conclusions which he has reached after many years spent in examining the zones of the chalk of the various coast sections in the south and south-east of England, with special reference to the distribution of the sea-urchins called micraster. Discussing these forms from the point of view of the evolutionist, he shows how they pass into each other by various mutation forms, but finds that each zone is rigidly marked by its own type. Geological literature has been enriched during the year by the publication of the Life of Sir J. Prestwich, written by his widow. This work gives an account of the original investigations which Prestwich for so many years carried out in connection with the Tertiary and Post-Tertiary deposits of England and France. The Cambridge University Press has issued an excellent work on Stratigraphical Geology by Mr. J. E. Marr. Several volumes

on geological subjects have been recently contributed to Mr. Murray's "Progressive Science Series," notably a volume on volcanoes, by Prof. Bonney, and one on earth sculpture, by Prof. J. Geikie. Geology is represented in this country by the Geological Society of London, which has offices at Burlington House, and issues a quarterly journal. **President for '99-1900, W. Whitaker, F.R.S.; Secretaries, W. H. Herries and Prof. W. W. Watts.** The Geologists' Association meets at University College, Gower Street. **President, J. J. H. Teall, F.R.S.** The Palæontographical Society is a publishing body for the issue of figures and descriptions of British fossils. **President, Dr. H. Woodward, F.R.S. Secretary, Rev. Prof. Wiltshire.**

George I. (Christian William Ferdinand Adolphus George), **King of Greece**, is the second son of King Christian of Denmark, and a brother of the Dowager Empress of Russia and the Princess of Wales; was b. 1845. Chosen King of Greece in '63, in succession to Otho I. The vacant throne had previously been offered to Prince Alfred (Duke of Edinburgh), and to Duke Ernest of Saxe-Coburg Gotha. King George married in '67 Princess Olga, daughter of the Russian Grand Duke Constantine, and has five sons and one daughter. An attempt to assassinate him was made in '98, but happily failed. The eldest son and heir-apparent is Prince Constantine, Duke of Sparta, who married Princess Sophia of Prussia in '89.

George, Prince, High Commissioner of Crete. He is the second son of King George of Greece, and was born June 24th, '69. See CRETE.

George of Wales, H.R.H. Prince. See YORK, H.R.H. GEORGE, DUKE OF.

German South-West Africa. A German protectorate in West Africa, coast extending from Cape Frio to the mouth of the Orange river. The area is estimated at 320,000 sq. miles, and the pop. 200,000. Coast infertile and desolate; inland are richer tracts. Damaraland is the name of the northern district, Namaqualand and Luderitzland lying to the south. Damaraland is occupied by the **South-West Africa Company**, an Anglo-German syndicate, which was formed in London in '92, and obtained from Berlin a concession to search for and work the minerals of the district, including the copper mines of Otavi, but outside of the district worked and occupied by the German South-Western Africa Colonial Company, which district consists chiefly of the coast lands. The country is apparently rich in copper and in agricultural resources, though as yet it is quite undeveloped. Coffee is exported. The seat of administration is at Great Windhoek, 180 miles inland from Walfisch Bay. The Government decided in '97 to build a railway from Swakopmund on the coast to the interior. The line is to be 90 kilometres long, with narrow gauge, and, although it is to be built for mule traffic, some engines were sent over it with the railway material. The first section of the line, to Windhoek, in Damaraland, was opened in December '97. The Reichstag granted 1,000,000 marks for continuing the railway and telegraph lines from Swakopmund to Windhoek (Feb. 13th, '98). A special agreement between the German Government and the British South Africa Company was reported (Nov. 9th, '99), whereby the Company undertook not to continue its railway to the West Coast of Africa from Rhodesia or Bechuanaland, south of 14° N. lat., except from

a point on the Anglo-German frontier to be agreed upon with the German Government; and not to construct a railway from the Company's territories to the west coast north of 14° N. lat., until a railway line has been built south of that degree through German South-West Africa.

GERMANY.

The German Empire is a confederation of German states under the presidency of the Emperor William II., of Hohenzollern, King of Prussia. According to the constitution of April 16th, 1871, all the states of Germany are to form an eternal union; the direction of political and military affairs is vested in the Emperor, who may declare war, but if it is not defensive, the consent of the Bundesrath, or Federal Council is required. The legislative functions of the empire are vested jointly in the **Reichstag** and the **Bundesrath**. This body, which represents the individual states of the empire, as the Reichstag represents the German nation, consists of fifty-eight delegates, appointed by the governments of the individual states for each session. Of these, seventeen sit for Prussia, six for Bavaria, four each for Würtemberg and Saxony, three each for Baden and Hesse, two each for Mecklenburg-Schwerin and Brunswick, and one each for the remaining states, including Hamburg, Lübeck, and Bremen. Of its functions, it may be said that the Bundesrath is mainly a confirming body, although it has the privilege of rejecting measures passed by the Reichstag. It has also a limited initiatory power, which it occasionally exercises. Members of the Bundesrath have the right of appearing in the Reichstag, and of speaking on any question in which the state they represent is directly interested. Members of the one chamber, however, are not eligible for election to the other, although they may sit in their respective provincial diets. The **Reichstag** is composed of 397 members, elected by universal suffrage and ballot for the term of five years. Of these 236 constitute the elected of Prussia, 48 represent Bavaria, 23 Saxony, and the remainder the other states in due proportion, ranging from 1 to 17. The following states are included in the confederation: The kingdoms of Prussia, Bavaria, Würtemberg, and Saxony; the imperial province of Alsace-Lorraine; the grand duchies of Baden, Mecklenburg-Schwerin, Hesse, Oldenburg, Brunswick, Saxe-Weimar, Mecklenburg-Strelitz, and fourteen smaller states.—**Religion.** Owing to its federal constitution, the relations of Church and State vary in different parts of the empire, but liberty of conscience prevails. The Protestants form 62·7 per cent. of the population, and Roman Catholics 35·9 per cent., Jews making up 1·2 per cent. of the remainder. **Education** is general and compulsory throughout the empire. There are elementary schools, supported from the local rates, in every town and village; and besides the elementary there is an admirable system of secondary education, with special schools for technical education. There are, besides, 21 universities in the empire. Uniform codes of commercial and criminal law prevail throughout the empire, and a uniform civil code was adopted in '96, though it will not come into force till 1900. Agriculture is a very considerable industry, supporting about 19,000,000 of the population. Manufactures employ and support a still larger

number, and the chief articles exported are textiles, metal-work, machinery, sugar and other food products, chemicals, etc. Most of the railways, which traverse 29,500 miles, belong either to the Imperial or the State Governments. **Area** (with Alsace-Lorraine), 208,830 sq. miles; **pop.** '95, 52,279,915. **Revenue**, '98-9, £69,157,400; **expenditure**, £70,551,800 (the revenue is derived from the customs and other Imperial sources, and the balance is made good by contributions from the confederate States); **public debt**, £104,831,654; **imports**, '97, £243,230,000; **exports**, £189,310,000. See **COLONIES, ETC., OF EUROPEAN POWERS, DIPLOMATIC, FOREIGN ARMIES, FOREIGN NAVIES.**

Political Parties. The centre of political life in the German Empire is the Reichstag, the constitution of which is somewhat complex. The general election of June '93 resulted as follows: **Centre**, 96 members; **Conservatives**, 75; **National Liberals**, 53; **Social Democrats**, 44; **Radical Popular Party**, 24; **Imperialists**, 23; **Poles**, 19; **Anti-Semites**, 17; **Radical Union**, 14; and a miscellaneous assemblage of the South German People's Party, Guelphs, Danes, Alsations, etc., making 32 in all. In '94 a dead set was made by members of all parties, notably the Conservatives, against Count Caprivi, the Imperial Chancellor, who ultimately resigned in October, and was succeeded by Prince Hohenlohe. The expulsion of Baron von Hammerstein from the Conservative party and from the editorial chair of its organ, the *Kreuz Zeitung*, and the decision of the Social Democrats not to support the agrarian policy, were the most noticeable events of '95. In '96 a section of the Conservative party, led by Dr. Stöcker, separated to form the **Christian Socialist** group, opposing both reactionary Conservatism and revolutionary Social Democracy. The Agrarian party lost much ground during the year, and what they lost the Liberals and Radicals gained. The National Liberal party showed a tendency to break up, the more progressive members of the party drawing towards the Moderate Radicals, and the more Conservative towards the agrarian and reactionary party. During '97, in prospect of the general election of '98, there were some efforts at promoting union between the various sections of the Liberals, but little came of it. A noteworthy decision, however, was arrived at by the Social Democrats in October—viz., that the party should abandon its policy of obstruction with regard to elections to the Prussian Diet, and work, as far as possible, with the Liberal and Progressive candidates. The General Election took place in June '98, and resulted in the return of the following members: **Centre**, or Clerical party, 103; **Social Democrats**, 56; **Conservatives**, 53; **Free Conservatives**, 21; **National Liberals**, 48; **Advanced Radicals**, 30; **Moderate Radicals**, 13; **Poles**, 14; **Anti-Semites**, 12; **South German People's Party**, 8; **Agrarians**, 5; and a miscellaneous group of Hanoverian Guelphs, Alsations, Bavarians, and others. The Social Democrats thus gained heavily, but the Centre were still left with the balance of power in their hands. The total number of qualified electors was officially returned at 11,200,000, and of voters 7,600,000, or about 67 per cent. The votes cast for the leading parties were:—**Social Democrats**, 2,120,000; **Clericals**, 1,333,000; **National Liberals**, 1,160,000; **Conservatives**, 900,000; **Radical Left**, 500,000; **Free Conservatives**, 220,000; **Anti-Semites**, 310,000; **Moderate**

Radicals, 230,000; **Poles**, 180,000; **South-German Democrats**, 120,000; **Alsation Party of Protest**, 90,000; **Bavarian Peasants' League**, 140,000; **Agrarian League**, 60,000. The Agrarian League claimed in '99 to have 188,000 members.

History '99.—The new Reichstag was opened by the Emperor in person on Dec. 6th, '98. More social legislation was foreshadowed, and a new Army Bill, increasing the strength of the army; the Emperor's visit to Palestine was alluded to, and a sympathetic reception was assured for the Czar's proposals in the interests of peace. The debate on the first reading of the Army Bill commenced in the Reichstag (Jan. 12th, '99). The Bill proposed an increase in the peace strength of the army amounting to 26,576 non-commissioned officers and men, the increase to take place between Oct. 1st, '99, and Dec. 31st, 1902. Prince Alfred, the only son of the Duke of Saxe-Coburg and Gotha, died (Feb. 6th), and the Duke of Connaught thus became heir-presumptive to the Duchy. He, however, afterwards renounced his rights in favour of the young Duke of Albany. The Emperor gave an audience to Mr. Cecil Rhodes (March 11th) in reference to the question of the Cape to Cairo railway and its passage through German East Africa. It was announced (16th) that a treaty for the erection of the telegraph line through German territory had been signed, and an understanding arrived at as to the route of the railway, though no final agreement had been reached (see **EAST AFRICA, GERMAN**). After prolonged negotiations in Committee a compromise was arrived at between the Government and the Clericals, and the Army Bill passed its third reading, the increase in the peace strength of the army originally proposed by the Government being diminished by about 7000. A Bill promoted by the Government for the formation of an Imperial Bank with a capital of 180,000,000 marks passed its third reading in the Reichstag (April 28th). At the opening of the Spanish Cortes in June it was announced that the Caroline, Pelew, and Ladrone Islands, Spain's remaining possessions in the Pacific, had been transferred by agreement to Germany for 25,000,000 pesetas, or about £800,000 (see **CAROLINE ISLANDS**). The Reichstag approved a Bill providing for the extension of the most-favoured-nation treatment to Great Britain and her colonies (Canada being subsequently excepted by the Federal Council) until July 30th, 1900 (20th). A Bill dealing with labour strikes, picketing, and the right of coalition, was introduced by the Chancellor personally, but the Reichstag would have none of it. It was dubbed the "Penal Servitude" Bill, the Social Democrats passionately protested against it, and the Reichstag was adjourned (22nd) till Nov. 14th. The Emperor in person opened the Dortmund and Ems Canal (Aug. 11th) (see article **ENGINEERING** for details). The Prussian Diet was at the time considering a Bill for the construction of the Rhine-Elbe Canal, and the Emperor took the opportunity of declaring his resolve to see the project carried through. Nevertheless the Diet threw out the Bill (20th), the reason alleged being the fears of the Agrarians and farmers of East Prussia that the Canal would bring them face to face with western and even foreign competition. In the Royal Message closing the Session the re-introduction of the project in the next Session was foreshadowed (29th), and a few days afterwards

most of the Landrätthe and other officials who had opposed and voted against the measure were removed from their positions. The resignation of Baron von der Recke, Minister of the Interior, and Dr. Bosse, Minister of Education, followed (Sept. 4th). They were succeeded by Baron von Rheinbaben and Herr Stutt. Certain members of a club called the Innocents' Club, largely affected by the aristocracy, were accused of professional gambling, but were acquitted, the Court not being satisfied that their conduct was that of "professional gamblers." The Court added that it was not their business to pronounce on the moral aspect of the case, and that the accused would have already discovered the verdict of public opinion on that point (Oct. 21st). The German press on the whole commented with great bitterness and hostility to England on the outbreak and development of the Transvaal War; but the Emperor sent a friendly telegram to the British 1st Royal Dragoon Regiment, of which he is honorary Colonel, on their departure for South Africa, and this was generally accepted as a sign that Germany would remain in a neutral position with regard to the war. It was pointed out, moreover, that it was to Germany's interest to be neutral. The agreement with Great Britain as to Samoa and the boundaries of Togoland and the Gold Coast (see SAMOA and GOLD COAST for details), and the agreement with the British South African Company as to railways to the West Coast of Africa (see GERMAN SOUTH-WEST AFRICA) further emphasised the friendly relations of the two countries; as well as an order issued by the Emperor (Nov. 8th) that no Prussian officers, attached or unattached, should be granted leave to go to South Africa. The Czar and Czarina paid a visit to the Emperor and Empress at Potsdam (8th).

German Emperor. See WILLIAM II.

Gibraltar. The name is a corruption of *Jebel el Tarik*, the Mount of Tarik. Anciently *Calpe*, one of the pillars of Hercules. Is a rocky promontory, $2\frac{3}{4}$ miles long and with an extreme breadth of $\frac{3}{4}$ mile, on the south of Spain, connected with Andalusia by a low isthmus, and is a British fortress and the "key" of the Mediterranean. Area, $1\frac{1}{8}$ sq. m.; pop. 26,050, including a garrison of 5664 men. The rock rises to 1439 feet, and is impregnablely fortified. The town lies within the bay, on the western side. Anchorage is bad. The port is free, and is the *entrepôt* of a considerable trade between North Africa and the United Kingdom. An enclosed harbour and graving docks are being constructed. (See ENGINEERING.) It is also a coaling station of first-rate importance. Ruled as a Crown colony by the military Governor. For financial statistics see BRITISH EMPIRE (table); see also DIPLOMACY.

Giffen, Sir Robert, K.C.B., late Controllor-General of the Commercial, Labour, and Statistical Department of the Board of Trade. He was born 1837, and educated at Glasgow University, which gave him the LL.D. degree in '84. After a legal training in a solicitor's office, he became a journalist, and was subeditor of the *Globe* '62-6, and assistant-editor of the *Economist* '68-76. He was then appointed Chief of the Statistical Department of the Board of Trade, and has since discharged the duties of that office and of Assistant Secretary to the Board ('82), and Controllor of the Commercial Labour and Statistical Department ('93). He was President of the Statistical Society '82-4, and

has published various works, such as "Essays in Finance," "The Progress of the Working Classes in the Last Half-Century," and "The Case against Bimetallism." He retired from the Board of Trade in Oct. '97. Address: 9, Bina Gardens, South Kensington, S.W.

Gilchrist Educational Trust. A fund left by the late Dr. John Borthwick Gilchrist (1759-1841) to trustees, "for the benefit, advancement, and propagation of education and learning in every part of the world, as far as circumstances will permit." The income is applied to the support of scholarships for young men and young women, awarded on the result of competitive examinations; in occasional grants to Educational Institutions under special circumstances; and to the delivery of high-class scientific lectures for the people, at a charge for admission of 1d. each per lecture. Secretary, R. D. Roberts, M.A., D.Sc. Office, 17, Victoria Street, Westminster, S.W.

Girls' Friendly Society. See YOUNG WOMEN, ORGANISATIONS FOR.

Girton College. See HIGHER EDUCATION OF WOMEN.

Gladstone National Memorial. See ST. DEINIOL'S LIBRARY.

"Glasgow Herald." A morning newspaper, independent in politics. Founded in 1782. It circulates all over Scotland, and has the highest reputation in commercial circles throughout the United Kingdom. It is said to be the greatest advertisement medium out of London. Editor, Charles Russell. From the same office are issued the *Weekly Herald* and the *Evening Times*. Head Office, 65 to 69, Buchanan Street, Glasgow; London Office, 112, Fleet Street.

Glasgow University. Founded by a bull of Pope Nicholas V. in 1450; received a new charter from James VI. of Scotland in 1577; remodelled by the Universities (Scotland) Acts, 1858 and 1889. There were last session 1953 students (336 women), and of the total 834 were students in Arts (216 women) and 661 students of Medicine (84 women). Women students are taught separately at Queen Margaret College. See article on HIGHER EDUCATION OF WOMEN. Chancellor, Rt. Hon. the Earl of Stair, K.T., LL.D. Rector, Lord Rosebery, elected Oct. 29th, '99. Principal and Vice-Chancellor, Robert Herbert Story, D.D. Parliamentary representative, Rt. Hon. J. A. Campbell, LL.D. Registrar of General Council, James Coutts, M.A. Degrees: M.A., D.Phil., D.Litt., B.Sc., D.Sc., B.L., LL.B.; LL.D., M.B. and Ch.B., M.D., Ch.M., B.D., D.D. Among the distinguished alumni are Adam Smith, Thomas Campbell, Francis Jeffrey, Archbishop Tait, Principal Caird, Principal Shairp, Rev. R. S. Candlish, and Lord Kelvin.

"Globe, The." Established 1803, and subsequently incorporated with *The Traveller*. It was started by the old Whig party, and always was recognised as an authority on political matters, its contributors including some who held high office in the State. It retained its Whiggism until 1866, when a new proprietary, recognising the changed times, made it an outspoken though independent Conservative organ, reducing its price from 4d. to 2d., and eventually to 1d. It is now a recognised evening journal of the Constitutional party. Editor, George Elliot Armstrong. Offices, 367, Strand, W.C.

Gloucester, Bishop of. See under PEERAGE.

Goa. A port-town and territory between the boundaries of Madras and Bombay, India. Once the seat of great trade, now decayed and

ruinous. Belongs to Portugal, with Damao, on the coast 100 miles north of Bombay, and Diu, a small island 140 miles off Damao. The capital is Panjin, in Goa. There are a number of salt works in Goa. See COLONIES, ETC., OF EUROPEAN POWERS.

Godley, Sir John Arthur, Permanent Under-Secretary for India since 1883, is the eldest son of John Robert Godley, late of Killigar, co. Leitrim, and was b. in '47. Educated at Rugby and Balliol College, Oxford; entered as a student at Lincoln's Inn '69, and was called to the Bar '76. From '80 until '82 he was senior private secretary to the late Mr. Gladstone, then Prime Minister and First Lord of the Treasury, who appointed him a Commissioner of Inland Revenue in '82; and he was selected for the position he now fills in '83. Lady Godley, whom he married in '71, is a daughter of Walter, Lord Northbourne.

Gold Coast Colony. A British Crown colony on the coast of West Africa, bounded on the east by Togoland (German), and on the west by the Ivory Coast (French). The colony has a coast-line of about 350 miles, and though the interior boundaries are not strictly defined, the area may be put at about 45,000 square miles, and the population at 1,500,000, including 37,500 professed Christians. The native state of Ashanti lies inland, at the back of the central portion of the colony. Trouble arose between the King of Kumassi, who had declared himself King of Ashanti in '94, and the British authorities and in '95 an expedition was sent against him, under the command of Sir Francis Scott, which resulted in the submission of the King, who was afterwards taken to the coast. The kings of Bekwai and Abodom also made their submission, and the country was placed under British protection, and a Resident appointed at Kumassi. The territories in the *hinterland* to the north of Ashanti have been made a separate district under the name of the "Northern Territories," and are administered by a Commissioner. The Niger Convention, drawn up by the Anglo-French Commission sitting at Paris, and signed June 15th, '98, settled the boundaries of the *hinterland* to the west and the north. From the intersection of the river Volta with the 9th parallel of north latitude, the boundary runs up the course of the river northwards to its intersection with the 11th parallel, and then turns east along the 11th parallel, deflecting northwards so as to include Bawku, till it reaches German territory in the *hinterland* of Togoland. The British and German Governments agreed (Nov. 15th, '99) to divide the neutral zone in the Gold Coast and Togoland *hinterland* between them. The Daka river forms the boundary up to the intersection of the river with the 9th parallel, N. lat., and thence northwards the line is to be demarcated so as to leave the western portion, including Mamprusi and Gambaga, to Great Britain, and the eastern portion, including Yendi and Chakosi, to Germany. Accra is the administrative centre of the colony, and has a population of 16,267. The Government includes a Governor, an Executive Council, and a Legislative Council of nine, none of whom are elected. There is a colonial constabulary force, with a military organisation, about 1650 strong, officers and men. Railway communication is being laid down, and by the Colonial Loans Act, '99, a sum of £578,000 was advanced by the Imperial Government for lines from Secondee to the

gold mines of Tarquah, from Tarquah to Kumassi, from Appam to Kumassi, and from Accra to the Volta. Another sum of £98,000 was advanced for harbour works at Accra. The products are chiefly palm-oil, gold, palm kernels, rubber, timber, etc. See BRITISH EMPIRE (table), DIPLOMATIC, and NIGERIA (map).

Gold Fields and Production. Gold is found in all parts of the world, but often in such small quantities as to render it impossible for it to be obtained at a profit. Practically its sources are two—(1) alluvial river deposits, and (2) quartz containing reefs or veins. The former was until recently the principal way in which gold was obtained. The gold discoveries in Victoria and California from forty to fifty years were of this kind. In the nature of things alluvial workings are mostly on a simple scale, and afford great chances as well as great risks to every one. They are, however, very frequently small and pocketty, and seldom develop into permanent industries. It is otherwise, however, with quartz mining, which has had an enormous development of late years. The lie of the reefs and veins is easily ascertainable, and the quantity of gold-yielding ore in a given area can be predicted with fair certainty. Thus it becomes profitable to do an immense amount of development work in the way of making borings, sinking shafts, etc., and to expend large sums on costly machinery, before an ounce of gold is obtained. The initial expenditure in connection with quartz mining is, indeed, necessarily so heavy that the industry is mainly in the hands of large limited companies, the buying and selling of whose shares form an important part of the business of the STOCK EXCHANGE (*q.v.*). The methods of extracting gold from the ore are becoming every year more complete and scientific. The ore is in the first place crushed by heavy stamps, which leave the gold deposited on plates. Then the residue, known as "tailings," undergoes treatment by cyanide, with the result that some gold which was not separated in crushing is secured. Even the ore then remaining, and known as "slimes," is now made to yield its quota, though until recently it was considered quite worthless. Of late years the world's output of gold, after remaining practically stationary for a considerable period, has shown a marked increase. This is due in the main to two new fields, those of Witwatersrand and Western Australia, particulars as to which will be found below.

Production in—

Year.	Australasia.	America.	Whole World.
	£	£	£
1851	1,319,000	11,000,000	17,200,000
1855	11,277,000	11,000,000	27,015,000
1860	10,554,000	9,200,000	23,850,000
1865	10,253,000	10,600,000	24,040,000
1870	8,939,000	10,000,000	21,370,000
1875	7,326,000	6,700,000	22,700,000
1880	6,174,000	7,200,000	22,130,000
1885	5,597,000	6,400,000	21,250,000
1890	6,004,000	6,600,000	24,260,000
1892	6,835,000	6,600,000	29,900,000
1894	7,282,000	7,900,000	30,765,000
1895	8,870,000	9,300,000	41,000,000
1896	8,983,000	10,800,000	45,000,000
1897	11,075,000	11,400,000	51,706,000
1898	13,831,000	13,524,000	59,857,000

The Witwatersrand field, though now the most important in the world, was only discovered as recently as '86. It is here that mining has been most scientifically carried on. In the so-called "deep" mines shafts are often sunk to great depths before the reef is struck, but many of these properties have recently been yielding excellent results. It is not expected that the field will be worked out for at least eighty years. Gold is known to exist in other parts of the Transvaal, such as the Lydenburg, Murchison, Klerksdorp, and De Kaap districts, but has not yet been extensively worked, owing to the heavy taxation on the industry. The output in Western Australia is also increasing very rapidly. Gold is worked in many parts of the colony, but the most important district so far is the small one of Kalgoorlie, which is at the present time yielding an output of about 90,000 oz. per month. The reefs there are very large and rich, and the prospect is very promising. The following table shows the progress of the Witwatersrand and West Australian gold fields during the past ten years:—

Year.	Witwatersrand.	West Australia.
	oz.	oz.
1890	494,869	34,209
1891	729,238	30,311
1892	1,210,869	59,548
1893	1,478,477	110,890
1894	2,024,163	207,131
1895	2,277,641	231,513
1896	2,280,892	281,265
1897	3,034,679	688,603
1898	4,295,602	1,050,182
1899	3,913,810*	1,160,202*

Gold mining in Rhodesia has not made much progress, owing to scarcity of native labour. There are some rich properties there, but it is yet to be seen whether the country will take a prominent place as a gold producer. There have not been any special developments in India, New Zealand, or British North America.

GOLF, '99.

Golf retains and even increases its hold on popular favour, and each year more links are added to the large number that now exist. The following are the most important matches that have taken place during the year:—On Dec. 26th, '98, J. Stuart Smith, Calcutta, won the Golf Championship of India, and in the same month the Amateur Championship of the Transvaal was played, resulting in the victory of T. C. Alison. H. Vardon, on Jan. 21st, '99, beat A. Lewis, at Barton-on-Trent. Oxford University beat Cambridge University by 18 up. Out of 21 matches Cambridge have won 11, Oxford 9, one match being halved. At Seaford, on April 4th, A. Herd beat J. White by 5 up and 4 to play, and on the next day P. Wynne halved a 36-holes match with J. Braid, at Mitcham. A professional tournament was held for three days, on April 20th, 21st and 22nd, by the Mid-Surrey G. C. On the first day H. Vardon beat J. White, and on the second he beat J. Braid and A. Herd, and on the third A. Herd beat J. Rowe. On April 14th H. Vardon won at a professional tournament at Cruden Bay, and at Aberdeen, on the 17th,

H. Vardon and Braid beat Kirkaldy and Simpson. Miss Hezlet won the Open Ladies' Championship, as well as the Irish Golf Championship. She is only 17 years of age, and her play is admirable. A. Herd beat H. Vardon on May 18th. Mr. J. Ball, at Prestwich, won the Amateur Championship, beating Mr. Tait in the final round. The Open Championship was won by Harry Vardon, whose aggregate score was 310; Jack White was second with 315, A. Kirkaldy, 319, J. H. Taylor, 320. The St. George's Challenge Vase was won at Sandwich by Mr. F. G. Tait, for the second year in succession, with a score of 155. The Yorkshire Championship was won by Mr. F. E. Woodhead for the fourth time. At Littlestone-on-Sea, J. H. Taylor won a professional tournament with the score of 155. The Mid-Lothian Amateur Championship was won by J. M. Wilkinson. The Parliamentary Handicap was won by Mr. A. J. Robertson, Press Gallery, over Mr. J. L. Wanklyn, M.P. by one hole. Vardon and Willie Park played two 36-holes games for £100 aside, one at Berwick on July 6th, when Vardon won, and the other, on July 22nd, at Ganton, when he again won by 11 up and 10 to play. White beat Kirkaldy at Newhaven, on July 22nd, and was beaten by him at Seaford, on the 25th. A match between Mr. Ball and Vardon against Mr. Tait and Park resulted in the victory of the former. The Calcutta Cup played for at St. Andrews ended in a win by Mr. F. G. Tait, after a tie with Mr. J. L. Low. H. Vardon beat J. Kinnel, at Leven on August 11th, by 3 up and 2 to play, and on August 16th he beat A. H. Scott. At Buxton, H. Vardon beat J. White, and A. Herd beat W. Low. H. Vardon beat W. Fernie at Troon, J. Kinnel at Leven, J. Dagleish at Nairn, B. Sayers at Luffness, and concluded his Scotch tour by beating Messrs. J. M. Williamson and Josiah Livingston at Barton by 5 holes. Mr. John Ball, junior, won the Irish Open Amateur Championship, beating Mr. J. M. Williamson in the final round by 12 up and 11 to play. Mr. J. R. Gairdner, Richmond G. C., won the South of Ireland Championship. Mr. F. E. Woodhead won the Welsh Championship for the third year in succession. Kirkaldy beat Sayers in a match at Cruden Bay. The Norfolk County Championship was won by Mr. H. T. Gillies. J. H. Taylor beat H. Vardon at Westward Ho! on Sept. 19th. H. Vardon beat Williamson at Bulwell Forest, the course of the Notts G. C., on Oct. 7th. Over the West Herts links, H. Vardon beat A. Tingey on Oct. 18th.

Goluchowski, Count Agenor, Austro-Hungarian Minister for Foreign Affairs, was born in 1849. He entered upon his diplomatic career in the Ministry for Foreign Affairs, and in '72 was appointed Attaché and afterwards Secretary of Embassy at Berlin. He then went to Paris as Counsellor of Embassy, and there married a daughter of Prince Joachim Murat. He was Minister at Bucharest, '87-93. He is a large landed proprietor in Galicia, and has sat as a Conservative in the Austrian Chamber of Deers. He was appointed Minister of Foreign Affairs on Count Kalnoky's resignation in May '95.

Good Templars, The Independent Order of, a total abstinence fraternity originated in New York in 1851. In '68 it was extended to England by Joseph Malins, who, by '70, had

* 9 months only.

instituted the Grand Lodge of England, from which the Order has spread round the world. It administers a pledge of lifelong abstinence from intoxicating beverages, and advocates the legal suppression of their common sale. It seeks to protect the abstinent and reclaim the inebriate. It admits both sexes to equal privileges and office. Only a small fee of 6d. or 1s. per quarter is exacted, as it is non-beneficiary in basis. The Order consists of (1) local "Subordinate" lodges, meeting weekly; (2) county "District" lodges, meeting quarterly; (3) national "Grand" lodges, meeting annually; and an "International Supreme Lodge." The latter has met in the United States, Canada, England, Ireland, Scotland, Wales, and Sweden, and next meets at Stockholm, Sweden, on the second Tuesday in July 1902. The Order publishes about sixty newspapers and magazines in various languages. It has a membership of nearly 600,000, in about 12,000 branches, governed by 80 different Grand Lodges. There are in the United Kingdom 220,000 adult and junior members, of whom 57,000 adults and 53,000 juniors are under the Grand Lodge of England, whose permanent offices are in Edmund Street, Birmingham. This Grand Lodge has 1400 lodges, of which 120 are in the army and navy. The Grand Lodge annual session at Middlesbrough, Easter '99, was attended by 700 representatives and officers. The Juvenile Section of the Order enjoins abstinence from strong drink, tobacco, gambling and bad words, and has 100,000 British members, in 1350 branches. The members have founded a **Temperance Orphanage** at Sunbury, at a cost of about £10,000. They have **Mission Vans**, with travelling missionaries to hold open-air meetings and circulate temperance literature in rural parts, and in many counties have latterly formed **Good Templar Cycling Brigades**. The Grand Lodge of Scotland has 688 adult and 433 junior branches, with a total of 79,000 members; its office is 40, St. Enoch Square, Glasgow, and its monthly organ is *The Good Templar*. Ireland and Wales have about 500 adult and junior branches, and have an increasing membership. The organ in England is *The Good Templar's Watchword*, weekly; and several local monthlies are issued, besides much literary matter, from the Grand Lodge printing presses, at 168, Edmund Street, Birmingham.

Gordon Memorial College, Khartoum. A letter from Lord Kitchener appeared in the public press Nov. 30th, '93, making a proposal, which, "if it met with the approval and support of the British public and of the English-speaking race, would prove of inestimable benefit to the Soudan and to Africa." The proposal was "that at Khartoum there should be founded and maintained with British money a college bearing the name of the Gordon Memorial College, to be a pledge that the memory of Gordon is still alive among us, and that his aspirations are at length to be realised." He went on to say: "We should begin by teaching the sons of the leading men, the heads of villages and the heads of districts. The teaching, in its early stages, would be devoted to purely elementary subjects—such as reading, writing, geography, and the English language. Later, and after these preliminary stages had been passed, a more advanced course would be instituted, including a training in technical subjects, specially adapted to the requirements

of those who inhabit the Valley of the Upper Nile. The principal teachers in the College would be British, and the supervision of the arrangements would be vested in the Governor-General of the Soudan. I need not add that there would be no interference with the religion of the people." He estimated the sum required for the establishment of such a College at £100,000—£10,000 for the initial outlay, and £90,000 for investment for the maintenance of the College, and the support of the staff of teachers. Lord Salisbury voiced the Government's warm approval of the proposal, and the money was rapidly subscribed—far more, indeed, than Lord Kitchener asked for being forthcoming. A site for the College was chosen on the Blue Nile, not far from the old Burrie fort which Gordon so gallantly defended during the siege of the town; and Lord Cromer laid the foundation stone on Jan. 5th, '99. Building operations were necessarily slow at first, but the work is now progressing as rapidly as possible, under the personal supervision of Lord Kitchener. The **Patron of the Gordon Memorial College Fund** is H.M. the Queen; **Vice-Patron**, H.R.H. the Prince of Wales; **President**, Lord Kitchener of Khartoum, G.C.B.; **Hon. Treasurer**, Lord Hillingdon; **Hon. Sec.**, the Hon. George Peel, 67, Lombard Street, E.C. See **SESSION**, sect. 60.

Gore, Rev. Charles, M.A., D.D. (Edin.), was b. 1853, and is the son of the late Hon. Charles Alexander Gore, the brother of the 4th Earl of Arran. He was ed. at Harrow and Balliol College, and was a Fellow of Trinity College, Oxford. Mr. Gore has taken a prominent position in Oxford as the exponent of High Church tenets. The publication of "**Lux Mundi**," for which he was largely responsible, caused almost as much controversy as that of "Tracts for the Times." He published in Nov. '91 "The Incarnation of the Son of God," being the Bampton Lectures for that year. In May '93 he resigned the headship of Pusey House, and in '94 became Canon of Westminster. In '95 and '96 he took a prominent part in the Armenian agitation, and in '97 attended, with the Bishop of Rochester, the Convention of the Brotherhood of St. Andrew, at Buffalo, U.S.A. In '98 he edited "Essays in Aid of the Reform of the Church." Address: Little Cloisters, Westminster.

Gorst, Sir John, M.P. See under **COMMONS**.

Goschen, Rt. Hon. George J., M.P. See under **COMMONS**.

Gosse, Edmund, M.A., LL.D., was b. in London 1849. Ed. privately. His book "Seventeenth Century Studies" was published in '80 (3rd edition '97). "The Masque of Painters," which was performed with great success by members of the Royal Institute of Painters in Water-Colours in May '86, was written by Mr. Gosse. In '89 he published "The History of 18th-Century Literature, 1660—1780." His later works include a volume of most interesting essays entitled "Gossip in a Library" ('91); a novel, "The Secret of Narcisse" ('92); a collection of essays, "Questions at Issue" ('93); a critical volume on "The Jacobean Poets"; a collection of lyrical poems, "In Russet and Silver" ('94); "Critical Kit-Kats" ('96), a series of modern monographs; "A Short History of English Literature" ('97); and the "Life and Letters" of the great Elizabethan poet and divine, Dr. John Donne, in '99. An edition of Mr. Gosse's works, in 7 vols., was issued in '96. Address: 29, Delamere Terrace, W.

Gothenburg System, The. See special articles in '95 and '96 editions, "The Gothenburg System of Public-house Licensing," published by the Church of England Temperance Society, 9, Bridge Street, Westminster; a book on the Gothenburg system, by Mr. Edwin Goadby, "Sober by Act of Parliament," published by Swan Sonnenschein & Co., and "The Gothenburg and Bergen Schemes," by D. Lewis, J.P., published by Elliott, Edinburgh. See also LICENSING LAWS COMMISSION.

Gould, F. Carruthers, one of the greatest cartoonists of the day, was b. at Barnstaple in 1845, and was ed. in that town. He entered a local bank at the age of 16, and at 20 came up to London and entered a stockbroker's office, eventually himself becoming a member of the Stock Exchange. As a boy his genius for caricature was noticeable, and on the Stock Exchange he found plenty of material ready to his hand. In '79 he began to illustrate the Christmas number of *Truth*, but his first journalistic work was done on the *Pall Mall Gazette* and *Budget* when Mr. Stead was editor. He very soon became a regular member of the staff, and with his colleagues transferred his services to the *Westminster Gazette* when the former paper passed into Mr. Astor's hands. For years his pictorial commentary on the proceedings at Westminster has been brilliant in the extreme, and latterly he has done the literary commentary also with equal success. His "Cartoons for the Crisis" during the general election of '95, afterwards republished separately, put his name into all men's mouths, and firmly established his reputation as a political caricaturist. He is now assistant editor of the *Westminster Gazette*.

Government. See MINISTRY, TREASURY, and other articles.

Grace, Dr. W. G., the renowned cricketer, was b. at Downend, Bristol, 1848, and made his first appearance in important matches in West Gloucestershire v. Bedminster, at Mangotsfield. Between '64 and '79 he made 20,842 runs in a total of 415 innings. His exploits as a batsman, fielder, and bowler, became so celebrated, that the title of "champion" was spontaneously conferred upon him. On July 22nd, '79, at Lord's, the enthusiasm of his admirers took the form of a presentation of the value of £1400. He celebrated his Jubilee in '98, and that autumn he accepted the position of secretary of the London County Cricket Club, whose ground is at the Crystal Palace. An interesting book upon Cricket was published by him in '91, and another, containing his "Cricketing Reminiscences and Personal Recollections," in '99.

"Graphic, The," founded 1869, by Mr. W. L. Thomas, its present manager, is an illustrated weekly of high-class character, and treats of current events. Its Christmas and Summer numbers are especially excellent, and have a very wide circulation. Editor, Mr. T. Heath Joyce. See also DAILY GRAPHIC. Office, 190, Strand.

Great Central Railway. See RAILWAYS.

GREECE.

A kingdom under George I. (*q.v.*), of Glücksburg. The country gained its independence in the famous struggle of 1821-9, after centuries of subjection to Turkey. The present monarch, who is the second son of the King of Denmark, was elected in '63, after the expulsion of King

Otto. Executive vested in King and responsible ministers. The legislative authority is in the hands of the Boulé, a chamber of 207 representatives elected by manhood suffrage for four years. The deputies are each paid about £72 per session. There are large numbers of Greeks outside the limits of the Kingdom. In Asia Minor there are probably about 2,000,000, in European Turkey about 3,500,000, and large numbers dwell in Crete, Cyprus, etc. The Greek orthodox Church is the State religion, but complete liberty of worship prevails. Education is compulsory, but the law is not enforced. The State has a monopoly in salt, petroleum, matches, and playing-cards. The chief exports are currants, ores, wines, fruit, and olive oil. There are 591 miles of railway open. By the war with Turkey, which arose in '97 out of Greek sympathy with Crete, Greece underwent humiliation and defeat, and had to agree to pay an indemnity of £14,000,000, and to submit to a strategic reconstruction of the frontier in Turkey's favour. She also had to accept international control in financial matters. Area about 25,014 sq. m.; pop. ('96) 2,433,806. Revenue, '99, £2,677,141; expenditure, £2,585,457. Public debt, £30,422,106; imports, '98, £6,083,345; exports, £3,577,524. See DIPLOMATIC, FOREIGN ARMIES, and FOREIGN NAVIES.

Political Parties. Until '90 the two chief party leaders were M. Tricoupi and M. Delyanni. But in '90 a section of the Opposition under M. Delyanni broke away from him to follow M. Ralli, who posed as the chief of the Neo-Hellenic party. M. Delyanni ruled the country from '90 till March '92, and M. Tricoupi from June '92 (with the exception of a few months during '93) till Jan. '95. In April '95 M. Delyanni returned to power. M. Tricoupi thereupon withdrew from political life, and died during '96. M. Delyanni remained in office till April '97, when the popular feeling against him aroused by the Greek reverses during the war with Turkey led the King to dismiss him. M. Ralli succeeded as Premier, and held office till Sept. 30th, '97, when he was succeeded by M. Zaïmis. With the formation of the Zaïmis Cabinet (Oct. 2nd, '97) a split occurred amongst the Delyannists. M. Zaïmis himself had formerly been a follower of M. Delyanni; but on his accession to office there was a rupture between them, and very many members of the party supported M. Zaïmis. Nevertheless M. Zaïmis deemed the opposition too strong for him, and resigned (Nov. 7th, '98). At the general election which followed in Feb. '99, the Tricoupists, under M. Theotokis, gained a large majority, and M. Theotokis succeeded M. Zaïmis as Premier. The constitution of parties was as follows: Tricoupists, 128; Delyannists, 37; Zaïmists, 28; and 14 Independents.

History, '99. On Dec. 21st, '98, the Royal decree dissolving the Chamber was published, and the General Election took place (Feb. 19th). When the Chamber re-assembled in March, M. Zaïmis found he could not count on a majority. The new members included a large number of Tricoupists led by M. Theotokis, as was shown when the Tricoupist candidate, M. Tsamados, was elected President of the Chamber. M. Zaïmis thereupon resigned (April 12th), and was succeeded by M. Theotokis (14th), who (May 24th) announced that he hoped to carry important reforms in the administration of justice, education, and the police system. The Budget showed an estimated revenue for

the current year of 105,795,658 drachmai, and expenditure of 99,347,624 drachmai. The International Commission of Control issued its report for the eight months of '98 during which it was working—i.e. from May 10th to Dec. 31st. The estimate for that period of the revenues put under the control of the Commission for the service of the Public Debt was 19,528,060 drachmai, but the amount actually collected amounted to 25,498,416 drachmai. Though this was satisfactory, the Commissioners reported fraudulent conduct on the part of the officials appointed to suppress smuggling, and other things that needed remedying. During the Session (which closed July 27th) many measures of reform were carried. It was resolved to employ foreign officers to reorganise the army and navy, to abolish the military police, to reorganise the gendarmerie, and to remodel the provincial administrations.

Greece, King of. See GEORGE I.

Greene, W. Conyngham, C.B., appointed British Agent in the Transvaal, Aug. 25th, '96, is a nephew of Lord Plunket, Archbishop of Dublin, and was b. in 1854. He was ed. at Harrow and Pembroke College, Oxford, and then entered the Foreign Office, '77. He has acted as Chargé d'Affaires at Athens, Stuttgart, and Teheran, being Secretary of Legation at the latter place '93-6. His rank at Pretoria, which he left on the outbreak of war in Oct. '99, was that of Chargé d'Affaires. See TRANSVAAL.

Greenland. An extensive region or island north-east of America, extending into the Polar regions. The interior is all ice, but parts of the south and west coast are habitable, with verdant pasturage, some shrubbery, and mossy valleys. **Principal exports:** oil of seals and whales, fox, seal, and reindeer skins, eider-down, feathers, and cryolite. The chief trade is with Denmark, to which country the colony belongs. **Area**, 46,740 sq. m.; **pop.** 10,516, of whom 309 are Europeans and the rest natives. See COLONIES, ETC., OF EUROPEAN POWERS.

Grenada. An island in the West Indies forming part of the British colony of the **Windward Islands**. It is the largest of the group, and is the residence of the Governor of the Windward Islands. Its **area** is about 133 square miles, and the **population** 61,299. **Capital**, St. George, with a population of 4919. **Products** are cocoa, fruits, cotton, coffee, and spices. The Government includes the Governor-in-chief of the Windward Islands, an Executive Council of six, and a Legislative Council of thirteen—six official, and seven nominated by the Crown. For financial statistics see BRITISH EMPIRE (table).

Grenadines. A cluster of islets lying between Grenada and St. Vincent, some of which are subordinate to Grenada and some to St. Vincent. The largest is Carriacou, with an area of 10 sq. m. and **pop.** 6190. **Area**, 86 sq. m.; **pop.** 6400.

Gresham College. The Gresham Lectures, as well as the College in which they are delivered, owe their institution to the munificence of Sir Thomas Gresham, the "Royal Merchant" of Queen Elizabeth. By his will, dated July 5th, 1575, Sir Thomas bequeathed certain rents growing out of the Royal Exchange, which he built, to the Corporation of the City of London, and to the Mercers' Company, for the "erecting and maintaining of divers lectures in sundry faculties"—divinity, law, physic, geometry,

astronomy, music, and rhetoric. The lectures were organised and commenced in June 1597. The buildings of **Gresham House**, which had thus become Gresham College, were pulled down in 1768, and the General Excise Office erected on the site, the property having been acquired by the Crown for an annuity of £500. In '76, whilst the Earl of Selborne was Master of the Mercers' Company, the Gresham Lecturers submitted two schemes for the improvement of the Lectures, and the recommendations under this head were adopted, the principal being that all the Lectures should be delivered in English instead of Latin and English, twelve lectures to be given in each year by each Professor. The names of the present Gresham Lecturers are as follows: **Physic**, E. Symes Thompson, M.D.; **Rhetoric**, J. E. Nixon, M.A.; **Astronomy**, Rev. E. Ledger, M.A., F.R.A.S.; **Law**, G. H. Blakesley; **Geometry**, W. H. Wagstaff, M.A.; **Music**, J. F. Bridge, Mus. Doc. (q.v.); **Divinity**, Rev. Henry E. J. Bevan, M.A.; **Clerk to the Gresham Committee**, John Watney, Mercers' Hall, London, E.C.

Grey, Earl. See PEERS.

Guadeloupe. This colony is one of the principal French possessions in the West Indies, and consists of two islands, Basse-terre and Grande-terre, separated by a narrow salt-water river, with five smaller dependent islands. It is situated in the Leeward group of the Lesser Antilles. **Capital**, Pointe-à-Pitre. **Products:** sugar, rum, coffee, cotton, cacao, bananas, etc. The colony is represented at Paris by a Senator and two Deputies, and has an area of about 680 sq. m., and a total population of 167,000. It is administered by a Governor with an elected Council. See COLONIES, ETC., OF EUROPEAN POWERS.

Guam, the largest of the Marianne or Ladrone Islands (see CAROLINE ISLANDS), was ceded to the United States by Spain in 1898, for use as a coaling station. It has a good roadstead, and contains about 9000 inhabitants.

Guatemala. The most northern republic of Central America, bounded on the east and north by Mexico, west by Belize, the republics of Honduras and Salvador, and south by the Pacific. Governed by a President, elected for six years, and a National Assembly, elected by universal suffrage for a term of four years. Roman Catholicism is the chief religion, but liberty prevails. Education free and compulsory. **Chief products:** coffee, hides, bananas, and sugar. **Army** numbers about 7000 officers and men, with militia about 57,000. **Area**, 63,400 sq. m.; **pop.** 2,000,000. **Capital**, Guatemala la Nueva, **pop.** 75,000. **Revenue**, '98, £832,000; **expenditure**, £800,000; **internal debt**, £320,000; **external**, £1,432,800; **imports**, '98, £2,000,000; **exports**, £1,700,000. In the above figures £ = \$12'50. See CENTRAL AMERICA; for Ministry, etc., see DIPLOMATIC.

Guernsey. One of the Channel Islands (q.v.).

Guildhall School of Music, Victoria Embankment, E.C., was established by the Corporation of London in '80, for the purpose of providing high-class instruction in the art and science of music at a moderate cost. Students are nominated by an alderman or a member of the Court of Common Council. The school commenced with 62 pupils, but now there are more than 3600 pupils. Its origin is traceable to the Guildhall Orchestral and Choral Society, founded in '78. The Common Council having

had a report of this Society laid before it, granted £350, and lent some buildings in Aldermanbury with which to establish the present school. Its speedy success led the Corporation of London to vote £20,000 for the fine buildings in which the school has carried on its work since '87. The total sum which the Corporation have expended on the school is £75,000, in addition to an annual contribution of £2300. There are numerous scholarships in connection with the school. Principal, Mr. W. H. Cummings; Secretary, Mr. Hilton Carter; Lady Superintendent, Mrs. Charles P. Smith.

Guy's Hospital and Medical School, London Bridge, S.E. This institution, now one of the great general hospitals of the Metropolis, was built and endowed in the year 1725 by

Thomas Guy, a City bookseller. The wards contain accommodation for 650 patients. Agricultural depression has of late years decreased by £20,000 per annum the income derived from the endowments, and public aid has had to be invoked. The Medical School has recently received an important addition in the erection of the **Physiological Laboratories**, opened in '97 by H.R.H. The Prince of Wales. Guy's also possesses a **Dental School** for complete instruction in dental surgery and mechanics, being the only institution in London in which the whole of the dental curriculum for the College of Surgeons' examination can be taken. The **Residential College** furnishes accommodation for fifty students and the resident medical staff.

H

Haggard, Henry Rider, 6th son of the late W. M. R. Haggard, was b. at Bradenham, Norfolk, 1856. He was private secretary to Sir Henry Bulwer at Natal, and was subsequently on the staff of Sir Theophilus Shepstone, H.M. Commissioner to the Transvaal, during the temporary annexation of that territory in '77. He was afterwards appointed **Master of the High Court of the Transvaal**. At the commencement of the Zulu war he was adjutant-lieutenant of the Pretoria Horse. He began his career as an author with the publication of "Cetewayo and his White Neighbours" in '82, and subsequently wrote "Dawn," "The Witch's Head," and "King Solomon's Mines." This won for him immense popularity, which was further increased by his romantic allegory "She," "Allan Quatermain," "Jess," "Mr. Meeson's Will," "Maiwa's Revenge," "Colonel Quaritch, V.C.," "Allan's Wife," and "Cleopatra" followed. Then came "The World's Desire," in collaboration with Mr. Andrew Lang, "Beatrice," "Eric Bright-eyes," "Nada the Lily," "Montezuma's Daughter," "The People of the Mist" ('94), "Joan Haste" ('95), "Heart of the World" ('96), "Swallow" ('98), and "A Farmer's Year" ('99). He is a barrister of Lincoln's Inn and a magistrate for Norfolk and Suffolk, and was Chairman of the Committee of the Society of Authors, '96-8. Address, Ditchingham House, Norfolk. Athenæum Club.

Haileybury College, Herts. Founded 1862, received Royal Charter '64. Exhibitions to Oxford and Cambridge five annually (£60, £50, £50, £40, and £20) for three years. Pupils 500. **Head Master**, Hon. and Rev. Edward Lyttelton, M.A., Hon. Canon of St. Albans.

Halsbury, Lord. See under PEERAGE.

Hamilton, Lord George, M.P. See under COMMONS.

Harcourt, Sir W. See under COMMONS.

Hardy, Thomas, novelist, was b. 1840, in Dorsetshire, and commenced his career as an architect. For an essay dealing with "Coloured Brick and Terra-cotta Architecture," he received the medal and prize of the Institute of British Architects. His first noteworthy literary effort was a novel published in '71,

entitled "Desperate Remedies." In '74 the work by which he is best known appeared in the pages of *Cornhill Magazine*—"Far from the Madding Crowd." Other novels from his pen have been "Under the Greenwood Tree" ('72), "A Pair of Blue Eyes" ('73), "The Trumpet Major" ('80), "A Laodicean" ('81), "Two on a Tower" ('82), "The Hand of Ethelberta," "The Return of the Native," "The Mayor of Casterbridge," "Wessex Tales," "A Group of Noble Dames," "Tess of the D'Urbervilles" ('91), which was held by some of the critics to be the finest of all his works, "Life's Little Ironies" ('94), "Jude the Obscure" ('95), and "The Well-Beloved" ('92 and '97). In June '93 Mr. Hardy followed an early dramatic version of "Far from the Madding Crowd" with a dramatic piece called "The Three Wayfarers," which achieved a striking success. "Tess" also has been recently dramatised and played in America. He was made a J.P. for Dorchester in '84, and for Dorsetshire in '94.

Harris, Lord. See under PEERAGE.

Harrison, Frederic, M.A., was b. in London 1831; educated at King's Coll., Lond., and Wadham Coll., Oxford; scholar, '48; first class in classics, '53; fellow and tutor, '54. Called to the bar, Lincoln's Inn, '58; practised in the Equity Courts; examiner in jurisprudence for Inns of Court '69-76; for London University '75-9; **Professor of Jurisprudence**, Inns of Court, '78-89; member of Royal Commission on Trades Unions '67-9; secretary to the Royal Commission for the Digest of the Law '69-70. Is a member of the State Trials Committee and Vice-President of the Royal Historical Society. Is President of the London Positivist Committee, Newton Hall, and has published numerous essays and addresses on Positivism. Author of very many articles in the *Fortnightly*, *Contemporary*, *Nineteenth Century*, *Cosmopolis*, and *Positivist Reviews* from their commencement; of "The Meaning of History" ('62); of "Order and Progress" ('75); "Social Statics," the second volume of Comte's "Positive Polity" (a translation), '75; the "Choice of Books" ('86); "Oliver Cromwell" ('88); "Annals of an Old Manor House" ('93); "The Meaning of History" ('94); "Early Victorian Literature" ('95);

"William the Silent" ('97); and a great number of lectures, printed privately, on historical, social, and religious questions. He is editor and part author of "The New Calendar of Great Men," a dictionary of general biography. He was elected an alderman by the London County Council in Feb. '89, but resigned in Oct. '93. Address: 38, Westbourne Terrace, W.

Harrow School. Founded 1571, by John Lyon, a yeoman, b. at Preston, near Harrow. Age of admission from 12 to 14. Among the scholarships to either University are Isabella Gregory's of £100 a year for four years, Earl Spencer's, £30 a year for three years, Botfield's, £60 a year for three years, Leaf's, £70 a year for three years, Anderson's, £50 a year for three years; to Hertford College, Oxford, Baring's three of £100 a year for five years; to Caius College, Cambridge, Sayer's two of £52 10s. for four years; and to any College, Oxford, Neeld's two of £30 for three years. Pupils, about 600. **Head Master**, Rev. Joseph Wood, D.D. *Motto*, *Stet fortuna domus*. Some distinguished alumni: Butler, afterwards head master, Sir R. Peel, Cardinal Manning, Sheridan, Earl of Aberdeen, Sir William Jones, Byron, Archbishop Trench, Trollope the novelist, Sir George Trevelyan, Lord Shaftesbury, Dr. Parr, Lord Palmerston, Rodney, Theodore Hook, Rt. Hon. E. Stanhope, M.P., Rt. Hon. Lord Knutsford, Rt. Hon. H. Chaplin, M.P., Rt. Hon. Lord George Hamilton, M.P., Rt. Hon. Sir W. Hart Dyke, Bart., M.P., Earl Spencer, K.G., and the present Master of Trinity Coll., Cambridge. Ten or eleven entrance scholarships, of the value of £100, £80, £60, and £30 a year, are offered every Easter to boys (not members of the school) who were under fourteen years of age on the previous 1st of January. These scholarships are held during the scholar's stay in the school, provided that both his conduct and diligence continue satisfactory. Two at least of the scholarships are given for proficiency in mathematics, or in modern subjects. No boy can compete under twelve years of age. The governors can, at their discretion, add £20 a year to any scholarship, if the circumstances of the scholar appear to make it desirable. There are also two scholarships, each of £20 a year for two years, open to boys in the fifth form, which are awarded for proficiency in such subjects as are common to both sides (classical and modern) of the school.

Harte, Bret, was born at Albany, New York, 1839. At the age of fifteen he settled in California, and went through a variety of experiences. He worked for a time in the mines, and subsequently served a short apprenticeship to a printer, and also acted as teacher in a school, express messenger to a newspaper editor, and secretary to the Mint at San Francisco; United States Consul at Crefeld, and at Glasgow in '80. He became the first editor of the *Atlantic Monthly*, in '68. His reputation as a humorist was established by his well-known poem "The Heathen Chinee," which appeared in that journal in '69. "The Luck of Roaring Camp" greatly increased his popularity. In '82 he published a collected edition of his works. His latest works are "Cressy," "The Heritage of Dedlow Marsh," "A Waif of the Plains," "A Ward of the Golden Gate," "A Sappho of Green Springs," "Sally Dows" ('92), "Susy" ('93), "A Protégée of Jack Hamlin's" ('94), "Clarence" ('95), "Three Partners" ('97), "Some

Later Verses," and "Tales of Trail and Town" ('98). Address: 74, Lancaster Gate, W.

Hausa Association, The. This association was formed in '92, for the purpose of securing scientific study of the Hausa language, so that the Scriptures might be translated into the Hausa tongue, and the higher interests of the people be furthered in other ways. Hausa is the *lingua franca* of the Central Soudan, extending from the Sahara to the pagan tribes near the Gulf of Guinea, and from the Egyptian Soudan to the French colony of Senegal. The greater portion of this region is in the sphere of British influence. It is estimated that no fewer than fifteen millions of persons speak the Hausa tongue, and many of these can read and write it in a modified form of Arabic character. The first student, the Rev. C. Robinson, was sent out in April '93. Since then he has visited Lokoja and Kano, the commercial centre of Hausaland, and collected the materials for a grammar of the Hausa language, besides having translated two of the gospels into Hausa, and revised and corrected Dr. Schon's dictionary. The Cambridge University has accepted the offer of the Association to endow a Lectureship in Hausa for three years; and the University Press in '96 published under Mr. Robinson's editorship a volume containing facsimiles of the fragments of Hausa literature brought home by him from Kano. **Hon. Secretary**, Rev. J. O. F. Murray, Dean of Emmanuel College, Cambridge; **Hon. Treasurer**, Mr. J. H. Tritton, 54, Lombard Street, E.C.

Hawaiian Islands. A group of eight inhabited and four uninhabited islands in the North Pacific, now forming a territory of the United States. **Area**, 6740 sq. m.; **pop.** 109,020. **Capital**, Honolulu, on the south-west coast of the island of Oahu, pop. 29,920. Until '93 the Government of the islands was that of a limited monarchy, under Queen Liliuokalani; but then a revolution broke out, and a President and provisional executive were appointed. The Hawaiian Republic was proclaimed and a new Constitution was promulgated on July 4th, '94. The islands were annexed to the United States in '98, and attached to the department of California for military purposes. The Commission appointed by the United States to inquire into the administration of the Islands recommended, in Dec. '98, that they should be made a Territory, all whites and those of African or Hawaiian descent who had been citizens prior to the annexation being declared citizens of the United States. The natives almost all profess the Christian faith, and education is general. **Exports**: sugar, rice, coffee, hides, wool, whale oil, and bone. The bulk of the trade is with the United States. Steamers connect the islands with America, Australasia, and China. **Revenue**, '97, £1,050,520; **expenditure**, £969,775; **imports**, '97, £1,857,960; **exports**, £3,337,870; **debt**, '97, £766,605. For Administration see DIPLOMATIC.

Hay, Colonel John, b. at Salem, Indiana, in 1838, and ed. at Brown University. He was a barrister practising in the Supreme Court of Illinois till '61, when he gave up his profession in order to become private secretary to President Lincoln. He also served as his aide-de-camp, and took an active part in the field as Adjutant and Lieut.-Colonel. After President Lincoln's death he continued his political and diplomatic career, and was appointed Secretary

of Legation and Chargé d'Affaires at Paris ('65), Vienna, and Madrid. He then became President Hayes' First Assistant Secretary of State '79-81. But Colonel Hay is best known in this country by his literary efforts, the "Pike County Ballads" having won him high favour with the reading public. In conjunction with Colonel Nicolay he wrote the Life of President Lincoln, a task for which he was specially fitted. In Feb. '97, on President McKinley's accession, he was appointed Ambassador to Great Britain, a post which he filled with distinction till, at the call of duty, he accepted the office of Secretary of State in '98.

Hayti, called Hispaniola by Columbus, and afterwards San Domingo. The second largest island of the Antilles, lying between Cuba and Puerto Rico. **Area**, 28,249 sq. m.; pop. 2,200,000. There are two states in the island. The largest is the Republic of San Domingo (q.v.). The Republic of Hayti occupies the western portion of the island. **Area**, 10,204 sq. m.; pop. 1,700,000. Capital, Port-au-Prince, pop. 50,000. It was originally a French colony, but was proclaimed independent in 1804, and is governed under a constitution drawn up in '89. The executive power is in the hands of a President, elected by the people in theory, but in practice by the Senate and House of Representatives, in whom rests the legislative power. The House is elected directly for three years by all male citizens, and the Senate indirectly for six years. The religion is Roman Catholic, and elementary education is free. There is an army of about 7000 men, and a navy of six small vessels. **Revenue**, '98, £1,244,720; **expenditure**, £1,249,240; **debt**, '99, £3,600,000; **exports** (coffee, mahogany, logwood, cotton, cocoa, turtle shells, and hides), '98, £2,655,820; **imports**, £821,625. See DIPLOMATIC.

Healy, T. M., M.P. See under COMMONS.

Henley, W. E., poet, critic, and dramatist, LL.D. St. Andrews '93, was b. in 1849 at Gloucester, at which city he was also educated. In his youth he suffered greatly from ill health, and his "In Hospital: Rhymes and Rhythms" ("A Book of Verses," fourth edition '93) was largely a reflection of certain experiences in the Old Infirmary, Edinburgh, between '73 and '75. In the latter year he began to contribute to various London journals, and was one of the founders of *London* ('77-9), which he edited for some time, and in which many of his verses first appeared. His editorial career subsequently led him to the chair of the *Magazine of Art*; in '89 to that of the *Scots Observer*, afterwards the *National Observer*, which he left in '94; and in '95 to that of the *New Review*. In these journals and in others—the *Athenaeum* and the *Saturday Review* among them—Mr. Henley's critical work has been done; but a reprint of some selected passages appeared in '90 as "Views and Reviews," (second edition '92). His dramatic work in collaboration with the late R. L. Stevenson included four plays republished in '96. His second book of verse, "The Song of the Sword," went into a second edition as "London Voluntaries" in '93. A corrected reprint of both volumes, with deletions and additions, was published in '97, under the title of "Poems." He is the editor of a series of "Tudor Translations," the editor and compiler of "Lyra Heroica" ('93); and, in collaboration with Mr. Charles Whibley, the editor and compiler of

an anthology of English prose. The fourth and last volume of "The Centenary Burns," to which he contributed an essay on the poet's "Life, Genius, and Achievement," and "English Lyrics: Chaucer to Poe," appeared in '97. In '98 he was granted a pension (£225) on the Civil List for his services to literature. He is at present—after a long spell of ill-health—engaged on a new edition of Byron's prose and verse (12 vols.), with a fuller commentary than has ever been essayed before. Address: 21, Bedford Street, Covent Garden, W.C.

Historical Manuscripts Commission. A Royal Commission was appointed in 1869 to examine and report upon the collections of manuscripts in the possession of private families and municipal authorities, who have rendered the commissioners every assistance in the investigation and classification of manuscripts illustrative of history, constitutional law and general literature. Fifteen reports and many appendixes thereto have been issued by the Commission describing some hundreds of private collections of manuscripts in Great Britain and Ireland. The Commission at present is constituted as follows: Sir Nathaniel Lindley, Master of the Rolls (chairman); the Marquess of Lothian, K.T.; the Marquess of Salisbury, K.G.; the Marquess of Ripon, K.G.; the Earl of Crawford; the Earl of Rosebery, K.G.; Lord Edmond Fitzmaurice, M.P.; the Bishop of Oxford; Lord Acton; Sir Edward Fry; Mr. W. E. H. Lecky, M.P.; Sir H. C. Maxwell-Lyte, K.C.B.; and Dr. S. R. Gardiner; with Mr. J. J. Cartwright as Secretary. The reports are prepared by various inspectors acting under the authority of the Commission, many of the historical papers examined being deposited by their owners in the Public Record Office for the purpose. Office, Public Record Office, Chancery Lane, W.C.

Hockey, '99. Hockey continues to be most successful, and gains ground every year. The number of clubs grows annually, and most towns have a club now. Ladies' clubs are not very numerous, but mixed games are very common. The hon. sec. of the **Hockey Association** is Mr. A. Frampton, Woodlawn, Teddington, who has this season succeeded Mr. S. Christopherson, who had been for so long the most valued secretary. Some of the principal matches resulted as follows:—England beat Wales, England beat Ireland, Ireland beat Wales, Cambridge University beat Oxford University, South beat North, Western Counties beat Midland Counties, Surrey beat Middlesex, Yorkshire beat Cheshire, Sheffield beat Notts, Notts beat Derby, Middlesex beat Lancashire, Surrey beat Cheshire, Notts v. Leicester drawn, Kent beat Middlesex.

Hofmeyr, Jan H., South African journalist and politician, is the leader of the Afrikaner Bond, and has often represented Cape Colony at Colonial and other conferences. For some

years Mr. Cecil Rhodes found him a staunch ally; but after the Jameson Raid he broke with Mr. Rhodes, and in the elections of '98, as wire-puller of the Bond caucus, was active in his opposition to him. At one time Mr. Hofmeyr advocated total separation of South Africa from England; but after the Transvaal War of '82 he acted as mediator between the Boers and the Cape Government, especially over the Swaziland question, and it was through his influence that a solution of the difficulty was arrived at. He was prominent in the negotiations which followed on the Bloemfontein Conference, '99, and his influence helped to induce President Kruger to offer a better franchise than that which he had put forward at the Conference, but failed to persuade him to grant the five years' franchise.

Hohenlohe, Prince, appointed Chancellor of the German Empire and Prime Minister of Prussia in Oct. '94, was b. in 1819. He is a native of Bavaria, and a Roman Catholic, and his long public career has given him exceptional experience and influence. So long ago as '66 he was Prime Minister of Bavaria, and in the war of '70 he took a most important part. In '74 he was chosen to succeed Count Arnim as the German Ambassador to France, and held the post till '85, when he became Governor-General of Alsace-Lorraine. When the crisis which resulted in the resignation of Count Caprivi and Count Eulenbergr arose, in '94, he was appointed Chancellor and entrusted by the Emperor with the continuance of Count Caprivi's policy. He is married to Princess Sayn-Wittgenstein, a daughter of an aide-de-camp of the Czar Nicholas I.

Holloway College, The Royal. See WOMEN, HIGHER EDUCATION OF.

Home Arts and Industries Association. Founded Nov. 1884. Supported by voluntary contributions. Its aim is to teach hand-work to the children of the poorer people by means of classes taught voluntarily by members of the association, and through such training to revive hand-work, and keep the people from the evils of idleness and drink. An annual exhibition of the work done in the classes is held in the gallery of the Royal Albert Hall (usually in May). **President**, The Rt. Hon. Earl Brownlow; **Hon. Treasurer**, Mr. A. K. Hitchens; **Secretary**, Miss Dymes. **Office and studios**, Royal Albert Hall. **Bankers**, London and County Bank, High Street, Kensington, Branch.

Home Office. This is a many-sided department, and makes great demands upon the time and judgment of its parliamentary chief. He grants certificates for the naturalisation of aliens. Addresses to the Sovereign and the gracious replies thereto pass through his office; reports of Royal Commissions are forwarded to him to be laid before the Sovereign, by whose command they are subsequently presented to Parliament; he nominates the principal officers of the Isle of Man and the Channel Islands; and most civil knighthoods are conferred upon his recommendation. Heavy fees are paid to the Department by those upon whom peerages and other dignities are bestowed. The Home Secretary may grant Provisional Orders for the improvement of unhealthy areas in the Metropolis, and the functions of licensing and inspection in regard to the practice of vivisection, schools of

anatomy, and retreats for habitual drunkards are vested in him. One staff of inspectors from the Department is charged with the supervision of coal and metalliferous mines; another sees that the Acts relative to the manufacture and storing of explosives are properly carried out; and a third visits factories, printing works, bleaching works, brickyards, white lead works, and workshops. The Home Secretary is also charged with powers of inspection under the Burial Acts, and may permit in certain special cases interments in closed burial grounds, or the exhumation of bodies where there is suspicion of foul play. Under the Prevention of Cruelty to Children Act he is given authority to direct a factory inspector to see that the conditions and restrictions of any licence granted in respect of the employment of children of between the ages of seven and ten years in theatres are duly complied with. His consent is required before certain steps can be taken under the Building Societies Act, '94, and he may, on the application of a County Council, make orders for the protection of wild birds, or prohibiting the taking or destroying of wild birds' eggs. His duties in connection with the police include the appointment of the Chief Commissioner of the Metropolitan Force, and the approval of rules made for the service by that officer; he must be satisfied, before granting his certificate under the County and Borough Police Act, that the police of a county or borough has been maintained in a state of efficiency in point of numbers and discipline; and should his certificate of efficiency be withheld, the sum annually payable by the County Council in substitution for local grants towards the cost of pay and clothing of the police is forfeited. The prevention and suppression of local disorder lies with the local authorities, but he may authorise the employment of the armed forces of the Crown in order to aid the local forces in the suppression of riot and disorder. He appoints and frequently puts in motion the Director of Public Prosecutions. The control of the prisons and convict establishments, and the inspection of reformatory and industrial schools are exercised by his Department, and he has the charge of criminal lunatics and insane prisoners. He may recommend to the Crown the remission of punishment passed upon offenders, either by justices of the peace or by the judges, his most anxious and responsible function in this connection being in regard to petitions for commutation of the death sentence; but before deciding in such grave matters he usually takes such judicial, legal, and, in cases where insanity is suggested, medical opinion as he may think necessary, to enable him to arrive at a just conclusion. The present Home Secretary is the Rt. Hon. Sir M. W. Ridley, Bart. See MINISTRY and SECRETARY OF STATE.

Home Rule. In the '94 edition, under the heading Session, Part I., sect. 3, and Part II., sects. 79-101, full particulars are given as to the provisions and progress of the Home Rule Bill, which was introduced by Mr. Gladstone in the Session of '93. For the Local Government (Ireland) Act '98, see LOCAL GOVERNMENT and Session, sect. 63, in '99 ed.

Honduras, a republic in Central America. Area, 43,000 sq. m.; pop. 450,000, the majority of whom are Indians. Capital, Tegucigalpa, pop. 12,600. Governed by a President and

Congress, elected by popular vote for four years. During '98 Honduras, Nicaragua and San Salvador combined to form the United States of Central America, but the federation was dissolved at the end of the year. The country possesses great agricultural resources and much mineral wealth, but these lie neglected because of internal disagreements and the consequent paralysis of enterprise. Agriculture, however, is now showing signs of development. **Chief products:** tobacco, sugar, coffee, indigo, wheat, mahogany, hides, and cattle. **Revenue, '96, £400,000; expenditure, £471,750; imports, '96, £275,000; exports, £651,000; debt, £5,400,000.** The loans were raised for the purpose of constructing an inter-oceanic railway, but a small proportion only was expended for this purpose. The arrears of interest amount to over £12,000,000. Army small, but there is a militia of about 20,000. See CENTRAL AMERICA and DIPLOMATIC.

Hong Kong. An island and British Crown colony, situated close to the mouth of the Canton river, and divided from the southern coast of China by a narrow strait—the Ly-e-moon pass. It was ceded to Great Britain in 1841, at the close of the opium war. The peninsula of Kowlung, opposite the island, and the small adjacent Stonecutter's Island, now strongly fortified, with other islets, appertain to the colony. In '98 a portion of territory adjacent to Kowlung, including Mirs Bay and Deep Bay, was leased to Great Britain by the Chinese Government for ninety-nine years. The area leased is 376 sq. miles, and is administered as part of the colony. It was stipulated that the city of Kowlung should be left under Chinese jurisdiction so far as that should prove consistent with military requirements. Capital, **Victoria** (commonly called Hong Kong). **Area, 32 sq. m.; pop. 261,258.** Government is in the hands of a Governor, with Executive and Legislative Councils. There are ten free Government schools, and a large number of other aided schools, mostly carried on by the missionary societies. The island is our "Eastern Gibraltar," and is both a military and naval station, forming the headquarters of the China Squadron. It is also the great emporium for the European trade with China, and for the local coast trade, and is a free port. **Imports,** chiefly goods for China, cottons, and other manufactured articles; **exports,** tea, silk, and other Chinese produce. For latest financial statistics see BRITISH EMPIRE (table); see also CHINA and DIPLOMATIC.

Hope, Anthony, is the pen-name of one of the most brilliant of the younger novelists of the day. His real name is Mr. A. H. Hawkins, and he is a younger son of the Rev. E. C. Hawkins, vicar of St. Bride's, Fleet Street, and was b. in London, Feb. 9th, 1863. He was ed. at Marlborough Coll. and Balliol Coll., Oxford, of which college he was a scholar. He gained a first class in Classical Schools in '85, and took his M.A. degree in '89. He took the step which is apparently necessary to success in literature by devoting himself at first to the law, and was called to the Bar at the Middle Temple in '87. His significantly named first book, "A Man of Mark," was published in '90, and there have since followed, "Father Stafford," "Mr. Witt's Widow," "Sport Royal," "Half a Hero," "The Prisoner of Zenda," "The God in the Car," "The Dolly Dialogues," a collection of ex-

quisitely finished dialogues, "Count Antonio" ('95), "Comedies of Courtship" and "The Heart of Princess Osra" ('96), "Phroso" ('97), "Simon Dale" and "Rupert of Hentzau," a sequel to the "Prisoner of Zenda" ('98), and "The King's Mirror" ('99). A dramatic version of "The Prisoner of Zenda" proved very successful in '96, and a comedy, "The Adventures of Lady Ursula," was successfully produced in the United States, and in London ('98). Address: 16, Buckingham Street, Strand, W.C.

Horological Institute, The British, has for its main object the encouragement of the English watch trade. Technical classes and examinations are held by the Institute at its headquarters, Northampton Square, E.C., and certificates of competency are granted. It publishes monthly the "**Horological Journal**," which circulates among watchmakers, jewelers, and silversmiths. There are 308 members and 15 associates. **Secretary, F. J. Britten.**

Horton, Robert F., M.A., D.D., Congregational minister, was b. 1855, ed. at Shrewsbury, whence he went to New Coll., Oxford ('74), where he commenced a brilliant college career by obtaining First Class in Moderations, and was President of the Union, and in '78 a First in Classical Greats. Elected Fellow of his college '79, but excluded from an examinership in the Rudiments of Faith and Religion by reason of his Nonconformist views. He began his ministry at Hampstead ('80), and his success there soon necessitated the building of a larger church, in the Lyndhurst Road, which was opened in '84. He has published "Inspiration and the Bible," '87; "Revelation and the Bible," '93; a course of lectures on "Preaching," delivered at Yale, and subsequently issued in book form as "Verbum Dei," '93; "The Cartoons of St. Mark," '94; "The Teaching of Jesus," '95; "The Life of John Howe," "The Book of Proverbs," in the Expositor's Bible, "The Art of Living Together," '96; "The Four Pillars of the Home," "Oliver Cromwell, a Study in Personal Religion," "Success and Failure," "The Women of the Old Testament," all in '97; "Brief Sermons to Busy Men," "England's Danger," and "The Commandments of Jesus," '98. Address: Chesils, Christ Church Road, Hampstead, N.W.

HOSPITALS AND DISPENSARIES.

The Prince of Wales's Hospital Fund was formed in '97, on the initiative of the Prince, to commemorate the 60th anniversary of the Queen's reign. The total paid to the Fund for the eleven months ending Dec. 31st, '97, was £227,553. Of this amount £56,286 5s. was given to the various London Hospitals, and £167,022 19s. 8d. was invested; the expenses were £3704 7s. 9d. The sale of stamps produced £34,776; the *Daily Telegraph* fund reached £36,780, and that of *Lloyd's News* £2618: a total of £74,174, the greater portion of which represents efforts not likely to be repeated. The total receipts in '98 were £39,272 3s. 5d. Of this £32,500 was distributed as shown below, the expenses of administration amounted to £2460 12s. 10d., and £4311 10s. 7d. was carried forward. Of the total sum distributed, namely, £32,500, £23,200 was given as annual grants, and the balance as donations. The total sum in hand on Dec. 31st, '98, was £171,332 10s. 3d. The effect of the action of the Fund in '98 was that, in addition to supplying certain specified

needs, the sums awarded enabled 57 closed beds to be reopened; and taking the work of '97 and '98 together, 242 beds previously closed were reopened and maintained, a result equivalent to the building and maintenance of another large hospital. The procedure is that hospitals lying within a radius of seven miles from Charing Cross send in applications for grants, and a special Visiting Committee then inspect the hospitals and make recommendations to the Council of the Fund, the attention of the governing bodies of the hospitals being also called to defects in accommodation and management. The Council believe that there is room for much more co-operation in the work of the Fund on the part of the middle and working classes. The President of the Fund is H.R.H. the Prince of Wales; the Treasurer is Lord Rothschild; the Hon. Secs. are Sir Savile Crossley, Bart., and Mr. J. G. Craggs, F.C.A.; and all communications should be addressed to them at the Bank of England, E.C.

The following list comprises most of the important hospitals and dispensaries in London, with their last notified annual income and secretary's address:—

Alexandra Hospital for Children with Hip Disease (£3723), Stanley Smith, Queen Sq., Bloomsbury.

Belgrave Hospital for Children (£1741), Percy Gates, 7, Victoria St., Westminster, S.W.

Bethlem Hospital (£40,000), A. H. Martin, Steward, Lambeth, S.E.

British Hospital for Diseases of the Skin (£1444), Albert Wills, Hon. Sec., 61, Great Marlboro' St., W., 29, Euston Road, N.W.

British Lying-in Hospital (£2216), A. C. Wickins, Endell St., Long Acre.

Cancer Hospital, The, free—no letters of admission required (£6728), F. W. Howell, Brompton, S.W.

Central London Ophthalmic Hospital (£1523), John Griggs Bryant, 238A, Gray's Inn Rd., W.C.

Central London Throat and Ear Hospital (£2406), R. Kershaw, Gray's Inn Rd., W.C.

Charing Cross Hospital (£17,369), A. E. Reade, West Strand, Charing Cross.

Chelsea Hospital for Women (£6200), Herbert H. Jennings, Fulham Rd., S.W.

Cheyne Hospital for Sick and Incurable Children (£3543), Reginald Blunt, Cheyne Walk, Chelsea.

City Dispensary (£1357), F. J. T. Moore, 98, Cannon St.

City of London Hospital for Diseases of the Chest (£12,620), H. T. Dudley Ryder, Hospital, Victoria Park, E.

City of London Lying-in Hospital, established 1750 (£4785), No. of patients 2197, R. A. Othwaite, 102, City Rd.

City Orthopædic Hospital (£1645), E. Derenth, 27, Hatton Garden.

Convalescent Hospital for Seamen (£22,254), included under Seamen's Hospital Society, P. Michelli, Seamen's Hospital, Greenwich.

Dental Hospital of London (£3118), J. Francis Pink, 40, Leicester Sq.

East London Hospital for Children and Dispensary for Women (£9939), T. Hayes, Shadwell, E.

Evelina Hospital for Sick Children (£4674), T. S. Chapman, Southwark Bridge Rd., S.E.

Finsbury Dispensary (£1076), W. H. Pratt, Brewer St., Goswell Rd., E.C.

Foundling Hospital (£21,214), W. S. Wintle, M.A., Guilford St.

German Hospital (£13,966), H. Gulich, Superintendent, German Hospital, Dalston.

Mrs. Gladstone's Free Convalescent Home for the Poor, more especially of the East of London (£1158), Lieut.-Colonel Neville, Hon. Sec., Thurgoland, Sheffield. Office, Woodford Hall, Woodford.

Great Northern Central Hospital (£15,640), Lewis H. Glenton-Kerr, Holloway Rd., N. The local hospital for North London.

Guy's Hospital (£40,795), H. Williams, Clerk, Counting House, St. Thomas St., Boro., S.E.

Hampstead Hospital, the local hospital for Hampstead (£3375), R. A. Othwaite, Hon. Sec., 1, Parliament Hill Rd., Hampstead.

Hospital for Consumption and Diseases of the Chest (£21,253), W. H. Theobald, Brompton.

Hospital for Diseases of the Throat (£3193), W. Holt, 32, Golden Sq., Regent St.

Hospital for Epilepsy, Paralysis and other Diseases of the Nervous System (£1228), H. Howgrave Graham, 32, Portland Terrace, Regent's Park, near St. John's Wood Road Station.

Hospital for Sick Children (£9004), Adrian Hope, 49, Great Ormond St., and Cromwell House, Highgate.

Hospital for Women (£5381), D. Cannon, 30, Soho Sq., W.

King's College Hospital (£17,493, including legacies), Rev. N. Bromley, Lincoln's Inn Fields, W.C.

Look Hospital and Rescue Home (£8770), A. W. Cruikshank, Harrow Rd., and 91, Dean St.

London Fever Hospital, specially for infectious patients who can pay a small fee (£10,900), Major W. Christie, Liverpool Rd., N.

London Homœopathic Hospital (£6620), G. A. Cross, Superintendent, Great Ormond St.

London Hospital (Ordinary, £49,147; Extraordinary, £83,315), G. Q. Roberts, M.A., Sec. and House Governor, Whitechapel Rd.

Magdalen Hospital (£4951), Warden and Secretary, Rev. W. Watkins, Streatham, S.W.

Metropolitan Dispensary (£906), W. Norvell, 9, Fore Street, Cripplegate.

Metropolitan Hospital (£12,605), C. H. Byers, Kingsland Rd., N.E.

Middlesex Hospital (Ordinary, £18,263; Extraordinary, £12,511), F. Clare Melhado, Sec. and Superintendent, Mortimer St., Berners St.

National Hospital for the Diseases of the Heart and Paralysis (£2256), Capt. F. Handley, 32, Soho Sq.

National Hospital for the Paralysed and Epileptic (Albany Memorial) (£21,868), R. Burford Rawlings, Queen Sq., Bloomsbury.

National Orthopædic Hospital for the Deformed (£2489), H. J. Tresidder, 234, Great Portland St., Regent's Park.

North-Eastern Hospital for Children, Hackney Rd., N.E. (£6137), T. Glenton-Kerr, 27, Clement's Lane, Lombard St., E.C.

North London or University College Hospital (Ordinary, £14,427; Extraordinary, £8065), N. H. Nixon, Gower St., St. Pancras.

North-West London Hospital (£3180), A. Craske, 18, Kentish Town Rd.

Paddington Green Children's Hospital (£3087), W. H. Pearce.

Poplar Hospital for Accidents (Ordinary, £8581; Extraordinary for Building, £1223), Lieut.-Col. Feneran, 303, East India Rd., E.

Queen Charlotte's Lying-in Hospital (Ordinary, £3501; Legacies, £3359), Arthur Watts, 191, Marylebone Rd.

Royal Free Hospital (£15,838), C. W. Thies, Gray's Inn Rd., W.C.

Royal Hospital for Children and Women (£4467), Thos. S. Conisbee, 51, Waterloo Bridge Rd.

Royal Hospital for Diseases of the Chest, for the gratuitous relief of poor persons suffering from diseases of the chest in any of their various forms (£8745), John Harrold, 231, City Rd., E.C.

Royal Hospital for Incurables (£31,451), F. Andrew, 106, Queen Victoria St.

Royal London Ophthalmic Hospital (£8055), R. J. Bland, Bloomfield St., E.C.

Royal National Hospital for Consumption and Diseases of the Chest on the Separate Principle, Ventnor (Ordinary, £11,401; Legacies, £10,957), E. Morgan, 34, Craven St., Charing Cross, W.C.

Royal Orthopædic Hospital (£3571), Bates Mansford, 297, Oxford St.

Royal Sea-Bathing Hospital, Margate (£6913), M. Biddulph, Esq., M.P., Treasurer, 30, Charing Cross.

Royal South London Ophthalmic Hospital (£3000), Edwin Easton, St. George's Circus, Southwark.

Royal Westminster Ophthalmic Hospital (£2006), T. Beattie-Campbell, 19, King William St., West Strand.

St. Bartholomew's Hospital (about £72,422), W. H. Cross, B.A., Clerk, West Smithfield, E.C.

St. George's Hospital (£25,197), C. L. Todd, Hyde Park Corner.

St. John's Skin Hospital (£4180), J. Dunlop Costine, Superintendent, 49, Leicester Sq., W.C.

St. Mark's Hospital for Fistula and other Diseases of the Rectum (£4986), Edgar Penman, City Road, E.C.

St. Mary's Convalescent Home (£2643), Miss E. Paget, 27, Kilburn Park Rd., N.W.

St. Mary's Hospital (£27,437), T. Ryan, Cambridge Place, Paddington.

St. Peter's Hospital for Stone, Stricture and Urinary Diseases (£3514), Irwin H. Beattie, Henrietta St., Covent Garden.

St. Thomas's Hospital (£51,441), R. Brass, Albert Embankment, Westminster, S.W.

Samaritan Free Hospital for Women and Children (£6962), W. Guntrip King, Marylebone Rd., N.W.

Seamen's Hospital Society (£15,737), P. Michelli, Greenwich.

Small Pox and Vaccination Hospital, Clare Hall, South Mimms, High Barnet. C. M. Wilkins, 30, Coleman Street, London, E.C.

University College (see North London).

Victoria Hospital for Children (£5011), A. Cameron Skinner, Queen's Rd., Chelsea.

West London Hospital (Ordinary, £6199; Extraordinary, £2948; for Building, £901), R. J. Gilbert, Hammersmith Rd., W.

Westminster Hospital (£18,201), S. M. Quennell, Broad Sanctuary, S.W.

For Charitable Societies see CHARITIES. See also METROPOLITAN HOSPITAL SATURDAY FUND and METROPOLITAN HOSPITAL SUNDAY FUND.

Hospitals Association, The (Street Ambulance Branch). Was established in '89 for the succour and safe removal of cases of street accident in the Metropolis. Possesses 57 stations, of which 30 are public thoroughfare stations, 14 are at fire brigade stations, and 13 are at hospitals. Office, 28 and 29, Southampton Street, Strand, W.C. Treasurer, Mr. H. L. Bischoffsheim; Hon. Secretary, Mr. Thomas Ryan, Secretary of St. Mary's Hospital, W., to which address all urgent communications should be sent.

House of Commons. See COMMONS, HOUSE OF.

Howard Association (founded 1866) was instituted, under the patronage of Lord Brougham, to promote the best methods of treatment and prevention of crime and pauperism. The principles of the great philanthropist, John Howard, have been generally embodied in the work of the Association. It collects information both at home and abroad bearing on the present systems of punishment and prevention of crime. Many books and pamphlets dealing with pauperism, boarding-out neglected children, vagrancy, and kindred subjects, have been disseminated by the Howard Association. A remarkable work, entitled "**Penological and Preventive Principles**," which has received high official recognition, and reached a second and enlarged edition in '95, is the work of Mr. William Tallack, who is the Secretary of the Association. Office, 5, Bishopsgate Street Without, E.C.

Hughes, Rev. Hugh Price, M.A., the leader of the "Forward Movement" of Wesleyan Methodism, is a native of Wales, and was b. 1847. Ed. at Richmond Theological Coll., and graduated M.A. at London Univ. Has held appointments at Dover, Brighton, Tottenham, Dulwich, Oxford, Brixton, and West London. Is a member of the Legal Conference. Has edited, with conspicuous success, the *Methodist Times* since '85, and is the Superintendent of the Wesleyan Mission to the West End. He is the author of "Social Christianity," "The Philanthropy of God," "Ethical Christianity," and "Essential Christianity." In '92 he took a prominent part in the "Review of the Churches" Conference at Grindelwald. He is one of the founders of the Evangelical Free Church Movement, and was President of its National Council in '96. He is a Vice-President of the United Kingdom Alliance, and an active member of the Anti-Gambling League. In '98 he was elected President of the Wesleyan Conference.

Humanitarian League, The, was founded in 1891, its main object being to apply and emphasise, wherever possible, the principle that "it is iniquitous to inflict avoidable suffering on any sentient being." The League proposes a thorough revision and more humane administration of the criminal law and prison system, deprecates the various provocations to aggressive warfare, and urges the need of amending present social conditions. With regard to the treatment of animals, it advocates the prohibition of vivisection, condemns cruel sports, and aims at the mitigation of the sufferings to which animals are subjected in the cattle traffic and the shambles. The Hon. Secretary is Mr. Henry S. Salt, and the offices are at 53, Chancery Lane, London, W.C.

Humbert I., King of Italy, was b. 1844; succeeded his father Victor Emmanuel '78. While Crown Prince he distinguished himself by the active part he took in the movement for promoting Italian Unity. He shared with Garibaldi the triumph of the reorganisation of the kingdom of the two Sicilies. Prince Humbert served with distinction in the war of '66, and displayed much personal bravery in the moment of disaster at the battle of Custoza, in which the Italians were defeated. He married in '68 his cousin, Princess Marguerite, daughter of the late Duke of Genoa. Their son, the Crown Prince Victor Emmanuel, Prince of Naples, was born Nov. 11th, '69, and his marriage to Princess Helen of Montenegro took place in October '96. During

his Majesty's visit to Naples, Nov. 17th, '78, a would-be assassin named Giovanni Passananti made an attempt upon his life with a poniard, and another attempt in '97 also happily failed. His Majesty is very popular among his subjects. The Queen is well known as an accomplished artist.

Hungary. See AUSTRIA-HUNGARY.

Hunting. According to figures given by the *Field* there has been of late years a steady increase in the number of packs kept in all parts of the kingdom. There were in the United Kingdom in '99 23 packs of staghounds, 194 of foxhounds, 136 of harriers, and 52 of beagles, as against 26 packs of staghounds, 195 of foxhounds, 152 of harriers, and 50 of beagles in '97. The packs were thus distributed: In

England and Wales there were 19 packs of staghounds, 161 of foxhounds, 105 of harriers, and 47 of beagles. In Ireland there were 4 packs of staghounds, 23 of foxhounds, 28 of harriers, and 5 of beagles. In Scotland there were 10 packs of foxhounds and 3 of harriers.

Hypnotism. See 95 and previous editions for an exhaustive article upon this subject. Also consult Vincent's "The Elements of Hypnotism: the Induction of Hypnosis, its Phenomena" (Kegan Paul); Moll's "Hypnotism" (Walter Scott); Binet and Féré's "Animal Magnetism" (Kegan Paul); Bernheim's "Suggestive Therapeutics" (Pentland); Tuckey's "Psycho-Therapeutics" (Baillière); Kingsbury's "Practice of Hypnotic Suggestion" (Simpkin); Felkin's "Hypnotism" (Pentland).

Ibsen, Henrik, the Norwegian dramatist and poet, was b. on March 20th, 1828, at Skien. After serving his apprenticeship to an apothecary, he went to Christiania Univ. to study medicine. In '50 he produced his first play, "Catilina"; and in '51 was appointed director of the National Theatre at Bergen by Ole Bull. In '52 he travelled for a time in Denmark and Germany; and in '57 he received the post of director of the Norske Theatre at Christiania, which he managed till '62. During this period several of his plays were written and produced. Most of his works are translated into German, and many into English. His "Doll's House" was produced at the Olympic, in London, July '89, and his drama "Rosmersholm" at the Vaudeville Theatre in Feb. '91, followed by "Ghosts," and "Hedda Gabler." Ibsen's characters are most powerfully drawn, and impress even the reader of his plays as being living men and women. The "Pillars of Society" perhaps represents his social philosophy as closely as any of his plays, while "Brand" is held to be his masterpiece. "Ghosts" is a striking, almost ghastly, study of heredity. "The Master-Builder" was translated, published, and performed in English early in '93. It produced violent dissensions amongst the critics, and even alienated some who had before been pronounced Ibsenites. Two English translations of "Brand" were published in '94, "Little Eyolf" in November of that year, and "John Gabriel Borkman" in '96. A distinguished group of English admirers presented him with a set of silver on his 70th birthday, '98.

Iceland. A large island, 130 m. east of Greenland, and 850 m. west of Norway, belonging to Denmark. Area, 39,756 sq. m.; pop. 70,927. Capital, **Reykjavik.** The legislature, called the Althing, consists of two houses, the Lower containing twenty-four members elected by household suffrage and the Upper twelve members, six elected, and six nominated by the King of Denmark. **Exports:** sulphur, Iceland moss, wool, dried fish, seal-skins and oil, whale-oil and baleen, eiderdown, bird-skins and ponies. Manufactures domestic.

There has lately been a considerable exodus from the island of emigrants to Manitoba.

Ile du Diable. See FRENCH GUIANA.

"Illustrated London News," established by Mr. Herbert Ingram, then a Nottingham printer, in 1842. Published weekly; contains illustrations of a high order, bearing upon current events and subjects of interest, with explanatory letterpress. Its first editor was Mr. Bailey, who was succeeded by Dr. Charles Mackay ('48-'59), and Mr. John Lash Latey ('59-'90). Editor, Sir William Ingram. **Assistant Editor,** Mr. John Latey. From the office of the *Illustrated London News* are also issued the *Penny Illustrated Paper* and the *Sketch* (both ably edited by Mr. John Latey), and the *English Illustrated Magazine*.

Imperial Federation. The Imperial Federation League was formed at a conference held in '84 under the chairmanship of the late Right Hon. W. E. Forster. A special committee of the League appointed in '91 prepared a practical scheme of Federation, and presented its report on Nov. 12th, '92. The substance of the report was given at length in the '99 and previous eds. Briefly, it recommended the establishment of a Council of the Empire, on which the chief self-governing Colonies should be represented, with the Indian Empire and the Crown Colonies. This Council should deal with Imperial Defence, to which all parts of the Empire should contribute. After the adoption of this report by the Council it was recognised by the leaders of the movement that its first stage, that of general discussion without any plan, had been passed, and that it would be necessary in future to advocate practical steps for bringing the matter to an issue. As the League had been avowedly founded without any defined policy as to the way in which Federation should be carried out, and as it was evident that opinions within the League would be likely to differ upon this point, it was decided to dissolve the League at the end of '93, in order that complete freedom of opinion should be afforded in advocating practical steps. The League was accordingly

dissolved on Dec. 31st, '93, by resolution of the Council adopted some months previously. This step has had the effect of giving increased activity to the movement in some directions, and it is now being prosecuted by several bodies in the United Kingdom, as well as by branches founded by the League in Canada and Australia. Among the former may be mentioned **The United Empire Trade League**, Sir Howard Vincent, M.P., Hon. Sec., which advocates a commercial union of the Empire by means of Protection; **The British Empire League**, Sec., C. F. Murray, 112, Cannon Street, London, E.C. (see separate account under the heading **BRITISH EMPIRE LEAGUE**); **The Imperial Federation (Defence) Committee**, Hon. Sec., A. H. Loring, 11A, Princes Street, Westminster, which advocates combination for the purposes of Defence on the lines of the report quoted above, in the first instance by maintaining a common Navy; **the Unity of the Empire Association**, Edinburgh. It may be added that the aid afforded to the mother country by the Colonies, notably the Australian Colonies and Canada, in the war with the Transvaal during '99, together with the efforts of Natal and Cape Colony, showed how real and practical is the union at present existing between all parts of the Empire.

IMPERIAL INSTITUTE.

The Imperial Institute of the United Kingdom, the Colonies, and India, was founded in 1887 as a record of Her Majesty's Jubilee. (See eds. '87 and '88.) In the main, the aims of the Institute may be said to be the formation of complete collections of the natural products of the British Empire, the establishment of a system of commercial intelligence to work with and supplement the display of the specimens, and the practical adaptation of both to the purposes and advancement of trade. The government of the Institute is carried on by a chartered body, whose form of constitution was approved by a royal warrant dated April 21st, '91. The **governors** are 125 in number, 12 being nominated by the Sovereign, 6 by the President, 36 by Colonial Governments, 15 by the Government of India, 21 by county and municipal authorities of the United Kingdom, and 27 by the various learned and technical societies and institutions of the Empire. The full complement is made up with certain *ex-officio* governors, who are principally high officials of the State. The foundation-stone was laid by Her Majesty on July 4th, '87, the buildings were partially opened in June '92, and the formal inauguration by Her Majesty took place on May 11th, '93. The buildings were in '99 transferred to the Commissioners of Works as representing the Crown, and an arrangement was made for the Institute to use a portion of them free of rent, while in the remaining portion the London University (*q.v.*) was accommodated.

The annual subscription for Fellows in the United Kingdom is £2; for Indian and Colonial Fellows £1: the wives of Fellows are entitled to Fellowship on election at half rates. The Institute practically offers all the advantages of a club-house. Vast quantities of specimen products from all parts of the Empire are in the galleries. Collections of products have been prepared and transmitted by the Governments of India, Ceylon, Straits Settlements, Mauritius, and Seychelles; the Canadian provinces of Quebec, Ontario, New Brunswick,

Nova Scotia, British Columbia, and Manitoba; New South Wales, Victoria, South Australia, Queensland, Western Australia, Tasmania; West Coast of Africa, Zanzibar, Cape Colony, Natal, Bechuanaland and Mashonaland; Jamaica, Bahamas, Bermuda, Hong-Kong, British North Borneo, and Malta. **Curators and officers** in charge of collections have been appointed by the Governments of India, Ceylon, the Canadian provinces, Cape Colony, Jamaica, and Bahamas.

Admission to the **Commercial Collection Galleries** of the Institute, and to the Public Commercial and Industrial News-room, is free from 11 a.m. to 5 p.m. (during the winter months from 11 a.m. to 4 p.m.) on every week-day. Lectures and concerts are given during the winter. The **Commercial Intelligence Department** of the Institute is open daily from 10 a.m. to 5 p.m. for the purpose of answering inquiries and supplying information relating to the commerce and industries of India and the Colonies. Applications may be made personally or by letter. Special information may be obtained from the curators in charge of the Indian and of certain Colonial collections. Arrangements have been made for the translation, for mercantile firms, of trade circulars, price lists and catalogues into any foreign language at cost price.

A **City Branch** of the Institute was opened in July last, at 112, Cannon Street, E.C. This embraces a News Room, well supplied with British and Foreign Commercial periodicals, and an **Inquiry Office**, in telephonic communication with the Commercial Information Office at the Institute. The News Room is open free to Fellows, but subscribers of £1 per annum can have the free use of the room and the supply of information, free of charge, not involving special research or correspondence. Non-subscribers can also be supplied with information, the first inquiry, not involving special research or correspondence, being *free*.

In connection with the **School of Modern Oriental Studies**, the Ouseley Scholarships, each of £50 per annum for two years, will be awarded in July 1900, should sufficient merit be shown, for proficiency in **Hindustani**. In Jan. '95 was published the first number of the **Imperial Institute Journal**, which is issued every month as a record of the trade and commerce, finance, and agriculture of the British Empire. The **Technical Department** of the Institute, opened in '94 for the scientific investigation of economic products furnished by the Empire, with a view to their commercial utilisation, is partly supported by special contributions from the Royal Commissioners of the Exhibition of 1881 and the Goldsmiths' and Salters' Companies. In '96 the Laboratories and staff were much extended, and the department was placed under the direction of Professor W. R. Dunstan, M.A., F.R.S. This Department has attached to it a special staff of Scientific and Technical Referees. **Hon. Secretary and Director**, Sir Frederick Abel, Bart., K.C.B., D.C.L., F.R.S.; **Director of the Scientific and Technical Department**, Professor Wyndham R. Dunstan, M.A., F.R.S.; **Assistant Secretary**, Lieut. Gerald R. Maltby, R.N. (*ret.*). **Offices**, Imperial Institute, Imperial Institute Road, S.W.

Imperial Protestant Federation, The, was formed early in '98, in order to provide a centre for the concentrated action of all existing

Protestant bodies, and to organise the constituencies for the purpose of returning to Parliament at the next general election a strong Protestant party, determined to uphold the Reformation settlement in our Church and constitution, and to maintain Protestant supremacy in all departments of the British Empire. The following societies are affiliated to the Federation: Belfast Protestant Association, Calvinistic Protestant Union, Church Association, Manchester Protestant Thousand, National Club, Protestant Alliance, Protestant Reformation Society, Scottish Protestant Alliance (Glasgow), Scottish Reformation Society (Edinburgh), Trinitarian Bible Society, Wellingborough Protestant League, Women's Protestant Union. **Chairman:** Colonel T. Myles Sandys, M.P. (President of the Protestant Reformation Society). **Hon. Sec.,** Edward H. Garbett, Esq. **Offices,** 3, Palmer Street, Queen Anne's Gate, S.W.

Imports. See BRITISH EMPIRE (table) and TRADE, '99.

Income Tax. The rates at which the Income Tax has been charged from '42 to '95 are as follows. **£100 but under £150:** '53, '57-8, *5d.* in the *£*; '54, *10d.*; '55-6, *11½d.*; '59, *6½d.*; '61-2, *6d.* **£150 and upwards:** '42-52, and '57, *7d.*; '54, *1s. 2d.*; '55-6, *1s. 4d.*; '58, *5d.*; '59, '61-2, *9d.*; '60, *10d.* **Uniform duties on Incomes of £100 a year and upwards, with abatement of £60 on Incomes under £200:** '63, *7d.*; '64, '68, '71, *6d.*; '65-6, '70, *4d.*; '67, *5d.* **Abatement extended to £80 on Incomes under £300:** '72, *4d.*; '73, *3d.*; '74-5, *2d.* **Exemptions extended to Incomes under £150, and abatement to £120 on Incomes under £400:** '76-7, *3d.*; '78-9, '81, '83-4, *5d.*; '80, '84, *6d.*; '82, *6½d.*; '85-6, *8d.*; '87-8, *7d.*; '88-93, *6d.*; '93, *7d.*; '94, *8d.* and exemptions extended to £160, and abatements to £160 on Incomes under £400: '95-9, *8d.*, and Abatements of £150 allowed on Incomes between £400 and £500, of £120 between £500 and £600, and of £70 between £600 and £700.

Incorporated Law Society, The. From papers discovered a few years ago at the Incorporated Law Society, and recently published, it appears that in the year 1739 a society called the "Society of Gentlemen Practisers in the several Courts of Law and Equity" was established, for the promotion of fair and honourable practice and the detection and discountenance of all unfair practice. This Society continued in active existence from that time till 1822, from which period all trace of it is lost. In the year 1825, however, certain leading solicitors issued a prospectus advocating the establishment of a "Law Institution." The deed of settlement of the Institution was completed in Feb. '27, and a royal charter was obtained in Dec. '31. In '45 the Society, which had been originally constituted as a joint-stock company, was remodelled upon the principle of other learned and professional bodies, and received a new charter. This charter was amended by a supplemental one in '72. Any solicitor practising in England or Ireland, and any writer practising in Scotland, as well as any solicitor or writer who has ceased to practise, is eligible for election as a member of the Society. The administration of business is in the hands of an elective council of forty ordinary members, of whom ten vacate their seats every year, and ten extraordinary members chosen by the council from among those members of the Society who are

presidents of provincial law societies. The President and Vice-President are annually elected by the members of the Society from the members of the council. The members of the Society at present number 7888. Its buildings are situated in **Chancery Lane**, and comprise a handsome hall and a library of upwards of 36,000 volumes. The general function of the Society resembles that which the Inns of Court are supposed to discharge. It takes care of the professional training, character, and interests of solicitors. When it was founded no test was required from any person wishing to become a solicitor beyond evidence of character and of having served under articles for the prescribed time. The Society instituted lectures on law in '33, and in '36 obtained from the judges authority to examine students on the completion of their articles. Since then Preliminary and Intermediate Examinations have been added, and the entire control of all the examinations has been transferred to the Society. Under recent legislation, all cases of alleged malpractice by solicitors are heard before a specially appointed committee, which, when necessary, makes a report to the High Court. The Society exerts itself to promote what it considers the legitimate interest of the public and of the profession. It has also assisted in promoting reforms beneficial to the whole community, such as the concentration in one building of the various Courts, the Conveyancing Acts, the Trustee Act, and the Companies Act of '98. The improved standing of solicitors is in great part due to the exertions of the Society. **Secretary,** E. W. Williamson. **Office,** Chancery Lane. Consult the Handbook of the Society.

Incorporated Society of Authors, The, established in 1884 by the late Sir F. Pollock, and other eminent literary men, under the presidency of the late Lord Tennyson. Its object is to defend the interests of literary, dramatic, and musical property, to maintain the rights of authors of all the above works, to advise them as to questions of copyright, and in other ways to render them assistance in their agreements and the publication of their works; to assist them to recover accounts and moneys due under their agreements, or for work sent to magazines, etc. Also to procure in England the passing of an Act which shall amend and consolidate the law of Domestic Copyright. It is the only association of the kind in England, but its model, *La Société des Gens de Lettres*, has been flourishing for over fifty years in France. The works published by this Society are "Grievances of Authors," "Literature and the Pension List," "History of the *Société des Gens de Lettres*," "The Cost of Production," "The Methods of Publication," "Copyright Law Reform," and a short record of the Society's work. The organ of the Society is *The Author* (monthly). **Office,** 4, Portugal Street, Lincoln's Inn Fields, W.C. **Chairman,** Sir W. Martin Conway ('98); **Secretary,** G. Herbert Thring.

Independent Order of Oddfellows. See ODDFELLOWS.

INDIA.

India is a dependency of Great Britain, consisting partly of territory under the direct administration of British officials, and partly of native states, all subordinate, in varying

degrees of relationship, to the suzerain power. The British territory was acquired by the **East India Company**, by conquest or treaty, in the course of one hundred years, dating from the battle of Plassey (1757). As a result of the mutiny of the Sepoy army (1857-8), the East India Company ceased to exist; and the direct sovereignty was vested by Act of Parliament in the Crown. In accordance with an Act of Parliament passed in '76, Queen Victoria assumed the title of "**Empress of India**," *Kaisar-i-Hind*. The Parliament of the United Kingdom is, of course, supreme over India; but this supremacy is enforced rather by means of Ministerial responsibility than by direct legislation. Practically, all the statutes relating to India are in the nature of either constitutional enactments or financial provisions. The Act of Parliament that abolished the Company also created a **Secretary of State for India**, together with a **Council** (selected for a period of ten years from among Indian officials for the most part), in which is vested the authority of the Crown. In England every measure concerning India runs in the name of the Secretary of State; and he alone is responsible to Parliament. In practice he is always a Cabinet minister of the first rank. In India the supreme authority, both executive and legislative, is vested in the **Governor-General in Council**. The Governor-General, or Viceroy, has power to overrule his Council in cases of emergency. For ordinary purposes the Council is composed of six members, all appointed, like the Governor-General himself, by the Crown. These six members preside over the departments of Finance and Commerce, Home Affairs, Revenue and Agriculture, Military Administration, Legislation, and Public Works. The Commander-in-chief is appointed as an extraordinary member. For purposes of legislation this Council is augmented by sixteen additional members, nominated by the Governor-General, of whom one-half must be non-official persons, and of whom some are always natives. The four provincial legislative councils and the Calcutta Chamber of Commerce have each the right to recommend one member. The seat of the Supreme Government is Calcutta, with an annual migration to the hill station of Simla for the hot season. As regards the **work of administration**, India is split up into several divisions. Two of these, Madras and Bombay, which boast a historic existence for two centuries, are styled Presidencies, and enjoy a certain precedence. They are each ruled by a Governor, appointed by the Crown, with legislative and executive councils modelled on those of the Governor-General. They each possess an army and a civil service of their own. Bengal, the North-West Provinces, the Punjab, and Burma are each under a Lieut.-Governor, and have each a legislative council. The Central Provinces and Assam are under Chief Commissioners. A Chief Commissioner presides over each of the following: Coorg, Ajmere-Merwara, British Baluchistan, and the Andaman Islands. In addition, there are some smaller tracts under the direct administration of the Governor-General. Within the provinces the actual unit of administration is the **District**, which forms the charge of an officer, usually styled Collector or Deputy-Commissioner. His principal duties are executive, magisterial, and fiscal; but he also exercises supervision over police,

jails, schools, public works, forests, etc. The Districts are combined into Divisions under Commissioners. As to justice, the Collector in each District is usually judge both of first instance and appeal. Madras, Bombay, Bengal and the North-west Provinces have each a High Court, from which there is an ultimate appeal to the Privy Council in England. The Punjab has a Chief Court, and Burma, the Central Provinces, Oudh and Sind, have each a Judicial Commissioner. For local government purposes there are the municipal bodies, numbering about 750, in all towns of sufficient size, appointed on the elective principle, and in the rural districts there are over a thousand district and local boards. The staff of administration consists of: (1) the covenanted civil service, appointed after competitive examination in England; (2) the statutory civil service, selected from among natives; (3) military officers of the staff corps in civil employ; (4) a miscellaneous class of uncovenanted civil servants of different grades, who may be either Europeans or natives. There still remain a number of **native or feudatory states**, over which the British Government has indeed control, but not control of the direct character which it exercises over the wholly British territory. Some, but not all, of these states pay tribute to the supreme Government. The nature of British control over these states varies, and is exerted chiefly through a political resident, who assists the native princes. These princes can manage their internal affairs, but have no power to make war or peace. Their external relations are in the hands of the Supreme Government, and they can only maintain a limited military force. The latest census of India ('91) states that the total area of these states was 595,167 sq. m., and pop. 66,050,479. **Religion.** The Hindu religion is that of three-fourths of the whole population. The Mohammedans number about 57,000,000 adherents, the Buddhists about 7,000,000 (chiefly in Burmah), and Christians about 2,500,000. The total number of **schools and colleges**, '97, was 152,841, attended by 4,393,109 pupils, of whom only 397,103 were girls. The large majority of the population are engaged in agricultural pursuits, nearly 200,000,000 either being engaged in tilling the soil or dependent upon those so engaged. Metal and textile workers, glass and pottery workers, with their dependants, number close on 20,000,000, and there are large numbers employed in service. In every province a special department is established for the purpose of improving agricultural methods and disseminating information. The principal crops cultivated are rice, wheat, and other food grains, tea, cotton, sugar-cane, tobacco, and indigo. There are two kinds of tenure under which the land is held. The first, the **Zamindari tenure**, prevails principally in Bengal, the Punjab, and the North-west Provinces and Oudh, while it also exists in the Central Provinces, Madras, and Assam. Under this system the land is held in large estates by zamindari and by village communities, and the state revenue is assessed and paid on each estate as a whole for stated periods. The **rayatwari system** prevails in Bombay, Madras, Sind, Burma, Assam, and to some extent in the Central Provinces. Under this system the land is held by petty proprietors direct from the Government, and the revenue is assessed with each holding, and is paid directly to the State. The country is rich in coal,

though little mining has as yet been done. The production in '98 was over 4,000,000 tons. The railways of India have been constructed either by private companies to which the State guarantees interest, or directly by the State. The total number of miles open for traffic during '99 was 22,650. The area of British territory alone (excluding native states) is 964,993 sq. m., and the population 221,172,952. The total area of India, including Burma and the native states, amounts to 1,560,160 sq. m., and the total population, according to the corrected census of '91, numbers 287,223,431. The revenue for '97-8 was, reckoning the rupee at rs. 4d., £60,276,250, and the expenditure £63,625,760; the estimates for '97-8 showed a revenue of £64,374,000, and expenditure of £67,963,000; the estimates of '98-9 a revenue of £66,057,000, and an expenditure of £65,463,000. The public debt is Rs. 114,862,983 in India, and £107,404,143 in England. The imports for '98-9 were £57,509,532, and the exports £93,419,770. For all details as to the army see ARMY, BRITISH; see also BRITISH EMPIRE (table), BURMA, DIPLOMATIC, INDIAN CURRENCY COMMITTEE, INDIAN FINANCE, ROYAL COMMISSION ON; MEDICAL SUMMARY, '99 (for details as to the Plague), and other articles.

History, '99.—The Indian National Congress was opened at Madras (Dec. 20th, '98), Mr. A. M. Bose of Calcutta presiding. He urged the need of a reform of the legislative councils and of admitting adequate Indian representation on such bodies. Resolutions were carried condemning a forward frontier policy and protesting against the Sedition and Press Laws. An address of welcome was telegraphed to Lord Curzon, who landed at Bombay (30th), and was greeted with the utmost enthusiasm. A farewell banquet was given to Lord Elgin by the Bengal Chamber of Commerce (Jan. 2nd, '99), and his Excellency in reply dealt at length with the questions of finance, railway policy, internal administration, and frontier troubles. Lady Elgin and he left Calcutta (6th), and Lord Curzon formally assumed the Government. Captain Trench, political officer at Ladak, reported that the trade *via* Kashmir with Tibet and Chinese and Russian Turkestan had fallen off seriously since '95, in Turkestan because of Russian competition. He suggested that the trade with Tibet might be pushed with advantage, as the Tibetan peasantry were losing their suspicion of the Indian trader. The Sultan of Oman was compelled, under threat of a bombardment, to withdraw the grant of a coaling station in one of the Muscat creeks which he had made to France (Feb. 16th). The British and French Governments afterwards agreed that France should have a coal depot there under the same conditions as Great Britain. Fuller details are given under SESSION, sect. 26. A Government Bill imposing a countervailing duty on bounty-fed sugar imported into India was introduced in the Legislative Council (March 10th) and passed (20th). The report of the Indian Currency Committee was issued (July 10th), and the decision of the Government not to revert to a silver standard was approved. The only practical alternative was a gold standard, and the action of the Government had resulted in making gold practically a legal tender; but it was undesirable to leave matters as they were. The British sovereign should be made a legal tender and a current coin in

India, and the mints should be thrown open to the unrestricted coinage of gold on suitable conditions. The permanent rate for the rupee should be rs. 4d. The Government's frontier policy, particularly the arrangements with regard to the Khaibar, were published (Aug. 6th), and it was found that the idea of constructing large fortifications and keeping big garrisons in the Chitral Valley and the Khaibar had been abandoned. The idea of running a railway through the Khaibar was also given up. Instead of this it was proposed to secure the Khaibar by a strong reorganised Khaibar Rifle Corps, and the Samana and the Kuram by a militia force under British officers, with a force of regulars stationed in the Miranzai Valley. The same policy was laid down of enrolling the tribes as local militia corps under British officers in other parts of the frontier region, connecting these with camps stationed on or near the border, light railways being constructed between the camps and connecting them with the military bases of British India. The disadvantage of locking up large numbers of regulars in the hill country was thus avoided. In the Queen's Speech at the close of the Session of the House of Commons (9th), it was said that agriculture and trade had rapidly recovered from the depression caused by the famine; but that during the previous few weeks the insufficient rainfall had caused fears as to the harvest in Western and Central India. The plague showed no signs of abatement. A Bill making the sovereign legal tender, as directed by the Secretary of State in accordance with the report of the Currency Commission, was introduced in the Legislative Council (Sept. 8th), the value of the rupee being fixed at rs. 4d. The Bill was duly passed. The embarkation of the troops selected for service in the Transvaal was commenced (11th), and was concluded with most commendable promptness. For details as to the troops sent see ARMY, BRITISH, Sect. VII. The area affected by the famine included the greater part of the Central Provinces and the South-East Punjab (Oct. 20th), and the Viceroy made a tour of these districts a little later on. See SESSION, sect. 18.

India, Imperial Order of the Crown of, was instituted Jan. 1st, 1878, and consists of the Sovereign and such as the Sovereign may think fit to appoint of the Princesses of Her Majesty's Royal and Imperial House; the wives and female relatives of Indian Princes; and the wives and other female relatives of any of the persons who have held, now hold, or will hereafter hold the office of Viceroy and Governor-General of India, Governors of Madras and Bombay, or Principal Secretary of State for India. Registrar of the Order, Sir Albert W. Woods.

Indian Association, National. Established in 1870 (by Miss Mary Carpenter) for the purpose of promoting social progress and education in India, and extending friendly intercourse between the English people and the people of India. The Association carries out these objects by the diffusion of information; by grants in encouragement of education, especially of female education, in India; organising lectures on Indian subjects, social meetings, etc.; selecting English teachers for Indian families and schools; helping and advising Indian students who visit England. The Princess of Wales is Patroness of the Association, and Lord

Hobhouse, K.C.S.I., the President. The Vice-Presidents include a large number of influential natives of India, Anglo-Indians, and other ladies and gentlemen interested in the welfare of the Empire. **Organ of the Association, *The Indian Magazine and Review*** (3d. monthly), published by Archibald Constable & Co., 2, Whitehall Gardens, S.W. There are several branches of the Association in India. **Hon. Secretary** in England, Miss E. A. Manning, 5, Pembroke Crescent, Bayswater, London, W.

Indian Civil Service, The, embraces a much wider field of employment than does the Home Civil Service. Besides the ordinary departments of civil administration, it includes judicial posts, the medical service, the forest department, and officers of the staff corps in civil employ. **Situations in the Covenanted Civil Service** are gained by passing a competitive examination in England—which examinations are as a rule held annually during August in London. The candidates who have successfully competed are required to undergo two years' probation, and to pass periodical examinations in special subjects of study before proceeding to India. Candidates must be above 21 and under 23 on the 1st of April preceding the date of the examination. Application for admission to the examination must be made before May 31st in each year. Candidates are encouraged, though it is not imperative, to obtain a **university training**; and to this end the Government makes an allowance of £100 per annum to all who pass their one year's probation in residence at a university. Having arrived in India, the candidate must within a specified period elect to serve either in the **executive** or the **judicial branch** of the service. In the former branch the lieutenant-governorship of a province is the highest post to which a civil servant can attain, and in the latter branch a judgeship of the High Court. The members of the **Statutory Civil Service of India** are selected purely from among the natives. Many appointments are in the gift of the local governments. The **Public Works Department** is recruited from the Royal Indian Engineering College (*q.v.*) at Cooper's Hill, from the corps of Royal Engineers, and, as regards natives, from the Civil Engineering Colleges in India. The **Telegraph Department** is recruited much in the same manner. Examinations for the **Forest Department** and the **Medical Service** are also held in this country, and successful candidates are required to attend a four months' course at the Army Medical School at Netley, during which period they receive an allowance to cover the cost of living. A resolution was carried in the House of Commons (June 2nd, '93) to the effect that all open competitions for appointments to the Civil Services of India should be held simultaneously both in India and England, and that, such examinations in both countries being identical in their nature, all who competed should be finally classified in one list according to merit. The Government immediately requested the Indian Government to give prompt and careful consideration to the subject. This was done, and the result was that that Government pronounced emphatically against the proposal. Her Majesty's Government, therefore, came to the conclusion that by far the best method of meeting the legitimate claims and aspirations of the natives of India was to bestow such of the higher posts as could be made available for them on those who

distinguished themselves by their capacity and trustworthiness in the performance of subordinate duties, and that the existing system, subject to such alterations in detail as experience might prove to be necessary, should be maintained.

INDIAN CURRENCY COMMITTEE.

As early as 1878 the Indian Government, in consequence of the fall in silver then beginning to be seriously felt all over the world, conceived the idea of closing the Indian mints against the free coinage of silver until the rupee should rise in value to 2s., or one-tenth of an English sovereign. This they hoped would counteract the cheapness of silver, by raising the value of the rupee. But the difficulties of interfering with the currency were so grave, that the proposal was rejected at that time. The financial troubles of the Indian Government, however, increased. That Government undertakes large responsibilities in the way of railroads and public works of all kinds; it has heavy official expenses; it imports largely from Europe, and has borrowed from other countries. The debt thus incurred is entirely a gold one, and must be paid back in gold. But it receives its revenue in rupees, and since these rupees are principally raised by land taxes, it follows that when silver became low in value the Government required more rupees to pay its obligations with than it had at its command—the amount of these land taxes in rupees having been already determined and settled with the natives, either for ever or for very extended periods of years. The suggestion that the extra revenue thus called for might be met by increasing those taxes was deemed impracticable, as likely to cause riots and other political dangers; and eventually the closing of the Indian mints to silver in '93 was sanctioned by the Imperial Government on the strength of recommendations to that effect received from India and from a second committee, commonly called Lord Herschell's Committee, which had been appointed to consider the question. The mints were accordingly closed, and it was provided that when the scarcity of silver coin should bring the value of the rupee up to 1s. 4d. the mint would be opened to the coinage of rupees at that price; but, as a matter of fact, that has never been realised. The consequences of this step have been variously estimated by its upholders and opponents. The advantages gained by the Indian Government are obvious: the rupee has gone up in price, as was hoped, and exchange is altogether in favour of remitting home. As far as the official side of the question is concerned the position of the Government financially has improved.

But there is another side, which is of equal importance. While the Government has gained, the producer, whether native grower or European planter, finds he has to lose whenever he has to place his tea, cotton, or whatever it may be, on a market where he is paid for his goods in gold. When he has turned the gold into rupees he now has proportionately fewer for each sovereign than he had when the value of the rupee was less, and as he has to pay his labourers as many rupees as he did before the mints were closed, it follows that his own profits are smaller. In other words, while all expenses of production remain the same, he is left with fewer rupees as his own share of

his industry. The natives also lost heavily by the closing of the mints. Many of them are compelled by poverty or some other cause to turn their hoards of silver ornaments into money, and it has been estimated that not less than £60,000,000 has been lost by the poorest classes in weight and exchange from this cause alone. All these facts combined resulted in a strong feeling of discontent with the action of the Government, and commercial opinion was strongly in favour of the reopening of the mints as the only possible cure for the present state of affairs. Strong memorials representing that view were sent to the India Office from the merchants in India, London, and other centres of trade. On the other hand, a proposal was brought before Parliament in the spring of '98 to mend matters by sending out from this country a gold reserve of £20,000,000 to India; and finally a Departmental Committee to consider the whole question was appointed by Lord George Hamilton, consisting of the following members:—Sir Henry Fowler, G.C.S.I. (Chairman), Lord Balfour of Burleigh, Sir David Barbour, K.C.S.I., Sir John Muir, Bart., Sir Francis Mowatt, K.C.B., Sir Charles Crosthwaite, K.C.B., F. C. Le Marchant, Esq., Everard Hambro, Esq., W. H. Holland, Esq., Robert Campbell, Esq., Sir Alfred Dent, K.C.M.G., Robert Chalmers, Esq.

The Committee heard a large number of witnesses and experts, and in July '99 issued a report. The following is a brief summary of the recommendations of the Committee:—In view of trade and Government considerations the Committee concurred with the Government of India in their decision not to revert to a silver standard, but recommended that measures should be taken for the effective establishment of a gold standard. They declared themselves in favour of making the British sovereign legal tender and a current coin in India, and advised that at the same time the Indian mints should be thrown open to the unrestricted coinage of gold on similar conditions to those governing the three Australian branches of the Royal Mint. Furthermore, the Government of India were recommended to give gold in exchange for rupees, the rupee being fixed at rs. 4*d.*, its then market value. The Committee were of opinion that the establishment of a gold currency was of paramount necessity to the interests of India, and they did not attach much importance to the difficulty of hoarding, which some of the witnesses had referred to. This report was signed by the entire Committee, but reservations as to different paragraphs were put in by Messrs. E. A. Hambro, W. H. Holland, Robert Campbell, and Sir John Muir. See INDIA.

Indian Empire, The Most Eminent Order of. Instituted in 1878 to commemorate the proclamation of Her Majesty as Empress of India, and enlarged in '86, and in the Jubilee year, as a means of rewarding those whose services to the Indian Empire have merited the Imperial favour. This order consists of the **Sovereign**, a **Grand Master**, who is the Viceroy of India for the time being, and of three classes of members—viz., **Knights Grand Commanders** (G.C.I.E.), **Knights Commanders** (K.C.I.E.), and **Companions** (C.I.E.). Only the two first of these, being knights, are entitled to the prefix "Sir." The motto of the order is *Imperatricis Auspiciis*.

Indian Expenditure, Royal Commission on. A Royal Commission was appointed in May '95 to inquire into the administration and management of the military and civil expenditure of India, and into the apportionment of the charge between the Governments of the United Kingdom and of India. The Commission was constituted as follows:—Lord Welby (Chairman), Rt. Hon. L. Courtney, M.P., Rt. Hon. W. L. Jackson, M.P., Field-Marshal Sir Donald Stewart, Sir W. Wedderburn, M.P., Sir E. W. Hamilton, Sir James Peile, Sir Andrew Scoble, M.P., Mr. T. R. Buchanan, M.P., Mr. W. S. Caine, Mr. Dadabhai Naoroji, M.P., Sir R. Mowbray, Sir Ralph Knox, Mr. G. L. Ryder, and Mr. Colin G. Campbell (Secretary). The main problems to be solved are how far the Indian Treasury ought to be charged for a number of services for which no charge is made to other dependencies of Great Britain, and especially for military charges designed primarily in the interests of Great Britain and without reference to India. A Select Committee in '74 acknowledged the right of India to equitable treatment, but also declared her liability for the cost of improvements in the general military administration. If the principle be maintained, it is questionable whether the present capitation charge for the British troops employed in India will be materially reduced by any fresh scrutiny. If the principle be modified with a view to the financial effect of the reforms as regards the troops on Indian service, and of the unsuitability of certain of the charges to Indian military requirements, then a field for the readjustment of home charges opens up. And so as to the civil establishments in England which are charged to the Indian Exchequer. India now has to pay the total cost not only of the services which the India Office renders to her, but also of the functions it discharges as a branch of the Home or Imperial administration. The fundamental question is—How far are Parliament and the nation willing to reconsider the principle, and to readjust the financial settlement which has been gradually formed upon it? The Commission began its work at the end of Nov. '95, and a mass of material was at once placed before it by the Indian Committee in the House of Commons, consisting of those members who devote themselves specially to Indian questions. No report had been issued by Nov. '99.

Indian National Congress. Some fifteen years ago a movement took definite shape, among the educated classes of India of all races, religions, and provinces—to meet together and discuss their political wants. Hitherto the people of India had been widely separated from one another by differences of language, creed, and caste; and these differences had been intensified by distance. It was the English Government that for the first time made it possible for them to unite in a common object. The original stimulus came from the education in English, which is given in all the colleges and higher schools, and in many of the common schools; but the scheme could never have been realised if it had not been for the development of the railway system. The first Indian National Congress was held at Bombay in Dec. '85; the president was Mr. W. C. Bonnerjee, a Bengali Brahmin. Amraoti was the scene of the thirteenth Congress, Dec. 28th, '97, and Madras of the Fourteenth Congress, Dec. '98. The Fifteenth

Congress will be held at Lucknow, Dec. '99. The political meetings of the Congress being ended, a **Social Conference** for the discussion of social reforms in the Hindu community is regularly held. From one-half to two-thirds of the delegates to the Congress attend this Conference. The resolutions adopted at all the congresses have been of a similar character. Questions of social reform—such as child marriage—have been altogether avoided, as affecting only special religions and castes. Loyalty to the British Crown has been unhesitatingly avowed, both in the resolutions and in the speeches; and certain political changes in the administrative system have been as unhesitatingly demanded, special stress being laid upon the excessive growth of Indian military expenditure, the evils of the "forward" frontier policy, the want of an adequate system of education, and the urgent necessity of giving effect to the resolution of the House of Commons in favour of holding examinations to the Indian Civil Service simultaneously in India and England. The Right Hon. Sir Richard Garth, Q.C., late Chief Justice of Bengal, has described the Indian National Congress as "a large, influential and important assembly of earnest and patriotic gentlemen," and says that it "affords an open, honest and loyal means of making the views and wishes of the most intelligent section of the Indian people known to the Government." The Indian Parliamentary Committee, which consists of 120 members of the House of Commons, and acts in concert with the British Committee of the Indian National Congress, watches Indian interests in Parliament, and was chiefly instrumental in securing the appointment of the Royal Commission on Indian expenditure. The chairman of both Committees is Sir W. Wedderburn, M.P. The official report of the various sessions of the Congress may be obtained from the British Committee, 84 and 85, Palace Chambers, Westminster, S.W. A weekly journal, named *India*, "a record and review of Indian affairs," is published at the same address. It is edited by Mr. Gordon Hewart, M.A. (Oxon), who is also Secretary of the British Committee. *India* publishes a full report of all proceedings in Parliament relating to Indian affairs.

India, The Most Exalted Order of the Star of. Established by letters patent in 1861, and enlarged in '66 and '78. Its badge is a light-blue ribbon with white stripes edge-wards, and with motto, "Heaven's Light our Guide." It consists of the Sovereign, a Grand Master, who is the Viceroy of India for the time being, and three classes of members:—

G.C.S.I. . Knight Grand Commander.

K.C.S.I. . Knight Commander.

C.S.I. . Companion.

Members of the first two classes, being Knights, are entitled to the prefix "Sir." Of the first class there may by the statutes of the Order be 30, of the second class 72, and of the third (or Companions) 144; but extra and honorary members may, and have been, from time to time appointed. The Registrar of the Order is Sir Albert W. Woods; and the Secretary is the Foreign Secretary to the Government of India.

Indo-China is the name given to the French possessions in the Annamese peninsula. They include Cochin China, Annam, Cambodia, and Tonquin, of which separate accounts will be found under their respective headings. A convention with China (signed June 25th, '95),

completed the delimitation of the boundaries between French Indo-China and Chinese territory, and settled all commercial arrangements in connection therewith. Among these one of the most important points was the right given to France to extend the Annamite railway into Chinese territory. This convention made French and Chinese territory contiguous from the Mekong to Laokai, on the Tonquin-China frontier. French access to China through Tonquin and Yunnan was thus definitely assured; but British rights seemed to be infringed, for Great Britain had definite rights over the Shan States of Kiang-Hung and Kiang-Kheng, to which France laid claim under the convention. However, by an agreement made in '96 between England and France the matter was settled. The Kiang-Kheng territory was handed over to France by Great Britain, the Mekong river being made the dividing line between the possessions of the two nations from the north of Siam to the boundaries of China. The boundary between the French and Siamese possessions was made the river Mekong southwards to the rapids just below Stung-Treng, from which point the frontier diverged in a south-westerly direction to the coast. See CHINA (map) as to French railway projects. M. Doumer is the Governor-General of Indo-China, and the seat of government is at Hanoi. There is a Superior Council which controls the financial affairs of Cochin-China, and advises Annam, Cambodia, and Tonquin on financial matters.—**History**, '99. A Bill, drafted in co-operation with the Governor-General, and providing for a loan of 200,000,000 fr., for railway development in the colony, was introduced in the French Chamber (Nov. 25th, '98). The Bill authorised the immediate construction of lines from Haifong to Ha Noi and Lao-kai, from Ha Noi to Nam Dinh and Vinh, from Sourane to Hué and Kwang Tri, from Saigon to Khanh-hoa and Lang Bian, and from Mytho to Cantho. The Colonial Committee of the Chamber refused, by 17 votes to 7, to sanction the guarantee of the loan by France (Dec. 7th, '98), but the Chamber reversed the vote (15th), and agreed to guarantee the 70,000,000 fr. required for the line between Tonquin and Yunnan. M. de Lanessan, Ex-Governor of Tonquin, specially advocated this line, which he said would be 300 miles long, and would be of great political and economic value. It would enable French influence to be extended over Yunnan, and give Frenchmen an opportunity to work the coal, copper, and tin mines there.

Inebriates Act, '98, The (which came into operation Jan. 1st, '99), provides as follows:—Where a person is convicted on indictment of an offence punishable with imprisonment or penal servitude, if the court is satisfied from the evidence that the offence was committed under the influence of drink or that drunkenness was a contributing cause of the offence, and the offender admits that he is or is found by the jury to be a habitual drunkard, the court may, in addition to or in substitution for any other sentence, order that he be detained for a term not exceeding three years in any State inebriate reformatory or in any certified inebriate reformatory the managers of which are willing to receive him. Any person who commits any of certain offences specified in the Act, and who within the twelve months preceding the date of the commission of the offence

has been convicted summarily at least three times of any offences so mentioned, and who is a habitual drunkard, shall be liable upon conviction on indictment, or if he consents to be dealt with summarily on summary conviction, to be detained for a term not exceeding three years in any certified inebriate reformatory the managers of which are willing to receive him. The offences in question include being found drunk in a highway or other public place, whether a building or not, or on licensed premises; being drunk while in charge, in any public place, of any carriage, horse, cattle, or steam engine; being drunk while in possession of any loaded firearms; refusing or failing when drunk to quit licensed premises when requested, etc., etc. The Secretary of State may establish State inebriate reformatories, and may make regulations for their rule and management, and, subject to any adaptations, alterations, and exceptions made by such regulations, the Prison Acts (including the penal provisions thereof) are to apply to every such reformatory; but no regulation shall authorise the infliction of corporal punishment in any such State establishment. The Secretary of State, on the application of the council of any county or borough or of any persons desirous of establishing an inebriate reformatory, may, if satisfied as to the fitness of the reformatory and of the persons proposing to maintain it, certify it as an inebriate reformatory; he may make regulations as to the establishment, management, maintenance, and inspection of such institutions, the classification, treatment, etc., of the inmates, and the application of their earnings, and the transfer of inmates from one reformatory, State or otherwise, to another. A county or borough council may contribute such sums as they may think fit towards or may themselves undertake the establishment of a reformatory certified or intended to be certified under the Act. Officers of these establishments are to have all the powers, protection, and privileges of a constable; and persons escaping from the reformatories may be arrested without warrant and brought back. Power is given to recover expenses against an inebriate's estate if he has property more than sufficient to maintain his family, if any. Licensing powers under the Inebriates Acts, as amended by this Act, are transferred to the borough council in boroughs, and elsewhere to the county council; and any such council may contribute towards the establishment or maintenance of a retreat under these Acts. In sect. 10 of the Habitual Drunkards Act, '79, a term not exceeding two years is substituted for a term not exceeding twelve months, and one justice shall be substituted for two justices as the attesting authority to the signature of an applicant; and a person who is or has at any time been detained in a retreat may have his term of detention extended, or be readmitted. Regulations made under the Act are not to come into effect until they have lain before each House of Parliament. The Act is adapted to Scotland and Ireland. Complaints were made during '99 that the Act was practically a dead letter; but see *Inebriate Act*, '99, in *SESSION*, sect. 62.

Infectious Disease (Notification) Extension Act, '99. See *SESSION*, sect. 63.

Institut de France. See *ACADEMY*, THE *FRENCH*.

Institute of Bankers. See *BANKING*.

Institute of Chartered Accountants in England and Wales. Incorporated by royal charter May 11th, 1880. **Objects.** The elevation of the profession of public accountants as a whole, and the promotion of their efficiency and usefulness, by compelling the observance of strict rules of conduct as a condition of membership, and by setting up a high standard of professional and general education and knowledge, and otherwise. **Conditions of Membership.** Except in the case of persons who have been for not less than ten years in practice as public accountants, or who were in service as public accountants' clerks before March 21st, '82, the date of the first bye-laws, persons desiring to become members of the Institute must pass the preliminary examination, unless they have previously passed some equivalent examination; they must then be articulated for five years, and pass an intermediate examination after the expiration of half the term of service, and a final examination on the end of their service. In the case of graduates of a university, the term of service under articles is three years. **Officers:** **President**, Ernest Cooper (Cooper, Brothers & Co.), 14, George Street, Mansion House, E.C.; **Secretary**, Hon. George Colville; **Librarian**, Edward Taylor; **Solicitors**, Messrs. Markby, Stewart & Co., 57, Coleman Street, E.C. **Hall and Offices**, Moorgate Place, London, E.C.

Institute of Journalists. See *JOURNALISTS*, *INSTITUTE OF*.

Institute of Secretaries, founded 1891. Has enrolled over 1500 members, and aims at the general advancement of the status of secretaries, and the promotion of personal and friendly intercourse. One of its objects is to ascertain the law and practice, and form a strong body of expert opinion, with the view of codifying and amending the Acts relating to Companies, and to watch legislation affecting the same. Secretaries of public companies, societies, institutions, etc., are eligible as fellows, and assistant secretaries, registrars, or clerks as associates. Examinations for membership as associate are held in June and December; no date has yet been fixed for examinations for membership as fellow. A Library and Reading-room has been opened, and an Employment Register is kept. **Organ**, *The Secretary's Journal*, monthly. **President**, Mr. Alexander Dickson; **Vice-Presidents**, Mr. Arthur H. Cane, and Mr. J. Stephen Jeans; **Secretary**, Mr. Russell Day, B.A., L.L.M. **Offices**, 19, Birchin Lane, Cornhill, E.C.

Institution of Civil Engineers, *The*. Founded Jan. 2nd, 1818, incorporated by royal charter June 3rd, '28, and received supplemental charters, with extended powers, Aug. 3rd, '37, and March 20th, '96. The object of the Institution is to further the advancement of mechanical science, and more particularly to promote the acquisition of that species of knowledge which is essential in the profession of a civil engineer. According to its constitution, it consists of members, corporate associates (called associate members), and honorary members. There are also attached to it non-corporate associates and students. It has recently adopted a scheme by which candidates for associate membership and studentships will in future be subject to examination, the subjects being general education and scientific knowledge befitting the profession of a civil engineer. These examinations will

be open to non-members. The numbers of the several classes are: members 1985, associate members 3969, honorary members 19, associates 323, and students 864; total 7160. The session extends from the first Tuesday in November to the last Tuesday in April, the ordinary meetings being held on the Tuesday in each week. The record of the papers read and the discussions thereon at these meetings is embodied in the *Minutes of Proceedings*, which likewise contain other original communications presented to the Institution, as well as abstracts of papers in scientific Transactions and periodicals. Besides the ordinary meetings there are every fortnight during the session special supplemental meetings for students only. The gross receipts were £25,033 5s. 6d., including strict income £22,258 4s. 2d., capital £2213 8s., and trust funds £561 13s. 4d. The funded property of the Institution amounts to £53,600, besides which it has under its charge trust funds of the nominal value of £17,144 os. 9d. It has a library of upwards of 50,000 volumes, including 750 of rare tracts, the number of which cannot be much less than 10,500. Secretary, Dr. J. H. T. Tudsbery. Offices, Great George Street, Westminster, S.W.

Institution of Mining Engineers, The. This Institution was founded July 1st, 1889, for the advancement of the sciences of geology, mining, and metallurgy, by the interchange of opinions, by the reading of communications from members and others, and by discussions; to supply information to the Government upon the practical requirements of legislation affecting mining and metallurgical industries, and more especially to promote a more general recognition of the status of mining and metallurgical engineering as scientific professions. The Institution now comprises six affiliated societies: viz., Chesterfield and Midland Counties Institution of Engineers, Midland Institute of Mining, Civil and Mechanical Engineers, Mining Institute of Scotland, North of England Institute of Mining and Mechanical Engineers, North Staffordshire Institute of Mining and Mechanical Engineers, South Staffordshire and East Worcestershire Institute of Mining Engineers. The numbers of members are: Honorary members, 37; members, 1901; associate members, 172; associates, 204; students, 147; subscribers, 48; total, 2509. Two general meetings are held during the year, one in London and the other in one of the mining districts. The papers and discussions are printed in the *Transactions*, which also contain notes of papers on the working of mines, metallurgy, etc., from the *Transactions* of colonial and foreign societies and colonial and foreign publications. President, Mr. H. C. Peake; Secretary, Mr. M. Walton Brown; Offices, Neville Hall, Newcastle-upon-Tyne.

- V. MINOR BRANCHES, AND EXTRAORDINARY FORMS OF INSURANCE.

I. FIRE.

Although, up to the time of our going to press, we have to record no conflagration of a very extensive character, fires since October '98

have been extremely numerous, and many of them have caused serious loss; and, taking fire insurance business as a whole, we do not expect that when returns are made up it will prove to have been better than in the corresponding period of the previous year. Owing, probably, to the long dry season, farm fires have very frequently occurred. Many of these have been caused by sparks emitted from railway locomotives; and it is becoming a serious question amongst farmers and other owners of property close to lines of railway, whether a combined effort should not be made to secure such legislation as will enable them to recover losses so caused from the railway companies, who, in view of recent decisions in the Law Courts, at present repudiate liability, and neglect to adopt reasonable precautions against the risk. In this connection, it may be mentioned that one company has in the West of England, where some of their bridges are of timber construction, adopted in a modified form the extended smoke box with which American locomotive engines are mostly built, and which has been found very effective to prevent farm fires from engine sparks. Printers' risks, especially in London, show a very heavy return of losses from fire. There have been several large fires in engineering works in different parts of the country. Fires in shipbuilding yards have also been frequent, but not many of them have been serious. In the Bermondsey tannery district fire has wrought a further clearance of old timber buildings. Since Oct. '98 outbreaks of a more or less serious character have occurred at the London, Millwall, and Victoria Docks; and we understand that a deputation from the Associated Fire Insurance Offices has waited on the dock authorities with the object of inducing them to investigate the cause of these frequent fires, and concert measures if possible to prevent them in future. Cotton and woollen mill fires have not been very numerous, but of those which have happened some have involved the fire offices in heavy loss. Liverpool cotton fires also show a falling off in number, and the list of theatre fires is also a short one. A few large mansions have been destroyed by fire, including Williams-sraig, near Linnithgow; Moyne House, Durrrow; and The Grange, Totteridge; the last named being historically interesting, as at one time it was the residence of Bulwer Lytton. Other fires worthy of mention occurred at High Wycombe, by which a number of buildings were consumed and others damaged, and at Amesbury, Wiltshire, resulting in the destruction of a considerable part of the village. Fires also occurred in electric cable works at Woolwich and New Charlton, in Thorn & Co.'s jute warehouses in Dundee, Armstrong & Co.'s ordnance works at Elswick, Swansea Market, Strood Oil Mills near Rochester, Keiller & Co.'s factory at Silvertown, paper mills at Oughton Bridge near Sheffield, Boyd & Co.'s warehouses at Manchester, Inverness Public Hall, at perambulator works at Leeds, at Messrs. Hughes' drapery establishment, Birmingham, the Theatre Royal, St. Heliers, Jersey, and at the Empress Theatre, Cardiff. Owing to the fact that for the last two years fire insurance business has not been productive of large dividends, no new fire company of any importance has been established during '99.

The aggregate premium income of fire offices amounts to about £19,000,000, and the losses

to about £11,000,000. The number of companies in the United Kingdom whose business is entirely or mainly that of fire insurance is 52; 36 compose the London Salvage Corps; and 67 companies contribute towards the expenses of the Metropolitan Fire Brigade at the rate of £35 per million on the amount of property insured. The premiums and losses of the leading British fire insurance companies as given below are mentioned in the *Annual Insurance Digest*, '99, published at the *Post Magazine* Office in November.

II. LIFE.

As the financial year with the great majority of life offices closes at the end of December, published reports of their position do not appear for some months subsequently. According to the returns relating to life assurance companies in '98 to the Board of Trade, and published in '99, the important particulars in the table opposite are notified.

Of the British and Colonial companies transacting ordinary life assurance in the United Kingdom, the following, arranged alphabetically, receive an annual premium income of £100,000 and upwards—viz., Alliance; Atlas; British Empire; British Equitable; Caledonian; City of Glasgow; Clergy Mutual; Clerical, Medical and General; Colonial Mutual; Commercial Union; Eagle; Economic; Edinburgh; English and Scottish Law; Equitable; Equity and Law; Friends' Provident; General;

Gresham; Guardian; Hand-in-Hand; Imperial; Law Life; Law Union and Crown; Legal and General; Life Association of Scotland; Liverpool and London and Globe; London and Lancashire; London Assurance; London Life; Metropolitan; National Mutual; National Provident; North British and Mercantile; Northern; Norwich Union; Pelican; Provident Clerks; Provident Life; Prudential (Ordinary); Refuge (Ordinary); Rock; Royal; Royal Exchange; Scottish Amicable; Scottish Equitable; Scottish Provident; Scottish Union and National; Scottish Widows' Fund; Standard; Star; Sun; Sun Life of Canada; Union; and United Kingdom Temperance. The yearly premium incomes of three of the United States of America companies are very much in excess of those of British life assurance companies. These American companies are the Equitable of the United States, the New York, and the Mutual Life of New York. The premiums of British and American companies, while they indicate the magnitude of the business done by them, are not always an approximate evidence of their merits.

Life assurance as transacted at the *Post Office* is not suited to the habits of the working classes, and the number of policies issued by it is therefore very small. According to the last annual report of the Postmaster-General for March 1st, '99, the number of Post Office assurances for '98 was 731 for £42,554, as compared with 849 for £48,017 in '97. The number of immediate annuities granted in '98 was 2065 for £55,753, as compared with 2051 for £56,237 in '97. The number of deferred annuities in '98 was 164 for £3626, as against 207 for £4009 in '97.

On the other hand, an enormous number of life policies are granted to the masses by industrial life assurance companies and collecting friendly societies; and this kind of insurance has prodigiously increased during the last twelve years—so much so that about half the population of this country is insured in them. The following figures, according to the latest returns, show receipts of over £100,000 premium incomes of industrial companies and collecting friendly societies: viz., British Workman's and General, £606,344 (including ordinary); Liverpool Victoria Legal, £595,034; London, Edinburgh and Glasgow, £283,951; Pearl, £622,783 (including ordinary); Prudential, £4,960,756; Refuge, £930,999; Royal Liver, £487,543; Royal London, £409,991; Scottish Legal, £—; Wesleyan and General, £376,424 (including ordinary). About half the number of British life offices grant immediate annuities; and lend on personal security with life assurance; and about 27 transact fire insurance. The Caledonian Insurance Company have introduced a new form of assurance, whereby in approved cases it will grant immediate life assurance without medical examination. The directors require the applicant under this method to lodge a proposal containing the usual information respecting his own health, history, and the causes of the death of his relatives; and although the directors reserve their right to communicate with the ordinary medical attendant of the proposer, they do not contemplate exercising this power in ordinary cases. The main safeguard on which the Company rely is the requirement that the transaction shall take the form of an endowment assurance—that is, an assurance payable on the attainment of a

selected age, or at death if this should occur previously; but with this variation from the ordinary endowment assurance—viz., that the amount payable on survival shall be double the amount payable at death. To meet the case of those who do not desire a cash benefit on reaching the selected age, there is provided instead of the endowment the option of a large paid-up policy or the exchange of an annuity for the endowment. Liberal cash values will be allowed for the surrender of these assurances at any time after payment of two years' premiums. The Company have reduced the

whole of life Tables without profits. One or two other companies also assure without medical examination. Under the name of **Indemnity Assurance**, some life offices grant policies at extraordinarily low premiums for sums payable at death if this event occur before the attainment of ages 45, 50, 55, or 60. These are practically temporary assurances of very long duration. Nothing will be paid under them if policy-holders die after the expiration of the term for which they are granted.

Endowment Policies payable at a given age

	Ordinary Companies.	Industrial Companies.

or earlier in the event of death, answer a very important public requirement, and are granted by most of the life offices. They have greatly increased during the last twelve years. Better arrangements have been recently made for paying surrender values and reviving lapsed policies. Several important restrictions have also been removed in favour of policy-holders as regards travelling and residing abroad. Invalids can also have their lives insured on favourable terms.—**The Equitable Life Assurance Society**, or the Old Equitable, as it is generally called, started upon a new career on June 16th, '93, when a memorandum and articles of association were substituted for the deed of settlement, which had done good service for 130 years, but which had become antiquated and almost unworkable. The direc-

tors availed themselves of the new powers by issuing an Endowment Assurance prospectus containing the rates of premium on which they were prepared to issue this class of policy with full participation in the exceptionally large profits. Hitherto they had not been able to grant such policies. The plan has been still further extended by a scheme for guaranteeing interest at the rate of 5 per cent. on the sum assured, and bonuses from the date of maturity until death. This has been followed by an attractive prospectus containing a somewhat novel feature—namely, deferred assurance for children without medical examination. The assurance under this scheme does not come into force or enter for profits until the child attains twenty-one. Ten pounds a year paid in respect of a child less than twelve months old will

secure for the child at the age of twenty-one a with-profit policy for £1000 payable at death, free from all restrictions as to residence or occupation, and for which he will only have to pay £10 a year. In the event of the child dying before twenty-one all the premiums paid will be returned without interest. In consequence of many adverse criticisms having been made on the use of the Northampton Table by the Old Equitable in its latest investigation, the directors have published a valuation by the Institute of Actuaries, H^m and H^m (5) Tables and 3 per cent. interest, which is considered the highest standard for a company to adopt, and the result shows that the surplus was £1,782,497, being £584,727 more than the amount divided as profit. This Society offers, as it has ever done, the most ample security for the discharge of its liabilities, and a substantial guarantee for future profits. The new prospectus is a comprehensive guide, and should be studied by all who are thinking of assuring their lives. The Society now grants immediate annuities. It previously only granted deferred annuities. The Royal Exchange Assurance, under the heading of **Settlement Endowment Policies**, has recently introduced a new scheme, which consists of an assurance upon the life of the survivor of husband and wife, combined with a deferred annuity payable to the husband on his attaining an agreed age, and to the wife on her husband's death. The policy may be either a whole-term or an endowment assurance, and, if required, may share in profits. In the case of a whole-life policy the deferred annuity is payable to the wife only after the death of the husband. The amount of the annuity is fixed when the policy is granted, and may range from $\frac{3}{4}$ to 5 per cent. on the sum assured, according to the wishes of the proposer. The premiums payable are regulated according to the percentage agreed upon. On the failure of both lives, the sum assured is paid to the husband's representatives to be distributed among the children or other beneficiaries as appointed by him, or, if no such appointment is made, "as provided in the policy itself." This scheme is adapted to, and obviates the necessity of, the ordinary form of settlement that secures a life interest to the wife, with remainder to the children, as appointed by the settler. It may also be stated that, contrary to the practice on the grant of an ordinary last-survivor policy, no evidence of the wife's health is necessary.

The Sun Life Office has introduced **Improved Tables of Endowment Assurance**. Under one table the assurance matures in the fifty-fifth, and in the other in the sixtieth year of age. The assurance money is also payable at death if this occurs before the maturing period. It has also introduced what it terms **The Perfect Protection Policy**, which means (a) that the policy cannot lapse as long as it has any surrender value; (b) if the assured has a breakdown in health he has no premiums to pay during the period of his incapacity; (c) if he becomes totally incapacitated the Society will not trouble him for any more premiums; (d) if he meets with a very serious accident the Society will pay him half the sum assured, keep the policy in force free of cost, and pay the balance of the policy at his death; (e) he can travel anywhere without paying an extra premium; (f) he

can surrender his policy, and either receive a paid-up policy or withdraw its value in cash; (g) he can borrow money on his policy. It is stated that no other assurance office issues this policy. **The Immediate Bonus Plan** has been introduced by the Scottish Equitable Life Assurance Society. Under this scheme a table has been prepared under which members may pay very low premiums, while retaining the right to share in the profits. The payments for those using the table have been fairly adjusted, so as to put them on a footing of equality with members paying the higher ordinary premiums. The system of assurance called **Guaranteed Tontine Endowment** has been introduced, whereby double the amount assured is paid if the policy-holder survive the stipulated time for which his policy is granted. Other systems of Tontine Endowment also prevail.—**Pensions** are also granted by several life offices to secure an annual income payable during the later years of life. If the assured should die before that date the whole of his premiums and interest will be returned to his representatives.

Half Premiums on Credit System.—To meet the case of those who require their assurance payments to be kept as low as possible from the outset, one-half of the premiums payable during the first five years may be left on credit at 4 per cent. interest by policy holders in the London Life Association.

The National Mutual Life Assurance Society has introduced a scheme of **Guaranteed 5 per cent. investment policies**, that provide for the sum assured becoming payable at the end of ten or twenty years after death, during which time a terminable annuity equal to 5 per cent. of the sum assured is payable to the legal representatives of the deceased, and who can surrender both the sum assured and the annuity either on the failure of the life assured, or at any time within the specified period after such failure, the surrender value being greater than the sum assured. The benefits of the scheme can also be extended to endowment assurances on payment of a slightly increased premium. The British Empire Mutual Life Assurance Company have also introduced a new feature, under the title of **Children's Assurances**. In this method there are two scales of premiums. In one all that are paid are returnable if a child dies before twenty-one. In the other scale, which is lower in the amount of premiums payable, these are non-returnable. On the child attaining twenty-one the policy comes into full force as a policy of insurance. The Norwich Union Life Assurance Society also transact this business as regards adults as well as children. The British Empire Mutual likewise issue **Six-per-Cent. Investment Policies**, whereby an assured income is secured without fluctuation or loss of capital value. This scheme is specially suited for marriage and family settlements. Under the **Reversible Premium Plan**, which is a new one introduced by the Colonial Mutual Life Assurance Society in connection with old age pensions, the sum assured becomes payable at death, and the premiums cease at the age of sixty or sixty-five, as selected at the outset, and afterwards the society will return one premium each year as long as the policy-holder lives. For providing a fund for payment of **Death Duties** under the Finance Act of '94 several life offices insert a clause in their policies that if

requested by the legal personal representatives of the assured, entitled to receive the policy moneys on grant of probate or letters of administration, they will either pay so much of the sum assured as will be enough to satisfy these duties to such representatives, or at their option pay the whole or so much of the policy moneys as shall be required for these duties to the Inland Revenue Commissioners or any other persons lawfully entitled to receive the same under the before-mentioned or any other statute. In consequence of these arrangements, executors and administrators are relieved from the necessity of realising the estate to provide the money for the payment of these heavy duties. An important and distinctive feature of the **Scottish Provident Institution** is what may be called the **Low Premium and Deferred Bonus** system. The premiums for policies granted by this society are considerably lower than the average rates of other offices, and thus a much larger sum can be assured than can be assured by the same premium in other offices. The particular feature of the scheme is that bonuses are reserved for division exclusively among those (more than half of the whole number) who survive the period at which their premiums with compound interest at 4 per cent. amount to the sum assured.

As there appears to be a demand for an assurance policy at a low rate of premium under which the holder shall not be excluded from bonus additions, the **Pelican Life Office** has made an arrangement which is described as **Bonus Policies at Minimum Premiums**. The rates are very little in excess of those for without-profit policies. The reversionary bonus to be allotted to the policies is always to be 1 per cent. per annum less than that allotted to the ordinary full-premium policies. If the bonus should fall below 1 per cent. these policies will get nothing, but will rank for their share beyond that proportion when the distribution is more than that rate. The great advantage of this arrangement is that it involves no liability on the policy-holder. He is assured for a definite fixed sum, which cannot be reduced even if there is no bonus; nor can the premium be increased.

The **3-per-cent. Consols with Bonuses** of the **Norwich Union Life Insurance Society** appears to offer an eligible and safe investment. The **4-per-cent. Guaranteed Increasing Policy**, recently introduced by this Company, appears to be much appreciated. Under this scheme the assured or his legal representative is entitled to a bonus of 4 per cent. annually during the continuance of the policy up to 25 years. If he should survive this period he will then be entitled to the following options if he insures for £1000: viz., (a) A cash payment of £1000, and a paid-up policy for the same amount; (b) A cash payment of £1500; (c) A paid-up policy for £2902, subject to health; (d) On a continuation of the premiums a policy for £4150, subject to health; (e) An annuity of £108 11s. 3d., payable half-yearly; (f) A paid-up policy for £1000, and an annuity for life of £72 7s. 6d.; (g) A cash loan value at the end of 5 years of £94, at the end of 10 years £220, at the end of 15 years £540, and at the end of 20 years £950. This example applies to a policy taken out by the assured at 25 years of age, the annual premium for which is £49, but premiums and options of the like kind as far as

is practically and equitably applicable will be quoted on application to the Society.

Very liberal **Immediate Annuities** are granted by many life offices, but in consequence of the small rate of interest paid for first-class investments the consideration money or rates paid for these annuities has increased very considerably, and is likely to further increase in the near future.

In order to meet the difficulty which trustees have now in finding safe investments yielding a fair rate of interest, the **Rock Life Assurance Company** and the **Westminster and General Life Assurance Association** have adopted **Assurances to Secure an Income for Widows and Children** at low premiums.

The system of profit peculiar to the **Rock Life** is that larger bonuses are reserved for those policy-holders who survive and cause a profit, a smaller share being reserved to those by whose earlier death there is a loss to the common fund.

The **Family Settlement Policies** of the **North British and Mercantile Insurance Co.**, which come under this class of assurance, also answer a growing requirement. They avoid the necessity of appointing trustees for the widow, and secure to her during her life a fixed safe and remunerative investment of the funds provided by the assurance on the life of her husband. It is stipulated in the policy that on the death of the husband, the wife surviving, the Company will pay to her during her life interest on the sum assured at the rate of 5 per cent. per annum. On the death of the survivor of husband and wife, the sum assured will be at once paid over to the executors of the husband. If the husband and wife both die, leaving a child or children, and while any child is under age, the fund may, on the death of the survivor of the parents, either be at once paid over to the husband's executors, and the matter closed—or it may, if the husband have so directed at the outset, be left in the hands of the Company, until the youngest child attains twenty-one, the Company allowing interest at $3\frac{1}{2}$ per cent. Power is reserved to the husband to revoke the foregoing provisions—in which case the sum insured would at his death be at once paid to his representatives or assigns. If it should be desired while husband and wife are both living to discontinue payment of premium, the Company will give to him either a cash surrender value, or a fully paid-up policy, securing a reduced amount of assurance and annuity. The husband alone is medically examined. The same Company also issues **Threefold Option Policies**. By this scheme the policy secures a capital sum payable at death or on the attainment of an age (say 55, 60, or 65) specified at the time the policy is effected; but the assured may, on attaining that age, choose to receive either—(1) Immediate payment of the capital sum; or (2) An annuity (equal in amount to interest on the capital sum at the rate of 4 per cent) payable during the remainder of his life—payment of the capital sum being deferred until his death; or (3) An annuity of larger amount (in lieu of capital and interest) payable during the remainder of his life. The **Investment Policies** granted by the **Rock Life Assurance Company** are likely to be much appreciated. By these policies small or large sums may be accumulated without any risk of losing the money, and the certainty of receiving back a sure and profitable return as regards sums

down, annuities, marriage settlements, family endowments, educational annuities, and leasehold redemption funds; and the whole with or without life assurance. By taking out a policy at any age up to 30, and having an average life, the profits will be very large. The Yorkshire Fire and Life Insurance Company have brought out a new table, giving **Endowment Insurance at Minimum Cost**, but with profits deferred until the attainment of the endowment age. The liberal options which are obtainable on the attainment of the endowment age are: 1. Payment of the full sum assured in cash, with bonuses. 2. The assurance to be continued for the original amount of the policy payable at death, the bonuses and the balance of the sums assured to be paid in cash. 3. A paid-up policy for an increased amount payable at death. 4. A paid-up policy, payable at death, for the original sum assured, and in addition a pension to be drawn for the remainder of life. 5. A pension for the remainder of life. 6. A pension to wife or child. 7. A deferred pension to commence at the death of the life assured, and be payable during the life of the widow or of a child. In addition to this table the Company have also brought out a new scheme of **Discounted Bonus**. This consists of the adoption of a new table of reduced premiums obtained by discounting bonus at the rate of £1 per cent. per annum (compound), whereby the actual premiums are reduced to a minimum almost equivalent to non-profit rates, but with the special advantage that should the assured attain a specified fixed age—say 30 years after the date of the policy—it will then participate in the profits for the whole period at the rate of the bonus declared over the £1 per cent. assumed; or, in other words, the difference between £1 per cent. and, say, 30s. per cent. (which is below the average rate hitherto declared by the Yorkshire) would be credited in a lump sum to the policy. Assurances on **Invalid Lives**, called "Invalid Assurances," are effected by the Clerical, Medical and General Life Assurance Society. For conducting this class of business with fairness to the public, the regulations of the Society provide that of the seventeen directors eight at least are to be members of the medical profession. The system adopted for assuring invalid lives, while safe to the Society, is as favourable to the assured as the various risks will permit. Other companies also take these and other under-average life risks. **Non-forfeitable Endowment Assurances with Guaranteed Bonuses** are granted by the London, Edinburgh and Glasgow Assurance Company. The Sun Life Assurance Company of Canada issue among other policies **Coupon Bonds** which are very attractive. The rates for these are so low that a person can, it is stated, carry 40 per cent. more assurance than in the ordinary plans for the same money. The coupon bonds differ from other systems of assurance, because the amount assured, instead of being paid in one sum at the death of the assured, or at the maturity of the policy, is payable by the company in twenty equal annual instalments. A coupon to represent each of these is attached to the bond. The first coupon becomes due immediately at death, or at the end of the endowment term, and the other coupons are payable one each year thereafter to the assured, or if dead, to the beneficiaries named by him, until the whole twenty have been redeemed. One great advantage

of this form of policy is that it avoids the trouble and risk of finding suitable investments for the assurance money which a wife may receive at the death of her husband. The bonds participate in the profits, and if money is urgently required during the twenty years, the coupons not then due will at any time be discounted by the Company. **Semi-Endowment Policies** are also granted by this Company. They differ from the ordinary endowment ones in the following manner. While an ordinary endowment contract provides for the payment of a fixed sum at the end of the term specified, or in the event of previous death, a semi-endowment policy provides for the payment of double the amount on the death of the assured before the expiration of the endowment period. One of such policies taken out by a person aged 30 next birthday for £1000, payable at the end of 20 years, would cost under the with-profit plan £33 9s. The amount payable on death during this interval would be £1000, but if the assured survived the endowment term the amount payable to him would be £500, exclusive of bonuses; which, if allowed to accumulate on the Reserve Dividend plan, would probably amount to £536. So that at the end of the term he would receive altogether about £1036, after paying to the Company £669.

Assurances with Exemption from Payment of Premiums under circumstances involving temporary or permanent Incapacity. There are many professional men, and others, whose incomes solely depend upon their ability to follow their occupations, to whom it would be a great advantage to effect assurances under conditions that should provide for the discontinuance of the premiums under their policies, in the event of their becoming incapacitated, either by accident, or bodily or mental disorder, from continuing to earn their own livelihood. With the view to secure this advantage to the assured a German life office, many years ago, issued policies for this purpose, and so much was their scheme appreciated that the Law Life Assurance Society introduced it into the United Kingdom shortly afterwards. It now issues policies of this kind upon the lives of males above the age of 24, whose occupations do not involve undue exposure to risk, and who are found to be assurable at ordinary rates. These special benefits cease at age 65. Under this scheme female lives are not accepted. This description of assurance is also transacted by the Scottish Accident Life and Fidelity Insurance Company, for the **Exemption from Payment of Premiums** on the life assured attaining the age of seventy, or whilst the assured may be temporarily or permanently incapable by accidental bodily injury or illness, or by mental disorder, from attending to his usual profession, business, or occupation.

The Edinburgh Life Assurance Company have brought forward a scheme—the **New "Edinburgh" Policy with Guaranteed Options**. This is stated to be an extension of the principle of endowment assurance. The annual contributions at most ages between 20 and 40 is £40 per £1000, if payable for 25 years, and £50 per £1000 if payable for 20 years. An intending policy-holder is offered three options. The first, if selected, must be declared at the outset, but a choice between the second and the third may remain open until the end of the selected term. Option 1 includes £1000 at

death if within the selected term, £45 annually for life after the selected term, and £1000 when that yearly payment ceases, whether by death or surrender, it being the option of the policyholder to drop the same at any time after the end of the selected term and take the £1000 in cash. Option 2 comprises the £1000 at death if within the selected term, £1000 in cash at the end of such, and accumulated profits to those who survive the term. Under Option 3 £1000 is payable at death if within the selected term, £1500 to £2200 fully-paid-up assurance at the end of the term according to the age then attained, and accumulated profits to those who survive the term. The profits may either be taken in cash or applied to secure additional paid-up assurance. The same company has introduced an **Early Provident Scheme**, whereby parents who wish to secure to their children a future provision may effect policies under this arrangement at about half the usual rates. These assurances may be of the ordinary kind, with premiums payable for the whole life or ending at a fixed age; or they may be endowment assurances payable at a given age or at death if that sooner occurs. The assurance commences after 15 years, but if death happens in the meantime the premiums are returned. When the age is attained at which the assurance is to begin; the policy takes rank for bonuses at the same rates as those declared on policies effected at that age. A surrender value is guaranteed after the first three years, or a paid-up policy may be had instead. This Company and the London and Lancashire Life Assurance Co. have introduced new schemes for the assurance under more favourable terms of **Naval and Military Officers**. The Law Union and Crown Insurance Company have recently issued a new **Secured Option Policy**. The following example will show the working of such scheme. A person aged 20 may, by paying £31 10s. per annum until he is 60, or until his death if earlier, secure £1000. If he should previously die, 5 per cent. per annum on £1000 would be paid to his representatives for 20 years, and the full sum of £1000 at such time as he would have attained 60. If he should survive this period he is entitled to receive in cash a **tontine bonus** representing his share of profits of the entire class, which are divided among survivors. Respecting the £1000 assured, he may either receive it immediately on reaching 60, take 5 per cent. per annum on it for the remainder of his life and leave it to his representatives, or accept in lieu of it an annuity of £100 for life. Again, instead of an immediate annuity, he may have one not commencing until he is 65 of £165 for the remainder of his life. Moreover, he may on satisfactory medical examination exchange the £1000 immediately payable for a fully paid policy of £1670 payable at death; or for one of £1250 payable at the end of five years or at death if earlier. The policy carries the further advantage, beyond those mentioned, that in the event of the assured being incapacitated for business by bodily or mental disorder for any continuous period exceeding six months while premiums are payable, a remission of premium is made for a period corresponding to the duration of the incapacity. For example, if an assured were disabled for a consecutive period of nine months previous to a year's premium falling due, only a quarter of such year's premium would be charged.

The Star Life Assurance Society have an improved system of endowment for twenty years, early assurances for children, 6-per-cent. debenture policies, 5-per-cent. policies, and reversionary annuities for widows. The Mutual Life Association of Australia have introduced a noteworthy scheme of **deferred bonuses**, under which members who decide to defer their bonuses will, nevertheless, receive bonus certificates at each quinquennial declaration of surplus, and will therefore be able to see exactly how their assurances progress in value. The Society claim that their whole life assurance rates are below the average of other British and Colonial offices; while for endowment for twenty and twenty-five years, with full participation in profits, the rates are particularly small. Until recently life offices were not favourably disposed to assure women, and would only grant them policies at premiums very much in excess of those charged to males. The New York Life Insurance Company, which transacts much assurance business in the United Kingdom, concedes the same benefits in respect of non-forfeiture, freedom from restrictions, etc., in female policies at the same premium rates as are charged to males. This is a very important experiment, which, as is alleged, is justified by the rapidly changing conditions of the female sex as regards their increasing professional and business occupations and other causes. Assurance companies are paying more attention to the rating of female lives, and are canvassing for policies by women. A large number of this sex in the United States is specially employed to solicit life assurance among female workers, and secure large numbers of them as policy-holders. In Great Britain it appears that the number of lady agents engaged to canvass women to assure their lives is on the increase, and it is stated that a great development in this pursuit may certainly be looked for in the near future. It appears from a recent article in the *Bankers' Magazine*, by Mr. A. G. Mackenzie, F.I.A., that the invested assets of Life Offices have now reached the enormous sum of £234,000,000 sterling, having doubled in the last 26 years. At this rate of progress they will amount to £500,000,000 by 1921, and in another quarter of a century to a thousand millions, and the rate of interest, which is declining, to £3 9s. per cent. by 1921. He adds that "in the not remote future" it is probable that 3 per cent. will be the highest rate of interest that a well-managed office will feel justified in assuming that it will earn in the future, "and it may be confidently hoped that this assumption will result in a fair profit from interest being made for a good many years to come."

III. MARINE.

This has, in '99, been in a worse condition than for several years, owing to many losses from foundering, stranding, and wrecks of ships, and very bad weather in the Atlantic. During recent years very low rates have been charged for insurance, which have been greatly inadequate to the risks involved. Such reduced rates have been largely occasioned by the influx of a great number of small marine insurance companies, who to get business have recklessly issued policies at such remarkably small premiums that they were not remunerative. Many first-class underwriters and insurance brokers condemn this practice as one

that will become ruinous to marine insurance companies, since it has materially increased **over-insurance** of ships. In consequence of the prevalence of **very low premiums** for marine insurance during the last fourteen years the large and old-established underwriting companies have refused to reduce their rates to anything like a level with those of the new companies, and hence the former have done much less business during this period than they previously did. Many foreign agencies have been withdrawn from marine insurance in England during the last two years. For the last ten years, however, marine insurance brokers have become more careful in considering the security of the companies they insure with than formerly, and therefore have increased their policies with leading companies of old standing, so that the latter have considerably regained much of the business they lost owing to smaller and newly established companies of indifferent financial status insuring at lower rates. The result has been that, while the latter companies have effected less insurances, the leading companies have issued more policies. Of eighteen leading marine insurance companies in Great Britain, the oldest are the Royal Exchange and the London Assurance Corporation, both established in 1720; and the Alliance and Indemnity Companies, both founded in 1824. Very heavy claims have recently been paid for losses on all kinds of ships, and the rates for insurance of them have materially increased during the last six years.

The dividends paid upon some marine insurance companies' shares are mainly, and as to others are almost entirely, derived from the investment of capital and reserves. Several of such companies are more financial than insurance concerns. A large amount of marine insurance business is also done by private underwriters connected with Lloyd's. Marine insurances are generally effected through **marine insurance brokers**, who are an important class in London, Liverpool, and Glasgow. Claims are determined by average adjusters in difficult cases. The number of members engaged as underwriters at Lloyd's is about 560, who, with few exceptions, have lodged with the Committee security, either by deposit or approved guarantee, against the marine liabilities which they severally incur at Lloyd's. Several wealthy foreign marine insurance companies having branches in Great Britain do a large portion of business here. To satisfy the requirements of the coasting trade, a few marine insurance clubs have been established, whose operations are governed by the principle of mutuality and co-operation.

About 50 per cent. of the total outgoings of underwriters on hulls is for average claims, and the remainder for total loss claims. According to the law of marine insurance relating to "constructive total loss," which shipowners agree is fair, the estimated market value of a ship, after repair, should be taken as a test of such loss, so that if the estimated cost of repairing a vessel is more than her market value after repair, she is constructively lost. Underwriters, however, demand that a valuation which is admitted to be far beyond the market value when the ship is sound, shall be fixed as the value below which, when the state of her damage may have entirely prejudiced her character in the market, she cannot be made a constructive total loss. Thus if a ship is

offered for insurance at what her owners consider her market value, £15,000, the underwriters, for reasons connected with averages, ask for the ship to be valued at £20,000, and policies are taken out for her insurance accordingly. If the vessel strands in a bad position, and sustains serious damage whereby her repairs are estimated by the surveyors to cost £12,000, and it is also estimated that after she is repaired buyers, thinking that she might have latent structural injury, would not give more than £10,000 for her, underwriters will make not this sum, but £20,000—their own fancy valuation—the test of constructive total loss. It is alleged by some that the losses which Marine Insurance Companies have recently suffered from strandings have been materially increased by the new method in the construction of hulls.

IV. ACCIDENT, AND FIDELITY GUARANTEE.

By far the most important change which has taken place in recent years by legislation between employers and employed has been caused by the **Workmen's Compensation Act**. The provisions of this Act, and the action taken by employers and the insurance companies in regard to it, are fully dealt with in the separate article on **WORKMEN'S COMPENSATION (q.v.)**.

1. Accident, Personal. The business of this branch is done by many companies, including four Life and two Fire Offices, who for certain premiums insure the payment of periodical sums for total and partial temporary disablement, and other fixed amounts on death or on total or partial permanent disablement. In consequence of the non-publication of the premium incomes of these companies for the assurance of personal accidents apart from their other business, such incomes cannot be notified to the public. Most accident insurance companies transact **Employers' Liability Insurance**, as well as nine Life and Fire Offices. Under the present law employers are indemnified against their liability to pay compensation for injuries to their workmen under the **Employers' Liability Act of '80**, and at common law up to the limit of three years' wages. The premiums are calculated on an estimate of the annual wages paid by the employer. Very many accidents which occur during employment are such that no compensation can be recovered against the employer. Joint policies are therefore granted to give the full indemnity under the **Employers' Liability Act** and at common law, as before mentioned, and also grant compensation in all cases of accident during occupation. Many employers extend their insurance by joining with their workpeople under this system, so as to provide for every accident during occupation. The usual benefits under these joint policies to employees are one year's wages in the event of death, and weekly allowances varying from one-third to one-half of the weekly wages, for not exceeding twenty-six weeks, during total disablement. The premiums for these policies are paid in full by the employer, who, by arrangement with the workpeople, deducts from their weekly wages their contributions, which vary from $\frac{1}{4}d.$ to $3d.$ per week, according to occupation. Since the latter part of '05 several important additional benefits have been offered to the public by the **Personal Accident Insurance Companies**. The majority issue what is termed a "Com-

combined Policy," offering a variety of benefits beyond the death and permanent and temporary disablement allowances of the older Accident policies. With these increased benefits, however, additional and necessary restrictions and safeguards have been adopted. As regards premium income from all kinds of accident insurance, that of the Ocean Accident and Guarantee Corporation is by far the highest. At the end of '98 this income was £717,924 9s. 3d., as against £334,102 in '97. The premium income of the Employers' Liability Assurance Corporation for the year ending March 31st, '99, was £334,648 13s. 7d., as against £320,386 for the year preceding; the premium income of the Railway Passengers' Assurance Company was £255,993 4s. for '98, as against £244,948 13s. 10d. for '97; and the premium income of the London Guarantee and Accident Company was £208,665 13s. 8d. for '98, as against £201,762 19s. for '97.

The Tontine Bonus for Non-Claimants is a system devised by the London, Edinburgh & Glasgow Assurance Company. Under this scheme the premiums payable by a policyholder who continues his assurance with the Company, and who makes no claim for compensation, will be considerably reduced after five years over and above the abatement allowed to all policy-holders, and it is possible that they will be eventually extinguished altogether, and the assured will at the same time retain the full benefit of his assurance in the event of subsequent injury.

2. **Fidelity Guarantee.** This class of insurance dates back to '40, and was commenced to supersede the system of private suretyship, against which there are many objections, one of the principal being the necessity for continual inquiry into the financial position of the bondsmen. Companies' guarantees have gained much popularity among employers owing to the liberal manner in which claims are dealt with; and all the Government departments at home and abroad, the law courts, municipal corporations, local boards, etc., accept them in preference to private bonds. Guarantees are issued on behalf of all persons of good character, and very many firms require a guarantee society's security with every new member of their staff, because if it is obtained it is a proof that the employé has satisfactorily passed through the searching inquiries made into his antecedents. Among the principal causes leading to defalcations by employés are drink, women, and betting. So much is this the case, that a man with a clear record as to honesty and character will find it difficult to obtain a guarantee if there is a suspicion of weakness in the matter of sobriety. On the employers' side the leading cause of the defalcations referred to is either the want of a good system of accounts, or, if a good system, negligence in its application. That opportunity makes the thief is the daily experience of guarantee societies, and any deficiency in the before-mentioned method of accounts is most seriously against the interests alike of employers and employed. These companies are not intended to render good accountants unnecessary, but to meet those losses which it is, and apparently always will be, unable to prevent. The rates of premium vary from 5s. to 40s. per cent., and are classified under the different employments. Length of service, position and means are all matters taken into

consideration when fixing the premium to be paid. Any number of officials of an employer may be guaranteed under one policy. Additions and alterations are made by endorsement from time to time. This is a great convenience when there is a large staff. Within the last few years, premiums have been reduced 50 per cent., and the present tariff is drawn up on such moderate lines that the inducement for large firms to form their own guarantee fund is removed. The Guarantee Society, the Provident Clerks' and General Guarantee Association, and the London Guarantee and Accident Company, Ltd., have each paid hundreds of thousands of pounds in claims. The Ocean Accident and Guarantee Corporation, the Employers' Liability Assurance Corporation, the Law Guarantee and Trust Society, the General Accident Assurance Corporation, the Palatine and other companies, have also paid large claims. One of the leading grievances of Fidelity Guarantee Insurance Companies is that they are not allowed more than a mere trifling percentage of the costs they incur for the prosecution of offenders. In addition to these companies, who insure employers generally against loss by their servants' dishonesty, there is a society called the "Bankers' Guarantee Trust Fund," to indemnify against loss by bank employés. The Society is divided into two branches, the British and the Foreign Guarantee Trust. The Bank of England and several of the leading railway companies have a fund contributed by the employés to secure their employers against loss by the dishonesty of the former. There is also a Local Government and a Post Office Fidelity Guarantee Society, to insure the honesty of the Local Government and Post Office employés. At present the only Insurance Company of importance whose premium income and expenses are not known to the public and the insurance world, is the Guarantee Society; and it is a cause of general astonishment that they are not published.

V. MINOR BRANCHES, AND EXTRAORDINARY FORMS OF INSURANCE.

1. **Sickness.** The Sickness, Accident, and Life Association answers a great requirement of the middle classes, and is particularly valuable to professional and business men. It pays weekly sums to those who are wholly or partially disabled from following their vocations on account of illness not resulting from accidents. This company also combines accident with health assurance. The Ocean Accident and Guarantee Corporation, the Northern Accident Insurance Company, the Life and Health Assurance Association, the General Accident Assurance Corporation, the Palatine Insurance Company, and the British and Colonial Insurance Corporation transact this business.

2. **Diseases.** More than twenty companies transact insurance against certain diseases, and make weekly allowances for temporary total disablement by scarlet, typhus or typhoid fevers, or smallpox. These allowances are extended to measles by eleven, and to diphtheria by ten companies.

3. The coupon system of insurance entitles persons who possess copies of specified newspapers, railway guides, etc., containing accident coupons, to the payment of certain sums for injuries mentioned therein; while some of these on other coupons promise to pay the next-of-kin or legal representatives of the

holders who suffer death from certain accidents—which are generally those that happen in railway trains—within specified times, fixed sums, which vary very much according to chances of death from such occurrences. By far the greater part of this insurance is transacted by the Ocean Accident and Guarantee Corporation. It is also transacted by the General Accident Assurance Corporation, the Law Accident Insurance Society, the Sickness and Accident Assurance Company, the Northern Accident Insurance Company, the Fine Arts Insurance Company, and the British and Colonial Insurance Corporation.

4. Medical Attendance during Sickness is insured by the Globe Accident Insurance Company and the National Medical Aid Company and several industrial assurance companies.

5. Burglary and Housebreaking. The companies which take risks against these felonies are the National Burglary Insurance Corporation, the Goldsmiths and General Burglary Insurance Association, the Norwich and London Accident Insurance Association, the Security Company, the Accident Insurance Company, the Ocean Accident and Guarantee Corporation, the Law Accident Insurance Society, the General Accident Assurance Corporation, the Fine Art and General Insurance Company, the Credit Assurance and Guarantee Corporation, the Northern Accident Insurance Company, the Patriotic Assurance Company, and the Manchester Assurance Company. Some of these companies also insure against larceny or theft in houses. The risk of murder by burglars or housebreakers is now covered by the Goldsmiths and General Burglary Insurance Association by payment of a small additional premium to that of the burglary and housebreaking risk.

6. Transit Risks. The Northern Accident Insurance Company, the Fine Art and General Insurance Company, and the Law Accident Insurance Society, insure against loss of property in transit.

7. Horses and Cattle and Insurance against Death by Accident and Disease is undertaken by the Horse, Carriage, and General Insurance Company, the Imperial Live Stock Insurance Corporation, the Vehicular Insurance Company, and the Lancashire and Yorkshire Accident Insurance Company.

8. Third Party Risks are taken by the Vehicular Insurance Company, the Northern Accident Insurance Company, the Ocean Accident and Guarantee Corporation, the British and Colonial Insurance Corporation, the Life and Health Assurance Association, the Fine Art and General Insurance Company, the Horse and Carriage and General Insurance Company, the Law Accident Insurance Society, the Sickness and Accident Assurance Association (outside London), the Patriotic Assurance Company, the Lancashire and Yorkshire Accident Insurance Company, the General Accident Assurance Corporation, the Globe Accident Insurance Company, the Norwich and London Accident Insurance Association, the Vulcan Boiler and General Insurance Company, and the London Guarantee and Accident Company.

9. Vehicular Risks are taken by nearly all the last-named companies, as well as the General Accident Insurance Corporation, the Scottish Employers' Liability and General Insurance Company, and the British and Colonial Insurance Corporation.

10. Hailstorm Insurance is transacted by the Norwich and London Accident Insurance Association, and the Nurserymen's and Market Gardeners'.

11. Engines and Boilers. Inspection and insurance of steam, gas, and oil engines, and advice on all matters relating thereto, is undertaken by the Vulcan Boiler and General Insurance Company, the National Boiler and General Insurance Company, and by the Engine, Boiler, and Employers' Liability Insurance Company.

12. Plate-glass Insurance was first commenced in '52 by the Plate-glass Insurance Company. Many companies transact this business. The method generally followed in plate-glass insurance is to undertake to make good all breakages, the companies being entitled, by way of salvage, to the broken glass. The insurance is often undertaken by contract in private dwellings.

13. Mortgages, Debentures, and other Securities. The insurance of the holders of these valuables against loss of principal and interest, and other business of a kindred character, is effected by the Law Guarantee and Trust Society, the Liverpool Mortgage Insurance Company, the Ocean Accident and Guarantee Corporation, the Trustees, Executors, and Securities Insurance Corporation, and the Credit Assurance and Guarantee Corporation.

14. Trusteeship and Executorship. In consideration of certain premiums, the Law Guarantee and Trust Society, the Ocean Accident and Guarantee Corporation, the Trustees, Executors, and Securities Insurance Corporation, and the Liverpool Mortgage Insurance Company, arrange to act as trustees or executors. Trusteeship by insurance companies has recently made considerable progress, not only under wills and marriage settlements, but for debenture holders.

15. Pictures and other Valuable Objects of Art. The owners of these are indemnified against loss from damage or destruction of such, by the Fine Art and General Insurance Company.

16. Licence Insurance. The Licences Insurance Corporation and the Law Guarantee and Trust Society insure licence-holders and other interested persons against loss or deprivation in the value of property incurred by the forfeiture or non-renewal of licences.

17. Loss or Damage of Passengers' and Mariners' Luggage at Sea. The Marine and General Mutual Life Assurance Society, the General Accident Assurance Corporation, and the Lancashire and Yorkshire Accident Insurance Company undertake these risks.

18. Sinking Funds or Capital Redemption in connection with Leasehold Property. Several life offices and the Ocean Accident and Guarantee Corporation issue policies for this purpose.

19. Special Indemnities or Contingency Policies are issued in almost any cases, when they are required, by several life offices, as well as by the Ocean Accident and Guarantee Corporation, the Law Guarantee and Trust Society, the Law Accident Insurance Society, the Fine Arts and General Insurance Company, and the General Accident Assurance Corporation. Most ordinary life assurance companies insure against issue of marriages, and on the other hand against a person dying without issue, when those events are improbable. Insurances are sometimes effected with ordinary life offices

against such contingencies as a change of name, armorial bearings or religion, loss or recovery of reason, etc. The Law Guarantee and Trust Society, beyond granting policies for these objects, have done so with regard to defects in title to landed or other property: lost documents, missing beneficiaries, avoidance of voluntary settlement, and payment of annuities. Some of these risks are also insured by the Ocean Accident and Guarantee Corporation.

20. Performance of Contracts. The London Guarantee and Accident Company, the Fine Art and General Insurance Company, and the Credit Assurance and Guarantee Corporation insure the performance of contracts.

21. Cycle Insurance of different kinds is undertaken by many companies. The General Accident Assurance Corporation appear to be the only company who insure cycles against loss by burglary or theft.

22. Credit Insurance. The Credit Assurance and Guarantee Corporation issue policies (a) to secure the fullest credit for solvent and responsible traders of good character, and likely to be successful in their business; (b) to enable business men to obtain additional capital through their bankers or otherwise; (c) to guarantee trade bills and other ordinary commercial transactions between traders and others.

23. Excess Bad Debt Insurance. Policies are issued by the Ocean Accident and Guarantee Corporation for covering merchants and others against bad debts of short duration.

24. Motor-Car Indemnity and Horseless Carriage Insurance is carried on by the General Accident Assurance Corporation, the Ocean Accident and Guarantee Corporation, and other companies.

25. Chemists and Druggists' Indemnity Insurance is undertaken by the Northern Accident Insurance Company, the Ocean Accident and Guarantee Corporation, the Scottish Employers' Liability and General Insurance Company, and the General Accident Assurance Corporation, for risks connected with the dispensing and sale of drugs by chemists and druggists in their business.

26. Lifts, Hoists, and Cranes. Several of the leading accident companies, and about five Life Offices, assure the owners or tenants of passenger and other lifts against liability for damages for personal injuries to individuals from accidents by or in connection with such lifts.

27. Landlords' and Factors' Indemnity Insurance. Policies are issued for these risks by the Northern Accident Insurance Company and the Ocean Accident and Guarantee Corporation to indemnify such persons for compensation which they may be compelled to pay in respect of those personal accidents the policy covers.

28. Steam Pipes. Inspection and insurance of steam pipes in connection with engines and boilers is undertaken by the Vulcan Boiler and General Insurance Company, the National Boiler and General Insurance Company, and the Engine, Boiler, and Employers' Liability Insurance Company.

29. Electrical Plant. Inspection and insurance of engines, dynamos, motors, and other electrical apparatus is undertaken by these three last-named companies.

30. Registered Post Insurance is transacted by the Law Accident Insurance Society on bonds,

notes, and other valuable articles sent by registered post.

Insurance Law. See LAW, '99.

International Arbitration. See PEACE CONFERENCE.

International Arbitration League, formerly known as the Workmen's Peace Association, was originally established during the Franco-German war of 1870 to promote a policy of peace and international arbitration. For many years the League has carried on an active peace propaganda, both in Great Britain, on the Continent, and in America. It initiated the memorial from 234 members of the British House of Commons to the President and Congress of the United States in favour of a permanent treaty of arbitration between the two nations, organised the deputation of M.P.s to Washington, also initiated and organised the inter-parliamentary conferences of Members of Parliaments in favour of international arbitration which have been held during the last ten years at Paris, London, Rome, Berne, The Hague, Brussels, Budapest, and Christiania. It has 106 members of various Parliaments as Vice-Presidents. **President**, Thomas Burt, M.P.; **Treasurer**, Howard Evans; **Secretary**, W. Randal Cremer, ex-M.P. **Offices**, 11, Lincoln's Inn Fields, London. **Occasional Organ**, *The Arbitrator*. See also PEACE CONFERENCE, PEACE SOCIETY.

INTERNATIONAL COPYRIGHT.

Artists and authors have long desired to obtain an international law of copyright, by which works of literature and art might be protected, not only in the countries where they were first published, but in all civilised countries. A conference upon international copyright was held at Berne in Sept. 1885, and attended by representatives of the following states: Germany, Spain, France, Great Britain, Hayti, Honduras, Italy, the Netherlands, Sweden and Norway, Switzerland, and Tunis. At this conference there was settled the draft of a convention for securing to the authors of literary or artistic works published in any one of the countries represented copyright in all the others. This convention was signed on Sept. 9th, '86. Such copyright is not to be more than the author enjoys in his own state, nor more than the state granting it secures to its own subjects. The provisions of the convention extend to dramatic and dramatico-musical works. They extend to all works which at the date of the convention have not become public property. They forbid the publication of a translation not sanctioned by the author of the original work. But if within a certain time there appears no authorised translation, an unauthorised one may be published. Articles which have appeared in newspapers or periodicals may be reproduced, unless such reproductions have been expressly forbidden by the original authors or publishers, and no prohibition by them can have effect in the case of articles discussing politics, current topics or news of the day. A work is not to be indirectly appropriated by a reproduction which, in spite of superficial changes, is essentially the same as its original. The convention establishes an Office of the International Union for the Protection of Literary and Artistic Works, which is to be under the surveillance of the Swiss Government, and is to be supported by contri-

butions from all the contracting parties. Any State, not a party, which is willing to adopt the provisions of the convention, may give in its adherence, whilst any State which is a party to the convention, and wishes to withdraw, must give a year's notice of its intention. The convention is to take effect within three months from the adoption of the draft. **Conferences for its revision** are to be held successively in each of the countries by which it has been adopted. It does not annul or preclude any conventions already existing or hereafter to be made between any two or more of the contracting parties, provided that such special conventions secure at least as ample a protection to authors as it does, and do not otherwise conflict with its provisions. In this country **Acts of Parliament** have been passed in '44, '52, '75 and '86, with the object of securing copyright to authors and artists who are subjects of foreign states which secure copyright to British artists and authors. These Acts empower Her Majesty by Order in Council to grant copyright to the artists and authors of such countries, and Her Majesty has a large discretion in fixing the conditions with which they must comply. The existence of the copyright of the **foreign author** in his own country may be proved by a certificate under the official seal of a Minister of State in that country or of a British diplomatic or consular officer acting there. Copies of works made in any foreign country other than that in which the protected work was first published and made without the consent of the proprietor of the copyright may not be imported into this country. An **Order in Council** issued under these Acts applies to works produced before the date of the Order, but not so as to prejudice any person who has lawfully produced any work in the United Kingdom. It shall be taken to apply to every British possession, saving only those which are expressly excepted. The Act of '86 contains several modifications of previous statutes intended to harmonise with the provisions of the convention of Berne above noticed. Conventions for the mutual protection of copyright have been made between the United Kingdom and several foreign States.

In the **United States of America**, after much amendment, a bill was passed in March '91, to take effect from July, giving to foreign authors a copyright in their works under certain conditions. Most of these are simple, consisting of the payment of small fees in certain places, but one is the famous "chromo-amendment," which in free-traders' ideas detracted largely from the merits of the Act. Under this clause the foreign copyright-owner can have his rights in the United States, if he deposit with the Librarian of Congress, firstly, a printed copy of the title of his book or musical composition, or a printed description of his painting, statue, lithograph, etc.; and secondly, two copies of such book, or a reproduction of such work of art from type set or from negatives or drawings on stone made within the United States. Musical compositions are exempted from the second condition; and Mr. Hay, American Secretary of State, in a letter to Mr. Alfred Austin in May '99, said that recent legal decisions had laid it down that all rights in paintings, etchings, drawings, sculpture, and architectural plans could be reserved by simple registry at a nominal fee. The well-known British author largely benefits by the

Act in spite of the amendment; but the fact that every number of a magazine is to be considered a separate book, and copyrighted accordingly, is awkward for those authors who produce their work serially. Many British publishers, however, have found it to their advantage to establish branch offices in the States. The Act is of chief benefit to American authors themselves, for it has freed them from competition with pirated reprints of popular English novelists.

In Canada the copyright question has caused trouble for over fifty years. Canada, with the other British colonies, came under the provisions of the Berne Convention and the International Copyright Act of '86, and was thus prevented from reproducing copyright works of Great Britain and other countries in the Union without the authority of the author. The United States, on the contrary, was able to flood the market, not only in America but also in Canada, with cheap reprints of English publications. Thereupon Canada passed a Copyright Act in '89, one provision of which was that, if an author had not obtained copyright in Canada, his book might be published under a licence or licenses, he receiving a 10-per-cent. royalty as the price of each licence. This would have compelled Canada to withdraw from the Copyright Union, which she was quite willing to do; but the Act never received the sanction of the Imperial Government. Mr. Hall Caine visited Canada in the autumn of '95, and it was reported that he had obtained important concessions from the Government as the result of his representations on behalf of the Society of Authors. He spoke strongly in favour of a system of licensed publishing under authors' control, and drew up an amended Act, to which he obtained the signatures of the publishing and printing and other interested classes in Canada, and the Canadian Copyright Association. This Act, known in official circles as the "H. C. Compromise," was made the basis of certain recommendations offered by the Colonial Office to the Canadian Government as a possible means of settling the dispute between Canada and the mother country, and it is understood that a new Act will be introduced into the Canadian Parliament embodying as many as may be of the new clauses agreed upon in the Compromise.

International Law, Institute of. This Institution was founded in '73, Dr. Lieber, a distinguished American, M. Moynier of Geneva, and M. Rolin-Jacquemyns, the well-known Belgian advocate, being its chief promoters. The first meeting was at Geneva in '74, and since then the Institute has assembled annually at various places on the Continent and in England. The idea of the founders was that since the rules which govern the intercourse of states are established out of respect for the public opinion of the civilised world, and since this public opinion in turn is mainly derived from the leading international jurists of Europe, the incorporation of those jurists into a society whose resolutions should form a *corpus juris gentium*, could not but facilitate the development of the reign of law and justice among nations. The maximum number of its members is 60, and of its associates 60, and no nation can possess more than a fifth of the whole number. The English members are Professors Westlake, Holland, Leech, and Dicey, Sir Robert Hart, Lord Reay, Mr. T. Barclay, and

Sir D. Mackenzie Wallace; and the English associates are Mr. E. J. Lawrence, Sir Sherston Baker, Sir John Scott, Mr. J. A. Foote, and Professor Goudy. **Secretary, M. Lehr.**

IRELAND.

The head of the executive in Ireland is the Viceroy or Lord-Lieutenant, who is assisted by a Chief Secretary, the Lord Chancellor of Ireland, the Attorney-General for Ireland, the permanent officials, and a Privy Council (which is a separate and distinct body from the Privy Council of Great Britain); but the government of the country is in all essential points carried on under the direction of or in concert with the Ministry of the day in London. The Lord-Lieutenant is charged with the maintenance of peace and order; the Irish Constabulary are under his control, and he may, if he think it to be necessary, direct the Commander of the Forces to send troops to their aid. He has power to commute sentences and pardon criminals. There are, however, more agreeable and less anxious functions attaching to the office; for, as representing Her Majesty, the Viceroy, assisted by his wife, holds courts, drawing-rooms, levées, and maintains in Dublin an establishment of a semi-regal character. On occasions he confers the honour of civil knighthood. During his absence the duties of chief governorship are performed by three or more Lords Justices, those who act in this capacity being usually the Lord Chancellor of Ireland, the Commander of the Forces, and some of the judges. The Chief Secretary to the Lord-Lieutenant, or Chief Secretary for Ireland as he is usually called, has been described as prime minister to the Viceroy; and although he is in theory subordinate to the Home Office, he has his own establishment at the Irish Office in London, as well as in Dublin, and is directly responsible to the House of Commons for the acts of the Irish administration. He is assisted by a Permanent Under-Secretary, salary £2000, and other officials. There is a separate Local Government Board for Ireland; a Board of Works, which is the great financial agent of the Government in Ireland; a Board of National Education, by which the grant made by Parliament for public education is administered; the inspection of Irish fisheries is kept separate from the supervision of those of England or Scotland; and there is a veterinary department in Dublin for dealing with cattle diseases, etc. The Local Government (Ireland) Act '98 assimilated the local government of the country in a large measure to the system set up in Great Britain, and full details will be found of the new bodies and their powers in the article on LOCAL GOVERNMENT (*q.v.*) The first elections under the Act, held in April '99, resulted in the elective seats being distributed between the Nationalists and the Unionists in the proportion, roughly, of 4 to 1. Following on the report made in '96 of the Royal Commission on the Financial Relations of Great Britain and Ireland, the Government in '98 appointed another Commission "to inquire into and report (1) how much of the total expenditure for which the State provides may properly be considered to be expenditure common to England, Scotland, and Ireland, and what share of such common expenditure each country is contributing, after the amount expended on local services has been deducted from its true revenue. (2) How the expenditure on Irish

local services, for which the State wholly or in part provides, compares with the corresponding expenditure in England and in Scotland, and whether such Irish expenditure may with advantage be readjusted or reduced. (3) Whether, when regard is had to the nature of the taxes now in force, to existing exemptions, and to the amount of expenditure by the State on local services, the provision in the Act of Union between Great Britain and Ireland, with regard to 'particular exemptions or abatements,' calls for any modification in the financial system of the United Kingdom."

For details of the Home Rule Bill see sects. 79-101 of SESSION in ed. '94; for the Land Law Act, '56, see eds. '97 and '98; for the report of the Royal Commission on the Financial Relations between Great Britain and Ireland appointed in '94 see '99 and previous eds.; for details as to the Royal Irish Constabulary and the Dublin Police see POLICE OF THE UNITED KINGDOM; and for the report of the Irish Land Commission appointed in '97 see '99 ed. As to Catholic University Education, see SESSION, sect. 19; as to Distress, see SESSION, sect. 20; as to Land Acts, see SESSION, sect. 21; and as to Legislative Independence, see SESSION, sect. 22. Irish Language, Society for the Preservation of the. This Society, founded in 1877, has gradually succeeded in establishing the teaching of Irish in popular schools and colleges in Ireland. When it began its work, the native language was taught perfunctorily to a few Divinity students in Trinity College, Dublin, and with more zeal in the Catholic College of St. Jarlath, Tuam, in the Irish-speaking west. There was also an Irish class in Maynooth College; but Irish was ignored in the National Schools. Now, mainly through the exertions of this Society, there is a Chair of Irish established in the Royal University of Ireland, Professorships of Irish in Cork College and Galway College, likewise in the Catholic Training College (for teachers), Drumcondra, etc.; and Irish is on the programmes of the Royal University, of the National Board, and of the Commissioners of Intermediate Education. In '81 but 12 pupils "passed" in the Irish examinations in National Schools; in '98 the "passes" were over 1000; 240 teachers

have obtained certificates of competency to teach Irish under the Board; Irish-speaking Inspectors are sent to the schools; and Irish can be used as a medium for instruction in Irish-speaking districts. This bilingual system has greatly increased the efficiency of the teaching in these schools. The Society has also procured the payment of results' fees for Irish to teachers in National and Intermediate Schools. Besides its voluminous annual reports, the Society has issued three elementary works (the First, Second, and Third Irish Books), four Irish Romances (text, translation, and glossaries), a book of "Irish Music and Song," etc., and new text-books are in course of preparation. About 150,000 of the Society's publications have been sold in Ireland, and an incalculable number in the United States, where they have been republished. The Society is constantly in touch with the teachers, boards of education, scholars, and sympathisers with its work in Ireland and abroad. The Council meets weekly. **President**, the Right Hon. the O'Connor Don, P.C., D.L.; **Treasurers**, Rev. M. H. Close, M.A., V.P., M.R.I.A., and G. N. Count Plunkett, V.P., M.R.I.A.; **Secretary**, J. J. MacSweeney, R.I.A. **Offices**, 6, Molesworth Street, Dublin.

Irish Literary Society, The London, comprises nearly four hundred and fifty members, and was founded in 1892 (1) to afford a centre of social and literary intercourse for persons of Irish nationality, and (2) to promote the study of the Irish language, Irish history, literature, music and art. An excellent library of Irish books and a number of Irish periodicals are provided, and lectures on Irish subjects, as well as social entertainments, are given during each session. The membership of the Society is open to Irishmen and Irishwomen, irrespective of religious or political creed; but persons of any nationality who, in the opinion of the Committee, possess special qualifications for belonging to the Society may be admitted as associates. The subscription is for ordinary members, £1 1s.; for country members, 12s. 6d.; life members, £10 10s.; **President**, Rev. Stopford Brooke, M.A.; **Hon. Sec.**, Alfred Perceval Graves, M.A.; **Chairman of Committee**, R. Barry O'Brien; **Hon. Treasurer**, the Hon. Charles Russell; **Assistant Sec.**, Miss M. MacMahon. **Office**: 8, Adelphi Terrace, Strand, W.C.
